### Gandhi Marg

In the early 1920s, Jaydayal Goyandka and Hanuman Prasad Poddar, two Marwari business-men-turned-spiritualists, set up the Gita Press and Kalyan magazine. As of early 2014, Gita Press had sold close to 72 million copies of the Gita, 70 million copies of Tulsidas's works and 19 million copies of scriptures like the Puranas and Upanishads. And while most other journals of the period, whether religious, literary or political, survive only in press archives, Kalyan now has a circulation of over 200,000, and its English counterpart, Kalyana-Kalpataru, of over 100,000. Gita Press created an empire that spoke in a militant Hindu nationalist voice and imagined a quantifiable, reward-based piety. Almost every notable leader and prominent voice, including Mahatma Gandhi, was roped in to speak for the cause. Cow slaughter, Hindi as national language and the rejection of Hindustani, the Hindu Code Bill, the creation of Pakistan, India's secular Constitution: Kalyan and Kalyana-Kalpataru were the spokespersons of the Hindu position on these and other matters. Featuring an extraordinary cast of characters - buccaneering entrepreneurs and hustling editors, nationalist ideologues and religious fanatics - this is essential (and exciting) reading for our times.

### Gita Press and the Making of Hindu India

Bhagawan Sri Sathya Sai Baba has repeatedly emphasised that Namasmara is the best exercise to reinforce Prema (supreme love) towards God. Bhagawan Baba explains further, "When the Name of the Lord is remembered with all the glory that is associated with it, a great flood of Ananda (Bliss) wells up in the mind. It is so easy in this Kali age to win the grace of the Lord." Bhagawan has dwelt at length on Namasmara and Nama Sankirtan as a spiritual Sadhana for the devotees, in His various discourses, right from the early years of His Avatarhood. Nama Mahima is a compilation of Swami's message to the devotees, dedicated at the Lotus Feet of Bhagawan Sri Sathya Sai Baba.

Theme: Pharma Patents and Access to Life Saving Medicines during a Viral Epidemic (First Edition was Published as Road Humps and Sidewalks) Inspired from real life experiences, this novel tells the story of Arjun, a young, blind lawyer who battles to save lives during a viral epidemic. It is a realistic modern day drama about defenseless victims and fatal diseases exploited for commercial gain taken directly from the pages of the daily news. As a deadly viral infection rages across the country, a spirited team of doctors set out to combat its spread. But their efforts are thwarted by a pharma major, Berminger, which

uses its patents to create artificial scarcity of the only drug that seems to work. As the Government refuses to come to their rescue, the doctors approach the Court for justice. Arjun, an upcoming lawyer agrees to represent them, and what follows is a thrilling, riveting and evocative Courtroom drama. Select Reviews "A blind lawyer, a virus outbreak, a dog that dreams and a patent infringement case. Dr. Kalyan Kankanala's debut fiction ... is an engrossing fast-paced legal thriller" - Deepa Padmanabhan, The Hindu "Finished it in one sitting. Just couldn't put it down. This ... IP law thriller has all the hallmarks of a winner; corporate espionage, attempted kidnapping, foiled hits, court room romance, a corrupt Chief Justice and a David v Goliath battle over patents for a life-saving drug." - Dr. Caroline Ncube, IP KAT About Arjun Mamidi Arjun Mamidi is a young IP attorney with a small law practice. Unlike many of his peers, he is honest, forthcoming and fiercely independent. His escapades with powerful adversaries, crafty attorneys and ruthless criminals constitute The IP law thriller series. Arjun is blind, but he neither acknowledges it, nor lets it hold him back. He is assisted by Jose, a capable, reliable and lighthearted ally. #### Ashtavakra Geeta

Guru Charitra is one of the most revered scriptural texts of Hinduism. Containing the biographies of Lord Dattatreya, (Lord Brahma, Vishnu and Mahesh) and his subsequent incarnations Sripada Sri Vallabha and Sri Narasimha Saraswati, it clarifies several doubts on religious dogmas, rituals and doctrines through a conversation between the master and his disciple. This book, steeped in lofty Hindu philosophical ideas also portrays a picture of the social and economic condition of the medieval times in India, and the message conveyed by the numerous teachings of the Guru needs to be understood in the context of those days. Reading of this interactive account, written in simple and lucid language will give strength and encouragement to spiritual aspirants to continue with their sadhana (spiritual pursuit), enable them to overcome the various problems of modern day living and fulfil their inherent wishes.

#### India's Glorious Scientific Tradition

The Lal Kitab, a rare book in urdu, was popular in north-west India, Pakistan, Iran and many other countries. This English version has added new dimensions to make it more lucid and easier to understand.

This monograph mainly covers our studies on the causes and management of the most common and disabling disorders of stress and strain of life. It is now well established that the brain with its known centres for sensory, intellectual and emotional functions plays the main role in maintaining a balanced condition of our body and mind by liberating required amount of neurohumors and hormones. Any disturbance of this homeostasis by genetic or environmental factors would ultimately lead to the development of the Stress Disorders. At first the changes are functional and later on bodily changes of Stress Disorders appear. In the treatment, during the acute stage, the use of tranquillizers and other drugs may help. However, if the disturbance persists, the practice of Yoga would help greatly to get over the neuro-humoral changes occurring in the brain. Hence the integrated practice of Yoga has an important role to play in the prevention and treatment of Stress Diseases. All these aspects have been dealt with in the book in sufficient detail with regard to each of the disorders of stress for the benefit of all concerned.

#### Lal Kitab - a Rare Book on Astrology

This book offers a translation of the seven thousand verses of the second book of the medieval Hindu text, the Ganesa Purana, one of two Puranas dedicated to the important elephant-headed god. In this book the reader is given many narratives about Ganesha's ascent to earth in order to kill demonic figures who threaten to overthrow the correct world order. In addition, these narratives contain myths about Ganesha's birth and family as well as some extended and quite humorous myths about ideal devotees of the god. The translation is preceded by a long introduction offering a geographical and historical context for the Ganesa Purana. Following the translation are very extensive notes which bring our points of philological interest, but focus mainly on the literary structure of the text and the methods used to present the many myths and narratives in a coherent and fully integrated manner.

The disturbing connection between well-meaning physicians and the prescription drug epidemic. Three out of four people addicted to heroin probably started on a prescription opioid, according to the director

of the Centers for Disease Control and Prevention. In the United States alone, 16,000 people die each year as a result of prescription opioid overdose. But perhaps the most frightening aspect of the prescription drug epidemic is that it's built on well-meaning doctors treating patients with real problems. In *Drug Dealer, MD*, Dr. Anna Lembke uncovers the unseen forces driving opioid addiction nationwide. Combining case studies from her own practice with vital statistics drawn from public policy, cultural anthropology, and neuroscience, she explores the complex relationship between doctors and patients, the science of addiction, and the barriers to successfully addressing drug dependence and addiction. Even when addiction is recognized by doctors and their patients, she argues, many doctors don't know how to treat it, connections to treatment are lacking, and insurance companies won't pay for rehab. Full of extensive interviews—with health care providers, pharmacists, social workers, hospital administrators, insurance company executives, journalists, economists, advocates, and patients and their families—*Drug Dealer, MD*, is for anyone whose life has been touched in some way by addiction to prescription drugs. Dr. Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction: cultural narratives that promote pills as quick fixes, pharmaceutical corporations in cahoots with organized medicine, and a new medical bureaucracy focused on the bottom line that favors pills, procedures, and patient satisfaction over wellness. Dr. Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system, the solution for which lies in rethinking how health care is delivered.

### Stress and Its Management by Yoga

Gandhi used his time in prison corresponding with followers. One asked about the ethical questions in the Bhagavad Gita, and Gandhi replied to this, and to other questions. Finally, he put together his comments and analysis of the lessons that Krishna was sharing with Arjuna in a little book, his most concise expression of this Hindu holy book as he understood it. After his autobiography, this may be the closest record of Gandhi's spiritual understanding. A sample chapter is available at [www.bandannabooks.com/free/gandhisample.zip](http://www.bandannabooks.com/free/gandhisample.zip). For a different view on the Indian subcontinent, you might like Ghazals of Ghalib, a 19th-century poet who wrote in Persian and Urdu. His ghazals are witty, self-revealing, thoughtful. He lived through the Sepoy Mutiny and the British Raj, asking Queen Victoria to support poetry as the rajahs had done, by direct donation.

### GaGe[apur Ga

"An in-depth, well-researched, and thoughtful exploration of the 'fat boom' in America." —The Boston Globe  
Low carb, high protein, raw foods . . . despite our seemingly endless obsession with fad diets, the startling truth is that six out of ten Americans are overweight or obese. In *Fat Land*, award-winning nutrition and health journalist Greg Critser examines the facts and societal factors behind the sensational headlines, taking on everything from supersize to Super Mario, high-fructose corn syrup to the high costs of physical education. With a sharp eye and even sharper tongue, Critser examines why pediatricians are now treating conditions rarely seen in children before; why type 2 diabetes is on the rise; the personal struggles of those with weight problems—especially among the poor—and how agribusiness has altered our waistlines. Praised by the New York Times as "absorbing" and by Newsday as "riveting," this disarmingly funny, yet truly alarming, exposé stands as an important examination of one of the most pressing medical and social issues in the United States. "One scary book and a good companion to Eric Schlosser's *Fast Food Nation*." —Seattle Post-Intelligencer

Why do our bodies rebel against themselves? Why are autoimmune disorders on the rise? What role do everyday environmental toxins play in triggering onset of these diseases? The author answers these questions with personal stories and sound scientific research and offers ways to combat the problem.

### Gandhi on the Gita

Over the past 50 years, rates of chronic illness, learning disabilities, and allergies in children have exploded--1 in 6 children has a diagnosed learning disorder, 1 in 50 has autism, and 1 in 13 has severe food allergies. Instead of blaming genetics or increased awareness and diagnosis, author Thomas Cowan, MD, attributes these rising numbers to our current vaccination policy. In *Vaccines, Auto-Immunity, and the Assault on Childhood*, Cowan combines his years of experience as a medical practitioner with his research into the history and science of vaccines to show how childhood illnesses, which help children to develop a robust immune system, are now eschewed by conventional medicine in

favor of an increasing array of vaccinations that do more harm than good. Invoking philosopher Rudolph Steiner's vision of vaccines as inspired by "spirits of darkness," Cowan brings to light the various ways in which scientists and government officials work to promote a vaccine program that only increases suffering. Along the way he questions commonly held views of cell biology, the role of water in the body, and the spatial and spiritual components of autism. Additionally, he provides hope of recovery in the form of a nontoxic course of treatment for those suffering chronic inflammation and other adverse immune responses to vaccines. Cowan's thoughtfully bold writing takes us on a journey into the history of illness, questioning the true origins of diseases such as polio, and asking important questions, such as: why did paralytic polio make a sudden appearance in the US in the years between 1916-1918? The answers lie far beyond what conventional medicine would have us believe. *Vaccines, Auto-Immunity, and the Assault on Childhood* asks that we re-examine not only our modern health system but our relationship with the spiritual world. Only then will we find true health.

#### Fat Land

A leading voice in public health policy and top environmental medicine scientist reveals the alarming truth about how hormone-disrupting chemicals are affecting our daily lives--and what we can do to protect ourselves and fight back. Lurking in our homes, hiding in our offices, and polluting the air we breathe is something sinister. Something we've turned a blind eye to for far too long. Dr. Leonardo Trasande, a pediatrician, professor, and world-renowned researcher, tells the story of how our everyday surroundings are making us sicker, fatter, and poorer. Dr. Trasande exposes the chemicals that disrupt our hormonal systems and damage our health in irreparable ways. He shows us where these chemicals hide--in our homes, our schools, at work, in our food, and countless other places we can't control--as well as the workings of policy that protects the continued use of these chemicals in our lives. Drawing on extensive research and expertise, he outlines dramatic studies and emerging evidence about the rapid increases in neurodevelopmental, metabolic, reproductive, and immunological diseases directly related to the hundreds of thousands of chemicals that we are exposed to every day. Unfortunately, nowhere is safe. But, thanks to Dr. Trasande's work on the topic, and his commitment to effecting change, this book can help. Through a blend of narrative, scientific detective work, and concrete information about the connections between chemicals and disease, he shows us what we can do to protect ourselves and our families in the short-term, and how we can help bring the change we deserve.

Enter the trenches of the bloodiest battles you've never heard of: the Vaccine Wars. Professor Christopher A Shaw discovered, after a deep-dive literature search on aluminum impacts on humans and animals, that aluminum hydroxide, an adjuvant in the anthrax vaccine, had a significantly negative impact on motor functions and reflexes of patients in the literature. After that finding, he did what scientists are supposed to do and kept following the leads. However, organizations like WHO dismissed him immediately. Those powerful organizations either knew what he knew, that aluminum vaccine adjuvants were harmful, or they simply didn't care. In either case, two possible reasons for the lack of response became clear to Shaw and his colleagues: dogma and money. The first had served to convince most of the world's medical professionals that Shaw had to be wrong because, after all, "the science was settled." And, behind much of this was the naked fact of how much money vaccines brought in to cover the pharmaceutical industry's profit margin. The combination of those two have the finger prints of various Big Pharma companies smudged all over the question of vaccine safety, which included the demonization of both scientists and lay scholars who raised even the tamest questions about safety and the push for vaccine mandates around the world. After these events, Shaw decided

to dig deeper. *Dispatches from the Vaccine Wars* is a comprehensive look at the origin of vaccination and the oversight of vaccines by various regulatory bodies in the United States and in Canada. The book provides not only the official view on vaccines safety and efficacy, but also provides a critical analysis on which such views are based. Aluminum and other compounds that may contribute to autism spectrum disorder are discussed at length. Professor Shaw also analyzes the corporate influences driving vaccine uptake worldwide and provides an in depth look at the push for mandatory vaccination. *Dispatches from the Vaccine Wars* evaluates the extent to which vaccinology has become a cult religion driving attempts to suppress divergent scientific opinions. Finally, the book delves into the COVID-19 pandemic and what it means for the future of us all.

*Culture, Health and Illness* is an introduction to the role of cultural and social factors in health and disease, showing how an understanding of these factors can improve medical care and health education. The book demonstrates how different cultural, social or ethnic groups explain the causes of ill health, the types of treatment they believe in, and to whom they would turn if they were ill. It discusses the relationship of these beliefs and practices to the instance of certain diseases, both physical and psychological. This new edition has been extended and modernised with new material added to every chapter. In addition, there is a new chapter on 'new research methods in medical anthropology', and the book is now illustrated where appropriate. Anyone intending to follow a career in medicine, allied health, nursing or counselling will benefit from reading this book at an early stage in their career.
