A Mind-Bending Vortex of Terror! Deep in the desert, ...

Full Movie (with subtitles)

An unidentified voice reflects on the concept of time, spanning past, present, and future, while unusual events unfold on Earth.

Family encounters strange events and seeks help from authorities in a mysterious occurrence.

Unexplained events unfold in a lively house leading to sightings of a UFO and broken mirror.

Family encounters strange events and UFO sightings during a power outage in the desert.

An unexpected event disrupts a family's plans, leading to confusion and fear as they try to figure out the situation.

Mysterious events unfold as a family experiences a space-time anomaly at their home.

Strange events unfold as a family encounters alien creatures and experiences a new way of living in an unknown location.

Science Fiction Theology

Explores the sublime in Christian theology and science fiction.

Theology and Science Fiction

What is the difference between a god and a powerful alien? Can an android have a soul, or be considered a person with rights? Can we imagine biblical stories being retold in the distant future on planets far from Earth? Whether your interest is in Christianity in the future, or the Jedi in the present--and whether your interest in the Jedi is focused on real-world adherents or the fictional religion depicted on the silver screen--this book will help you explore the intersection between theology and science fiction across a range of authors and stories, topics and questions. Throughout this volume, James McGrath probes how science fiction explores theological themes, and vice versa, making the case (in conversation with some of your favorite stories, TV shows, and movies) that the answers to humanity's biggest questions are best sought by science fiction and theology together as a collaborative effort.

Religion and Science Fiction

Religious themes, concepts, imagery, and terminology have featured prominently in much recent science fiction. In the book you hold in your hands, scholars working in a range of disciplines (such as theology, literature, history, music, and anthropology) offer their perspectives on a variety of points at which religion and science fiction intersect. From Frankenstein, by way of Christian apocalyptic, to Star Wars, Star Trek, Battlestar Galactica, and much more, and from the United States to China and back again, the authors who contribute to this volume serve as guides in the exploration of religion and science fiction as a multifaceted, multidisciplinary, and multicultural phenomenon. Contents List of Contributors / vii Introduction: Religion and Science Fiction--James F. McGrath / 1 1 The Dark Dreamlife of Postmodern Theology: Delicatessen, The City of Lost Children, and Alien Resurrection--Joyce Janca-Aji / 9 2 Sorcerers and Supermen: Old Mythologies in New Guises--C. K. Robertson / 32 3 Star Trekking in China: Science Fiction as Theodicy in Contemporary China--Eriberto P. Lozada Jr. / 59 4 Science Playing God--Alison Bright MacWilliams / 80 5 Looking Out for No. 1: Concepts of Good and Evil in Star Trek and The Prisoner--Elizabeth Danna / 95 6 Robots, Rights, and Religion--James F. The Religion of Science Fiction

Science fiction captures contemporary sentiment with its faith in a scientific/technological future, its explorations of the ultimate meaning of man's existence. Kreuziger is interested particularly in the apocalyptic visions of science fiction compared to the biblical revelations of John and Daniel. For some time our confidence has been placed largely in science, which has practically become a religion. Science fiction articulates the consequences of a faith in a technological future."

Religion and Science Fiction

This multidisciplinary book focuses on the intersection between religion and science fiction. Several perspectives are addressed by scholars from different disciplines: theology, literature, history, music, and anthropology. From Frankenstein, by way of Christian apocalyptic, to Star Wars, Star Trek, Battlestar Galactica, and much more, and from the United States to China and back again, the authors who contribute to this volume serve as guides in the exploration of religion and science fiction as a multifaceted, multidisciplinary, and multicultural phenomenon.

Science Fiction Theology

Science fiction imagines a universe teeming with life and thrilling possibility, but also hidden and hideous dangers. Christian theology, often a polemical target for science fiction, reflects on the plenitude out of which and for which the universe exists. In 'Science Fiction Theology', Alan Gregory investigates the troubled relationship between science fiction and Christianity and, in particular, how both have laid claim to the modern idea of sublimity. From its seventeenth-century beginnings, the sublime, with its representations of immensity, has informed the imagining of God. Gregory examines the sublime and its implicit theologies as they appear in early American pulp science fiction, the horror writing of H.P. Lovecraft, science fiction narratives of evolution and apocalypse, and the work of Philip K. Dick. Ironically, science fiction's tussle with Christianity hides the extent to which the sublime, especially in popular culture, serves to distort the classical Christian understanding of God, secularizing that God and rendering God's transcendence finite. But by turning from the sublime to a consideration of the beautiful, Gregory shows that both Christian and science-fictional imaginations may discover a new and surprising conversation. (Book jacket).

Holy Sci-Fi!

Can a computer have a soul? Are religion and science mutually exclusive? Is there really such a thing as free will? If you could time travel to visit Jesus, would you (and should you)? For hundreds of years, philosophers, scientists and science fiction writers have pondered these questions and many more. In Holy Sci-Fi!, popular writer Paul Nahin explores the fertile and sometimes uneasy relationship between science fiction and religion. With a scope spanning the history of religion, philosophy and literature, Nahin follows religious themes in science fiction from Feynman to Foucault and from Asimov to Aristotle. An intriguing journey through popular and well-loved books and stories, Holy Sci-Fi! shows how sci-fi has informed humanity's attitudes towards our faiths, our future and ourselves.

Religion in Science Fiction

In this thorough and engaging book, Gabriel McKee explores the inherent theological nature of science fiction, using illustrations from television shows, literature, and films. Science fiction, he believes, helps us understand not only who we are but who we will become. McKee organizes his chapters around theological themes, using illustrations from authors such as Isaac Asimov and H. G. Wells, television shows such as Star Trek and The Twilight Zone, and films such as The Matrix and Star Wars. With its extensive bibliography and index, this is a book that all serious science fiction fans--not just those with a theological interest--will appreciate.

The Gospel according to Science Fiction

What do scientists know about the possibility of life outside our solar system? How does Catholic science fiction imagine such worlds? What are the implications for Catholic thought? This collection brings together leading scientists, philosophers, theologians, and science fiction authors in the Catholic tradition to examine these issues. In the first section, Christian scientists detail the latest scientific findings regarding the possibility of life on exoplanets. The second part brings together leading Catholic science fiction authors who describe how "alien" life forms have been prevalent in the Catholic imagination from the Middle Ages right up to the present day. In the final section, Catholic philosophers and theologians examine the implications of discovering intelligent life elsewhere in the universe. Rather than worrying that the discovery of intelligent extraterrestrials might threaten the dignity of humans or their existence, the contributors here maintain that such creatures should be welcomed as fellow creatures of God and potential subjects of divine salvation.

Extraterrestrials in the Catholic Imagination

What is science fiction's mass market appeal? In what ways do its devotees treat it like a religion? This book includes analyses of science fiction writers like Isaac Asimov, as well as programmes like Star Trek and 2001.

Stardust and Ashes

The debate between science and religion is never out of the news: emotions run high, fuelled by polemical bestsellers like *The God Delusion* and, at the other end of the spectrum, high-profile campaigns to teach 'Intelligent Design' in schools. Yet there is much more to the debate than the clash

of these extremes. As Thomas Dixon shows in this balanced and thought-provoking introduction, a whole range of views, subtle arguments, and fascinating perspectives can be taken on this complex and centuries-old subject. He explores not only the key philosophical questions that underlie the debate, but also highlights the social, political, and ethical contexts that have made 'science and religion' such a fraught and interesting topic in the modern world. Along the way, he examines landmark historical episodes such as the Galileo affair, Charles Darwin's own religious and scientific odyssey, the Scopes 'Monkey Trial' in Tennessee in 1925, and the Dover Area School Board case of 2005, and includes perspectives from non-Christian religions and examples from across the physical, biological, and social sciences.

Science and Religion: A Very Short Introduction

The authors explore the explicitly Christian implications and meanings of six classic sci-fi television series: "Doctor Who, Star Trek, The Prisoner, The Twilight Zone, The X-Files," and "Babylon Five."

The Truth is Out There

The black-clad mercenaries of the Friendly planets fought where their employer and their God dictated. On New Earth they pitted their fanaticism against the cold courage of the Dorsai. And the implacable hatred of one man, Tam Olyn. Olyn saw his brother-in-law shot down before his eyes. His quest for vengeance took him across half the civilised worlds, to Cassida and Frieland, to St. Marie and back to New Earth. He met men of all the splinter groups into which mankind had evolved and he used them all to bring about his revenge - until Padma the Exotic taught him how to use his special powers, and the frightening knowledge of Final Encyclopaedia.

Soldier, Ask Not

What does science have to do with science fiction? What does science fiction have to do with scientists? What does religion have to do with science and science fiction? In the spiritual vacuum of our post-Christian West, new mythologies continually arise. The sources of much religious speculation, however, may be surprising. Author James Herrick directs our attention to a wide range of scientists, filmmakers, science fiction writers and religious philosophers and discovers there the role that science and science fiction have played in such mythmaking. From scientists such as Francis Bacon, Francis Crick, Carl Sagan and Freeman Dyson, to filmmakers such as George Lucas and Steven Spielberg, to science fiction writers such as Olaf Stapledon, Sir Arthur C. Clarke, Robert Heinlein and Isaac Asimov, Herrick finds a curious collusion of science with science fiction for promoting and justifying alternative spiritualities. The rise of these new mythologies, he argues, is no longer a curiosity at the edge of Western culture. This alchemy is catalyzing a religious vision of new gods, a new humanity, and alien races with superior intelligence and secret knowledge. This new mythology overshadows the realms of politics, science and religion. Should we follow such visions? Does science endorse these mythologies? Are we being offered a spirituality superior to the Judeo-Christian tradition? This book will help you decide.

Scientific Mythologies

I used to think that life was about maintaining relationships. Now, I realize that such thinking is a prison. We cannot be fully free until we are fully free to choose. These otherworldly stories/or perhaps not so otherworldly stories are about choosing.

Science Fiction Theology

This book examines science fiction's relationship to religion and the sacred through the lens of significant books, films and television shows. It provides a clear account of the larger cultural and philosophical significance of science fiction, and explores its potential sacrality in today's secular world by analyzing material such as Ray Bradbury's classic novel *The Martian Chronicles*, films *The Abyss* and *2001: A Space Odyssey*, and also the *Star Trek* universe. Richard Grigg argues that science fiction is born of nostalgia for a truly 'Other' reality that is no longer available to us, and that the most accurate way to see the relationship between science fiction and traditional approaches to the sacred is as an imitation of true sacrality; this, he suggests, is the best option in a secular age. He demonstrates this by setting forth five definitions of the sacred and then, in consecutive chapters, investigating particular works of science fiction and showing just how they incarnate those definitions. Science Fiction and

the Imitation of the Sacred also considers the qualifiers that suggest that science fiction can only imitate the sacred, not genuinely replicate it, and assesses the implications of this investigation for our understanding of secularity and science fiction.

Science Fiction and the Imitation of the Sacred

Calculating God is the new near-future SF thriller from the popular and award-winning Robert J. Sawyer. An alien shuttle craft lands outside the Royal Ontario Museum in Toronto. A six-legged, two-armed alien emerges, who says, in perfect English, "Take me to a paleontologist." It seems that Earth, and the alien's home planet, and the home planet of another alien species traveling on the alien mother ship, all experienced the same five cataclysmic events at about the same time (one example of these "cataclysmic events" would be the meteor that wiped out the dinosaurs). Both alien races believe this proves the existence of God: i.e. he's obviously been playing with the evolution of life on each of these planets. From this provocative launch point, Sawyer tells a fast-paced, and morally and intellectually challenging, SF story that just grows larger and larger in scope. The evidence of God's universal existence is not universally well received on Earth, nor even immediately believed. And it reveals nothing of God's nature. In fact, it poses more questions than it answers. When a supernova explodes out in the galaxy but close enough to wipe out life on all three home-worlds, the big question is, Will God intervene or is this the sixth cataclysm? Calculating God is SF on the grand scale. Calculating God is a 2001 Hugo Award Nominee for Best Novel. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Calculating God

Why did it seem strange when Battlestar Galactica ended its narrative on a religious note instead of providing a scientific explanation? And what does this have to do with gender? This book explores the connection between the triumph of religion and the dominance of femininity in Battlestar Galactica and its prequel series Caprica. Both series breached science fiction's convention of representing the "irrationality" of femininity and religion. Analyzing the connections (and disconnections) between women and men, and theology and technology, the author argues that the "Battlestarverse" depicts women as zones of contact between the seemingly contradictory spheres of science and religion by simultaneously employing and breaking gender stereotypes.

Religious Science Fiction in Battlestar Galactica and Caprica

Fold space using the spice mélange and travel from "a long time ago in a galaxy far, far away" to the planet Krypton, from Trantor to Terminus, and back to the scorched skies of earth. Did you know there is a Virgin Birth at the core of Star Wars? A Jewish Messiah of Dune? A Holy Family in Superman? A Jesus and Judas in The Matrix? And the Catholic Church is Asimov's Foundation? This book covers a lot of territory. It spans galaxies and universes. Nevertheless, the great expanse of human imagination will forever be captivated by the events of the little town of Bethlehem. There is a reason that all of mankind's stories overlap, coincide, correlate, and copy. Like it or not, all mankind bears the same indelible stamp, the mark of Christ. Why should there be a singular story binding us all? Unless we are truly all bound as one human family. At the core of the Monomyth is not another myth, a neat coincidence, but a reality-the reality of Jesus Christ. At the heart of the Monomyth is a man, a very real man. The God-Man. The source and summit of all hero stories and myths ever told, both before and after those short 33 years in First Century Israel.

The Theology of Sci-Fi

This book explores what science fiction can tell us about the human condition in a technological world, with the ethical dilemmas and consequences that this entails. This book is the result of the joint efforts of scholars and scientists from various disciplines. This interdisciplinary approach sets an example for those who, like us, have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a contemporary world of technology and which ethical dilemmas it brings along. One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation, where visions of human (or even post-human) life under various scientific, technological or natural conditions that differ from our own situation can be thought through and commented upon. Although a scholarly work, this book is also designed to be accessible

to a general audience that has an interest in science fiction, as well as to a broader academic audience interested in ethical questions.

Science Fiction, Ethics and the Human Condition

The field of 'science and religion' is exploding in popularity among both academics and the reading public. This is a comprehensive and authoritative introduction to the debate, written by the leading experts yet accessible to the general reader.

The Oxford Handbook of Religion and Science

Creatively communicate the Christian message with this fascinating collection of 14 science fiction story-sermons. George Murphy has extended Christian parable telling into the 21st century with a series of preachable stories. These engaging, sometimes poignant, and often provocative tales spotlight particular theological themes from scripture. Comments following each pulpit-tested story help to contextualize it in relation to literary sources and the liturgical year. This book is a remarkable gift to those charged with proclaiming the Word to that spacefaring species, Homo sapiens. -- Jim Miller, American Association for the Advancement of Science

Pulpit Science Fiction

First published in 1979. This volume presents Science Fiction as a coherent system, not as a collection of facts or random sequence of individual voices. The contributors are concerned with less with surveying the bare facts of the genre than with interpreting their significance. They attempt to establish the common properties of Science Fiction writing whether in the treatment of a theme or in SF of a given period or nationality.

Science Fiction

Who am I? Why am I here? Where am I going? What if . . . ? Science fiction delights in asking old questions in new ways. Rather than being primarily about advanced technology and the imagined future, science fiction novels and films are more fundamentally about issues of human nature and destiny. They provide a unique perspective on the same questions that have dominated theology and philosophy throughout history. In this fascinating book, Mike Alsford aims neither to give a history of science fiction, nor to systematically identify specific religious motifs within the genre, but to create an interdisciplinary, exploratory space where we can engage with the primal themes in new ways. Whether we are already well-versed in science fiction, or have had only the briefest encounters with Frankenstein's monster and Doctor Who, this book will provide exciting insights into questions of identity, the human condition, our relationships and our destiny.

What If?

Horror and Religion is an edited collection of essays offering structured discussions of spiritual and theological conflicts in Horror fiction from the late-sixteenth to the twenty-first century. Contributors explore the various ways that horror and religion have interacted over themes of race and sexuality; the texts under discussion chart the way in which the religious imagination has been deployed over the course of Horror fiction's development, from a Gothic mode based in theological polemics to a more distinct genre in the twenty-first century that explores the afterlife of religion. Horror and Religion focuses on the Horror genre and its characteristics of the body, sexuality, trauma and race, and the essays explore how Horror fiction has shifted emphasis from anti-Catholicism and anti-Semitism to incorporate less understood historical and theological issues, such as the 'Death of God' and the spiritual destabilisation of the secular. By confronting spiritual conflicts in Horror fiction, this volume offers new perspectives on what we traditionally perceive as horrifying.

Horror and Religion

"In an age when faith and science seem constantly to clash, can theologians and scientists come to a meeting of minds? Yes, maintains the intrepid Hans Küng, as he brilliantly argues here that religion and science are not mutually exclusive but complementary"--Back cover.

The Beginning of All Things

God's Existence: Truth or Fiction? The Answer Revealed By: Gary R. Lindberg Studying the existence of God, Lindberg takes a different approach by investigating science as well as Christian research. Lindberg's unique approach suggests that both science and the Bible were created by God and as a result the two say the same thing. Lindberg's message will show that science itself proves the existence of God because of the evidence presented.

God's Existence: Truth or Fiction? The Answer Revealed

The Sacrament of Reconciliation examines this sacrament in terms of its anthropological, scriptural, historical, and theological roots. The powerful message of God's merciful love expressed through this sacrament is an essential way of knowing the "joy of the Gospel."

Sacrament of Reconciliation

The Muslim world is not commonly associated with science fiction. Religion and repression have often been blamed for a perceived lack of creativity, imagination and future-oriented thought. However, even the most authoritarian Muslim-majority countries have produced highly imaginative accounts on one of the frontiers of knowledge: astrobiology, or the study of life in the universe. This book argues that the Islamic tradition has been generally supportive of conceptions of extra-terrestrial life, and in this engaging account, Jörg Matthias Determann provides a survey of Arabic, Bengali, Malay, Persian, Turkish, and Urdu texts and films, to show how scientists and artists in and from Muslim-majority countries have been at the forefront of the exciting search. Determann takes us to little-known dimensions of Muslim culture and religion, such as wildly popular adaptations of Star Wars and mysterious movements centred on UFOs. Repression is shown to have helped science fiction more than hurt it, with censorship encouraging authors to disguise criticism of contemporary politics by setting plots in future times and on distant planets. The book will be insightful for anyone looking to explore the science, culture and politics of the Muslim world and asks what the discovery of extra-terrestrial life would mean for one of the greatest faiths.

Islam, Science Fiction and Extraterrestrial Life

Due to certain irreconcilable differences two Scottish men, one being Catholic and the other being atheist, decide to fight a duel to the death. However, duels are against the law, so they have to find a secret place for that occasion. Searching for such place they must avoid authorities, and also numerous kinds of people who all try to convince them to give up on a duel, leading to many comic adventures.

The Ball and the Cross

Civil Refuge is Christian Science Fiction and is a story about the future of Christianity in the Universe that God has created. In the future technology will bring us into a closer relationship with Jesus and this book explores the multi-faceted dimensions that occur in the emphasis of these new relationships. America has turned to God and they are at war with the East that has turned to Islam and the Americans seek refuge on the planet of Ionious. Ionious is a technologically advanced planet that is closer to God than any other race of people in the Universe and after the refuge of the Americans a civil war breaks out among the Ionians and the Americans take sides. This book introduces new technologies in the realm of Science Fiction such as the QUEST Starship (Quantum Universal Energy String Transport) and their method of transportation on the planet the PAST gateways (Personal Argos String Transport) which are doorways that offer instantaneous travel to any other door on the planet.

Civil Refuge - Star QUEST: Christian Science Fiction

The Christian faith is filled with mystery, from the Trinity and the Incarnation to the smaller mysteries found in some of the strange and unexplained passages of the Bible: Behemoth and Leviathan, nephilim and seraphim, heroes and giants and more. There is no reason for fiction engaging with Christianity to be more tidy and theologically precise than the faith itself. Here you will find challenging fantasy, science fiction, and horror stories that wrestle with tough questions and refuse to provide easy answers or censored depictions of a broken world, characters whose deeds are as obscene as their words and people who meet bad ends-sometimes deserved and sometimes not. But there are also hope, grace, and redemption, though even they can burn like fire. Join us as we rediscover the mysteries of the Christian faith. Featuring stories by Daniel Southwell, Stephen Case, Bret Carter, H. L. Fullerton, David Tallerman, James Beamon, Robert B Finegold MD, Pauline J. Alama, J. S. Bangs, Kenneth Schneyer,

Christian Leithart, F. R. Michaels, Rachael K. Jones, S. Q. Eries, Beth Cato, G. Scott Huggins, Laurel Amberdine, Joanna Michal Hoyt, Mike Barretta, Sarah Ellen Rogers. Publisher's Note: Mysterion does not adhere to CBA content guidelines.

A Canticle for Leibowitz

DigiCat Publishing presents to you this special edition of "God, the Invisible King" by H. G. Wells. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Mysterion

George Simling has grown up in the city-state of Illyria, an enclave of logic and reason founded as a refuge from the Reaction, a wave of religious fundamentalism that swept away the nations of the twenty-first century. Yet to George, Illyria's militant rationalism is as stifling as the faith-based superstition that dominates the world outside its walls. For George has fallen in love with Lucy. A prostitute. A robot. She might be a machine, but the semblance of life is perfect. To the city authorities, robot sentience is a malfunction, curable by erasing and resetting silicon minds. But George knows that Lucy is something more. His only alternative is to flee Illyria, taking Lucy deep into the religious Outlands where she must pass as human because robots are seen as mockeries of God, burned at the stake, dismembered, crucified. Their odyssey leads them through betrayal, war and madness, ending only at the monastery of the Holy Machine...

God, the Invisible King

A science fiction novel about a spaceship that has wandering in space for many years.

The Holy Machine

Doctor Who has always contained a rich current of religious themes and ideas. In its very first episode it asked how humans rationalize the seemingly supernatural, as two snooping schoolteachers refused to accept that the TARDIS was real. More recently it has toyed with the mystery of Doctor's real name, perhaps an echo of ancient religions and rituals in which knowledge of the secret name of a god, angel or demon was thought to grant a mortal power over the entity. But why does Doctor Who intersect with religion so often, and what do such instances tell us about the society that produces the show and the viewers who engage with it? The writers of *Religion and Doctor Who: Time and Relative Dimensions in Faith* attempt to answer these questions through an in-depth analysis of the various treatments of religion throughout every era of the show's history. While the majority of chapters focus on the television show Doctor Who, the authors also look at audios, novels, and the response of fandom. Their analyses--all written in an accessible but academically thorough style--reveal that examining religion in a long-running series such as Doctor Who can contribute to a number of key debates within faith communities and religious history. Most importantly, it provides another way of looking at why Doctor Who continues to inspire, to engage, and to excite generations of passionate fans, whatever their position on faith. The contributors are drawn from the UK, the USA, and Australia, and their approaches are similarly diverse. Chapters have been written by film scholars and sociologists; theologians and historians; rhetoricians, philosophers and anthropologists. Some write from the perspective of a particular faith or belief; others write from the perspective of no religious belief. All, however, demonstrate a solid knowledge of and affection for the brilliance of Doctor Who.

Ship of Fools

The Matrix Reformed provides an analysis of both science fiction and the contemporary adoration of technology from a Christian point-of-view, weaving a discussion of issues in religion, philosophy, and ethics in major sci-fi works (e.g., The Matrix, Star Wars, and Star Trek) with the insights and claims of Kierkegaard, Descartes, and Herman Dooyeweerd.

Religion and Doctor Who

The New York Times bestselling author explains why any attempt to make religion compatible with science is doomed to fail. What we read in the news today is full of subjectivity, half-truths, and blatant

falsehoods; and thus it is more necessary now than ever to safeguard the truth with facts. In his provocative new book, evolutionary biologist Jerry A. Coyne aims to do exactly that in the arena of religion. In clear, dispassionate detail he explains why the toolkit of science, based on reason and empirical study, is reliable, while that of religion—including faith, dogma, and revelation—leads to incorrect, untestable, or conflicting conclusions. Coyne is responding to a national climate in which over half of Americans don't believe in evolution (and congressmen deny global warming), and warns that religious prejudices and strictures in politics, education, medicine, and social policy are on the rise. Extending the bestselling works of Richard Dawkins, Daniel Dennett, and Christopher Hitchens, he demolishes the claims of religion to provide verifiable "truth" by subjecting those claims to the same tests we use to establish truth in science. Coyne irrefutably demonstrates the grave harm—to individuals and to our planet—in mistaking faith for fact in making the most important decisions about the world we live in.

The Matrix Reformed

Faith Versus Fact

Stellar Science Fiction Stories

Danny and her crew expose a new enemy Danny and her crew on the Supreme Lythion, and her friends and allies in the Carina worlds learn more about the Slavers and their appetite for war. When slavers raid a Carina star station and snatch more of their people, Jai Van Veen directs Danny to return the favour—steal into Slaver territory and take their people back. Only the quasi-military venture reveals more about the threatening nature of their new enemy than anyone is braced for... Stellar Storm is the second book in the Iron Hammer space opera science fiction series by award-winning SF author Cameron Cooper. The Iron Hammer series is a spin off from the acclaimed Imperial Hammer series, and features many of the characters and situations from that series. The Iron Hammer series: 1.0: Galactic Thunder 2.0: Stellar Storm 3.0: Planetary Parlay 4.0: Waxing War 5.0: Ruled Out 6.0: Stranger Stars 7.0: Federal Force 8.0: Redline Rebels Space Opera Science Fiction Novel __ Praise for Stellar Storm: I love the worlds and universe this author creates. Large cast, but good character development so it is easy to keep track of them. Vivid descriptions. Realistic scenes. I actually feel like I am present with the characters as they interact with each other. Personalities, dedication, loyalty and fabulous para wolves come together to create a brilliant story! The reader is kept on edge waiting to see how this all plays out. Cooper draws you into this created world that is so different, yet relatable I kept telling myself, Just one more chapter, just one, but I couldn't stop reading it! __ Cameron Cooper is the author of the Imperial Hammer series, an Amazon best-selling space opera series, among others. Cameron tends to write space opera short stories and novels, but also roams across the science fiction landscape. Cameron was raised on a steady diet of Asimov, Heinlein, Herbert, McCaffrey, and others. Peter F. Hamilton, John Scalzi, Martha Wells and Cory Doctorow are contemporary heroes. An Australian Canadian, Cam lives near the Canadian Rockies.

Stellar 1

Milton A. Rothman was best known to generations of science-fiction readers for a single classic story written at age 19: "Heavy Planet," published under the byline of "Lee Gregor" in 'Astounding Science Fiction' in 1939 at the beginning of the Golden Age and kept in print for decades in the classic anthology 'Adventures in Time and Space'. He was also a pioneer of early fandom, a founder of the Philadelphia Science Fiction Society, a fanzine publisher, and a World Science Fiction Convention chairman. After World War II, he became one of the country's leading nuclear physicists, but continued to write science fiction throughout his life. Here, for the first time, all his science fiction stories are collected in one volume, giving a clear picture of the author's development from youth to old age, reflecting lifelong preoccupations with physics, mathematics, music, the futility of war, and, of course, science fiction itself. Here is an authentic voice from the early years of the modern science fiction field. Features an introduction by science fiction master Frederik Pohl.

STELLAR SCIENCE FICTION STORIES #4

Blast off into a galaxy full of fun with this fact-tastic nonfiction Level 3 Ready-to-Read, part of a series about the history of fun stuff! Did you know that ancient people all over the world looked at the stars and saw constellations? Or that a science fiction author named Jules Verne predicted the first moon

landing? Or that astronauts from different countries take turns living on board the International Space Station? Houston, you're cleared for takeoff and ready to become a History of Fun Stuff Expert on space travel! Amaze your friends with all you've learned in this fun, fact-filled Level 3 Ready-to-Read! A special section at the back of the book includes Common Core-vetted extras on subjects like science, social studies, and math, and there's even a fun quiz so readers can test themselves to see what they've learned! Learning history has never been so much fun!

STARSHIP CONQUEST is Book 1 of the Stellar Conquest series and formerly called First Conquest. From Hugo Award finalist and bestselling author David VanDyke. "VanDyke...did another great story, it really kick starts a brand new series. I didn't realize it was actually a follow on series to another one he wrote. It was so good." - J. Wachter "If you like reading EXTREMELY POWERFUL books, you'll like this one." - A. Customer "VanDyke does a great job of keeping the reader glued to their eReader, throughout the entire series. His knowledge of military terms helps make the story a little more believable." - D. Justice When the crew of EarthFleet's most powerful dreadnought Conquest is sent on a mission forty light years from Earth, none of them expect to return. But to find a home and keep humanity safe from hostile aliens, they must fight to seize a new world, initiating EarthFleet's first conquest of another star system. Starship Conquest carries the Plague Wars series forward a century into the future when humanity turns to the stars to find its destiny. It tells of a bitter battle as EarthFleet smashes into an alien star system in a desperate first strike to save humanity. Follow the starship Conquest as its captain and crew take the fight to Earth's enemies, finding allies and making heroic sacrifices in order to secure the future of Earth's solar system against a hostile universe. Plague Wars: Decade One - The Eden Plague - Reaper's Run - Skull's Shadows - Eden's Exodus - Apocalypse Austin - Nearest Night Plague Wars: Alien Invasion - The Demon Plagues - The Reaper Plague - The Orion Plague - Cyborg Strike - Comes the Destroyer - Forge and Steel Plague Wars: Stellar Conquest - Starship Conquest - Desolator: Conquest - Tactics of Conquest - Conquest of Earth - Conquest and Empire Keywords: space fleet science fiction, English, first contact series, galactic empire series, time travel, alien invasion, space marine books, military science fiction series, space travel, alien species, space battles, space wars, space marine battles, survival of humanity, survival of earth

STELLAR SCIENCE FICTION STORIES

A soldier struggles with the emptiness left behind by amnesia until he learns he is more than the world would have him remember. The earth is desolate, and only one ship of humans remains. An assassin plays god, dealing out justice and mercy as he sees fit. Explore the outer reaches of the imagination through these and other short stories. From brainwashed clones to winged aliens of destruction, the stories in Stellar Cloud will pull in any lover of science fiction and fantasy.

Stellar One

Trapped in the economic rat-race of the 21st century Kevin Blake had little going for him but an over-active imagination: an attribute which brought him to the notice of Paul Trevainen, who made Kevin an offer he couldn't resist. On the face of it the assignment was simple - to find the billionaire's daughter, bring her back to Earth and collect a dazzling reward. But Crystal was wilful, stubborn and hard to find. The quest forced Kevin to become an advocate in an alien court, turned him into a hunter, and made him the captive of giant, money-hungry frogs, a rebel against established authority, a fugitive, a criminal and in general one of the most harassed young men ever to have longed for adventure.

Stellar #7

AIR WONDER STORIES was the "new" science-fiction magazine, published after the bankruptcy of Hugo Gernsback's first publishing company. Gersback, long considered the true father of modern science-fiction publishing, was dedicated not only to the release of SF stories, but continually improving them -- and unlike the first issue of Amazing Stories three years earlier, included mostly new material in AIR WONDER STORIES. We're bringing you all 11 issues of this title -- individually, and as a three-volume collection! Get the full catalog by contacting classicsflibrary@yahoo.com

Stellar Science Fiction Stories #4

An ancient enemy... A hidden power... A war as old as the universe... This isn't the first invasion. This time, they're taking everything...and everyone. Earth, still patching itself together after the 300 Years War, is severely unprepared and outnumbered when the invasion hits. Their only hope is a small team of soldiers on a suicide mission to infiltrate the mothership and relay critical defense information home. Sergeant Nakio Atana is the Universal Protectors' elite assassin. But a daring escape from an enemy ship during the last invasion knocked years of her life into darkness. Atana carries out orders with inexplicable apathy and advances their militaristic force with technical knowledge beyond Earth's evolution. What she is can change the future. Command hasn't told her everything. Sergeant Bennett must guard her with his life. Together, Atana and Bennett lead a team to the mothership in hopes her knowledge, and his crew's skills, will render them a soft spot in the alien armor. What they find in the stars and within themselves challenges the code they live by and their concepts of the power within. Infused with cyberpunk, dystopian, and space battle elements, Stellar Fusion will launch you into a future where love is forbidden to those with the most important duty, protecting what remains of the human race. No one escapes the Suanoan empire forever. "Compelling characters and imminent danger. Comradery, loyalty, survival, threat, and danger are expertly woven into an engaging plot... This futuristic world has some technologies that are both beautifully and terrifyingly imagined, those that will aid our heroes, and those that will stand in their way...really enjoyable, interesting, and most importantly fun to read." -- Goodreads Review, "Enjoyed the theory of operations of the weapons!" -- Goodreads Review, "If you love character-driven sci fi with a great message, I really recommend Stellar Fusion. I loved Atana's transformation throughout the book, from cold, businesslike super soldier to a compassionate leader who will stand in front of any threat for her people and friends. The tech is incredibly detailed and intriguing, and I loved the different alien species. Can't wait to read more from these characters as their story continues!" --Goodreads Review, Infinite Spark Series: 0: Rise of the Blood Phoenix 1: Stellar Fusion 2: Requiem 3: Shadows of the Son 4: Red Shift 5: Earth's Vengeance

Stellar Storm

The last thing computer circuit planner Daniel Kitajima remembered was being hit by a crane at an orbital construction site. Waking up 80 years later - in 2089 - he found that most of his body had been destroyed...but he had survived. A group of doctors had constructed an artificial body that gave him superhuman strength, the ability to survive without food or air, the powers of radar and infrared vision. All Daniel wanted was to resume a normal life. But his new-found strengths had attracted the attention of powerful people with a devastating secret - that the solar system only has a few centuries to live...

Heavy Planet and Other Science Fiction Stories

Journey Across the stars and universe with four classical science fiction tales to excite and inspire your Imagination. 1.....Flame-Jewel of the Ancients. The tiny golden sphere, blazed with terrible energy, and spelled doom for the Galactic Empire. 2.....The Rebel of Valkyr. From the dark ages of space emerged the second Empire ruled by a child, a usurper, and a fool. 3.....The Rocketeers have Shaggy Ears. Someday there will be a Legend, from steamy Venus or arid Mars, building a great glory the men of Terra will choke with pride. 4.....Witch of the Demon Seas. A black Galleon is guided back to the lost Citadel of Xanthi, A tale of Corun the condemned pirate of Conahur and his lover, the Demon Witch! Classical science fiction from the masters of the genre!

The Stellar Story of Space Travel

Danny is trapped in a fragile relationship with the self-aware interstellar array which calls itself Noam. The array provides transport and communications. Without its cooperation, the Carinad Empire would collapse, stranding billions of people and causing chaos and death. Danny Andela, a former Ranger known as the Imperial Hammer, is the only human the array trusts. Danny's work to keep the array happy and minimize its deadly temper tantrums is draining. Worse, other humans distrust her because of her association with the array, including the crew of her one-of-a-kind ship, the Lythion. Broke and alone, Danny faces a new peril: The array may not trust her, afterall... Star Forge is the second book in the Imperial Hammer space opera science fiction series by award-winning SF author Cameron Cooper. The Imperial Hammer series: 1.0: Hammer and Crucible 2.0: Star Forge 3.0: Long Live the Emperor 4.0: Severed 5.0: Destroyer of Worlds Space Opera Science Fiction Novel __ Praise for The Imperial Hammer series: Fun, fast paced, full of action and humor. I greedily read in this in one day. You will want to as well. Lots of action and a boatload of twists and turns that grab your attention and won't let go. It has kept me up way past bedtime! This is a read that really sucks you in! Excellent characters, twists and turns throughout. Written in such a natural hand that you can fully image the spectacular universe the author has created. __ Cameron Cooper is the author of The Indigo Reports science fiction series and the alter ego for an Amazon #1 bestselling author in an unrelated genre. The Indigo Reports was originally conceived as a one-off series, but readers demanded more. The Imperial Hammer series was released in early 2020. Cameron tends to write space opera short stories and novels, but also roams across the science fiction landscape. Cameron was raised on a steady diet of Asimov, Heinlein, Herbert, McCaffrey, and others. Peter F. Hamilton and John Scalzi are contemporary heroes. An Australian Canadian, Cam lives near the Canadian Rockies.

Star Science Fiction Stories

Since its debut in 1996, Starlight has been recognized as the preeminent original anthology of science fiction and fantasy. Its stories have won the Nebula Award, the Sturgeon Award, and the Tiptree Award. Starlight 1 itself won the World Fantasy Award for Best Anthology. The series represents the best new short fiction in fantasy and SF. Now, with Starlight 3, award-winning editor Patrick Nielsen Hayden offers a new serving of powerful, original stories. Some are playful, some rigorous, or exuberant, or melancholy; some are set in the world of today, and some amidst the farthest stars or in worlds that never were. Stephen Baxter Terry Bisson Ted Chiang Susanna Clarke Brenda W. Clough D. G. Compton Cory Doctorow Andy Duncan Colin Greenland Alex Irvine Geoffrey A. Landis Maureen F. McHugh Susan Palwick Madeleine E. Robins Greg van Eekhout Jane Yolen At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Starship Conquest (First Conquest)

This book explores the idea of time travel from the first account in English literature to the latest theories of physicists such as Kip Thorne and Igor Novikov. This very readable work covers a variety of topics including: the history of time travel in fiction; the fundamental scientific concepts of time, spacetime, and the fourth dimension; the speculations of Einstein, Richard Feynman, Kurt Goedel, and others; time travel paradoxes, and much more.

Stellar Cloud

Danny and her crew learn that humans may not be alone in the galaxy. Thirty years ago, Danny and her crew on the Supreme Lythion were instrumental in the defeat of the sentient array, the crumbling of the Empire and the development of crescent ships. Now wildcat crescent ships are opening up the known galaxy, finding more worlds to be settled and new resources. When the wildcat ship Ige Ibas goes dark and silent, Dalton comes to Danny for help, because his son, Mace, is on that ship. Despite their history,

Danny agrees to try to find Mace. But the Ige Ibas has gone dark for a reason, and Danny's investigation rouses the ire of a new enemy, one that emerges from beyond any worlds known to humans... Galactic Thunder is the first book in the Iron Hammer space opera science fiction series by award-winning SF author Cameron Cooper. The Iron Hammer series is a spin off from the acclaimed Imperial Hammer series, and features many of the characters and situations from that series. The Iron Hammer series: 1.0: Galactic Thunder 2.0: Stellar Storm 3.0: Planetary Parlay 4.0: Waxing War 5.0: Ruled Out 6.0: Stranger Stars 7.0: Federal Force 8.0: Redline Rebels Space Opera Science Fiction Novel __ Praise for Galactic Thunder: I found myself unable to just stop reading at just anyplace even at 2:00 a.m. IT IS THAT GOOD and I'm really pleased to have found this author!!! This one is rife with conflict and fall out from the Imperial Hammer series. And more parawolves! This is the beginning of a series, so while it contains a full story arc (there isn't a cliff hanger) it is also building a larger arc and that last line is a doozy! I highly recommend this book and to enrich your experience with the characters I would definitely read the Imperial Hammer series first. Intriguing and in my opinion the best Danny book yet. This writer gets better and better with each new book. __ Cameron Cooper is the author of the Imperial Hammer series, an Amazon best-selling space opera series, among others. Cameron tends to write space opera short stories and novels, but also roams across the science fiction landscape. Cameron was raised on a steady diet of Asimov, Heinlein, Herbert, McCaffrey, and others. Peter F. Hamilton, John Scalzi, Martha Wells and Cory Doctorow are contemporary heroes. An Australian Canadian, Cam lives near the Canadian Rockies.

Science Fiction and Fantasy Literature, Vol 1

"Are they Android with Robot Brains or Robots with Android Brains? " Read Legend Srinidhi's most amazing science fiction short story starring himself set in a futuristic universe. Legend Srinidhi is a futuristic Android living in the brilliant sky-city of Zail in the year 2300. He owns a laseroid - a new kind of amazing weapon for defeating his enemies and a teleportation magnet to travel to incredible places in the city. Legend is a security ANDROID who was created to provide military-level force for corporations wealthy enough to purchase him. If Legend had more opportunities, he can even teleport to Paradise 3.0 - the city where the highly rich and influential people reside. It's very difficult to enter Paradise 3.0. But Legend Srinidhi is trying to seize an opportunity to reach that place. He needs to start with gathering information about the city first and where he is initially. How will Paradise 3.0 be - he thinks? Full of diamonds, crystal streets, golden waters? What will happen when he gets there? Let's find out. Catch this incredible sci-fi adventure of Srinidhi in this intriguing book. There's no looking back.

Stellar Assignment

In-depth analysis and discussion of fifteen classic Ballantine science fiction titles.

Air Wonder Stories #1

Read opening chapters here - <http://magicdomebooks.blogspot.com/2019/11/project-stellar-by-roman-prokofiev.html> When the shattered fragments of the Black Moon collapsed onto planet Earth, splitting continents apart and flooding them with raging oceans, Darkness descended onto our world. The eruptions of hostile energy from behind the Edge distorted the laws of the physical world, creating new life forms which now threaten to take over the planet. The last remaining vestiges of humankind, too desperate for their own survival, have nothing to offer against their advance. So it's time to activate Incarnation: the last instruction issued by Project Stellar. In a situation when there're not enough living beings to protect planet Earth, the dead fighters will have to rejoin the defenders' ranks.

Stellar Fusion

Forty-eight enthralling stories from the most talented new science fiction, fantasy, and horror writers. MetaStellar is an online publication focusing on science fiction, fantasy, and horror launched in September 2020, founded by a dozen speculative fiction writers, editors, and artists from around the world. Since then, it's published hundreds of short stories by hundreds of writers, both original fiction, reprints, and excerpts. Excite your mind and Imagination with this wonderfully illustrated and written book.

Star Forge

"This collection speaks to common themes and strategies in women's writing about their different worlds, from Margaret Cavendish's seventeenth-century Blazing World of the North Pole to the "men-less" islands of the French writer Scudery to the eighteenth- and nineteenth-century utopias of Shelley and Gaskell, and science fiction pulps, finishing with the more contemporary feminist fictions of Le Guin, Wittig, Piercy, and Mitchison. It shows that these fictions historically speak to each other and together amount to a literary tradition of women's writing about a better place."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Starlight 3

During an action on the third planet from Arcturus, soldier Cal Truent woke up in the hospital with a sixteen-hour hole in his memory. No one knows what it is that Cal has forgotten, but his superiors can't

take the chance that it might be something deadly to his fellow soldiers - and to Earth. Somehow Cal means to seek out whatever it is that his mind is resisting . . .

Time Machines

Science fiction and fantasy stories from a USA Today bestselling author. Carl Sagan famously said that we are made of star stuff. The atoms in our bodies were forged in the hearts of stars. We are a way for the universe to know itself. Science fiction is the literature of ideas. Of exploration. Of imagination. Through science fiction, we get a little closer to knowing the universe. This anthology contains tales of imagination. One novella. Five science fiction stories. One fantasy story. All seven tales ask a question. What if . . . We are made of star stuff. Let's gaze at where we came from . . . and imagine.

Galactic Thunder

This third volume in Mike Ashley's four-volume study of the science-fiction magazines focuses on the turbulent years of the 1970s, when the United States emerged from the Vietnam War into an economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science-fiction magazines. Not only were they struggling to survive within the economic climate, they also had to cope with the death of the father of modern science fiction, John W. Campbell, Jr., while facing new and potentially threatening opposition. The market for science fiction diversified as never before, with the growth in new anthologies, the emergence of semi-professional magazines, the explosion of science fiction in college, the start of role-playing gaming magazines, underground and adult comics and, with the success of Star Wars, media magazines. This volume explores how the traditional science-fiction magazines coped with this, from the

Circumpolar!

Galaxy Science Fiction hit the scene in 1950 edited by H. L. Gold and quickly became the leading science fiction magazine of its time. Galaxy gave a home to writers that didn't fit into Astounding and F&SF, and readers rejoiced. In this first Galaxy Science Fiction Super Pack we bring you more than five hundred pages of fiction. These are the stories that helped Galaxy Magazine carve its name on the Mount Rushmore of Science Fiction. Doorstep by Keith Laumer, The Chasers by Daniel F. Galouye, Blueblood by Jim Harmon, Bad Memory by Patrick Fahy, Beach Scene by Marshall King, The Reluctant Heroes by Frank M. Robinson, Creativity for Kats by Fritz Leiber, Perfect Answer by L. J. Stecher, Jr., Dumbwaiter by James Stammers, The Ignoble Savages by Evelyn E. Smith, Angel's Egg by Edgar Pangborn, Survival Type by J.F. Bone, Misbegotten Missionary by Isaac Asimov, The Business, as Usual by Jack Sharkey, No Substitutions by Jim Harmon, Prime Difference by Alan E. Nourse, Delay in Transit by F. L. Wallace, My Lady Greensleeves by Frederik Pohl, A Little Journey by Ray Bradbury, Med Ship Many Murray Leinster, Spoken for by William Morrison, A Pail of Air by Fritz Leiber, Contagion by Katherine MacLEAN, Pen Pal by Milton Lesser, Delayed Action by Charles Vincent De Vet, ... and it Comes out Here by Lester del Rey, The Old Die Rich by H. L. Gold,

Paradise 3.0

Joe Sorby, a high school student of a future century, has a longing for faraway places that eventually takes him to a life of hardship and danger on the planet Mercury and in the Rings of Saturn.

The Ballantine Teachers' Guide to Science Fiction

The Incarnator (Project Stellar Book 1)
