Uglies

A fresh repackaging of the bestselling Uglies boks...the series that started the whole dystopian trend!

Regulating Aged Care

'Regulating Aged Care is a significant achievement and addresses areas of personal caring which do not usually receive attention. [It] is an important book which draws attention to the central problems of providing care for large numbers of vulnerable people. . . [it] should be required reading on undergraduate and postgraduate courses relating to applied social science, health and medical sociology.' Alison M. Ball, Sociology 'This book provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field.' International Social Security Review 'They have given us a fascinating case study here, rich in detail, and masterfully interpreted against the backdrop of evolving regulatory strategy. It is rare indeed to find this depth of analysis made accessible, laced throughout with humanity, compassion, and humor.' Malcolm Sparrow, Harvard University, US 'This book offers an intelligent and insightful account of the development of nursing home regulation in three countries England, the USA and Australia. But, more than that, it intertwines theory and more than a decade of empirical work to provide a telling and sophisticated explanation of why and how good regulatory intentions often go awry, and what can be done to create systems of regulation which really work to produce improvement.' Kieran Walshe, University of Manchester, UK This book is a major contribution to regulatory theory from three members of the world-class regulatory research group based in Australia. It marks a new development in responsive regulatory theory in which a strengths-based pyramid complements the regulatory pyramid. The authors compare the accomplishments of nursing home regulation in the US, the UK and Australia during the last 20 years and in a longer historical perspective. They find that gaming and ritualism, rather than defiance of regulators, are the greatest challenges for improving safety and quality of life for the elderly in care homes. Regulating Aged Care shows how good regulation and caring professionalism can transcend ritualism. Better regulation is found to be as much about encouragement to expand strengths as incentives to fix problems. The book is underpinned by one of the most ambitious, sustained qualitative and quantitative data collections in both the regulatory literature and the aged care literature. This study provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field. The book will find its readership amongst regulatory scholars in political science, law, socio-legal studies, sociology, economics and public policy. Gerontology and health care scholars and professionals will also find much to reflect upon in the book.

Trade and Development Report 2011

What lessons have policy makers drawn from the global financial and economic crisis to reform the international monetary and financial system and the design of macroeconomic policies? The enthusiasm about system reform and a reorientation of macroeconomic policies has not lasted. Reforms of financial regulations are progressing slowly and only at the national level, monetary system reform is limited. After an interlude that some considered as a return to Keynesianism, the orientation of macroeconomic policy, especially fiscal policy, is back to business as usual. This will hinder a sustained recovery of the world economy and open the door for new financial crises. Thus, the rethinking of policies and reshaping the financial and monetary system remain an urgent task. The Report makes concrete proposals on how, and in which priority areas, to advance with the strengthening regulation of the financial sector and commodity markets, reform of the international monetary system, and the reorientation of fiscal policy.

International Multilateral Negotiation

"In a single volume, a team of distinguished international scholars draws on a wide range of social science theory to explain the dynamics of bargaining and diplomacy when many parties and many issues are involved. Each contributor explores a different approach to reaching successful agreements among diverse governments, multinational corporations, and other international actors. To show how these approaches work in actual practice, the authors provide detailed analyses of two multilateral negotiations - the Uruguay round of negotiations under the General Agreement for Tariffs and Trade (GATT) and the negotiations leading to the Single European Act consolidating the European Community." "The increased length and frequency of such events as the GATT talks, the Rio Conference on Environment and Development (UNCED), and the Law of the Sea Conferences (UNCLOS) highlight the enormous challenges of complex negotiations among many competing interests. This work, sponsored by the International Institute for Applied Systems Analysis, offers the first comprehensive understanding of the intricate and complex process of multilateral negotiation." "The book provides the tools for analyzing and managing the complexities of multilateral negotiations including how the roots of conflict, the distribution of power, and specific patterns of resistance and cooperation affect all stages of negotiation; how game theory, multi-attribute utility models, and other practical tools can be used to chart interests and identify strategic trade-offs before negotiations; how negotiation is organization in action, applying the rules and culture of organizations to change through a cybernetic process; how insights into the way small groups function can help advance negotiations; why different modes of leadership are needed to diagnose multinational problems, clarify options, and develop feasible solutions; how and why coalitions are formed - and how they can prompt meaningful bargaining and help forge positive, lasting agreements."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Decoupling 2

This report explores technological possibilities and opportunities for developing and developed countries to accelerate decoupling and reap environmental and economic benefits of increased resource productivity. It examines policy options successful in helping different countries improve resource productivity in various sectors of their economy, avoiding negative impacts on the environment. It does not seem possible for a global economy based on the current unsustainable patterns of resource use to continue into the future. Economic consequences of these patterns are already apparent in increases in resource prices, increased price volatility and disruption of environmental systems. The environment impacts are also leading to potentially irreversible changes to the world's ecosystems, often with direct effects on people and the economy - for example: damage to health, water shortages, loss of fish stocks or increased storm damage. This report shows that much of the policy design 'know-how' needed to achieve decoupling is present in terms of legislation, incentive systems, and institutional reform. Many countries have tried these out with tangible results, encouraging others to study and where appropriate replicate and scale up such practices and successes

Geographic Data Management

This comprehensive account of the establishment of the WTO focuses on those who shaped its creation as well as those who have influenced its evolution. It also examines trade negotiations, the WTO's dispute settlement role, the process of joining, and what lies ahead for the organization.

The History and Future of the World Trade Organization

Since 1999 European higher education has been engaged in the most radical reform of its 900 years of history. This volume brings together a group of higher education researchers across Europe and looks into the implementation of the Bologna Process in the countries often attributed a peripheral status. In addition to cultural and political issues, the volume pays particular attention to the role of students as well as the changing position of the intellectuals under its impact.

Creating the European Area of Higher Education

The second installment of Scott Westerfeld's New York Times bestselling and award-winning *Uglies* series—a global phenomenon that started the dystopian trend. Tally has finally become pretty. Now her looks are beyond perfect, her clothes are awesome, her boyfriend is totally hot, and she's completely popular. It's everything she's ever wanted. But beneath all the fun—the nonstop parties, the high-tech luxury, the total freedom—is a nagging sense that something's wrong. Something important. Then a message from Tally's ugly past arrives. Reading it, Tally remembers what's wrong with pretty life, and the fun stops cold. Now she has to choose between fighting to forget what she knows and fighting for her life—because the authorities don't intend to let anyone with this information survive.

Pretties

Explains that the selling of ideas is a matter of encouraging others to share one's beliefs in a guide for salespeople that invites readers to self-assess their persuasion personality and build on natural strengths.

The Art of Woo

The shape of the world economy has changed significantly over the last two decades, with a rising importance of several developing countries and regions as additional drivers of global economic growth. The main objective of Trade and Development Report 2013 is to assess the systemic changes in the underlying structure of the world economy and to analyze the resulting policy challenges. Particular attention will be paid to a plausible scenario in which developing and transition countries must design their development strategies in a context of a prolonged period of sluggish growth in developed countries. The Reports main message will be that in order to achieve high, sustained and inclusive growth, developing and transition economies will need to move towards a new form of development, away from seeking net-export advantages on the back of global imbalances.

Global Governance and Policy Space for Development

Computers are complex tools of the human species. To make them work well for us, we have to specify their actions in very great detail. When properly instructed, networks of computers take on the trappings of human social orders derived from the physiological characteristics and capabilities of our species. To create a social order, we engage in grouping mechanisms through which the actions of the individuals within the group are influenced. From a technical perspective, such grouping mechanisms form the trust environments within which we can effect policy. Historically, the most comprehensive such environments have been formed by religions. Within a specific religion, the policy framework is established by a statement of theology. So, if we connect all the dots, when we want to tell our computers how to act in a manner paralleling human social orders, we must define for them a theology. So goes the rationale explored in great detail by the authors of *Computer Theology*. Based on their combined tenure of almost a century working in the realms of computer systems and their ubiquitous networks, du Castel and Jurgensen have expressed both social and computer systems through the same concepts. The result offers a unique perspective on the interconnection between people and machines that we have come to understand as the World Wide Web.

Computer Theology

A historically-grounded examination of United States foreign policy that interrogates the ideological assumptions--whether explicit or tacit--that drive it.

Peace, War, and Liberty

"The potentially adverse effect of import surges on domestic markets and the agricultural sector, particularly in developing countries, have received enough attention to prompt the concepts of safeguards to protect against any "injurious" import surge. This book has two objectives. The first is to examine the

theoretical and legal frameworks of an import surge, based on reviews of the definition and identification of an import surge, and its potential and likely effects. The second is to synthesize the findings of FAO country case studies, including implications for ways to deal with import surges, and especially to provide informed guidance to policy-makers to respond to the surge's consequences"--Publisher's description.

Agricultural Import Surges in Developing Countries

This is the first comprehensive volume to compare the sociolinguistic situations of minorities in Russia and in Western Europe. As such, it provides insight into language policies, the ethnolinguistic vitality and the struggle for reversal of language shift, language revitalization and empowerment of minorities in Russia and the European Union. The volume shows that, even though largely unknown to a broader English-reading audience, the linguistic composition of Russia is by no means less diverse than multilingualism in the EU. It is therefore a valuable introduction into the historical backgrounds and current linguistic, social and legal affairs with regard to Russia's manifold ethnic and linguistic minorities, mirrored on the discussion of recent issues in a number of well-known Western European minority situations.

Cultural and Linguistic Minorities in the Russian Federation and the European Union

This is the fourth edition of the standard introductory text and complete reference for scientists in all disciplines, as well as engineers. This fully revised version includes important updates on articles and books as well as information on a crucial new topic: how to create transparencies and computer projections, both for classrooms and professional meetings. The text maintains its user-friendly, example-based, visual approach, gently easing readers into the secrets of LaTeX with The Short Course. Then it introduces basic ideas through sample articles and documents. It includes a visual guide and detailed exposition of multiline math formulas, and even provides instructions on preparing books for publishers.

More Math Into LaTeX

Beginning with an introduction to the philosophy of learning through the process of play, this book brings you through a series of basic warm-up exercises that can be combined with later projects. Then you'll move quickly on to more challenging and engaging exercises, including word games, dimensional shapes, and inventive sketchbooks and letterforms, eventually creating a "toolkit" of ideas and skills developed through the process of play. This book features creative, adaptable ideas, and numerous examples of designers and artists responses to each exercise, giving you a peek into their way of thinking and seeing.

Playing with Sketches

Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

Border Management Modernization

Profusely illustrated with full color maps and photographs. Center of Military History Publication number CMH 55-2. Contingency operations series. Second volume in the U.S. Army Center of Military History's Contingency Operations Series, provides an account of how Army logistics affected ground operations during the Grenada intervention and, in turn, how combat influenced logistical performance. Emphasizes the role of individuals and the decisions they made based on the necessarily incomplete and sometimes misleading information available at the time during an unexpected and short-notice contingency operation.

The Rucksack War

"This whole game is just designed to make us hate ourselves."—Shay Uglier told Tally Youngblood's version of life in Uglierville and the budding rebellion against the Specials. Now comes an exciting

graphic novel revealing new adventures in the Ugliers world—as seen through the eyes of Shay, Tally's rebellious best friend who's not afraid to break the rules, no matter the cost. A few months shy of her sixteenth birthday, Shay eagerly awaits her turn to become a Pretty—a rite-of-passage operation called “the Surge” that transforms ordinary Ugliers into paragons of beauty. Yet after befriending the Crims, a group of fellow teens who refuse to take anything in society at face value, Shay starts to question the whole concept. And as the Crims explore beyond the monitored borders of Uglyville into the forbidden, ungoverned wild, Shay must choose between the perks of being Pretty and the rewards of being real.

Ugliers: Shay's Story (Graphic Novel)

This document presents a summary of the key findings of the EIB Investment Report 2017/2018. As the bank's flagship research report, the Investment Report aims to deepen our understanding of investment and investment financing in the EU. It presents and analyses the new 2017 release of the EIB Investment Survey (EIBIS) of businesses in the EU, which this year also includes a Europe-wide survey of municipal authorities.

EIB Investment Report 2017/2018

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

Crosswalking EUR-Lex

This book provides new research on tourism from around the world, looking at issues such as innovations in tourism for national parks, management of nature-based tourism in protected areas, the influence of climate change on tourism in Europe, and terror and tourism. Other topics examined are the development of mining heritage tourism, international students' perceptions of the university bar on an Australian university campus, the macroeconomic contribution of tourism, and the implications of innovation among tourism entrepreneurs for rural development on the island of LaPalma, Spain.

A Short Italian Dictionary; Abridged from the Author's Larger Dictionary (Volume I)

Environmental management is a wide, expanding, and rapidly evolving field, affecting everyone from individual citizens to businesses; governments to international agencies. Indisputably, it plays a crucial role in the quest for sustainable development. This comprehensively updated second edition explores the nature and role of environmental management, covering key principles, practices, tools, strategies and policies, offers a thorough yet understandable introduction, and points to further in-depth coverage. Among the key themes covered are: sustainable development proactive approaches the precautionary principle the ‘polluter pays’ principle the need for humans to be less vulnerable and more adaptable. Reflecting the expansion and evolution of the field, this revised edition focuses strongly on sustainable development. There has been extensive restructuring to ensure the book is accessible to those unfamiliar with environmental management and it now includes greater coverage of topics including key resources under stress, environmental management tools, climate change and urban environmental management. With rapid expansion and development of the subject it is easy for those embarking on a course of study to become disorientated, but with its well-structured coverage, effective illustrations, and foundation for further, more-focused interest, this book is easily accessible to all.

Tourism Development

This book comprises a collection of articles and essays published in a variety of journals during the past decades, which seek to identify and analyze the main factors in Turkish politics. Political parties, military interventions, international relations and cultural developments are given wide coverage alongside studies on literature.

Environmental Management for Sustainable Development

Since the end of World War II, European airlines have revealed their own operational style. By analyzing seven European flag-carriers, Dienel and Lyth provide a comparative study of the airline business, covering government policy, aircraft procurement, network growth, commercial performance and collaboration with other airlines and transport modes. This study also seeks to explain why national

flag-carriers have survived in an age of globalization and strategic alliances. A concluding chapter views the contrasting American air transport industry.

Studies on Turkish Politics and Society

This book constitutes the refereed proceedings of the 27th European Conference on Information Retrieval Research, ECIR 2005, held in Santiago de Compostela, Spain in March 2005. The 34 revised full papers presented together with 2 invited keynote papers and 17 selected poster papers were carefully reviewed and selected from 124 papers submitted. The papers are organized in topical sections on peer-to-peer, information retrieval models, text summarization, information retrieval methods, text classification and fusion, user studies and evaluation, multimedia retrieval, and Web information retrieval.

Proceedings of the Second International Fishing Industry Safety and Health Conference, September 22-24, 2003, Sitka, Alaska, U.S.A.

This annual report monitors and evaluates agricultural policies spanning all 6 continents, including the 36 OECD countries, the 6 non-OECD EU Member States, and 12 emerging economies. It is a unique source of up-to date estimates of support to agriculture using a comprehensive system of measuring and classifying support to agriculture – the Producer and Consumer Support Estimates (PSEs and CSEs), the General Services Support Estimate (GSSE) and related indicators – which provide insight into the increasingly complex nature of agricultural policy and serve as a basis for OECD's agricultural policy monitoring and evaluation.

Flying the Flag

The COURAGE Handbook ushers its reader into the world of the compellingly rich heritage of cultural opposition in Eastern Europe. It is intended primarily to further a subtle understanding of the complex and multifaceted nature of cultural opposition and its legacy from the perspective of the various collections held in public institutions or by private individuals across the region. Through its focus on material heritage, the handbook provides new perspectives on the history of dissent and cultural non-conformism in the former socialist countries of Central, Eastern, and Southeastern Europe. The volume is comprised of contributions by over 60 authors from a range of different academic and national backgrounds who share their insights into the topic. It offers focused discussions from comparative and transnational perspectives of the key themes and prevailing forms of opposition in the region, including non-conformist art, youth sub-cultures, intellectual dissent, religious groups, underground rock, avantgarde theater, exile, traditionalism, ethnic revivalism, censorship, and surveillance. The handbook provides its reader with a concise synthesis of the existing scholarship and suggests new avenues for further research.

Agricultural Conservation Program Bulletin

Chris Barrow clarifies the definition, nature and role of environmental management in development and developing countries, making extensive use of global-local case studies.

Advances in Information Retrieval

Innovation is sweeping the globe at breakneck speed, and emerging markets are where tremendous growth and opportunity reside. Jerry Haar and Ricardo Ernst delve into the forces and drivers that shape innovation in emerging markets and present case studies, along with a summation of the key features and outlook for innovation over the next decade.

Agricultural Policy Monitoring and Evaluation 2019

Agriculture is one of the most important influences on biological diversity. Conventional agriculture has heavily contributed to reducing the diversity of ecosystems, species and genes, but it has also created new diversity. The eighth Interactive Session of the 2nd World Conservation Congress dealt with a broad spectrum of agricultural issues from around the world and examined the linkages between biodiversity, economy and society. This publication represents the opinions and issues raised by those participating in the Session, and it contains both the papers prepared by presenters and contributions from those unable to attend.

The Handbook of COURAGE

Often called the workhorse of industry, the advent of power electronics and advances in digital control are transforming the induction motor into the racehorse of industrial motion control. Now, the classic texts on induction machines are nearly three decades old, while more recent books on electric motors lack the necessary depth and detail on ind

Environmental Management and Development

This cutting edge collection presents a political reading of the power of modern sport in Asia. Providing an interdisciplinary study of political and cultural tensions in Asia, past and present, through the key case-study of sport, it illuminates the complex practices and legacies of Japanese imperialism across East and Southeast Asia through the 20th century and beyond. Focusing on the deep background to contemporary dynamics of intraregional tensions, it examines sport both as a tool of imperialism and as an agent of reconciliation as the region gears up to the 2020 Olympics in Tokyo. Offering a unique contribution to East Asian Studies, Colonial and Postcolonial Studies and Sport Studies, this work represent key reading for students and scholars of East Asian studies, International Politics and Sports Diplomacy.

Mechanical vibration and shock measurements

Descriptions and evaluations of the vocational education services delivered to special populations, the effects of the Carl D. Perkins Act of 1984 in modernizing the vocational education system, the impact of vocational education on academic skills and employment opportunities, and other topics as mandated by Congress in the Act (Section 403[a]).
