She has Dissociative Identity Disorder, ...

For more than a decade, Paula was misdiagnosed with everything from depression, to post-traumatic stress disorder, to bipolar disorder.

Recently, Paula met with a police sketch artist to visualize her alters.

For Paula, tracking "Freedom's" activities is a necessity.

Evidence of "Teddy Claire's" anger can be seen in Paula's journals.

Over the years, "Teddy Claire's" anger has driven Paula to become more destructive.

mental facility to help control her self-destructive behavior.

Over the years, Paula has continued to use the journals to better understand her alters.

Four of Paula's alters are male.

One of Jonathan's talents is shooting backward free throws.

Testing with an EEG machine will measure brain activity

will measure brain activity, heart rate and other physical data as Paula switches between alters.

The process is known as integration.

Today, Paula continues to undergo treatment for her D.I.D.
