Unbroken

During the bleak, heartbreaking days of early 1942, when beleaguered Malta was reeling under bombardment and blockade and Rommel was making his last desperate thrust towards Egypt, only one British submarine was operating in the western Mediterranean - the tiny, 600-ton *Unbroken*. In twelve months in the Med, *Unbroken* sank over 30,000 tons of enemy shipping, took part in four secret operations, three successful gun actions, and survived a total of over 400 depth charges, as well as innumerable air and surface attacks. This account of the 26-year-old Alastair Mars' command of this outstandingly successful submarine embraces her construction, sea trials and voyage to Gibraltar preparatory to her vital role in the Mediterranean. Once there, she was responsible for the destruction of two Italian cruisers and played a pivotal part in Operation Pedestal, the convoy that saved Malta from surrender. Alastair Mars writes simply and without pretension, and his words evoke the claustrophobic yet heroic world of the submariner.

'Unbroken'

After six years in the Royal Navy, Joel Blamey was conscripted into Britain's submarine service in 1926, aged 22. He went on to serve an unprecedented 28 years as a submariner, surviving peacetime accidents and World War II. At the age of 50, Joe returned to general service. He served on several submarines and survived several accidents, such as hitting an underwater pinnacle in Sidon and a collision in *Seahorse*, from which he was transferred before it was lost to enemy action.

Unbroken

We Come Unseen, first published in 2001, follows the careers of six Royal Navy submariners from their graduation from Dartmouth's Britannia Royal Naval College in 1963, just after the Cuban Missile Crisis, to the fall of the Berlin Wall in 1989. Between these dates, it seemed that nuclear war was never far away - and Jim Ring explains not only the nuclear threat and its beginnings in the last days of the Second World War, but why the Polaris and Trident submarines ('capable of inflicting the damage of the bombs that fell on Hiroshima and Nagasaki many times over'), and their accompanying attack submarines, were critical to avoiding war. Alongside a gripping narrative of the Cold War game of hide-and-seek played out under the waves of the northern seas, Ring gives an account of the history of submarine warfare from its earliest, pre-nuclear days to the 1982 combat in the Falklands.'A welcome acknowledgement of one of the Cold War's little-known aspects.' A Sub and a Submarine

Launched in 1942 as World War II was raging, HMS Unruffled patrolled the oceans for the remainder of the hostilities, destroying nearly 40,000 tons of enemy shipping - and one train - before retiring, battered and bruised but glorious, and without losing a man. James Gregan's home town of Colchester adopted the vessel and took its gallant crew to its heart, and more than 70 years on, Gregan has written this book to celebrate the forgotten submarine which he describes as 'not just another piece of war machinery but a boat which helped thirty-three heroes to survive a war when so many brave young men did not return'. The book is a detailed, thoroughly-researched account of Unruffled's three and a half years of service from Norway to the Mediterranean and from Scotland to Bermuda, with detailed accounts of every encounter, every moment of fear and every hour of glory.ÿ

#1 NEW YORK TIMES BESTSELLER • The incredible true story of survival and salvation that is the basis for two major motion pictures: Unbroken and Unbroken: Path to Redemption. "Extraordinarily moving . . . a powerfully drawn survival epic."—The Wall Street Journal Hailed as the top nonfiction book of the year by Time magazine • Winner of the Los Angeles Times Book Prize for biography On a May afternoon in 1943, an Army Air Forces bomber crashed into the Pacific Ocean and disappeared, leaving only a spray of debris and a slick of oil, gasoline, and blood. Then, on the ocean surface, a face appeared. It was that of a young lieutenant, the plane's bombardier, who was struggling to a life raft and pulling himself aboard. So began one of the most extraordinary odysseys of the Second World War. The

lieutenant's name was Louis Zamperini. In boyhood, he'd been a cunning and incorrigible delinquent, breaking into houses, brawling, and fleeing his home to ride the rails. As a teenager, he had channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics and within sight of the four-minute mile. But when war had come, the athlete had become an airman, embarking on a journey that led to his doomed flight, a tiny raft, and a drift into the unknown. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, a foundering raft, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. Laura Hillenbrand writes with the same rich and vivid narrative voice she displayed in *Seabiscuit*. Telling an unforgettable story of a man's journey into extremity, *Unbroken* is a testament to the resilience of the human mind, body, and spirit.

The Story of Our Submarines

Nautilus tells the story of the submarine, a vessel which revolutionized naval warfare in the course of 50 years, and the men who designed them and worked on them. In their short history submarines and submersible craft have played a decisive role in two world wars and today they roam the oceans, bearers of nuclear arsenals, ready to surface anywhere and strike any target.

The Secret Service Submarine

In the early morning hours of October 24, 1944, the legendary U.S. Navy submarine *Tang* was hit by one of its own faulty torpedoes. The survivors of the explosion struggled to stay alive one hundred-eighty feet beneath the surface, while the Japanese dropped deadly depth charges. As the air ran out, some of the crew made a daring ascent through the escape hatch. In the end, just nine of the original eighty-man crew survived. But the survivors were beginning a far greater ordeal. After being picked up by the Japanese, they were sent to an interrogation camp known as the "Torture Farm." When they were liberated in 1945, they were close to death, but they had revealed nothing to the Japanese, including the greatest secret of World War II. With the same heart-pounding narrative drive that made *The Bedford Boys* and *The Longest Winter* national bestsellers, Alex Kershaw brings to life this incredible story of survival and endurance.

Unbroken

In this riveting personal account, an authentic American hero relives the perils and triumphs of eight harrowing patrols aboard one of America's most successful World War II submarines. Courageous deeds and terror-filled moments - as well as the endless hard work of maintaining and operating a combat sub - are vividly recalled in James Calvert's candid portrait. From rigorous training and shakedown cruises off the coast of New England, to tense patrols within shouting distance of Japan's major cities, the progress of the newly commissioned USS *Jack* parallels Calvert's own growth from callow ensign to charter member of one of the sharpest attack teams in the fleet.

Nautilus

In 1944 Allied codebreakers learned the Imperial Japanese Navy had dispatched the cargo submarine I-52 to occupied France with tons of military supplies and payment--in gold--for German assistance. I-52 undertook the mission as part of the Yanagi missions, a military program meant to alleviate Japan's desperate need for military material and technical knowledge. After tracking I-52 from Asia to the Atlantic, the Allies destroyed the vessel in a battle that ended the Yanagi missions and left I-52 an unlikely treasure ship on the seafloor. David W. Jourdan adds to the history of I-52 with a spellbinding account of his efforts to find the sunken submarine. One of the first joint American-Russian research

expeditions, the search for the wreck combined a team effort, exhaustive detective work, and a dramatic battle with the sea. The effort paid off when the group found I-52's nearly intact hull three miles down. The expedition also earned an unexpected historical dividend when it uncovered one-of-a-kind recordings of American Avenger torpedo bomber attacks on an enemy submarine. Part war tale and part seagoing adventure, Operation Rising Sun tells the story of the two very different missions to find submarine I-52.

The Secret Service Submarine

This book is essential reading for all those interested in one of the major naval theaters of the Second World War.

Escape from the Deep

The shocking, tragic true story of a strange explosion that wreaked havoc on a Russian nuclear submarine. The true story of the sinking of the Russian nuclear submarine in the Barents Sea on August 12, 2000. Hailed as "unsinkable," the "Kursk" was on maneuvers when mysterious explosions rocked the sub, causing it to sink to the bottom of the sea with its 118-man crew. This in-depth look at the disaster reveals previously unreleased information from family members of the deceased as well as from government officials.

Silent Running

In November 1944, the U.S. Navy fleet lay at anchor deep in the Pacific Ocean, when the oiler USS Mississinewa exploded. Japan's secret weapon, the Kaiten—a manned suicide submarine—had succeeded in its first mission. The Kaiten was so secret that even Japanese naval commanders didn't know of its existence. And the Americans kept it secret as well. Embarrassed by the attack, the U.S. Navy refused to salvage the sunken Mighty Miss. Not until 2001, when a diving team located the wreck, would survivors learn what really happened. In Kaiten, Michael Mair and Joy Waldron tell the full story, from newly revealed secrets of the Kaiten development and training schools to gripping firsthand accounts of U.S. Navy survivors in the wake of the attack, as well as the harrowing recovery efforts that came later. Above Us the Waves

His Majesty's submarine Unbeaten was last heard from via a signal sent to Flag Officer Submarines on 1st November 1942. The signal simply stated 'Operation Bluestone completed'. After this date the 58-metre British U-Class submarine inexplicably disappeared. Unbeaten was fully operational for just over two years. During her short tenure she successfully returned to war-torn Malta many times, symbolically flying her Jolly Roger. 'Being Silent They Speak' endeavours to highlight the varied triumphs, tragedies, events and sacrifices of submarine life during World War II.

A Sub and a Submarine

There has naturally been a great deal of ink spilled during the War on the subject of the U-boat. The British Submarines have worked unseen and unheard of. Occasionally a few official lines have appeared in the newspapers about them, but the very nature of the work they have been doing has precluded any divulging of their activity. With the permission of the Admiralty I am about to speak now of some of the work they have done, and to give their own reports describing some of the many occasions on which they have been in contact with the enemy.

Kursk Down

HMS Conqueror is Britain's most famous submarine. It is the only sub since World War Two to have sunk an enemy ship. Conqueror's sinking of the Argentine cruiser Belgrano made inevitable an all-out war over the future of the Falkland Islands, and sparked off one of the most controversial episodes of twentieth century politics. The controversy was fuelled by a war-diary kept by an officer on board HMS Conqueror, and as a young TV producer in the 1980s Stuart Prebble scooped the world by locating the diary's author and getting his story on the record. But in the course of uncovering his Falklands story, Stuart Prebble also learned a military secret which could have come straight out of a Cold War thriller. It involved the Top Secret activities of the Conqueror in the months before and after the Falklands War. Prebble has waited for thirty years to tell his story. It is a story of incredible courage and derring-do, of men who put their lives on the line and were never allowed to tell what they had done. This story, buried under layers of official secrecy for three decades, is one of Britain's great military success stories and can now finally be told.

Kaiten

This is the story of the Tenth Submarine Flotilla and its part in the Second World War in the Mediterranean, told in the survivors' own words as well as by those British and Maltese civilians who obstinately fought the battle on shore.

Red Star Rogue

The remarkable true story of Eugene Fluckey, the US Navy's most innovative—and aggressive—submarine commander of World War II. Over the course of five combat patrols during the Pacific War, Commander Fluckey reinvented submarine warfare, pioneering audacious strategies to hunt and sink Japanese warships and merchant vessels. At the helm of the USS Barb, he directed his boat to attack warship convoys—never mind the lop-sided odds—and to slip into heavily defended enemy harbors to launch torpedoes at unsuspecting targets. “Lucky” Fluckey's submariners often attacked from the surface, brazenly sinking the enemy with the Barb's deck guns. Once, he even sent sailors ashore on one Japanese island on a perilous mission to blow up a Japanese train. Fluckey and his crew sent an astounding seventeen enemy ships, including an aircraft carrier, to the bottom of the sea. In *Torpedo Run*, acclaimed naval historian Don Keith dives into the most thrilling and dangerous tales of Fluckey's war, as he guides his gallant crew against the Japanese fleet. For his heroism and intrepidity, Fluckey earned four Navy Crosses and the Medal of Honor, and showed what a submarine—and he—was capable of.

Being Silent They Speak

Interweaves the story of Edward L. Beach and the crew of his boat, the USS *Trigger*, with other battle-hardened submarines and the brave men who fought on them.

The Story of Our Submarines

Royal Navy submarine HMS *Poseidon* sank in collision with a freighter during routine exercises in 1931 off the Chinese coast. Thirty of its fifty-six-man crew scrambled out of the hatches as it went down. Of the twenty-six who remained inside, eight attempted to surface using an early form of diving equipment: five of them made it safely to the surface in the first escape of this kind in submarine history and became heroes. The incident was then forgotten, eclipsed by the greater drama that followed in World War II, until news emerged that, for obscure reasons, the Chinese government had salvaged the wrecked submarine in 1972. This lively account of the *Poseidon* incident tells the story of the accident and its aftermath, and of the author's own quest to discover the shipwreck and its hidden history.
