September 11, 2013 marks the 10th anniversary of the Cartagena Protocol on Biosafety

To meet their obligations under the Protocol, many Parties are building capacity through various collaborative activities at all levels

in their efforts to develop and implement their national biosafety frameworks comprising regulatory regimes and administrative systems

Countries are also increasingly sharing their biosafety information through the information-sharing facility under the Protocol known as the Biosafety Clearing-House

The national nodes of the BCH and the Central Portal of the BCH are used to facilitate the exchange of scientific, technical environmental and legal information on LMOS

Countries are also actively promoting awareness-raising and public consultation on biosafety issues

Developing and implementing a communication strategy is essential to promote public awareness, education and participation including access to information

Countries are increasingly also shipping LMOS that are accompanied by documents clearly identifying these organisms

Parties are also establishing national and regional standards to identify shipments of LMOs

Parties to the Cartagena Protocol are in the process of ratifying and promoting the Supplementary Protocol.
