Violence Against Women in Asian Societies

Violence against women is a violation of women's human rights and a priority public health issue. It is endemic worldwide. While much has been written about it in industrialized societies, there has been relatively little attention given to such violence in Asian societies. This book addresses the structural and interpersonal violences to which women are subject, both under conditions of conflict and disruption, and where civil society is relatively ordered. It explores sexual violence and coercion, domestic violence, and violence within the broader community and the state, avoiding sensationalised accounts of so-called cultural practices in favour of nuanced explorations of violences as experienced in Cambodia, Thailand, Burma, Indonesia, Malaysia, the Philippines, Bangladesh, and India.

The Political Economy of Violence Against Women

Violence against women is a major problem in all countries, affecting women in every socio-economic group and at every life stage. Yet, when women enjoy good social and economic status they are less vulnerable to violence across all societies. This book develops a political economy approach to understanding violence against women - from the household to the transnational level - accounting for its globally increasing scale and brutality.

Violence Against Women

Women generally face sexual harassment, sexual abuse, or domestic abuse at higher rates than men. Violence against Women explores the history behind these issues, the effects of these issues on women and society, and ongoing efforts to stop sexual harassment and domestic violence.

Women, Violence and Social Control

Violence against women permeates our society at every level, in every setting. Murder, rape, intimidation, pornography, workplace harassment, incest are all part of a general belief built into the roots of patriarchal society: Women are proper targets of male violence. The chapters in this book,

contributed by some of the most prolific contemporary writers on women's issues, explore this culture of violence and oppression, examining its ideological underpinnings and its structural supports in the social, political and legal systems that protect the violent by blaming the victim.

Violence Against Women

Violence against women is a pervasive problem in society and responding appropriately to those who experience it and those who perpetrate it is a constant challenge for social work, health and related professions today. This volume seeks to address issues surrounding violence against women at all levels, from its root causes to the specific needs arising in victims of gendered abuse from a particular social or ethnic group. Drawing on the expertise of a range of 'front line' service providers and practitioners as well as academic researchers, it seeks to provide those working in social work and related professions with up-to-date coverage of the major issues pertaining to violence against women, and suggest ways to tackle the rise in violence against women by translating knowledge into effective training and practice. This important book will be essential reading for practising social workers and allied professions, as well as academics and students.

Violence Against Women

This book provides university students, policy makers, activists, public health workers, clinicians, and lay citizens alike with a vivid overview of the scope of the problem of gender-based violence worldwide, as well as a sense of the important work now underway to eradicate it. An integration of a vast range of data and insights from all the major disciplines that have contributed to our understanding of this problem, this book is invaluable as a classroom text. The authors have been guided throughout this work by the desire to contribute a document that would move the current international discourse along by providing an historical, interdisciplinary overview that is at once critical, constructive, and visionary.

Overcoming Violence Against Women and Girls

Involving men to stop violence against women is a global trend, with celebrity-endorsed campaigns such as HeForShe and White Ribbon being hailed as progress in changing male behaviour. But the question remains: Has men's involvement resulted in positive change, or has it reinforced the belief that women need to be rescued by men? *Involving Men in Ending Violence against Women* provides a feminist analysis of men's motivations for joining violence against women's movement. Through extensive fieldwork in Afghanistan, Pakistan and East Timor, this innovative title explores the roles men play in violence against women programs. Indeed, while there are growing voices that question male advocacy and activism in the violence against women campaign, this is the first monograph which provides empirical and critical analysis of how men's feminist involvement is translated into benevolent patriarchy. Seeking to subvert mainstream narratives which accept male activism without questions, this controversial yet enlightening title will appeal to undergraduate and postgraduate students, including postdoctoral researchers, interested in fields such as Gender and Sexualities, Political Science, Feminist Studies and Southeast Asian Studies.

Involving Men in Ending Violence against Women

Arguing that law must be looked at holistically, this book investigates the 'hidden gender' of the so-called neutral or objective legal principles that structure the law addressing violence against women. Adopting an explicitly feminist perspective, it investigates how legal responses to violence against women presuppose, maintain and perpetuate a certain context that may not in fact reflect women's experiences. Carline and Eastaugh draw upon relevant legislation, case law and secondary studies from a range of territories, including Australia, England and Wales, the United States, Canada and Europe, to contextualize and critique different policy responses. They go on to examine the potential and limits of law, making recommendations for best practice models of policymaking and law reform. Aiming to help improve government, community and legal responses to women who experience violence, *Shades of Grey – Domestic and Sexual Violence Against Women: Law Reform and Society* will assist law-makers, academics, policymakers and a wider audience in understanding the complexities of violence against women.

Shades of Grey - Domestic and Sexual Violence Against Women

Based on large research material collected in Hungary, Macedonia, Serbia and Bulgaria Social change, Gender and Violence is the book which explores the impact of transition from communism and war on everyday life of women and men, as well as the way how everyday life and gender related changes affect women's vulnerability to domestic violence and trafficking in women. The book also explores the impact of micro level changes on development of civil society, women's movement, and legal and policy changes regarding violence against women. This is a unique book, which tries to look at violence against women as connected to oppression of both women and men. It argues that violence against women in post-communist and war affected societies is significantly connected to the increase of social stratification, economic hardship, unemployment, instability, uncertainty and related social stresses, changes in gender identity and structural inequalities brought by new world order. Using largely accounts of more than hundred interviewed people, the author shows vividly how, in post-communist societies, the contradictions of capitalism are interlaced with the mostly negative relics of communism. Moreover, the book shows how contradictory processes in post-communist societies have led to a rather paradoxical result: political pluralism and a capitalist economic system generated both violence against women and a women's movement, albeit not the conditions for a reduction of violence.

Social Change, Gender and Violence

Demonstrates how refuges and shelters stand at the core of the battered women's movement, and how the movement has challenged the police, courts and social services to provide greater assistance to women in both Britain and the US.

Women, Violence and Social Change

In Violence Against Women, award-winning author Walter S. DeKeseredy offers a passionate but well-documented sociological overview of a sobering problem. He starts by outlining the scope of the challenge and debunks current attempts to label intimate violence as gender neutral. He then lays bare the structural practices that sustain this violence, leading to a discussion of long- and short-term policies to address the issue. DeKeseredy includes an examination of male complicity and demonstrates how boys and men can change their roles. Throughout, he responds to myths that dismiss threats to women's health and safety and provides an impassioned call to action for women, men, and policymakers.

Violence Against Women

Highlighting gendered violence across layers of social and political organization, from the military to the sexual, this book explores the connections between international security, intra-state conflict and 'domestic' violence. International in scope, it makes the links between the local and the global and between the public and the private, in its discussion of gendered violence. Claiming that it is not enough to simply 'add' women to international relations theory, the contributors to this book brilliantly demonstrate how much more fruitful an in-depth analysis of the different layers of gendered violence can be. This book will be necessary reading for students and academics of women's studies, international relations and political theory.

States of Conflict

Editor Kate Burns has selected a diverse array of primary source writings to provide your readers with a comprehensive look at violence against women. Written by respected experts in the field, these essays present important opinions on issues such as rape, genital mutilation, domestic abuse, and femicide. Different viewpoints are organized into a question-and-response format in each chapter, allowing readers to easily summarize them. Contains extensive book and periodical bibliographies

Violence Against Women

Violence against women is one factor in the growing wave of alarm about violence in American society. High-profile cases such as the O.J. Simpson trial call attention to the thousands of lesser-known but no less tragic situations in which women's lives are shattered by beatings or sexual assault. The search for solutions has highlighted not only what we know about violence against women but also what we do not know. How can we achieve the best understanding of this problem and its complex ramifications? What research efforts will yield the greatest benefit? What are the questions that must be answered? Understanding Violence Against Women presents a comprehensive overview of current knowledge

and identifies four areas with the greatest potential return from a research investment by increasing the understanding of and responding to domestic violence and rape: What interventions are designed to do, whom they are reaching, and how to reach the many victims who do not seek help. Factors that put people at risk of violence and that precipitate violence, including characteristics of offenders. The scope of domestic violence and sexual assault in America and its consequences to individuals, families, and society, including costs. How to structure the study of violence against women to yield more useful knowledge. Despite the news coverage and talk shows, the real fundamental nature of violence against women remains unexplored and often misunderstood. *Understanding Violence Against Women* provides direction for increasing knowledge that can help ameliorate this national problem.

Understanding Violence Against Women

This book aims to bring together the pioneering research on gender based violence that has been conducted by the Centre for Gender and Violence Research at the School for Policy Studies, University of Bristol. Topics discussed include violence in young people's relationships, prostitution policy, disabled women's experiences of domestic violence, men as victims of domestic violence, feminist movements and methodological concerns. This book will have a wide appeal, as each individual chapter builds on and contributes to existing global and national concerns about gender based violence. The book starts with an exploration of key theoretical, conceptual and methodological issues in researching gender based violence, then moves on to look at specific national (UK) based empirical studies. The final section brings together a wide range of research from diverse contexts, ranging from China, Iran, India and refugee camps in Rwanda. The book will be an invaluable resource for researchers, students and practitioners who have an interest in this area, as well as for policymakers around the world. It will also be of interest to the general reader who wants to learn more about what is now a highly topical issue.

Understanding Gender Based Violence

Around the world, discriminatory legislation prevents women from accessing their human rights. It can affect almost every aspect of a woman's life, including the right to choose a partner, inherit property, hold a job, and obtain child custody. Often referred to as family law, these laws have contributed to discrimination and to the justification of gender-based violence globally. This book demonstrates how women across the world are contributing to legal reform, helping to shape non-discriminatory policies and to counter current legal and social justifications for gender-based violence. The book takes case studies from Brazil, India, Iran, Lebanon, Nigeria, Palestine, Senegal, and Turkey, using them to demonstrate in each case the varied history of family law and the wide variety of issues impacting women's equality in legislation. Interviews with prominent women's rights activists in three additional countries are also included, giving personal accounts of the successes and failures of past reform efforts. Overall, the book provides a complex global picture of current trends and strategies in the fight for a more egalitarian society. These findings come at a critical moment for change. Across the globe, family law issues are contentious. We are simultaneously witnessing an increased demand for women's equality and the resurgence of fundamentalist forces that impede reform, invoking rules rooted in tradition, culture, and interpretations of religious texts. The outcome of these disputes has enormous ramifications for women's roles in the family and society. This book tackles these complexities head on, and will interest activists, practitioners, students, and scholars working on women's rights and gender-based violence.

Feminist Advocacy, Family Law and Violence against Women

This is the first anthology to take a theoretical look at violence against women. Each essay shows how philosophy provides a powerful tool for examining a difficult and deep-rooted social problem. Stanley G. French, Wanda Teays, and Laura M. Purdy, all philosophers, present a familiar phenomenon in a new and striking fashion. The editors employ a two-tiered approach to this vital issue. Contributors consider both interpersonal violence, such as rape and battering; and also systemic violence, such as sexual harassment, pornography, prostitution, and violence in a medical context. The editors have further broadened the discussion to include such cross-cultural issues as rape in war, dowry deaths, female genital mutilation, and international policies on violence against women. Against this wide range of topics, which integrate personal perspectives with the philosophical, the contributors offer powerful analyses of the causes and effects of violence against women, as well as potential policies for effecting change.

Violence against Women

While forced marriage and 'honour-based' violence attract media attention, little is known about the issues and experiences of South Asian women and children who are affected by gendered violence. This book explores the key theoretical and empirical issues involved in gendered violence, ethnicity and South Asian communities. The editors draw together leading researchers and practitioners to provide a critical reflection of contemporary debates and consider how these reflections can inform policy, research and practice. The contributors consider the primacy of religion and culture, and how South Asian women face multiple and intersecting forms of violence. Future directions for facilitating improved services for survivors of violence against women from different racial and ethnic backgrounds are also proposed. Violence Against Women in South Asian Communities will have widespread relevance for professional academics, researchers, students, policy makers, practitioners and anyone concerned with gendered violence within South Asian communities.

Violence Against Women in South Asian Communities

Violence against women is now being recognised as a serious, widespread problem, with enormous social costs and individual and community impacts. In Australia, one in three women over the age of 15 years have experienced physical assault; over half of all women have experienced at least one incident of physical and/or sexual violence in their lifetime. Men's violence affects women across all sectors of society and includes sexual, emotional, psychological and financial abuse. A wide range of attitudes and beliefs continue to excuse, justify, minimise and hide physical and sexual violence against women. As a society, we need to address these misconceptions and entrenched gender inequality to effectively respond to violence against women and their children, and ultimately to prevent it. This title details the various forms of violence used against women, and presents the latest research findings on prevalence and attitudes. The book also focuses on understanding and countering sexual assault and harassment, and explores the latest approaches to dealing with genderbased violence. Although violence against women is a confronting social problem, it is ultimately preventable.

Violence Against Women

Based on a series of international workshops sponsored by the Harry Frank Guggenheim Foundations, this cutting-edge volume advances theories, methodologies, and policy analyses relating to various forms of violence against women. Under the skillful editorship of Rebecca Emerson and Russell P. Dobash, Rethinking Violence Against Women is the joint effort of recognized anthropologists, psychologists, philosophers, sociologists, and historians in the field. Divided in three parts, this text takes a comprehensive examination of the following topics: +

Rethinking Violence Against Women

8. Challenging the state.

Ending Violence Against Women

Prevention of Violence Against Women and Girls argues that women and girls are vulnerable across all areas of society, and that therefore a commitment to end violence against women and girls needs to be embedded into all development programmes, regardless of sectorial focus. This book presents an innovative framework for sensitisation and action across development programmes, based on emerging best practices and lessons learnt, and illustrated through a number of country contexts and a range of programmes. Overall, it argues that SDG 5 can only be achieved with a systematic model for mainstreaming an end to violence against women and girls, no matter what the priorities of the particular development programme might be. Demonstrating how the approach can be applied across contexts, the authors explore cases from the energy sector, health and humanitarian intervention, and from countries as varied as South Sudan, Myanmar, Rwanda, Nepal, and Kenya. Drawing on nearly three decades of experience working on gender, health, and violence against women programmes as both practitioners and academics, the authors present key lessons which can be used by students, researchers, and practitioners alike.

Prevention of Violence Against Women and Girls

Worldwide, patterns of violence against women differ markedly from violence against men. For example, women are more likely than men to be sexually assaulted or killed by someone they know. The

United Nations has defined violence against women as "gender-based" violence, to acknowledge that such violence is rooted in gender inequality and is often tolerated and condoned by laws, institutions, and community norms. Violence against women is not only a profound violation of human rights, but also a costly impediment to a country's national development. While gender-based violence occurs in many forms throughout the life cycle, this review focuses on two of the most common types-physical intimate partner violence and sexual violence by any perpetrator. Unfortunately, the knowledge base about effective initiatives to prevent and respond to gender-based violence is relatively limited. Few approaches have been rigorously evaluated, even in high-income countries. And such evaluations involve numerous methodological challenges. Nonetheless, the authors review what is known about more and less effective-or at least promising-approaches to prevent and respond to gender-based violence. They present definitions, recent statistics, health consequences, costs, and risk factors of gender-based violence. The authors analyze good practice initiatives in the justice, health, and education sectors, as well as multisectoral approaches. For each of these sectors, they examine initiatives that have addressed laws and policies, institutional reforms, community mobilization, and individual behavior change strategies. Finally, the authors identify priorities for future research and action, including funding research on the health and socioeconomic costs of violence against women, encouraging science-based program evaluations, disseminating evaluation results across countries, promoting investment in effective prevention and treatment initiatives, and encouraging public-private partnerships.

Preventing and Responding to Gender-based Violence in Middle and Low-income Countries

This textbook provides students across Social Sciences, Humanities, Politics, and International Studies with an in-depth understanding of the issues, policies, and strategies for addressing the symptoms and root causes of violence against women (VAW) in sub-Saharan Africa. This text uses the United Nations Security Council's Resolution 1325 (UNSCR 1325) on Women, Peace and Security in Eastern and Southern Africa as a framework to present the causes and impacts of VAW and to trace the journey of sub-Saharan African countries toward gender equality. It also provides an overview of the policy and legislative frameworks that underpin the progress, challenges, and achievements of addressing VAW based on four key pillars: prevention, protection, participation, and relief and recovery. Chapters provide a wealth of knowledge, as the book draws on academic literature; national, regional, and international legislations; and data collected from field research, and makes use of end-of-chapter discussion questions and quick study guides. Students will come away equipped with the tools, resources, and knowledge necessary to address and fix VAW in sub-Saharan Africa and beyond.

Understanding Violence Against Women in Africa

This book draws together both: theory and practice on minority/migrant women and gendered violence. The interplay of gender, ethnicity, religion, class, generation and sexuality in shaping the lives, experiences and choices of minority/migrant women affected by violence has not always been adequately theorised within much of the existing writing on violence against women. Feminist theory, especially the insights provided by the concept of intersectionality, are central to the editors' conceptual frameworks.

Ending Violence Against Women

8. Challenging the state.

Violence against Women and Ethnicity: Commonalities and Differences across Europe

EPUB and EPDF available Open Access under CC-BY-NC-ND licence. Some have argued that more men should play a role in ending violence against women – but what do we know about those men who are already doing so? Using case studies from Spain, Sweden and the UK, this book highlights those men who are already taking action. Examining the social, cultural, political and economic factors that support men to take a public stance, the authors explore what we can learn from their experiences in order to help build the movement to end violence against women. This important study will inform scholars and students of sociology and gender studies, as well as social movements and organisations working to involve and engage men and boys in achieving gender equality.

Ending Violence Against Women

"Social Suffering" takes in the human consequences of war, famine, depression, disease and torture, problems that result from what political, economic and institutional power does to people. Experts have joined together to investigate the cultural representations of.

Men's Activism to End Violence Against Women

From the Preface: "Contemporary efforts to end violence against women are entering a fourth decade . . . The goal of this anthology is to assemble into one edited volume many of the classic, ground-breaking pieces that have shaped the field . . . The works in this book are broadly inclusive of the domains that most authorities would consider violence against women. We have divided the classics into three general areas: Sexual Violence against Women; Physical Violence against Women; and Perpetrators of Violence against Women. Following each chapter, we have included commentaries by original authors (whenever possible) about their own work. We invited the authors of these classic papers to write reflections about their work and to specifically address why they decided to study and write about their particular issue at the time and to consider the impact that their work has had on the field of violence against women . . . Taken together, these twenty-three commentaries are empowering--they force us to remember the passion of those who have done this challenging work for decades. They are an amazing group of people! Reading these commentaries is also empowering in that we are reminded of the work that still must be done and the need to continue the struggle against all forms of violence." Raquel Kennedy Bergen, St. Joseph's University Jeffrey L. Edleson, University of Minnesota Claire M. Renzetti, St. Joseph's University

Social Suffering

Responding to the targeted destruction of women, Fields argues for establishing Gender as a protected class under the Genocide Convention. Cases are explored, historically, anthropologically, psychologically and sociologically, from the author's field research, as well as focuses on morbidity, mortality and demographic documentation data.

Violence Against Women

This text offers a balance of clinical and social psychological theory and research, as well as prevention and intervention techniques with the purpose of understanding and ultimately ending gender-based violence. The authors address several forms of violence, including rape, intimate partner violence, stalking, and sexual harassment in a contemporary linguistic style carefully crafted to avoid victim blaming. Although most men do not perpetrate violence against women, such violence is not a "women's" issue; it will take the strength and courage of both women and men to solve this human issue. This book moves full circle in its coverage of the topic as it explores the silent epidemic of men's violence against women, the grave consequences of this violence on both individuals and society, and the historical and current foundations that serve to both criminalize and tolerate men's violence against women. The authors describe a variety of efforts to treat both offenders and victims highlighting both their vital importance and their insufficiency in preventing violence. The final part of the book contains descriptions of model violence prevention approaches and techniques for implementing these programs. Readers are empowered as they discover how they can be part of the solution. Men's Violence Against Women is intended as a text for courses in gender-based violence in a variety of disciplines including psychology, sociology, and women's, men's, and/or gender studies. The book is also a valuable resource for college and community gender-based violence prevention and intervention program providers.

Against Violence Against Women

Chapters include: Is Violence Against Women a Serious Problem? What Causes Violence Against Women? Are Current Criminal Justice Approaches to Domestic Violence Effective? How Can Violence Against Women Be Reduced?

Men's Violence Against Women

This collection of articles from development practitioners and feminist activists places violence against women, both direct and indirect, in the context of development. Violence is both a human rights issue and an obstacle to women's participation in development. Writers here focus on campaigning and advocacy work as well as work with women who have experienced violence, in countries including

Russia, Guinea-Bissau, and India. The collection includes accounts of work with women who have been sexually assaulted and those who have undergone cultural practices such as female genital mutilation and early marriage.

Violence Against Women

Throughout the world, one in three women will experience violence in their lifetime, such as beating, rape, or assault, yet it continues to be downplayed by the general public and by policymakers who fail to create and fund programmes to eradicate it. However, there have been some significant achievements made over the last few decades to combat gender-based violence and to promote women's empowerment. This publication examines the various forms of violence experienced by women around the world, drawing on the findings of research conducted by expert consultants. It highlights examples of good practices and explores the reasons why some activities have failed to meet their objectives. It goes on to consider policy options available and makes recommendations for actions required to build on these achievements. The report includes details of legislation on gender-based violence by country, selected indicators on violence against women, and information on projects supported by the UNIFEM Trust Fund to eliminate violence against women.

Violence Against Women

This important and timely reference work examines violence against women and gender-based discrimination around the world, providing a global perspective on why this kind of oppression is still occurring in the 21st century. Within the past decade, the attention that has been paid to violence against women by international government organizations such as the United Nations and World Health Organization has grown. Yet silences around the violent treatment of women remains across the world, particularly in those countries where women's rights are not protected and statistics are not available. *Women and Violence* encompasses a global perspective of the history, causes, and complex underpinnings of gender and violence from a multidimensional and cross-disciplinary perspective. Chapters focus on a specific world region, including North America, Latin America and the Caribbean, Europe, North Africa and the Middle East, Sub-Saharan Africa, Central and East Asia, South and Southeast Asia, and Oceania. Each chapter begins with a general discussion on its world region, then focuses on particular forms of violence against women in the more specific contexts of particular countries and in relation to the wider region. Readers will be able to make cross-cultural comparisons, learning how to view gender-based violence and women's advocacy against discrimination that is occurring around the world.

Not a Minute More

This book argues that women and girls are vulnerable across all areas of society, and that therefore a commitment to end violence against women and girls needs to be embedded into all development programmes, regardless of sectorial focus.

Women and Violence

This report, the ninth edition of the biennial OECD overview of social indicators, addresses the growing demand for quantitative evidence on social well-being and its trends. This year's edition presents 25 indicators, several of which are new, and includes data for 36 OECD member countries and ...

Prevention of Violence Against Women and Girls

How can we understand and contest the global wave of violence against women? In this book, Alison Brysk shows that gender violence across countries tends to change as countries develop and liberalize, but not in the ways that we might predict. She shows how liberalizing authoritarian countries and transitional democracies may experience more shifting patterns and greater levels of violence than less developed and democratic countries, due to changes and uncertainties in economic and political structures. Accordingly, Brysk analyzes the experience of semi-liberal, developing countries at the frontiers of globalization--Brazil, India, South Africa, Mexico, the Philippines, and Turkey--to map out patterns of gender violence and what can be done to change those patterns. As the book shows, gender violence is not static, nor can it be attributed to culture or individual pathology--rather it varies across a continuum that tracks economic, political, and social change. While a combination of international action, law, public policy, civil society mobilization, and changes in social values work to decrease

gender violence, Brysk assesses the potential, limits, and balance of these measures. Brysk shows that a human rights approach is necessary but not sufficient to address gender violence, and that insights from feminist and development approaches are essential.
