Intercultural Education

Is popular culture merely a process of creating, marketing, and consuming a final product, or is it an expression of the artist's surroundings and an attempt to alter them? Noted Argentine/Mexican anthropologist Néstor García Canclini addresses these questions and more in *Transforming Modernity*, a translation of *Las culturas populares en el capitalismo*. Based on fieldwork among the Purépecha of Michoacán, Mexico, some of the most talented artisans of the New World, the book is not so much a work of ethnography as of philosophy—a cultural critique of modernism. García Canclini delineates three interpretations of popular culture: spontaneous creation, which posits that artistic expression is the realization of beauty and knowledge; "memory for sale," which holds that original products are created for sale in the imposed capitalist system; and the tourist outlook, whereby collectibles are created to justify development and to provide insight into what capitalism has achieved. *Transforming Modernity* argues strongly for popular culture as an instrument of understanding, reproducing, and transforming the social system in order to elaborate and construct class hegemony and to reflect the unequal appropriation and distribution of cultural capital. With its wide scope, this book should appeal to readers within and well beyond anthropology—those interested in cultural theory, social thought, and Mesoamerican culture.

Harry's Holiday Level 1 Beginner/Elementary

This is the first book on the acquisition of Spanish that provides a state-of-the-art comprehensive overview of Spanish morphosyntactic development in monolingual and bilingual situations. Its content is organized around key grammatical themes that form the empirical base of research in generative grammar: nominal and verbal inflectional morphology, subject and object pronouns, complex structures involving movement (topicalizations, questions, relative clauses), and aspects of verb meaning that have consequences for syntax. The book argues that Universal Grammar constrains all instances of language acquisition and that there is a fundamental continuity between monolingual, bilingual, child and adult early grammatical systems. While stressing their similarities with respect to linguistic representations and processes, the book also considers important differences between these three acquisition situations with respect to the outcome of acquisition. It is also shown that many linguistic properties of Spanish are acquired earlier than in English and other languages. This book is a must read for those interested in the acquisition of Spanish from different theoretical perspectives as well as those working on the acquisition of other languages in different contexts.

"Inclusive education had its origins in the move of disabled children from segregated special settings to mainstream classrooms, on the premise that every child has the right to access the curriculum and other experiences of publicly funded schools. This book reports on studies by leading researchers in the USA, Britain, Australia, New Zealand, Norway and the Netherlands that set out to examine the meanings of inclusion in their various cultures and school systems. The emphasis in each of the studies is on attending to the voices of those most directly involved - the students, parents and teachers. They tell us about the complexity of the issues in this area, suggesting guidelines for teachers and other professionals working with disabled children."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Acquisition of Spanish

Ethnocriticism moves cultural critique to the boundaries that exist between cultures. The boundary traversed in Krupat's dexterous new book is the contested line between native and mainstream American literatures and cultures. For over a century the discourses of ethnography, history, and literature have sought to represent the Indian in America. Krupat considers all these discourses and the ways in which Indians have attempted to "write back," producing an oppositional—or at least a

parallel—discourse. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1992.

Second Language Pedagogy

Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. Unsustainable patterns of economic production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future. It proposes that we consider education and knowledge as global common goods, in order to reconcile the purpose and organization of education as a collective societal endeavour in a complex world.

Platero and I

They said Steve Biko was a man of violence; then why did he talk of peace? They said he wanted revolution; so why did he talk of friendship? They said he died of hunger; why was his body broken and bruised? This is the story of a man's fight with the government of South Africa. It is the story of all people who prefer truth to lies. It is the story of all people who cry 'Freedom', and who are not afraid to die.

Neglected Crops

Why is historicism a problem? Why do we need a new historicism? This text considers these questions and aims to show that the problem of historicism, and new historicism, is more than just a problem of knowledge-validity and that new historicism is not so much an answer to the difficulties of history writing but the opening of new questions.

Get Set - Go!: 4: Pupil's Book

Under the aegis of the two grandes dames of international studies in psychology, 23 experts examine violence in all of its multivarious forms around the world. They find that it is present in practically every society, at every socioeconomic level, and in every age group. The first group of essays look at violence as a societal phenomenon—its motivational aspects as related to, for example, terrorism or machismo. The second group of essays discuss violence involving children—incest, trauma, delinquency, school violence, and the death penalty for youths. The last section looks at adult violence, particularly within the family. Marital violence, domestic violence, substance abuse, women and crime, and maltreatment of elders are all presented. The consensus of the study is that the eradication of violence is essential to a better world and is possible. Proof of its possibility is given in the concluding description of life in Ladakh, a peaceable society of Tibetans in northwestern India.
