Recommendation for Directors To Amend the Company Certificate of Incorporation

Does Anyone Have any Further Business To Come before this Meeting before We Adjourn

Elaborate upon the Logic of Adding Two Family Members to the Board of Trustees

And the Manager Figures Out a Way To Do the Business with Less Capital We Make Credit Him a Very at a Very High Rate Same Rate We Would Use in Charging Him in Terms of His Bonus Arrangement so We Believe in Managers Knowing that Money Costs Money and I Would Say that Just Generally My Experience and Business Is that Most Managers When Using Their Own Money Understand that Money Costs Money but Sometimes Managers When Using Other People's Money Start Thinking of It a Little Bit like Free Money and that's a Habit We Don't Want To Encourage

From the Company Standpoint Merely To Protect His Own Position but the the Reason for Buying Insurance Is whether and this Is True Life Insurance It's True It's True a Property Casually to a Personal Insurance That's True of Commercial Insurance Is To Protect against Losses That You'Re Unwilling or Unable To To Bear Yourself or the Second Reason Which Occasionally Comes Up Is if You Think the Insurance Company Is Actually Selling You a Policy That's Too Cheap so that You Really Expect to over a Period of Time To Do Have a Mathematical Advantage

The Second Reason Which Occasionally Comes Up Is if You Think the Insurance Company Is Actually Selling You a Policy That's Too Cheap so that You Really Expect to over a Period of Time To Do Have a Mathematical Advantage by Buying the Insurance Well We Try To Avoid Selling the Second Kind and To Concentrate on Selling the First Kind and We Think any Company Wien Sell Insurance Too and of Course We Much of the Insurance We Sell this to Other Insurance Companies I Mean We Are Reinsure in Very Large Part We Are Selling Them Insurance against a Loss That They Are either Unable or Unwilling To Sustain and a Typical Case You Know Might Be a Company That Had a Lot of Homeowners Policies in in California

Seems that There's a Relative Ease of Entry into that Business through Bermuda Based Companies and Others and Given the Importance of that Business to the Overall Company I'M Curious How the the Ease of Entry into the Business Affects Its Long Term Competitive Position in Its Rates of Return Well You'Re Very Right There Is an Ease of Entry into the Catastrophe Business and and You Know It's It's Sort Of Attractive for It It's Particularly Attractive for Promoters because if You Start an Insurance Company To Write Earthquake Insurance in California

You'Re Very Right There Is an Ease of Entry into the Catastrophe Business and and You Know It's It's Sort Of Attractive for It It's Particularly Attractive for Promoters because if You Start an Insurance Company To Write Earthquake Insurance in California and You Raise a Few Hundred Million Dollars

and You You You'll either Have Essentially no Losses or You if You Write Enough of It You'll Go Broke and Most Years You'll Have no Losses so if Your Intention Is To Sell Your Stock Publicly in a Year or Two That the Odds Are Very Good that You Will Have a Beautiful Record for a Couple of Years and and and and You Can You Can Sell

Over a Longer Period of Time whether because of Volatility It's Much Harder to To Assess whether What the Average Returns Might Be from a Business and the Answer Is Charlie and I Probably if We Were To Try and Write the Forecast for the Next Two or Three Years We Would Not Have a High Feeling That We Had a High Probability of Being Able To Predict What that Company or Other Companies in that Industry Either Would Earn Three Years Out or Would Probably Have in the Way of Average Earnings Our Own Commitment Is to a 700 Million Dollar Preferred

The Central Poland China Record;

Invasive non-native species are a major threat to global biodiversity. Often introduced accidentally through international travel or trade, they invade and colonize new habitats, often with devastating consequences for the local flora and fauna. Their environmental impacts can range from damage to resource production (e.g. agriculture and forestry) and infrastructure (e.g. buildings, road and water supply), to human health. They consequently can have major economic impacts. It is a priority to prevent their introduction and spread, as well as to control them. Freshwater ecosystems are particularly at risk from invasions and are landscape corridors that facilitate the spread of invasives. This book reviews the current state of knowledge of the most notable global invasive freshwater species or groups, based on their severity of economic impact, geographic distribution outside of their native range, extent of research, and recognition of the ecological severity of the impact of the species by the IUCN. As well as some of the very well-known species, the book also covers some invasives that are emerging as serious threats. Examples covered include a range of aquatic and riparian plants, insects, molluscs, crustacea, fish, amphibians, reptiles and mammals, as well as some major pathogens of aquatic organisms. The book also includes overview chapters synthesizing the ecological impact of invasive species in

fresh water and summarizing practical implications for the management of rivers and other freshwater habitats.
