1. Be able to remain calm and take control of emotionally-charged situations

I am someone who takes my work seriously and I understand there is no room for error in respect of being a midwife in both the undertaking of your professional duties and also in respect of the advice you offer women and families during their time under your

The main role of a midwife is to prepare women for the delivery of new life and to also provide support and guidance during all stages of the pregnancy, throughout the process of labour itself and also during the early days of the postnatal process.

The main strengths I possess are an ability to remain calm under difficult and pressurized situations. As a Midwife, this is a core skill and without it, you won't be able to carry out your duties professionally. The most important thing for me is to establish control from the outset and make everyone aware of what is going to happen during the birth and also what is expected of them.

The most rewarding aspects will be building up positive and professional relationships with both parents during the antenatal period, which would then enable to me to provide the best levels of care, support and guidance during birth.
