Intro

A gunshot wound victim is transported via EMS to the ED with no next of kin present. The patient needs emergency surgery to save his life. What is the proper way for the nurse to obtain informed consent since the patient cannot sign?

The first and most important step in the nursing process is assessment. Which of the following does assessing entail?

The second step of the nursing process is diagnosis. Which of the following does diagnosis entail?

According to Maslow's Hierarchy of needs, a patient must have certain needs met. One of these needs is self-actualization. Which of the following does not fall into the self-actualization category?

The nurse on a neuro unit is caring for a patient who recently suffered a stroke. The physician orders for the patient to be advanced to a clear liquid diet from NPO. Before allowing the patient to drink, which of the following healthcare team members should assess the patient?

You're the nurse caring for a patient who is newly diagnosed with CHF. You may ask the UAP to perform all of the following tasks EXCEPT

What is the term for something that often entails giving responsibility for the outcome while assigning non-licensed assistance people to execute activities or duties linked to patient care?

What is the term for a collaborative approach that supports suggested treatment plans to ensure that patients with disabilities, illnesses, or injuries receive the proper medical care?

The nurse on a medical surgical floor with four patients with medications due at 9 am. Which of the following patients will the nurse administer medications to first?

Which of the following patients should be assessed first by the nurse?

12 You're a nurse working on the rehabilitation unit and have a new LPN shadowing you today. Which of the following should not be delegated to the new nurse?

What is the term used to describe cross-disciplinary activity in medicine? For example, the nurse

communicates with a physical therapist for home health needs of the patient.

A nurse working in the ICU has a patient that is experiencing a sudden upper gastrointestinal bleed. What is the most important intervention?

A patient states to the UAP, "I can't breathe!" Which of the following interventions, if provided by the UAP, would warrant correction by the nurse?

10 The nurse is caring for a diabetic patient who the nurse finds sweating and only able to mumble words. What is the FIRST intervention for the nurse to take?

The nurse working on an L&D unit suspects her patient is having a seizure. What is the most important intervention for the nurse to provide?

You're educating a 16 year old female on oral birth control pills before she leaves the OBGYN's office. Which of the following statements by the patient assures you that the patient understands the teaching?

You're educating a patient on his risks for CAD (coronary artery disease). Which of the following is NOT considered a modifiable risk factor for this patient?

Which of the following is NOT considered a primary preventative measure?

You're assessing an infant who is 6 months old. You ask the mother which foods have been introduced to the infant. Which of the following would require education from the nurse?

Which of the following is not a normal part of aging in the older adult population (65+)?

A patient presents to the ED with tachycardia, hypertension, and hallucinations. His EKG reveals SVT. The patient's temperature is 100.7. His wife states, He had a seizure that lasted more than 5 minutes before EMS arrived. Which of the following substances can the nurse anticipate this patient will test positive for in his urinalysis?

A patient with breast cancer came into her PCP's office and stated that she feels extremely tired and worthless to her kids and husband. She states, "maybe they will be better off when I am dead." The nurse understands that the patient needs

A patient with schizophrenia has orders for haldol IM STAT due to extreme aggressive behavior due to hallucinations. When the nurse goes into the patient's room to administer the IM injection, which of the following is the most important for the nurse to ensure safety?

A patient who recently started a low dose of a benzodiazepine is at home experiencing a panic attack. The mother calls the patient's PCP and asks what she can do to help her child. What intervention should the nurse educate the mother on?

A patient is admitted to the hospital for complications of her chronic pancreatitis. The patient states that she drinks 12 beers per day as well as at least a pint of hard liquor most days. Which of the following medications should the nurse anticipate the physician ordering for this patient?

A 16 year old comes into the ED with severe abdominal pain to the right lower quadrant. What is your initial step when assessing this patient?

Your patient has a new diagnosis of stroke with a new prescription for warfarin. Which of the following will you educate your patient on?

Your patient is gasping for air. Which of the following positions are best to place the patient in?

Which of the following lung sounds would be MOST likely heard in a patient with an asthma exacerbation?

You are providing catheter care to a patient with a suprapubic catheter. What is the best way to provide catheter care?

30 You're providing education on medications to a patient that you're discharging. What is the best way to be sure that the patient has understood the education provided?

You're the home health nurse providing medication education to a 67 year old male that lives alone. The patient states that he sometimes forgets to take his medications. How will you know that the patient knows how to take his medications?

30 A teenage patient is admitted to the ICU for overdosing on acetaminophen. You know the antidote for acetaminophen is what?

A nurse is caring for a patient that is an alcoholic. She has been admitted to the hospital and will not be able to drink alcohol. What medication does the nurse anticipate the doctor prescribing for this patient to help with withdrawal symptoms?

The nurse is caring for a patient who has been receiving dilaudid 0.5 mg every 3 hours scheduled for post op surgical pain. The nurse is handing off report and notices that the patient's O2 sat drops to 88%, the patient's chest is not moving, and the patient becomes unresponsive. Which pharmacological therapy do you anticipate needing?

You're giving furosemide via IV push. You know to push it 20 mg/min to prevent which clinical side effect?

A patient is prescribed ferrous sulfate for her chronic anemia. Which of the following medications does the patient need to be educated on?

The MD orders D5W 2 L to infuse over 12 hours. What is the rate of infusion?

A 20 year old patient with down syndrome is unable to perform oral hygiene and has no family with him. Which of the following is the responsibility of the UAP?

A 7 year old patient presents to the ED after falling from his treehouse. X-rays show that the patient sustained a greenstick fracture. Which of the following correctly identifies a greenstick fracture?

A patient presents to the ED complaining of a severe stomach ache to her right lower abdomen. The patient is diagnosed with appendicitis after a CT scan. The patient is later admitted to the medical surgical unit. Which of the following, if stated by the patient, would indicate a medical

The nurse is assessing a patient with a new ileostomy. The nurse notices that the ostomy is purple. Which of the following is MOST likely the issue with the new ileostomy?

The nurse is caring for a patient in an external fixation device on an orthopedic unit. What is the MOST important nursing intervention for this patient?

The nurse is monitoring a 5 year old for increased intracranial pressure after the child fell from his treehouse. Which of the following should be reported to the MD immediately?

The nurse is caring for a patient that is 6 hours post surgery with a Jackson Pratt drain. The nurse knows that the proper way to create suction is to

You're caring for a patient who is 6 hours post surgery after a TURP (transurethral resection of the prostate). The nurse notices that there is bright red blood in the foley drainage tubing. What is the correct intervention by the nurse?

The nurse is educating a patient who is receiving radiation therapy. Which of the following is MOST important to educate the patient on increasing in their diet?

Which of the following is MOST important to educate a patient on when receiving chemotherapy and radiation therapy?

A mother in the transitional stage of labor begins having late decelerations causing the fetus's heart rate to drop. What is the BEST intervention for the nurse to perform?

A nurse is assessing a patient's foley catheter drain tube. The patient has previously had yellow, clear urine. The nurse noticed that there is heavy sediment in the patient's urine. What can the nurse most likely expect to do once notifying the doctor.

A 16 week pregnant mother being seen in her OBGYN's office is a gravida 1 mother who explains to the doctor that she is worried because she has not yet felt her baby move. What education is likely to be provided to the patient?

A patient is being seen in his PCP's office due to pain and redness in his left calf. The site is hot and edematous. What is the most likely intervention to be performed for this patient?

Saunders NCLEX-PN Review, serious talk| LPN Edition - Saunders NCLEX-PN Review, serious talk| LPN Edition by Nurse Natalie 2.0 3,273 views 4 years ago 9 minutes, 44 seconds - I pray that this moment will pass, that we will be able to get back on our feet as Americans. Know that God's plan is the right plan.
