### Action Stations

**THEY PLANNED ON A NICE WAR** There had been a century of peace, and the politicians of Earth and its colonies were running on platforms of cutting “wasteful” military spending—all while Earth’s military tried to keep aging and obsolete ships flying and battle-ready. And while the swords rusted, war clouds gathered on the horizon... Contact had been made with the Kilrathi—a warrior race feline in appearance and deadly in combat. Yet, even though they had annihilated or enslaved scores of other races throughout the galaxy, and had attacked human colonies on the border worlds, the government was not taking them seriously, thinking that the Fleet could handle them with ease. Commander Winston Turner knew that the government was moving toward a declaration of war against the Kilrathi in response to demands from the border worlds. He also knew that the Fleet would be forced to operate under Plan Orange Five: limited action and punitive responses only. He only hoped that mankind would recognize its mistake before it was too late.

## The Wing Commander

The Kilrathi Empire is in a bind. For the last five years they have been constructing a secret fleet so powerful that it will slice straight through to Earth and destroy the Confederation. There is a problem, however: the Confederation has become increasingly successful with its behind-the-lines raids and the Prince fears that before the new fleet is ready, the Empire will be on the ropes. At a Kilrathi council of war a simple solution is agreed upon: sure for peace, lull the humans into disarming and then when all is ready, launch a surprise offensive. True to the tradition of democracies everywhere, the Confederation falls for it; the military stands down. Luckily for the human race, however, there are a few who don't trust soft words from a Kilrathi mouth. Admiral Tolwyn and his veterans must fight a delaying action, buying time with their lives for humanity to make ready for the final battle... After an in-depth study, I conclude: if the supercomputers of ten years from today compute this information, it will take 10,00,00,00,00,00,00,00,000 calculations to collect information of one native. Simply putting, it is mathematically impossible. In the terms of computer science, this is referred to as the NP complete problem." Here is sample how the name of a person appears in the leaf:
