

kriminologji me penologji

[#Criminology](#) [#Penology](#) [#Criminal Justice](#) [#Crime Prevention](#) [#Punishment Theory](#)

Explore the interconnected fields of criminology and penology, which together delve into the nature of crime, its causes, and societal responses. Criminology investigates criminal behavior and its sociological roots, while penology focuses on the various theories and practices of punishment, incarceration, and offender rehabilitation within the broader justice system, offering a comprehensive view of how societies manage lawbreaking.

Equality, Discrimination, and the Law

Equality, Discrimination and the Law argues that the traditional notions of discrimination and victimisation are inadequate to implement equality policy and cannot represent fully the reality of discriminatory practices.

Equality and Discrimination

The domestic law concerning discrimination is currently contained in five separate Acts and four sets of principal regulations, reflecting no less than six main EU Directives. The Equality Act 2010 will harmonise the law relating to equality and discrimination, and will replace all existing anti-discrimination law once in force. The Act contains a number of provisions to support progress on equality, by: * introducing a public sector duty regarding socio-economic inequalities * empowering ministers to add caste to the definition of race * prohibiting discrimination arising from disability and outlawing enquiries about disability and health * extending indirect discrimination to disability * introducing combined discrimination based on dual characteristics * dealing with reasonable adjustments to common parts of premises * creating new rights to claim equal pay as a form of direct sex or dual discrimination where there is no identifiable male comparator * rendering it unlawful to prohibit colleagues from talking about terms of employment with a view to checking whether there is prohibited discrimination * allowing political parties to take proportionate action in selection arrangements to address under-representation in elected bodies and requiring them to publish anonymised information on the diversity of candidate selections * extending the public sector equality duty to gender reassignment, age, religion or belief, and sexual orientation * extending the permitted use of positive action to all protected characteristics, and to recruitment and promotion * defining relevant types of work to which an equality clause or rule apply * recognising the reduction of pay inequality as a legitimate part of the material factor defence * enabling claims of direct sex discrimination or dual discrimination in relation to contractual pay in the absence of a comparator doing equal work * ensuring that there is greater transparency and dialogue within workplaces about pay * requiring private and voluntary sector employers of 250+ employees to publish information about gender-based pay differences * ensuring licensing authorities cannot refuse licences to wheelchair accessible vehicles on the grounds of controlling taxi numbers * excepting charities benefiting only people of the same age group or with the same disability * allowing exceptions from age discrimination in the provision of services and the exercise of public functions * reforming the law on family property and civil partnerships * ensuring the future harmonisation of the areas of the Act covered by EU law and those that are domestic in origin * making new provisions affecting information society services
Equality and Discrimination - The New Law provides a thorough and practical analysis of the new Act, and places it in the context of the old law and suggests how the new law is likely to work

in practice. It will be essential reading for all lawyers and professional advisers dealing with employment and discrimination matters, as well as central and local government departments; schools, colleges and universities and their users; private clubs and other associations; and transport providers. The full text of the Act is reproduced in full.

Working Women and the Law

Drawing on their teaching and research experience, the authors of this volume have produced a detailed account of why the law, and in particular the anti-discrimination laws, have failed women.

Equality: A New Framework

This review of UK anti-discrimination law and its enforcement highlights the shortcomings of existing laws and recommends measures to develop an accessible legislative framework and promote effective equal-opportunity policies. Chapters focus on the need for a new framework, harmonizing legislation and institutions, changing organizational policy and behavior, and making procedures and remedies more effective. Distributed by ISBS. No index. Annotation copyrighted by Book News Inc., Portland, OR

Equality, Diversity and Discrimination

This work provides an insight into all types of unlawful discrimination in Britain, including the new areas of sexual orientation and religion implemented in December 2003.

European Union Non-Discrimination Law

EU equality law is multidimensional in being based on different rationales and concepts. Consequently, the concept of discrimination has become fragmented, with different instruments envisaging different scopes of protection. This raises questions as to the ability of EU law to address the situation of persons excluded on a number of grounds. This edited collection addresses the increasing complexity of European Equality Law from jurisprudential, sociological and political science perspectives. Internationally renowned researchers from Scandinavian, Continental and Central European countries and Britain analyse consequences of multiplying discrimination grounds within EU equality law, considering its multidimensionality and intersectionality. The contributors to the volume theorise the move from formal to substantive equality law and its interrelation to new forms of governance, demonstrating the specific combination of non-discrimination law with welfare state models which reveal the global implications of the European Union. The book will be of interest to academics and policy makers all over the world, in particular to those researching and studying law, political sciences and sociology with an interest in human rights, non discrimination law, contract and employment law or European studies.

Gower Handbook of Discrimination at Work

Workplace discrimination is an experience that, despite four decades of equality legislation, continues to blight the lives of thousands every year. Discrimination persists on the protected grounds of sex, race, disability, age, sexual orientation, religion or belief and gender reassignment, as well as where no legal protection exists such as in relation to class background or migration status. The Handbook discusses recent changes in equality legislation as well as considering the limitations of legal frameworks in addressing inequality. However, complying with the law is only the first step towards addressing discrimination in the workplace, and the book goes beyond the law and provides evidence of good practice in promoting organisational culture change, as well as considering future directions for policy on equality action. The Gower Handbook of Discrimination at Work looks at both social justice and business case perspectives, and its message is not a negative one. The contributors have considerable depth of understanding of workplace discrimination, both as academics and equality practitioners, their work has contributed to policy formation and all are committed to improving the lives of people at work. They offer insights into existing international developments and make suggestions for the ways in which positive change can be realised. Practitioners, such as human resources professionals and other managers involved in addressing equality at work, trade unionists, equality trainers, and academics concerned with researching or teaching in the areas of employment and equality will all find this book of interest. Furthermore, it will be of value to students in the fields of business and management, employment law, equality and diversity and human resource management.

Sex Discrimination in Uncertain Times

This collection of essays arose from a conference held to mark the silver anniversary of the Australian Sex Discrimination Act (1984). The collection has two aims: first, to honour the contributions of both the spirited individuals who valiantly fought for the enactment of the legislation against the odds, and those who championed the new law once it was passed; secondly, to present a stock-take of the Act within the changed socio-political environment of the 21st century. The contributors present clear-eyed appraisals of the legislation, in addition to considering new forms of legal regulation, such as Equality Act, and the significance of a Human Rights Act. The introduction of a proactive model, which would impose positive duties on organisations, is explored as an alternative to the existing individual complaint-based model of legislation. The contributors also pay attention to the international human rights framework, particularly the Convention on the Elimination of all Forms of Discrimination against Women and the UN Declaration on the Rights of Indigenous People. The essays are illuminated by recourse to a rich vein of historical and contemporary literature. Regard is also paid to the comparative experience of other jurisdictions, particularly the UK and Canada.

Equality, Discrimination and the Law

In identifying a number of 'fuzzy border' cases (notably where pensionable age, pregnancy, residence, and marriage, are proxies for unlawful discrimination), Equality, Discrimination and the Law argues that the traditional notions of discrimination and victimisation are inadequate to implement equality policy and cannot represent fully the reality of discriminatory practices. When Mr and Mrs James - each aged 61 - went swimming, Mr James was charged for entry, while Mrs James was admitted free. The reason was that the local authority offered free swimming to those of 'pensionable age' (at the time, 65 for men and 60 for women). The House of Lords found that Mr James had suffered direct sex discrimination. This majority plurality decision indicated that sometimes a given set of facts does not neatly accord to traditional definitions of discrimination. This in turn encourages the judiciary to shape the law to fit the facts, which results in an inconsistent body of law full of 'fuzzy borders'. Starting with the James case, this book investigates a number of 'fuzzy border' cases in the EU and UK based on nationality discrimination, notions of indirect discrimination, pregnancy and sex discrimination, marriage and sexual orientation discrimination, perceived discrimination, and victimisation. The argument concludes that fixed notions such as 'direct and indirect discrimination are mutually exclusive' do not stand up to scrutiny and that it must be recognised that the traditional concepts of discrimination and victimisation do not reflect the reality of practice. This work is essential reading for students, scholars and practitioners in all EU and English-speaking jurisdictions, particularly post-graduates, Policy/Law-makers, and those on dedicated equality undergraduate courses.

Discrimination Law

Equality is an ideal to which we all aspire. Yet the more closely we examine it, the more its meaning shifts. How do we explain how equal treatment can in effect lead to inequality, while unequal treatment might be necessary in order to achieve equality? The apparent paradox can be understood if we accept that equality can be formulated in different ways, depending on which underlying conception is chosen. In this highly readable yet challenging book, Sandra Fredman examines the ways in which discrimination law addresses these questions. The new edition retains the format of the highly successful first edition, while incorporating the many new developments in discrimination law since 2002, including the Equality Act 2010, human rights law, and EU law. By using a thematic approach, the book illuminates the major issues in discrimination law, while at the same time imparting a detailed understanding of the legal provisions. The comparative approach is particularly helpful; by examining comparable law in the US, India, Canada, and South Africa, as well as the UK, the book exposes common problems and canvasses differing solutions. As in the previous edition, the book locates discrimination in its wider social and historical context. Drawing on the author's wide experience of equality law in many jurisdictions, she creates an analytic framework to assess the substantive law. The book is a thought-provoking and accessible overview of the way in which equality law has adjusted to new and increasingly complex challenges. It concludes that progress has been evident, but uneven. Those dedicated to equality still face an exacting, but ultimately deeply rewarding, task.

The Logic of Equality

This title was first published in 2003. The Logic of Equality proposes a formal-logical method for examining the indeterminacy of legal discourse, using the example of the non-discrimination norm. It shows that the indeterminacy of a legal concept does not mean that it is completely chaotic -

the indeterminacy of the non-discrimination norm arises out of, and presupposes, a determinate formal structure, which remains fixed and constant both within and across jurisdictions, regardless of institutional or doctrinal differences. To illustrate the argument, cases are presented from a variety of jurisdictions including the United States Supreme Court, the European Court of Human Rights, the European Court of Justice, and the German Constitutional Court. The book is aimed at theorists who are interested in the analysis of legal discourse, including comparative legal scholars and those who specialise in human rights and/or discrimination law.

Discrimination, Equality and the Law

This monograph explores some of the conceptual questions which underpin the legal disputes which arise in relation to equality and discrimination. Among these are questions about the meaning of 'equality' as a legal concept and its relationship to the principle of non-discrimination; symmetrical and asymmetrical approaches to equality/non-discrimination; the role of comparators in discrimination/equality analysis; the selection of protected characteristics and the proper sphere of statutory and constitutional protections, and the scope for and regulation of potential conflicts between protected grounds. The author engages with domestic, EU and ECtHR case law as well as with wider international approaches.

Discrimination, Copyright and Equality

This book explores how restrictive copyright laws deny access to information for the print disabled, despite equality laws protecting access. It contributes to disability rights scholarship and ideas of digital equality in analysis of domestic disability anti-discrimination, civil, human and constitutional rights, copyright and other reading equality measures.

Equality and Non-Discrimination in the EU

Discussing the fundamental role played by equality and non-discrimination in the EU legal order, this insightful book explores the positive and negative elements that have contributed to the consolidation of the process of EU legal integration. It provides an in-depth analysis of the three key dimensions of equality in the EU: equality as a value, equality as a principle and equality as a right.

Basic Equality and Discrimination

The focus of this book is the idea of equality as a moral, political and jurisprudential concept. The author is motivated primarily by a concern to better understand conundrums in the justification, interpretation and application of discrimination law. Nicholas Smith aims to provide a clearer understanding of the nature of the value that the law is trying to uphold - equality. He rejects the notion that the concept of equality is vacuous and defends the idea as the proper range of moral concern. After discussing the general characteristics of the denial of equality and some types of discrimination, Smith considers prominent views on the point of equality law. He argues that human rights lawyers should step back from the business of trying to steer courts towards vague equality goals informed by conceptions of equality that are either empty or even more abstract than the notion of equality itself. If they do, Smith thinks that the meaning of 'equality' will be apparent, though abstract, and our difficulties will be shown to be, in the first instance, moral ones. These moral issues will require more rigorous attention before we can draft discrimination law which gives clear effect to a widely legitimate understanding of what it means to uphold and promote equality. This book will be a valuable resource for students and researchers working in the areas of legal philosophy, political theory, public law, and human rights law.

Non-discrimination and Equality in the View of the UN Human Rights Treaty Bodies

As part of a larger research project on harmonisation and convergence among UN human rights treaty bodies, scrutinises convergence and divergence, communality, and related issues. Focuses on five Committees: The Convention on the Elimination of All Forms of Racial Discrimination (CERD), the Human Rights Committee (HRC), the International Covenant on Economics, Social and Cultural Rights (CESCR), the Convention on the Elimination of All forms of Discrimination Against Women (CEDAW), and the Convention on the Rights of the Child (CRC).

Equality, Diversity and Disadvantage in Employment

This edited collection brings together new research findings from a wide range of academics investigating equal opportunities and managing diversity. It explores the impact of gender, race/ethnicity, disability and age on employment opportunities and examines theoretical issues underlying the experience of discrimination. Based on original research, each chapter analyses a different facet of equality and diversity and draws out the policy implications. The chapters adopt a variety of qualitative and quantitative methods to analyse cases from various countries, thereby highlighting differences and similarities in the formulation and implementation of equality and diversity policies. As a result the book provides an up-to-date review of developments in the subject area and reveals important lessons for policy makers and practitioners.

Time for Equality at Work

This is the fourth global report under the follow-up to the ILO Declaration on Fundamental Principles and Rights at Work. It examines diverse forms of discrimination at work and considers various policy and practical responses to tackle this problem. The book finds that the benefits of eliminating discrimination in the workplace go beyond the individual level and extend to the economy and to society, leading to the efficient use of human resources and diverse talents, improved worker morale and motivation, better labour relations and productivity gains.

Equality and Discrimination Under International Law

Legislating Equality describes the development of antidiscrimination policy through the lens of European integration. Through examining the development of discourses around anti-racism and historical developments in the 1980s, the book explains the role the key players who moved the legislation forward at the EU level.

Legislating Equality

This volume examines established and emerging trends in workplace discrimination and provides a global picture of the struggle to overcome the problem. The report addresses established discrimination issues and the persistence of economic, social, and moral implications caused by chronic racial, ethnic, and sex discrimination in employment. It also investigates recently recognized forms of discrimination, including those based on age and sexual orientation, and emerging forms such as genetic and lifestyle discrimination. Various institutional and policy responses to combat all kinds of discrimination in the workplace are highlighted. The book examines the effectiveness and accessibility of strategies such as affirmative action, procurement policy, and active labor market policies. It presents an action plan for eliminating discrimination and promoting equality as part of the decent work agenda at national and global levels.

Equality at Work

This work provides an insight into all types of unlawful discrimination in Britain, including the new areas of sexual orientation and religion implemented in December 2003.

Equality, Diversity and Discrimination

"In the wake of the civil rights movement, the legal system dramatically changed its response to discrimination based on race, gender, and other characteristics. It is now showing signs of yet another dramatic shift, as it moves from considering difference to focusing on neutrality. Rather than seeking to counter subjugation through special protections for groups that have been historically (and currently) disadvantaged, the Court now adopts a 'colorblind' approach. Equality now means treating everyone the same way, instead of creating an equal playing field for those who start out disadvantaged. This book explores these shifts and the research used to support civil rights claims, particularly relating to minority youths' rights to equal treatment. It integrates developmental theory with work on legal equality and discrimination, showing both how the legal system can benefit from new research on development and how the legal system itself can work to address invidious discrimination. The legal system may champion ideals of neutrality in the goals it sets itself for treating individuals, but it cannot remain neutral in the values it supports and imparts. This volume shows that despite the shift to a focus on neutrality, the Court can and should effectively foster values supporting equality, especially among youth"--Unedited summary from book cover.

Adolescence, Discrimination, and the Law

This book contributes to a critical reflection of current legislative and jurisprudential developments in Non-Discrimination Law, focusing on the European Union. The book is focused on intersectionality between gender, race and disability and the question of whether, and to what extent, this intersection can be adequately addressed in (EU) law. The discussion rests on two basic assumptions. First, the multiplication of 'discrimination grounds' in EU law and other legal regimes should not result in a dilution of the demands of equality law. Accordingly, the book focuses on the three key grounds - race, gender and disability. These constitute nodes around which other discrimination grounds can be grouped. Second, any multi-ground non-discrimination law framework needs to engage with the question of discrimination on several grounds. This book provides a critical evaluation of some of the problems presented by such intersectionality and an opportunity to explore the issues in depth. This collection offers some new proposals relating to the regrouping of identity categories and to the general approach to socio-legal research in the field. It also contains a comparative section, which expands on practical experiences with intersectionality and law, and a section dedicated to juridical responses to intersectionality. The book will be a valuable resource for researchers, academics and those working in the area of EU non-discrimination law and policy.

European Union Non-Discrimination Law and Intersectionality

This book focuses on equality, inclusion, and discrimination within the English-speaking Caribbean region, specifically as it relates to employment, education, society, and the law. Though anti-discrimination laws have recently been enacted in the Caribbean, this, in and of itself, neither translates to societal changes nor changes within the organisational context. The authors examine racial diversity in public sector organisations in Trinidad and Tobago and Guyana, gender diversity in organisations across the Caribbean region, sexual orientation and its impact on employment, disability and access within organisations, and equality and inclusion within Caribbean institutions of higher education. Further, the book explores the region's equality laws and compares them with legislation from selected developed countries. This interdisciplinary text provides researchers in HRM, organisational behavior, sociology, and public policy with an overview of the types of discrimination prevalent within the Caribbean as well as the varied institutional frameworks in place that encourage equality.

Diversity, Equality, and Inclusion in Caribbean Organisations and Society

Examines international practice in measuring equality and discrimination, highlighting good practice developed in Ireland.

Making Equality Count

Against Equality of Opportunity deals with the ways in which opportunities - education, jobs and other things which affect how people get on in life - are distributed. Take jobs: should the best person always get the job? Or should everyone be given an equal 'life chance'? Or can we somehow combine these two ideas, saying that the best person should always get the job, but that everyone should have an equal chance to become the best? These seem to be the standard views, but this book argues that they are all flawed. We need to understand meritocracy for what it is - a technical rather than a moral ideal; and we need to accept that equality just isn't something we should be striving for at all in this area. We also need to rethink our approach to the related issue of discrimination. We tend to assume discrimination is wrong because it violates either meritocracy or equality, when in fact it is wrong for quite different reasons. In all these areas, then, Cavanagh aims to loosen the grip of established ways of thinking, in order that other ideas might find room to breathe. This is particularly important in the case of meritocracy, which after the recent conversion of the centre-left now dominates the debate more than ever. This book will be of interest to students and teachers of political philosophy, but ultimately it is aimed at anyone who cares about the fundamental values that lie behind the way society is organized. Though the argument is rigorous, it does not require a professional philosophical training to follow it.

Against Equality of Opportunity

This book argues that traditional complaint-based antidiscrimination laws are inherently inadequate to respond to systemic discrimination in employment. It examines the mechanisms and characteristics of systemic discrimination and the shortcomings of complaint-based laws. Yet these characteristics can also inform employers and government authorities of the kinds of preventive action that help alleviate

systemic discrimination at the workplace. In its search for a rational government policy response to systemic discrimination, the book evaluates selected legal regimes which impose proactive obligations on employers to promote equality at the workplace. Proactive regimes are regulatory in nature, rather than adjudicatory. They induce employer compliance through technical assistance, dialogue and regulatory pressure, rather than court orders. By examining the key elements of these regimes the author explains why some proactive regimes function better than others, and why proactive regimes function better than complaint-based laws in addressing systemic discrimination.

Systemic Discrimination in Employment and the Promotion of Ethnic Equality

Equality and non-discrimination: A core principle of all human rights and fundamental freedoms. Ensuring equal opportunities for persons with disabilities is an important facilitator of participation and inclusion in society. Both the United Nations Convention on the Rights of Persons with Disabilities (UNCPRD) and the Council of Europe Disability Strategy 2017-2023 address equality and equalisation of opportunities for persons with disabilities. Article 5 of the UNCPRD requires States to adopt positive measures aimed at ensuring equality across the substantive rights in the Convention. The Council of Europe Disability Strategy aims at guiding and supporting the activities of Council of Europe member States in their implementation of the UNCPRD and Council of Europe standards regarding disability, and similarly addresses equality and non-discrimination. The overall goal of this study is to analyse the obligations contained in the UNCPRD regarding equality and non-discrimination, and to provide examples of good national practices regarding equality and non-discrimination.

Promoting equality and non-discrimination for persons with disabilities

Equality, Diversity and Inclusion at Work is certainly a recommended read for EDI scholars interested in both established and novel perspectives on the field. . . Practitioners, whether directly involved with diversity management or not, can also use this volume to gain significant insight into the variety of perspectives on diversity management and training. Florence Villesèche, Management This collection can serve as a mirror for all of us who spend much of our lives in work organizations. From diverse vantage points, the authors help us see and understand the dynamics through which workplaces are gendered to the advantage of some and the disadvantage of others. For those of us wanting to transform those dynamics and create organizational cultures characterized by fairness, support, and cooperation, this book is a must-read. Jay Coakley, University of Colorado, Colorado Springs, US Equality, Diversity and Inclusion at Work, edited by Mustafa F. Özbilgin is a fascinating and useful collection of articles that cover varied perspectives on this thriving topic. Theoretical issues and policy problems, equal opportunity and diversity management, sociological and psychological approaches, history and present management and trade union efforts, and much more are all covered. I particularly appreciated the inclusion of several articles on men, masculinities, equality and diversity, a refreshing recognition of the importance of men and masculinities in the success or failure of equality and diversity efforts. Although the collection covers the UK in the most detail, chapters on the US, Germany, South Africa, and Japan provide a multinational perspective. It s the kind of book I d like to have at hand when I m writing about organizations, gender, equality and diversity. Joan Acker, University of Oregon, US With over thirty chapters, this book offers a truly interdisciplinary collection of original contributions that are likely to influence theorization in the field of equality, diversity and inclusion at work. Many chapters in the book offer comparative perspectives through cross-national and multi-level analyses. The volume adopts a critical perspective as it focuses on relations of power in exploring equality, diversity and inclusion at work. Specifically, the authors examine areas such as cultural conflict, gender inequity and politics, work life balance, affirmative action, trade unions and diversity and diversity interventions and change. This timely book with chapters that are contributed by internationally eminent scholars will prove to be an invaluable resource for researchers, policy makers and students in this field.

Equality, Diversity and Inclusion at Work

"[This book] provides an exploration and evaluation of discrimination law, focusing primarily on discrimination in employment. Introducing readers to the concepts of equality and the historical origins of discrimination law, [the author] explores the wider political, social and economic contexts through which discrimination law has evolved. The second edition has been thoroughly updated and includes a new chapter considering discrimination against trade unionists, discrimination against 'non-standard' workers as well as the public sector equality duty. The book begins with an examination of what is meant by such concepts as equality and discrimination followed by an analysis of the Equality Act 2010

and the impact of EU and international law. All the protected characteristics contained in the Equality Act 2010 are critically considered (age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex, sexual orientation). Issues not covered by the legislation such as those relating to multiple discrimination and caste discrimination are also analysed. Important cases from the UK courts as well as international courts are considered. The book also contains an appendix with the most relevant parts of the 2010 Act. Important cases are highlighted in the text and some reflections as the basis for further discussion are included at the end of each chapter."--

Discrimination and the Law

An attorney specializing in employee discrimination, Gregory argues that sex discrimination against working women persists; that the most effective method of eliminating it is opposing all employer discriminatory conduct, policies, and practices wherever and whenever they appear; and that such opposition is best pursued through legal challenges based on US anti-discrimination laws. Annotation copyrighted by Book News, Inc., Portland, OR

Women and Workplace Discrimination

Equality and Discrimination Law in Australia: An Introduction explores four decades of anti-discrimination laws in Australia. Beth Gaze and Belinda Smith argue that effective laws protecting against and deterring discrimination are vital for a fair future, and emphasise the theoretical and social contexts that underpin this area of the law. The text is divided into three sections: the first addresses the social and conceptual context, history and framework of anti-discrimination laws; the second analyses the main elements of the law and the processes of enforcement; and the third explores broader avenues for pursuing equality beyond simply prohibiting discrimination. Written in a clear and concise style, Equality and Discrimination Law in Australia: An Introduction is a vital resource for students.

Equality and Discrimination Law in Australia: An Introduction

This is a seminal time for Equal Opportunities and Diversity (EO&D) in the UK: the three existing Equality Commissions have been amalgamated into the Commission for Equality and Human Rights and a new Single Equality Act was published in 2010. The concepts of EO&D now incorporate gender, ethnicity, disability, sexual orientation, religion and belief and age inequalities. For the future, the problems of separate and relative deprivation, and conflicting experiences and interests, must be tackled, both between and within different categories of disadvantage. These different, complex and sometimes contradictory strands in legislation, policy and practice need to be analysed and understood in order to facilitate genuine social change. This book challenges the official discourse that shapes the debates on EO&D at national, regional and European level. The book will be a key text for students and researchers of EO&D in criminology, social policy, sociology, women's studies, gender studies, public administration, business studies, economics and management and industrial relations, at both undergraduate and postgraduate courses. It will also be of interest to EO&D professionals and policy makers in public and private sector organisations.

Understanding Equal Opportunities and Diversity

The principles of equality and non-discrimination lie at the heart of international human rights law. They are the only human rights explicitly included in the UN Charter and they appear at the beginning of virtually every major human rights instrument. This volume contains selected works by leading authors on the subject of equality and non-discrimination under international law. The selections are grouped into four sections. The first presents essays that explore theoretical concepts of equality and non-discrimination. The next addresses the development of international legal standards on the subject. The third presents articles analyzing how those standards have been interpreted and applied by UN and regional human rights bodies, and the last contains works on what measures besides legal action States are to take to in order to achieve equality and non-discrimination.

Equality and Non-Discrimination under International Law

Discrimination and the Law provides an exploration and evaluation of discrimination law, focusing primarily on discrimination in employment. Introducing readers to the concepts of equality and the historical origins of discrimination law, Malcolm Sargeant explores the wider political, social and eco-

conomic contexts through which discrimination law has evolved. The second edition has been thoroughly updated and includes a new chapter considering discrimination against trade unionists, discrimination against 'non-standard' workers as well as the public sector equality duty. The book begins with an examination of what is meant by such concepts as equality and discrimination followed by an analysis of the Equality Act 2010 and the impact of EU and international law. All the protected characteristics contained in the Equality Act 2010 are critically considered (age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex, sexual orientation). Issues not covered by the legislation such as those relating to multiple discrimination and caste discrimination are also analysed. Important cases from the UK courts as well as international courts are considered. The book also contains an appendix with the most relevant parts of the 2010 Act. Important cases are highlighted in the text and some reflections as the basis for further discussion are included at the end of each chapter. This is an essential introduction to the wide-ranging law relating to discrimination in the UK for law, HRM and business students.

Discrimination and the Law 2e

This casebook, the result of the collaborative efforts of a panel of experts from various EU Member States, is the latest in the *Ius Commune Casebook* series developed at the Universities of Maastricht and Leuven. The book provides a comprehensive and skilfully designed resource for students, practitioners, researchers, public officials, NGOs, consumer organisations and the judiciary. In common with earlier books in the series, this casebook presents cases and other materials (legislative materials, international and European materials, excerpts from books or articles). As non-discrimination law is a comparatively new subject, the chapters search for and develop the concepts of discrimination law on the basis of a wide variety of young and often still emerging case law and legislation. The result is a comprehensive textbook with materials from a wide variety of EU Member States. The book is entirely in English (i.e. materials are translated where not available in English). At the end of each chapter a comparative overview ties the material together, with emphasis, where appropriate, on existing or emerging general principles in the legal systems within Europe. The book illustrates the distinct relationship between international, European and national legislation in the field of non-discrimination law. It covers the grounds of discrimination addressed in the Racial Equality and Employment Equality Directives, as well as non-discrimination law relating to gender. In so doing, it covers the law of a large number of EU Member States, alongside some international comparisons. The *Ius Commune Casebook on Non-Discrimination Law* - provides practitioners with ready access to primary and secondary legal material needed to assist them in crafting test case strategies. - provides the judiciary with the tools needed to respond sensitively to such cases. - provides material for teaching non-discrimination law to law and other students. - provides a basis for ongoing research on non-discrimination law. - provides an up-to-date overview of the implementation of the Directives and of the state of the law. This Casebook is the result of a project which has been supported by a grant from the European Commission's Anti-Discrimination Programme. See the detailed website for this book: www.casebooks.eu/nonDiscrimination/.

Cases, Materials and Text on National, Supranational and International Non-Discrimination Law

This much-needed text provides a clear exposition of the key theoretical perspectives of diversity management and equal opportunities approaches; combined with practice-based experience. Taking a business, rather than sociological slant on the subject, the chapters cover age, gender, legal framework and more.

Managing Equality and Diversity

This textbook offers comprehensive coverage of the Equality Act 2010 and deals also with the equality aspects of the Human Rights Act 1998 and European Convention on Human Rights. It encourages critical analysis of equality law to equip the reader with an understanding of the enduring challenges that frame equality law and contemporary responses to those challenges. New content includes a chapter on age discrimination and analysis of the Public Sector Equality Duty. Structured so as to be accessible to the student approaching discrimination law for the first time, the book is also sufficiently detailed and analytical to appeal to the well-informed reader, and to provide those engaged in research with a solid base for further independent study. For the undergraduate student studying discrimination law as a free-standing subject or as part of a wider course, the book provides a one-stop shop. This book is also a key core text for any postgraduate discrimination law course.

Discrimination Law

Hill and Kenyon explain the fundamental changes in the drive to achieve equality and diversity in the workplace. Their book takes a task based approach, suggesting legal solutions to discrete practical problems, and providing clear guidance to enable practitioners to tackle individual problems they might encounter.
