No other guide has ever made field identification so clear. Features highlighted include: • leaves (including multiple leaf shapes and fall leaf color) • bark • needles • cones • flowers • fruit • twigs • silhouettes More than 500 maps show the complete range, both natural and cultivated, for nearly all species. Trees are arranged taxonomically, with all related species grouped together. In addition, there are essays on taxonomy, on the cultivation of trees, and on conservation issues, reflecting Sibley's deep concern with habitat preservation and
