

The Perioperative Medicine Consult Handbook Engli

[#perioperative medicine](#) [#medical consult handbook](#) [#surgical patient management](#) [#preoperative assessment](#) [#postoperative care](#)

Explore comprehensive guidance for perioperative medicine consults with this essential handbook. Designed for medical professionals, it provides key insights and practical approaches to managing patient care before, during, and after surgery, making it an invaluable resource for enhancing surgical outcomes.

We continue to expand our journal library with contributions from respected universities.

Thank you for visiting our website.

You can now find the document Perioperative Consult Guide you've been looking for. Free download is available for all visitors.

We guarantee that every document we publish is genuine.

Authenticity and quality are always our focus.

This is important to ensure satisfaction and trust.

We hope this document adds value to your needs.

Feel free to explore more content on our website.

We truly appreciate your visit today.

This document is highly sought in many digital library archives.

By visiting us, you have made the right decision.

We provide the entire full version Perioperative Consult Guide for free, exclusively here.

Perioperative Management of Anticoagulants: What clinicians need to know in 2021 - Perioperative Management of Anticoagulants: What clinicians need to know in 2021 by Icahn School of Medicine 7,846 views 2 years ago 56 minutes - A Department of **Medicine**, Grand Rounds presented by James D. Douketis, MD, FRCP(C), FCAHS, Department of **Medicine**, ...

Objectives: Paradigm Shifts to Consider for Perioperative Anticoagulant Management

Paradigm Shift No. 1

Illustrative Case • 75-kg old female with AF on warfarin, TTR 75% - hypertension, diabetes, TIA 2 yrs ago (CHADS₂ = 5)

What causes perioperative stroke in anticoagulate patients and how can we prevent it?

BRIDGE: Trial Design

BRIDGE Trial: Primary Study Outcomes No Bridging

PERIOP-2: Results

Paradigm Shift No. 2

Illustrative Case • 75-yr old female with AF on apixaban, 5 mg BID - hypertension, diabetes, TIA 2 yrs ago (CHADS₂ = 5)

Pharmacokinetic-based Perioperative DOAC Management

Reason 1: there is no established 'safe for surgery' DOAC level

Situations where "abnormal" results are allowed for safe surgery

PK-based Interruption of Anticoagulants (no need for blood tests) • Unfractionated heparin

Perioperative DOAC Management Protocol

Key Pharmacokinetic Properties of Anticoagulants

Results: Primary Outcomes (ITT Analysis)

Are "increased DOAC levels" associated with increased perioperative/surgical bleeding? (univariate analysis)

What are predictors of periop bleeding? (major or clinically-relevant non-major)

Routine Coagulation Tests and DOAC Levels

PT to measure Rivaroxaban and Apixaban

aPTT and TT to measure Dabigatran

Paradigm Shift No. 3

BRUISECONTROL-1 Trial

Perioperative Hemostasis: continue OAC vs. interrupt + bridge

Multiple Redundant, Clotting Pathways

Do mild coag test abnormalities 1 periop bleeding? When are you "good to go"?

back to the Presentation Objectives

#1. Virtual perioperative management: is it safe?

PAUSE-Virtual Study

PAUSE vs. ASRA Management

What do docs prefer? Physician survey: Oct-Dec 2019 Preferred clinical scenarios: surgery with neuraxial anesthesia in

PAUSE-2: Study Design

Bentracimab • Phase II study in healthy volunteers of neutralizing IV monoclonal antibody fragment that binds ticagrelor (reversible agent) and its metabolites
