Documentation and Reimbursement for Speech-language Pathologists

"Although it is the least noticed by patients, effective documentation is one of the most critical skills that speech-language pathologists must learn. With that in mind, Documentation and Reimbursement for Speech-Language Pathologists: Principles and Practice provides a comprehensive guide to documentation, coding, and reimbursement across all work settings. The text begins with section 1 covering the importance of documentation and the basic rules, both ethical and legal, followed by an exploration of the various documentation forms and formats. Also included are tips on how to use electronic health records, as well as different coding systems for diagnosis and for procedures, with an emphasis on the link between coding, reimbursement, and the documentation to support reimbursement. Section 2 explains the importance of focusing on function in patient-centered care with the ICF as the conceptual model, then goes on to cover each of the types of services speech-language pathologists provide: evaluation, treatment planning, therapy, and discharge planning. Multiple examples of forms and formats are given for each. In section 3, Nancy Swigert and her expert team of contributors dedicate each chapter to a work setting in which speech-language pathologists might work, whether adult or pediatric, because each setting has its own set of documentation and reimbursement challenges. And since client documentation is not the only kind of writing done by speech-language pathologists, a separate chapter on "other professional writing" includes information on how to write correspondence, avoid common mistakes, and even prepare effective PowerPoint presentations. Each chapter in Documentation and Reimbursement for Speech-Language Pathologists contains activities to apply information learned in that chapter as well as review questions for students to test their knowledge. Customizable samples of many types of forms and reports are also available. Instructors in educational settings can visit www.efacultyounge.com for additional material to be used for teaching in the classroom. Documentation and Reimbursement for Speech-Language Pathologists: Principles and Practice is the perfect text for speech-language pathology students to learn these vital skills, but it will also provide clinical supervisors, new clinicians, and speech-language pathologists starting a private practice with essential information about documentation, coding, and reimbursement."--Provided by publisher.

Build your documentation skills—and your confidence. Step by step, this text/workbook introduces you to the importance of documentation to support quality patient care and appropriate reimbursement. It shows you how to develop and write a proper and defensible note; and prepares you to meet the technological challenges you'll encounter in practice. You'll learn how to provide the proper documentation to assure all forms of reimbursement (including third party) for your services. You'll also explore issues of patient confidentiality, HIPAA requirements, and the ever-increasing demands of legal and ethical practice in a litigious society.

Documentation for the Physical Therapist Assistant

Documentation for Physical Therapist Practice: A Clinical Decision Making Approach provides the framework for successful documentation. It is synchronous with Medicare standards as well as the American Physical Therapy Association's recommendations for defensible documentation. It identifies documentation basics which can be readily applied to a broad spectrum of documentation formats including paper-based and electronic systems. This key resource skillfully explains how to document the interpretation of examination findings so that the medical record accurately reflects the evidence. In addition, the results of consultation with legal experts who specialize in physical therapy claims denials will be shared to provide current, meaningful documentation instruction.
