There is no denying that fish contains many essential omega-3 fatty acids

Many consider fish "brain food" because these nutrients are essential to brain health.

Unfortunately, farmed fish, especially salmon and perch, cause more harm than good that farmed fish are one of the most toxic foods in the world.

What is the problem with fish farms?

Today, fisheries face a number of problems, including overfishing, chemical pollution

critical look at the fish farming industry around the world

showing exclusive insider shots of fish farms and how they work.

According to the film producer, the meat of the fish we eat has become a deadly chemical cocktail

Unfortunately, aquaculture often advertises itself

However, the reality is that fish farms are actually causing more problems than they are solving

Farmed salmon is one of the most poisonous foods in the world

Kurt Oddekalv, a respected Norwegian environmental activist

Since these farms are operated in open waters, the entire seabed has been destroyed

Due to these overcrowded conditions, diseases among fish are widespread.

To ward off disease, various pesticides are used, and if you eat this fish

there is no doubt that you also eat these pesticides yourself.

After testing toxins on a number of different food groups sold in Norway

he found that farmed salmon contains the largest amount of toxins, and extremely high levels.

The farmed salmon was five times more toxic than any other food product tested.

A study in which farmed salmon were fed to mice showed how the mice became obese inevitably contain far more toxins than their wild counterparts.

As highlighted in the documentation, the most surprising source of toxic exposure

These contain a whole host of other toxic chemicals including dioxins and PCBs, and these fish never had a chance. The list of everything that is wrong in the farmed fish industry is getting longer and longer At all costs, stop eating farmed fish!

You can tell the difference between farmed and wild fish by its color risk of toxic contamination

The only way to stop this industry from moving forward is to stop our support as consumers
