The Capital Times

As Madison's Capital Times marks its 100th anniversary in 2017, editors Dave Zweifel and John Nichols recall the remarkable history of a newspaper that served as the tribune of Robert M. La Follette and the progressive movement, earned the praise of Franklin Delano Roosevelt for its stalwart opposition to fascism, battled Joe McCarthy during the "Red Scare," championed civil rights, women's rights, and LGBTQ rights, opposed the Vietnam War and the invasion of Iraq, and stood with Russ Feingold when he cast the only US Senate vote against the Patriot Act. The Capital Times did not do this from New York or Washington but from the middle of America, with a readership of farmers, factory workers, teachers, and shopkeepers who stood by The Cap Times when the newspaper was boycotted, investigated, and attacked for its determination. At a point when journalism is under assault, when newspapers struggle to survive, and "old media" struggles to find its way in a digital age, The Capital Times remains unbowed—still living up to the description Lord Francis Williams, the British newspaper editor, wrote 50 years ago: "The vast majority of American papers are as dull as weed-covered ditch-water; vast Saharas of cheap advertising with occasional oases of editorial matter written to bring happiness to the Chamber of Commerce and pain and irritation to none; the bland leading the bland.... Just here and there are a few relics of the old fighting muckraking tradition of American journalism, like The Capital Times of Madison."

The Wisconsin Garden Guide

Ed Garvey (1940-2017) was one of the most influential and colorful progressive politicians in Wisconsin's history. Growing up in what was a conservative rural town, he got his first taste of liberal

activism at the University of Wisconsin in the 1960s, became the first executive director of the National Football League Players' Union, led two spirited campaigns against Bob Kasten and Tommy Thompson, and eventually cofounded the Fighting Bob Fest. Shortly before he died, Garvey expressed his views on everything in a series of detailed, no-holds-barred interviews with journalist Rob Zaleski. In his trademark witty, blunt, and often abrasive style, he offered his impressions of the political climate, worries about the environment, and Act 10 protests on Capitol Square. Garvey's candor during these conversations provides deeper insight into the personal highs and lows he experienced over his rich life. Diehard followers will fondly remember his energetic campaigns, but they may be surprised to learn of his long-simmering disappointment after those losses. Ever timely and meaningful, Garvey's words offer a path for how the Democratic Party, both within Wisconsin and nationally, can regain its soul.

The Capital

A contemporary interrogation of Marx's masterwork Karl Marx saw the ruling class as a sorcerer, no longer able to control the ominous powers it has summoned from the netherworld. Today, in an age spawning the likes of Donald Trump and Boris Johnson, our society has never before been governed by so many conjuring tricks, with collusions and conspiracies, fake news and endless sleights of the economic and political hand. And yet, contends Andy Merrifield, as our modern lives become ever more mist-enveloped, the works of Marx can help us penetrate the fog. In *Marx, Dead and Alive*—a book that begins and ends beside Marx's recently violated London graveside—Merrifield makes a spirited case for a critical thinker who can still offer people a route toward personal and social authenticity. Bolstering his argument with fascinating examples of literature and history, from Shakespeare and Beckett, to the Luddites and the Black Panthers, Merrifield demonstrates how Marx can reveal our individual lives to us within a collective perspective—and within a historical continuum. Who we are now hinges on who we once were—and who we might become. This, at a time when our value-system is undergoing core “post-truth” meltdown.

Ed Garvey Unvarnished

Here's a cookbook destined to be talked-about this season, rich in techniques and recipes epitomizing the way we cook and eat now. *Bar Tartine*—co-founded by Tartine Bakery's Chad Robertson and Elisabeth Prueitt—is obsessed over by locals and visitors, critics and chefs. It is a restaurant that defies categorization, but not description: Everything is made in-house and layered into extraordinarily flavorful food. Helmed by Nick Balla and Cortney Burns, it draws on time-honored processes (such as fermentation, curing, pickling), and a core that runs through the cuisines of Central Europe, Japan, and Scandinavia to deliver a range of dishes from soups to salads, to shared plates and sweets. With more than 150 photographs, this highly anticipated cookbook is a true original.

Marx, Dead and Alive

Thomas Piketty's *Capital in the Twenty-First Century* showed that capitalism, left to itself, generates deepening inequality. In this audacious follow-up, he challenges us to revolutionize how we think about ideology and history, exposing the ideas that have sustained inequality since premodern times and outlining a fairer economic system.

Next Generation INDIE Book Awards Grand Prize Winner, Best Non-Fiction Book in 2017; and Winner in the Science/Nature/Environment category Finalist for Foreword INDIES Book of the Year Awards in Ecology and Environment In this book, Lowell E. Baier, one of America's preeminent experts on environmental litigation, chronicles the century-long story of America's resources management, focusing on litigations, citizen suit provisions, and attorneys' fees. He provides the first book-length comprehensive examination of the little-known Equal Access to Justice Act (EAJA) and its role in environmental litigation. Originally intended to support veterans, the disabled and small business, EAJA, Baier argues, now paralyzes America's public land management agencies. Baier introduces readers to the history of EAJA, examines the many beneficiaries of the law, describes in depth 20 of the most prominent litigious environmental groups in America, and recommends carefully tailored amendments to the EAJA to correct environmental abuses of the law while protecting legitimate interests. Inside the Equal Access to Justice Act will be a valuable resource for the environmental legal community, environmentalists, practitioners at all levels of government, and all readers interested in environmental policy and the rise of the administrative state.

Capital Times Clip Index

A daring--and controversial--second look at Senator Joseph McCarthy that declares that many of his notorious accusations were actually true. 16-page photo insert.

Capital and Ideology

What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

The juxtaposition of biopolitical critique and animal studies--two subjects seldom theorized together--signals the double-edged intervention of *Animal Capital*. Nicole Shukin pursues a resolutely materialist engagement with the "question of the animal," challenging the philosophical idealism that has dogged the question by tracing how the politics of capital and of animal life impinge on one another in market cultures of the twentieth and early twenty-first centuries.

Congressional Record

A GUARDIAN, OBSERVER, TELEGRAPH, NEW STATESMAN, EVENING STANDARD, SUNDAY TIMES AND IRISH TIMES BOOK OF THE YEAR. 'A very good read indeed' Matt Haig 'Terrific, page-turning, slyly funny' India Knight 'As satisfying a novel as I have read in years' Sarah Perry Quentin and Lottie Bredin, like many modern couples, can't afford to divorce. Having lost their jobs in the recession, they can't afford to go on living in London; instead, they must downsize and move their three children to a house in a remote part of Devon. Arrogant and adulterous, Quentin can't understand why Lottie is so angry; devastated and humiliated, Lottie feels herself to have been intolerably wounded. Mud, mice and quarrels are one thing - but why is their rent so low? What is the mystery surrounding their unappealing new home? The beauty of the landscape is ravishing, yet it conceals a dark side involving poverty, revenge, abuse and violence which will rise up to threaten them. Sally Verity, happily married but unhappily childless knows a different side to country life, as both a Health Visitor and a sheep farmer's wife; and when Lottie's innocent teenage son Xan gets a zero-hours contract at a local

pie factory, he sees yet another. At the end of their year, the lives of all will be changed for ever. A suspenseful black comedy, this is a rich, compassionate and enthralling novel in its depiction of the English countryside, and the potentially lethal interplay between money and marriage.

Inside the Equal Access to Justice Act

"This book is required reading for anyone involved in the practical issues of cost of capital decisions. It is written in a way that engages the novice, and yet challenges the professional to rethink the real issues." Brendan Scholey, Bloomberg. The cost of capital is the fundamental financial tool for business decision-making. It drives measures of value creation and destruction, and forms the basis of financial analysis using cash flow and other frameworks. This book is here to help the business world to use the cost of capital for real. The Real Cost of Capital describes the key issues in understanding and using the cost of capital today, taking principles from the world of managerial finance and putting them into the context of major investment decisions. Should, for example, a company use its own cost of capital to appraise new investments and acquisitions? What cost of capital might a US company use when appraising an investment in, say, the Philippines? For a typical investment, which type of risk is more important – specific risk or systematic risk? How should these risks be reflected in, say, a venture capital situation? Debt is cheaper than equity – so why don't companies raise more debt than they do? Most practitioners use the weighted average cost of capital ("WACC") in valuation and appraisal – but when should an alternative approach be used? This book will help you find the answers. The Real Cost of Capital is required reading for anyone involved in the practical issues of cost of capital decisions. It brings together the latest academic thinking with practical requirements in a real-life context, and the authors have used their combined experience of advising governments and international blue-chip companies to bring readers up to date with current issues. The Real Cost of Capital includes chapters on choosing models, calculating the cost of capital using real-life data sources, and calculating the cost of capital in an international context (a subject not usually covered in academic texts). It also has chapters and worked examples on the practical application of the cost of capital in business valuations, high-tech situations and the wide range of premia and discounts that can be applied to the cost of capital. The book has an associated website www.costofcapital.net which contains some current links. The site also gives access to tax rate information and financial data relevant to using cost of capital around the world. The objective is to make sure that the corporate planner, student, adviser or decision maker, when she/he is on the road, can simply open the book or dial in and take advantage of a wealth of decision-making support, without the pain of extended academic study.

Desperately Seeking Women Readers delves into the history of U.S. newspapers to examine the construction of female readership. Pages designed specifically for women transformed over time as the newspaper industry looked for ways to capture women readers. Harp investigates the creation and collapse of these pages before considering contemporary case studies to explore the recent revival of sex-specific pages. Interviews with professional journalists reveal the difficulties with defining news for

women and the problems inherent in constructing newspapers in a sex-specific way. With a clear and descriptive style, Harp offers a fresh, original topic in communication scholarship. *Desperately Seeking Women Readers* is ideal for undergraduate and graduate coursework, as well as for curious readers of U.S. newspapers or historical and contemporary women's issues.

Animal Capital

A first edition, *Insiders' Guide to Madison* is the essential source for in-depth travel and relocation information to this thriving Wisconsin city. Written by a local (and true insider), this guide offers a personal and practical perspective of Madison and its surrounding environs.

The Lie of the Land

Traces the events leading up to the Bush victory in the 2000 presidential election, and argues that confusing ballots, a purge of the electorate, politically-motivated decisions, and related factors influenced the outcome.

The Real Cost of Capital

**** From the author of *The Wall* **** Adapted into an Emmy Award-winning BBC One drama 'Effortlessly brilliant . . . hugely moving and outrageously funny.' Observer The residents of Pepys Road, London - a banker and his shopaholic wife, an elderly woman dying of a brain tumour, the Pakistani family who run the local shop, the young football star from Senegal and his minder - all receive anonymous postcards with a simple message: We Want What You Have. Who is behind it? What do they want? As the mystery of the postcards deepens, the world around Pepys Road is turned upside down by the financial crash and all of its residents' lives change beyond recognition over the course of the next year. From the bestselling author of *Whoops!* and *How to Speak Money* comes a post-financial crisis, state-of-the-nation novel told with compassion, humour and unflinching truth.

The Capital

Tracks power, privilege, and processes of community trust building in digitized media ecologies, focusing on public dialogues about racial inequality.

Desperately Seeking Women Readers

On February 11, 2011, Wisconsin Governor Scott Walker announced he would strip collective bargaining rights from public employees and teachers. In response, people rose up in mass protest, and Wisconsin became a reference point for a renewal of labor militancy and radical politics. These protests elicited extensive national media coverage, and drew more attention from the general public than any American labor struggle in decades. John Nichols's *Uprising* traces the roots of this struggle -- which has faced legislative disappointments, legal challenges, and dramatic electoral twists and turns -- and in the process reveals how Scott Walker rose to national prominence and went on to become a frontrunner in the Republican race for the nomination in 2016. At a time when public services are under assault from corporate privatizers and billionaire political donors, the public repudiation of Walker's efforts (and the shadowy interests like the Koch Brothers behind them) has translated into a broader challenge to corporate America, Wall Street, the far Right, and its media echo chamber.

Insiders' Guide® to Madison, WI

This book tells the inside story of those who played key roles in setting up the organisations and combatting the crisis. In exclusive interviews, global financial leaders and ESM insiders provide a rich stock of perspectives and anecdotes that bring to life the urgency of the crisis as well as the innovative solutions found to resolve it. The European Stability Mechanism and its temporary predecessor the EFSF provided billions of euros in loans to five hard-hit euro area countries during the European financial and sovereign debt crisis of the early 2000s, helping to safeguard the stability of those countries and the euro area as a whole. Initially, the crisis-torn euro area was ill-equipped institutionally, but the rapid establishment of the firewalls, the assistance programmes, deep seated country reforms, the strengthening of European institutions, and extraordinary European Central Bank measures shielded Europe from a euro area break-up. With the EFSF/ESM set-up, its managers aspired to create a new, more entrepreneurial international financial institution, one that is agile enough to respond quickly to new challenges, while still ensuring the strict governance befitting an organisation

pursuing a public mission. The euro area has emerged from near disaster in more robust shape. As Europe strives to further strengthen its architecture in preparation for any possible future crises, it is important to reflect upon how the euro area reinvigorated its fortunes and draw the relevant lessons for future crisis management in Europe and beyond.

Jews for Buchanan

"Today, we can sound like conservatives and act like conservatives—and still win elections. Those who say we can't don't see what I see in Wisconsin and what my fellow governors in states all across America see. We don't need to change our principles. What we need is more courage." In 2011, Wisconsin governor Scott Walker's chances of staying in office looked bleak. Angry protesters—furious about his collective bargaining proposal—swarmed Madison, camped in the capitol, and attempted to block the passage of the governor's reform legislation. Teachers unions accused him of sabotaging education. His approval numbers fell to the basement, and with the national media's descent on Wisconsin, liberals denounced "Dead Man Walker." He found himself fighting for his reforms, fielding death threats, and facing an unprecedented recall election. But then something happened. Walker's policies began to work. His constituents realized they were better off with his leadership, and in June 2012, he became the first governor in American history to survive a recall attempt, winning with a higher share of the vote than he had for his original election. In *Unintimidated*, Governor Walker tells the story of his fight to save Wisconsin from a \$3.6 billion budget deficit while simultaneously improving the state's schools and public infrastructure. He describes how he stood for his convictions against enormous political pressure and personal attacks. He explains how he knew his reforms would work, based on his experience as a local official. Speaking from the perspective earned from his resounding victory, he outlines lessons conservatives on the national stage can learn from his success, such as:

- Change the polls, not your principles.
- Don't accept the false choices presented to you.
- You can reform entitlements and survive.
- Austerity is not the answer.
- Never stop reforming.

Walker is living proof that conservatives need not move to the center to win. He argues that Republicans must offer Americans big, bold, positive solutions for our nation's challenges—and have the courage to implement them. Walker has shown that even President Obama will back down when faced with reforms promoted with common sense and courage.

I got his blood on me -- The pathway -- All our friends and ghosts -- My brother's blood -- The man who would be king -- A hesitant man -- Claim of blood -- The knight of the range -- The road to Tokomairiro -- The snack machine -- The man beside the pool -- What luck. A bloodied figure travels through time, a stepfather kicks a ball and curses a snack machine, a cranky ghost brakes a Kapiti train. From a reimagined history to a future where holograms walk the streets, these stories traverse time and genre to explore the frontiers that face the adventurous—now and in the past.

Uprising

The signing of the Paris Peace Accords in 1973 signified the end of the Vietnam War. American personnel returned home and the 591 American prisoners held captive in North Vietnam were released. Still, 2,646 individuals did not come home. Thirty-seven of those missing in action were from Wisconsin. Their names appear on the largest object—a motorcycle (now part of the Vietnam Veterans Memorial Collection)—ever left at the Vietnam Veterans Memorial. Using the recollections of the soldiers' families, friends and fellow servicemen, the author tells the story of each man's life.

Safeguarding the Euro in Times of Crisis

"The *Capital* is a mischievous yet profound story about storytelling . . . [An] unexpectedly delightful book about Brussels" *Economist* Brussels. A hive of tragic heroes, manipulative losers, involuntary accomplices. No wonder the European Commission is keen to improve its image. The fiftieth anniversary of the European Commission approaches, and the Directorate-General for Culture is tasked with organising an appropriate celebration. When Fenia Xenopoulou's assistant comes up with a plan to

put Auschwitz at the very centre of the jubilee, she is delighted. But she has neglected to take the other E.U. institutions into account. Meanwhile the city is on the lookout for a runaway pig. And what about the farmers who take to the streets to protest against restrictions blocking the export of pigs to China? The Capital is a brilliantly entertaining satire, a crime story, a comedy of manners . . . and a wild pig chase. It tells the tale of a continent, a city and its inhabitants as they navigate their way through the confusing tangle of 21st-century life. A "House of Cards" for the E.U. Commission - Winner of the German Book Prize "A deliciously vicious - and timely - satire about the E.U. and the meaning of Europe today" Financial Times Translated from the German by Jamie Bulloch

Unintimidated

The director of the famed Bodleian Libraries at Oxford narrates the global history of the willful destruction—and surprising survival—of recorded knowledge over the past three millennia. Libraries and archives have been attacked since ancient times but have been especially threatened in the modern era. Today the knowledge they safeguard faces purposeful destruction and willful neglect; deprived of funding, libraries are fighting for their very existence. *Burning the Books* recounts the history that brought us to this point. Richard Ovenden describes the deliberate destruction of knowledge held in libraries and archives from ancient Alexandria to contemporary Sarajevo, from smashed Assyrian tablets in Iraq to the destroyed immigration documents of the UK Windrush generation. He examines both the motivations for these acts—political, religious, and cultural—and the broader themes that shape this history. He also looks at attempts to prevent and mitigate attacks on knowledge, exploring the efforts of librarians and archivists to preserve information, often risking their own lives in the process. More than simply repositories for knowledge, libraries and archives inspire and inform citizens. In preserving notions of statehood recorded in such historical documents as the Declaration of Independence, libraries support the state itself. By preserving records of citizenship and records of the rights of citizens as enshrined in legal documents such as the Magna Carta and the decisions of the US Supreme Court, they support the rule of law. In *Burning the Books*, Ovenden takes a polemical stance on the social and political importance of the conservation and protection of knowledge, challenging governments in particular, but also society as a whole, to improve public policy and funding for these essential institutions.

Why we must reject the illusory consolations of technology and choose revolution over fascism. We are living in apocalyptic times. In *Capital Hates Everyone*, famed sociologist Maurice Lazzarato points to a stark choice emerging from the magma of today's world events: fascism or revolution. Fascism now drives the course of democracies as they grow less and less liberal and increasingly subject to the law of capital. Since the 1970s, Lazzarato writes, capital has entered a logic of war. It has become, by the power conferred on it by financialization, a political force intent on destruction. Lazzarato urges us to reject the illusory consolations of a technology-abetted "new" kind of capitalism and choose revolution over fascism.

Senate, 1789-1989, V. 1: Addresses on the History of the United States Senate

FINALIST FOR THE 2022 PEN/FAULKNER AWARD FOR FICTION FINALIST FOR PUBLISHING TRIANGLE'S EDMUND WHITE DEBUT FICTION AWARD In the last weeks of her pregnancy, a Muslim Indian lesbian living in San Francisco receives a visit from her estranged mother and sister that surfaces long held secrets and betrayals in this "sweeping family saga . . . with the beautiful specificity of real lives lived, loved, and fought for" (Entertainment Weekly) Working as a consultant for Kamala Harris's attorney general campaign in Obama-era San Francisco, Seema has constructed a successful life for herself in the West, despite still struggling with her father's long-ago decision to exile her from the family after she came out as lesbian. Now, nine months pregnant and estranged from the Black father of her unborn son, Seema seeks solace in the company of those she once thought lost to her: her ailing mother, Nafeesa, traveling alone to California from Chennai, and her devoutly religious sister, Tahera, a doctor living in Texas with her husband and children. But instead of a joyful reconciliation anticipating the birth of a child, the events of this fateful week unearth years of betrayal, misunderstanding, and complicated layers of love—a tapestry of emotions as riveting and disparate as the era itself. Told from the point of view of Seema's child at the moment of his birth, and infused with the poetry of Wordsworth and Keats and verses from the Quran, *Radiant Fugitives* is a moving tale of a family and a country grappling with acceptance, forgiveness, and enduring love.
