The Heat of the Day

It is wartime London, and the carelessness of people with no future flows through the evening air. Stella discovers that her lover Robert is suspected of selling information to the enemy. Harrison, the British intelligence agent on his trail, wants to bargain, the price for his silence being Stella herself. Caught between two men and unsure who she can trust, the flimsy structures of Stella's life begin to crumble.

The Heat of the Day

NOW A NO.1 NEW YORK TIMES BESTSELLER Michael Mann, Oscar-nominated filmmaker and writer-director of Heat and Miami Vice, teams up with Meg Gardiner to deliver Mann's first crime novel, an explosive return to the world and characters of his classic film Heat – an all-new story that illuminates what happened before and after the film.

Heat 2

In The Heat of the Day, Elizabeth Bowen brilliantly recreates the tense and dangerous atmosphere of London during the bombing raids of World War II. Many people have fled the city, and those who stayed behind find themselves thrown together in an odd intimacy born of crisis. Stella Rodney is one of those who chose to stay. But for her, the sense of impending catastrophe becomes acutely personal when she discovers that her lover, Robert, is suspected of selling secrets to the enemy, and that the man who is following him wants Stella herself as the price of his silence. Caught between these two men, not sure whom to believe, Stella finds her world crumbling as she learns how little we can truly know of those around us.

The Heat of the Day

A corpse ends up in the gutter. The black man arrested turns out to be a detective from California. No witnesses, no clues, no apparent motives. All the police have is the talented stranger to help them solve the case.

In the Heat of the Night

When recently orphaned Woodley Sharpless encounters Ben Pinkerton -- known to all as 'Trouble' -- for the first time at the exclusive Blaze Academy, he is instantly enraptured. They are polar opposites; Ben is exotic and daring; Woodley is bookish and frail, yet their lives quickly become inextricable intertwined. First at school, then in the staccato days of twenties New York, Woodley sees flashes of another person in his friend and slowly discovers a side of Ben's nature that belies a dark and hidden history. As the curtain falls on the frivolity of the twenties and rises to reveal the cruelty of a new decade, Woodley and Ben's friendship begins to fragment. Over the coming years the two men meet intermittently; in Japan before the outbreak of the Second World War and then in the midst of the Manhattan Project at Los Alamos. Change in both their lives, their relationship and their suffering, stand for a generation; one dispersed by depression and upheaval, brutality and confusion. David Rain's novel, *The Heat of the Sun*, is an ambitious and assured debut that captures perfectly two friends, two loves: two lives.

The Heat of the Sun

The “compelling” story behind the 1995 Chicago weather disaster that killed hundreds—and what it revealed about our broken society (Boston Globe). On July 13, 1995, Chicagoans awoke to a blistering day in which the temperature would reach 106 degrees. The heat index—how the temperature actually feels on the body—would hit 126. When the heat wave broke a week later, city streets had buckled; records for electrical use were shattered; and power grids had failed, leaving residents without electricity for up to two days. By July 20, over seven hundred people had perished—twenty times the number of those struck down by Hurricane Andrew in 1992. Heat waves kill more Americans than all other natural disasters combined. Until now, no one could explain either the overwhelming number or the heartbreaking manner of the deaths resulting from the 1995 Chicago heat wave. Meteorologists and medical scientists have been unable to account for the scale of the trauma, and political officials have puzzled over the sources of the city's vulnerability. In *Heat Wave*, Eric Klinenberg takes us inside the anatomy of the metropolis to conduct what he calls a “social autopsy,” examining the social, political, and institutional organs of the city that made this urban disaster so much worse than it ought to have been. He investigates why some neighborhoods experienced greater mortality than others, how city government responded, and how journalists, scientists, and public officials reported and explained these events. Through years of fieldwork, interviews, and research, he uncovers the surprising and unsettling forms of social breakdown that contributed to this human catastrophe as hundreds died alone behind locked doors and sealed windows, out of contact with friends, family, community groups, and public agencies. As this incisive and gripping account demonstrates, the widening cracks in the social foundations of American cities made visible by the 1995 heat wave remain in play in America's cities today—and we ignore them at our peril. Includes photos and a new preface on meeting the challenges of climate change in urban centers “Heat Wave is not so much a book about weather, as it is about the calamitous consequences of forgetting our fellow citizens. . . . A provocative, fascinating book, one that applies to much more than weather disasters.” —Chicago Sun-Times “It's hard to put down *Heat Wave* without believing you've just read a tale of slow murder by public policy.” —Salon “A classic. I can't recommend it enough.” —Chris Hayes

Heat Wave

During a brutally hot Atlanta summer, a crew of Black teenagers deals with the aftermath of their biggest tag: an audacious defacement of the United States' largest bas-relief monument to the Confederacy. They never exactly planned to hit Stone Mountain—things just got out of hand. But as June gives way to July and the temperature keeps rising, the crew can't quite manage to get anything back under control. Instead, each struggles with conflicting allegiances and problems they're not quite ready to handle, and they hurtle toward the summer's end and a future that threatens to pull them apart for good. Meanwhile, two FBI agents attempt to untangle the knot of rage, alliances, and tensions that led to the tag, getting in deep and ultimately revealing their own dangerously different professional agendas. Set to a thumping soundtrack, rolling down suburban lanes and congested highways, *In the Heat of the*

Light delivers a new twist on the old story of a crew of young friends drawn in different directions on the verge of adulthood—one that is rooted in Black experiences of gentrification, Black Lives Matter, music, and a mosaic of Atlanta neighborhoods made up of families, food, and overwhelming change. Stephen Kearse is a dynamic journalist and critic covering movies, music, and American history for media including New York Times Magazine, Uproxx, Pitchfork, and Paste.

In the Heat of the Light

Winner of the Booker Prize as best novel of the year in 1983, *Heat and Dust* was also made into a major motion picture starring Julie Christie, now regarded by many as a classic.

Heat and Dust

Eva Trout has a capacity for making trouble, attracting trouble and for spreading trouble around her. This book was the author's last completed novel, first published in 1968.

Eva Trout

In this searingly sexy anthology, #1 New York Times bestselling authors Sylvia Day, Maya Banks, and national bestselling author Karin Tabke present three stories of men in uniform—unzipped. They may enforce the rules, but when men in uniform are off duty and under the covers, they're experts at breaking them. After all, the hottest thing about a man in uniform is imagining him out of it... In Maya Banks's "Soul Possession," Jessie spends a hot night with two sexy-as-sin detectives, only to be accused of murder the very next day. But when Jessie becomes the target of a serial killer, her two detectives will risk everything to have her back in their arms—and in their bed... It's time for protected witness Layla Creed to come out of hiding and take the stand in "Taking the Heat" by Sylvia Day. Layla has only three days to reconnect with federal marshal Brian Simmons—and slake the white-hot lust that has simmered between them for years... Karin Tabke's "Wanted" follows the X-rated exploits of bad-boy cop Colin Daniels and the soon-to-be-ex-wife of a mob boss. He's been hired to guard her body, but it drives him to distraction instead, putting his career—and his life—on the line...

Men Out of Uniform

Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! Solids, liquids, and gases are the three states of matter. But have you ever made matter change from one state to another? Or seen how even invisible matter takes up space? Now you can! Explore matter with the fun experiments you'll find in this book. As part of the Searchlight Books™ collection, this series sheds light on a key science question How Does Energy Work? Hands-on experiments, interesting photos, and useful diagrams will help you find the answer!

Investigating Matter

Stacey Daniels has always been attracted to the wrong type of man . . . And she knows in her heart the virile, wounded Viking at her front doorstep will certainly be no exception. A vision from her most secret erotic fantasies—a glorious god of a man—he excites her with his tantalizing aura of dangerous sensuality. Stacey knows in the deepest depths of her soul that submission will bring unforeseen peril into her life, and yet she is helpless to resist him—for he is a master of decadent pleasures and sweet sensuality . . . and all she has ever wished for. But loving Conor carries a burden that no mortal woman can bear. Though he finds solace in Stacey's passion and the warmth of her welcoming body, his true realm is one of darkest dreams, torn by violence and strife, that is now following him into Stacey's world

Heat of the Night

'An inspirational memoir from an extraordinary woman . . . A humbling, jaw-dropping read' Viv Groskop
'This book challenges assumptions about who firefighters are, and about what women can do' The Guardian
'This book will change the way you think. Forever' Cosmopolitan
Dr Sabrina Cohen-Hatton has been a firefighter for eighteen years. She decides which of her colleagues rush into a burning building and how they confront the blaze. She makes the call to evacuate if she believes the options have been exhausted or that the situation has escalated beyond hope. Taking us to the very heart of firefighting, she immerses us in this extraordinary world; from scenes of devastation and crisis, through triumphs of bravery, to the quieter moments when she questions herself. Revealing her own story for the

very first time, she recounts her years spent sleeping rough and her passion for a career that allows her to rescue others as she was never rescued herself. This book is the result of everything she has learnt about how we respond in our most extreme moments. 'An inspirational woman' Good Housekeeping 'Gripping, heart-stopping and profoundly reassuring' Sue Black, author of *All That Remains*

The Heat of the Moment

From leading climate scientist Dr. Friederike Otto, this gripping book reveals the revolutionary science that definitively links extreme weather events—including deadly heat waves, forest fires, floods, and hurricanes—to climate change. “Meet the forensic scientists of climate change; if you like CSI, you’ll be equally enthralled with the skill and speed these folks exhibit. But the stakes are infinitely higher!” —Bill McKibben, author of *Falter* and *The End of Nature* Tied with Hurricane Katrina as the costliest cyclone on record, Hurricane Harvey caused catastrophic flooding and over a hundred deaths in 2017. *Angry Weather* tells the compelling, day-by-day story of the World Weather Attribution unit—a team of scientists that studies extreme weather events while they’re happening—and their race to track the connection between the hurricane and climate change. As the hurricane unfolds, Otto reveals how attribution science works in real time, and determines that Harvey’s terrifying floods were three times more likely to occur due to human-induced climate change. At the forefront of cutting-edge climate science, Friederike Otto uncovers how the new ability to determine climate change’s role in extreme weather events can dramatically transform how we view the climate crisis: from how it will affect those of us who are most vulnerable, to the corporations and governments that may find themselves held accountable in the courts. The research laid out in *Angry Weather* will have profound impacts, both today and for the future of humankind. Published in Partnership with the David Suzuki Institute.

Angry Weather

Throughout the late-seventies and eighties, Van Halen were the archetypal American rock group. What’s more they were also the highest paid band in the history of show business, taking a cool \$1 million for a night’s work at a festival in 1983 and making the Guinness Book of Records. This autobiography tells their story.

Crazy from the Heat

J-B. J. FOURIER’S immensely influential treatise *Theorie Analytique de la Chaleur* [21J], and the subsequent developments and refinements of FOURIER’S ideas and methods at the hands of many authors, provide a highly successful theory of heat conduction. According to that theory, the growth or decay of the temperature e in a conducting body is governed by the heat equation, that is, by the parabolic partial differential equation. Such has been the influence of FOURIER’S theory, which must forever remain the classical theory in that it sets the standard against which all other theories are to be measured, that the mathematical investigation of heat conduction has come to be regarded as being almost identical with the study of the heat equation, and the reader will not need to be reminded that intensive analytical study has not been entirely; witness, for example, those theories which would replace the heat equation by an equation which implies a finite speed of propagation for the temperature. The reader is referred to the article [9] of COLEMAN, FABRIZIO, and OWEN for the derivation of such an equation from modern Continuum Thermodynamics and for references to earlier work in this direction. viii Introduction amply demonstrated that the heat equation enjoys many properties of great interest and elegance.

Heat Conduction Within Linear Thermoelasticity

In Central Harlem, the symbolic and historic heart of black America, the violent unrest of July 1964 highlighted a new dynamic in the racial politics of the nation. The first “long, hot summer” of the Sixties had arrived.

In the Heat of the Summer

In *The Heat of the Day*, Elizabeth Bowen brilliantly recreates the tense and dangerous atmosphere of London during the bombing raids of World War II. Many people have fled the city, and those who stayed behind find themselves thrown together in an odd intimacy born of crisis. Stella Rodney is one of those who chose to stay. But for her, the sense of impending catastrophe becomes acutely personal when she discovers that her lover, Robert, is suspected of selling secrets to the enemy, and that the man

who is following him wants Stella herself as the price of his silence. Caught between these two men, not sure whom to believe, Stella finds her world crumbling as she learns how little we can truly know of those around us.

The Heat of the Day

The mercury is climbing in Lumberville, and the folks are doing everything they can to keep cool. Officer McGinnis spends the day in a cold bath, Lottie Mims does her housework in her bathing suit, and Abigail and Ralphie Blue sell ice cubes. When the temperature refuses to relent, the entire community seeks solace by the river--where everyone dreams of cool relief. A cast of quirky characters and lots of playful details from two celebrated picture-book talents make this heat wave look like fun!

Heat Wave

Winner of the 2007 Agatha Award for Best First Novel If a door suddenly swings wide in your memory, what would you see? Young veterinarian Rachel Goddard's world begins to crumble when a client rushes into the animal hospital with a basset hound struck by a car during a thunderstorm. The dog owner's terrified tot, drenched with rain, loses sight of her mother in the flurry of activity and screams, "Mommy! I want Mommy!" Instantly Rachel is hurled back in time to a day in her own childhood when her baby sister Michelle uttered the same cry while thunder crashed and rain poured down on them. The unearthed memory feels like a fragment from a nightmare, and Rachel doesn't understand its meaning or the anguish it stirs up in her. When she seeks answers she learns nothing from Michelle or from Judith, their loving but manipulative mother. Judith is a psychologist who is only too happy to have her adult daughters still living in her elegant Tudor house outside Washington, DC. But their apparently serene home is a house of secrets where Judith's unspoken rules forbid questions about the family history or the daughters' long-dead father. As more baffling memories surface, Rachel begins to suspect that nothing about her family is what it seems. As her mother's attempts to control her accelerate, Rachel embarks on a quest that takes her deep into her own memory as well as halfway across the country. The heartbreaking truth she uncovers will shatter her world and force her to make an unthinkable choice.

The Heat of the Moon

The Last Day at Bowen's Court deals with the life of the Irish novelist, Elizabeth Bowen, her time in London during the Second World War and her 'reporting' on Irish neutrality for the Ministry of Information. At the centre of the novel is her Blitz love affair with the Canadian diplomat, Charles Ritchie, a wartime romance that inspired her most famous novel, *The Heat of the Day*, a gripping story about espionage and loyalty that became a best-seller. The novel is told from the point of view of Bowen herself, and also from that of her lover Charles Ritchie, her husband Alan Cameron and Ritchie's wife Sylvia. It is set in wartime London, Dublin and North Cork, and deals with the private and public conflicts of love and of national identity in a time of upheaval and liberation. At the centre of the novel is a portrait of Elizabeth Bowen, one of Ireland's most influential writers.

The Last Day at Bowen's Court

Fanatical about cricket since he was a boy, MILES JUPP would do anything to see his heroes play. But perhaps deciding to bluff his way into the press corps during England's Test series in India wasn't his best idea. By claiming to be the cricket correspondent for BBC Scotland and getting a job with the (Welsh) Western Mail, Miles lands the press pass that will surely be the ticket to his dreams. Soon, he finds himself in cricket heaven - drinking with David Gower and Beefy, sharing bar room banter with Nasser Hussain and swapping diarrhoea stories with the Test Match Special team. Amazing! But struggling in the heat under the burden of his own fibs, reality soon catches up with Miles as - like a cricket-obsessed Boot from Evelyn Waugh's *Scoop* - he bumbles from one disaster to the next. A joyous, charming, yet cautionary tale, *Fibber in the Heat* is for anyone who's ever dreamt about doing nothing but watching cricket all day long.

Fibber in the Heat

The tenth Nikki Heat novel, set in the universe of the Castle TV series. New York police captain Nikki Heat is accustomed to dealing with murders, even those with no leads and no motives. However, when a coed is murdered on campus, Heat's husband is a suspect, making this case the most personal one yet.

Marriage. It's a double-edged sword, or at least it is for Nikki Heat. Her husband, Pulitzer Prize-winning journalist Jameson Rook, infuriates her in a way no one else in her entire life has ever done. He also takes her to heights of pleasure she has never experienced. But most of all, she loves the man with all her heart and she'd do anything to protect him—which is just what she had done not so long ago. It almost cost them everything. Now Rook is given the honor to be a visiting professor at his alma mater, and he can't pass up the opportunity to mentor burgeoning writers at his award-winning college newspaper. But shortly after his arrival on campus, a female reporter for the paper is found dead... naked... in Rook's bed. Dealing with betrayal from any man is not Nikki's style. She and Jameson have had plenty of conflicts during their complicated relationship, but none like this. Is her husband keeping secrets, or can she really trust him? In order to find out, Nikki gives Jameson the benefit of the doubt and digs into his theory of a secret society within a secret society. What she finds puts her investigative skills, and her marriage, to the test.

Crashing Heat

The #1 Bestseller! Michael Arroyo has a pitching arm that throws serious heat along with aspirations of leading his team all the way to the Little League World Series. But his firepower is nothing compared to the heat Michael faces in his day-to-day life. Newly orphaned after his father led the family's escape from Cuba, Michael's only family is his seventeen-year-old brother Carlos. If Social Services hears of their situation, they will be separated in the foster-care system—or worse, sent back to Cuba. Together, the boys carry on alone, dodging bills and anyone who asks too many questions. But then someone wonders how a twelve-year-old boy could possibly throw with as much power as Michael Arroyo throws. With no way to prove his age, no birth certificate, and no parent to fight for his cause, Michael's secret world is blown wide open, and he discovers that family can come from the most unexpected sources. Perfect for any Little Leaguer with dreams of making it big--as well as for fans of Mike Lupica's other New York Times bestsellers *Travel Team*, *The Big Field*, *The Underdogs*, *Million-Dollar Throw*, and *The Game Changers* series, this cheer-worthy baseball story shows that when the game knocks you down, champions stand tall.

From the Heat of the Day

If you can't stand the heat, don't walk into the fire. Danny knew his sophomore year would be stressful . . . but he didn't expect his school to burn down on the first day. To make matters worse (and they were about to get a lot worse), he -- and his three best friends -- receive an email in their inboxes from the principal of their rival, King's Academy, offering full-rides to attend the town's prestigious boarding school. Danny wants nothing to do with King's Academy and says no. Of course his mother says yes. So off he goes to be bullied and picked on for not being part of the popular and rich "in crowd." From day one at King's, Danny encounters hazing, mocking insults from girls at the "popular and pretty" table, and cafeteria food that, for such a prestigious school, tastes as if it were purchased from a military surplus supply warehouse. If he survives, Danny will have to overcome his fears of failure, rejection, and loneliness--all while standing strong in his beliefs and walking into the fire.

Heat

Once in a blue moon a book is published that changes irrevocably the face of things. *White Heat* is one such book. Since it was originally produced in 1990, it has gone on to become one of the most enduring classic cookbooks of our time. With its unique blend of outspoken opinion, recipes and dramatic photographs by the late legendary photographer Bob Carlos Clarke, *White Heat* captures the magic and spirit of Marco Pierre White in the heat of his kitchen. This 25th anniversary edition features brand new material, including photographs from the late Bob Carlos Clarke and contributions from James Steen, Lindsey Carlos Clarke and a host of high-profile chefs: Jason Atherton, Sat Bains, Mario Batali, Raymond Blanc, Anthony Bourdain, Adam Byatt, David Chang, Phil Howard, Tom Kerridge, Paul Kitching, Pierre Koffmann, Gordon Ramsay and Jock Zonfrillo.

Blaze

This book consists of chapter-length visits to world "hot" spots, where people are already coping with the consequences of climactic disruption. It reveals the process of climate change to be ongoing, serious and immediate.

From the Heat of the Day

The author is the youngest son of a British landowner. He trained as a Dairy Consultant and worked for a major Dairy Company before moving to New Zealand. He has a lively imagination and sees farming as it may have been. Gerald now lives in New Zealand with his wife Joy. "You knew," he raved on "Why didn't you tell me sooner?" his father replied "I told you that there is nothing you can do, you have to accept it and move on. The frail old man grasped his son's arm and said quietly. "You don't need the farm son, move on, and live your own life away from all this grief." "I swear that I will make them pay dearly for this deceit and jealousy they will never know when but it will happen" His mother was dying they both knew that, as one last gesture they took their first born to see her. The very old lady asked quietly, "What did you name him?"

White Heat

Soon enough I found myself outside the airport in what felt like a market - a wall of people shouting and heckling, selling newspapers, phone cards, even boiled eggs. But it wasn't the people that stopped me in my tracks, it was the heat. The heat made New Orleans on a hot summer day feel like spring. Humid, thick and salty to taste, that was Nairobi heat. When a beautiful blonde girl is found murdered on the porch of an African university professor in a small town in Wisconsin, USA, hard-working detective Ishmael Fofona knows immediately that it will be the news event of the year. What he cannot know however is that the discovery of the dead girl will change his life forever and that barely seventy-two hours after being called to the scene he will find himself on African soil, hunting for clues in a case that seemingly makes no sense. Why would Joshua Hakizimana - hero of the Rwandan genocide, a man who had saved hundreds of people from the machetes of genocidaires - kill a random white girl and then dump her body outside his house? The answers, it would seem, lie in Africa. And there is only one way to get at them.

Feeling the Heat

ONE OF BARACK OBAMA'S FAVOURITE READS OF THE YEAR 'If I could get policymakers and citizens everywhere to read just one book this year, it would be Kim Stanley Robinson's *The Ministry for the Future*' Ezra Klein, Vox 'A great read' Bill Gates *The Ministry for the Future* is a masterpiece of the imagination, using fictional eyewitness accounts to tell the story of how climate change will affect us all. Its setting is not a desolate, postapocalyptic world, but a future that is almost upon us. Chosen by Barack Obama as one of his favorite books of the year, this extraordinary novel from visionary writer Kim Stanley Robinson will change the way you think about the climate crisis. 'A novel that presents a rousing vision of how we might unite to overcome the greatest challenge of our time' TED.com 'A breathtaking look at the challenges that face our planet in all their sprawling magnitude and also in their intimate, individual moments of humanity' Booklist (starred review) 'Gutsy, humane . . . a must-read for anyone worried about the future of the planet' Publishers Weekly (starred review) 'A sweeping epic about climate change and humanity's efforts to try and turn the tide before it's too late' Polygon (Best of the Year) 'Steely, visionary optimism' Guardian

The Heat is on

A *Shadow Stalkers* novella from the #1 New York Times bestselling author of the *Crossfire* series. Layla Creed and Deputy US Marshal Brian Simmons have a history that is as hot and heartbreaking as it is unforgettable. Now their paths have crossed once again. This time things are twice as hot. Layla—a protected witness—has been persuaded to come out of hiding and testify in a sensational murder trial. But as far as Brian's concerned, there's an even more pressing problem. Once Layla testifies she'll get sucked back into the Witness Protection Program. A new identity, a new location, a new occupation—and a new inspector to check up on her. In other words, out of his life forever. There is one more option—take Layla and go on the run. Rekindling what they once had should be easy. But a stranger in their shadow has plans of his own, forcing Brian and Layla to risk everything in the name of love. Includes an excerpt of *On Fire*, another *Shadow Stalkers* novella. Taking the Heat previously appeared in *Men Out of Uniform*

In the Heat Of The Day

'An inspirational memoir from an extraordinary woman . . . A humbling, jaw-dropping read' Viv Groskop 'This book will change the way you think. Forever' Cosmopolitan Dr Sabrina Cohen-Hatton has been a firefighter for eighteen years. She decides which of her colleagues rush into a burning building and

how they confront the blaze. She makes the call to evacuate if she believes the options have been exhausted or that the situation has escalated beyond hope. Taking us to the very heart of firefighting, she immerses us in this extraordinary world; from scenes of devastation and crisis, through triumphs of bravery, to the quieter moments when she questions herself. Revealing her own story for the very first time, she recounts her years spent sleeping rough and her passion for a career that allows her to rescue others as she was never rescued herself. This book is the result of everything she has learnt about how we respond in our most extreme moments. 'This book challenges assumptions about who firefighters are, and about what women can do' The Guardian

Nairobi Heat

A comprehensive history of the influential cult band draws on dozens of new interviews and previously undiscovered archive sources, tracing their initial lack of success before they inspired and were championed by such artists as David Bowie. Original.

The Ministry for the Future

"Schneider looks at how climate change is already threatening our mental and physical health and offers ... tips to tackle these challenges"--

Taking the Heat

The Death of the Heart is perhaps Elizabeth Bowen's best-known book. As she deftly and delicately exposes the cruelty that lurks behind the polished surfaces of conventional society, Bowen reveals herself as a masterful novelist who combines a sense of humor with a devastating gift for divining human motivations. In this piercing story of innocence betrayed set in the thirties, the orphaned Portia is stranded in the sophisticated and politely treacherous world of her wealthy half-brother's home in London. There she encounters the attractive, carefree cad Eddie. To him, Portia is at once child and woman, and her fears her gushing love. To her, Eddie is the only reason to be alive. But when Eddie follows Portia to a sea-side resort, the flash of a cigarette lighter in a darkened cinema illuminates a stunning romantic betrayal--and sets in motion one of the most moving and desperate flights of the heart in modern literature.
