Identity in Question

"A spectacular collection of essays by the most noted theorists of identity. The book well frames the issues around identity that presently are defining living in the early 21st century ... A must read." - Patricia Ticineto Clough, City University, New York "A wonderfully disparate and impressively distinguished set of authors to address the question of identity. The result is exciting and fruitful. No other book connects so elegantly sociological notions of individualization with the psychoanalysis of melancholy." - Scott Lash, Goldsmiths, University of London Identity in Question brings together in a single volume the world's leading theorists of identity to provide a decisive account of the debates surrounding self and identity. Presenting incisive analyses of the impact of globalization, postmodernism, psychoanalysis and post-feminism upon our imaginings of self, this book explores the complexity, contentiousness and significance of current debates over identity in the social sciences and the public sphere. As these contributions make clear, mapping the contours and consequences of transformations in identity in our globalizing world is not simply an academic exercise. It is a pressing concern for public and political debates. As identity continues its move to the centre of political life, so too do the possibilities for creatively re-imagining how we choose to live, both individually and collectively, in an age of uncertainty and insecurity. Identity in Question is essential reading for all students of self, identity, individualism and individualization.

Questions of Cultural Identity

Why and how do contemporary questions of culture so readily become highly charged questions of identity? The question of cultural identity lies at the heart of current debates in cultural studies and social theory. At issue is whether those identities which defined the social and cultural world of modern societies for so long - distinctive identities of gender, sexuality, race, class and nationality - are in decline, giving rise to new forms of identification and fragmenting the modern individual as a unified subject. Questions of Cultural Identity offers a wide-ranging exploration of this issue. Stuart Hall firstly outlines the reasons why the question of identity is so compelling and yet so problematic. The cast of outstanding contributors then interrogate different dimensions of the crisis of identity; in so doing, they provide both theoretical and substantive insights into different approaches to understanding identity.

A Question of Identity

A Question of Identity is a multi-disciplinary exploration of one of the most vital issues in the contemporary world. Never was this topic more relevant than now, on the threshold of the twenty-first century. At

a time when the global economy, European citizenship and worldwide religion are the order of the day, nationalism – as in eastern Europe and the Balkans – and regionalism – Wales and Scotland provide perfect examples – ride high on the agenda. It is the problems and paradoxes that emerge immediately the subject is raised that form the core of this book. *A Question of Identity* breaks new ground by drawing together eminent academics from a variety of disciplines including; anthropology, history, law, linguistics, politics, psychology and sociology, to examine the way in which issues of identity have impacted on society and the way in which changes in society have resulted in a re-evaluation of identity. Topics covered include, 'Britishness' within the context of devolution; language and identity; religion, gender and identity; the political and legal problems of European citizenship; elderly migrants and identity; and German identity after reunification. The book explores questions of identity in two sections: British and global. The main conclusion to be reached is that at any period of history the question of identity is complex composed of interacting facets which combine in larger or smaller proportions to create the whole, be that individual, group, ethnic, religious, national or supranational. This book sets out to identify some of the facets that contribute to the whole and by so doing answers some of the questions which are currently circulating around the question of identity.

A Question of Identity

"Who am I?" and 'Who are we?' are the existential, foundational questions in our lives. In our modern world, there is no construct more influential than 'identity' – whether as individuals or as groups. The concept of group identity is the focal point of a research group named "A Question of Identity" at the Mandel Scholion Interdisciplinary Research Center in the Humanities at the Hebrew University of Jerusalem. The papers collected in this volume represent the proceedings of a January 2017 conference organized by the research group which dealt with identity formation in six contextual settings: Ethno-religious identities in light of the archaeological record; Second Temple period textual records on Diaspora Judaism; Jews and Christians in Sasanian Persia; minorities in the Persian achaemenid period; Inter-ethnic dialogue in pre-1948 Palestine; and redefinitions of Christian Identity in the Early Modern period.

100 Questions and Answers About Gender Identity

"100 Questions and Answers About Gender Identity" answers many of the basic, everyday questions people ask. The idea is to give information to people so they can have better conversations with fewer worries about hurting others or embarrassing themselves. The guide is respectful, accurate, authoritative and accessible.

Question of Identity

Meet Rona Parish, a talented biographer who has a skill for writing about the past and encountering danger along the way, and her adorable golden retriever, Gus. Rona Parish has to verify a rumour of what seems to be a huge scandal which happened a long time ago at a closed-down school. But will the past catch up with her before she can unravel the truth? Biographer Rona Parish is at her wits' end when she struggles to finish her latest writing project. Open to distraction, she catches up with her friends and family and tries to clear her head in the meantime. An old school photograph in which someone seems to have been blacked out hints at a curious event . . . A far more inconvenient distraction, her twin sister Lindsey persuades her to use her detective skills for a discovery concerning an old school photograph in which someone deliberately blacked out a figure. Who is the mysterious person in the photograph and why would someone want to hide their identity? Rona Parish has to uncover long-forgotten secrets and a rumoured scandal that took place decades ago . . . Reluctantly, Rona takes on the job and tries to put the pieces together. But investigating a decades-old scandal proves trickier than she anticipated, and brings up the question if this story will stay buried after all . . . A page-turning cosy mystery set in the fictional English market town of Marsborough in the stunning Chiltern Hills. Fans of M.C. Beaton, Richard Osman, Reverend Richard Coles, G.M. Malliet, Margery Allingham, Betty Rowlands and Faith Martin will love this series. READERS ADORE RONA PARISH: "Excellent mystery" "I enjoy this series and like catching up with Rona Parish and her extended family" "This is a good clean murder mystery" "British cozy fans will enjoy the sophisticated plot and country atmosphere" Booklist "Solid plotting complements the author's in-depth examinations of the varied relationships among her characters, in particular the bond between Rona and Lindsey" Publishers Weekly The Rona Parish mysteries 1. The Bear That Wasn't

A hibernating bear awakens to find himself smack dab in the middle of a sprawling industrial complex where people think he's just a silly man who wears a fur coat. 46 illustrations.

Questioning Identity

What is really happening when people either individually or in groups identify with particular definitions of themselves or strike out to take up new identities? Do gender, class and ethnicity offer some stability, or are they limiting?

Identity and Personhood

This book approaches the concept of identity from both logical-linguistic and socio-cultural perspectives, and explores its implications for our understanding of who or what we persons really are. In the process, it bridges disciplines that often remain disconnected - most notably analytic philosophy and the social sciences - and offers a novel critique of citizenship and moral education, "identity politics"

Understanding Sexual Identity

Today's youth struggle with difficult questions of sexual identity. How can a youth worker offer wise care and counsel on such a controversial and confusing subject? Mark Yarhouse, Director of the Institute for the Study of Sexual Identity, writes to equip youth ministers so they can faithfully navigate the topic of sexual identity in a way that is honest, compassionate, and accessible. Reframing the focus away from the culture wars, Yarhouse introduces readers to the conversation beginning with the developmental considerations in the formation of sexual identity—all of which occurs in the teen years. He offers practical and helpful ways to think about people who experience same-sex attraction. Sections of the book are also dedicated to helping parents respond to their children and teens who struggle with questions of sexual identity, as well as how youth ministry can become more relevant in the lives of youth who are navigating these issues.

Personal Identity and Self-Consciousness

Personal Identity and Self-Consciousness is about persons and personal identity. What are we? And why does personal identity matter? Brian Garrett, using jargon-free language, addresses questions in the metaphysics of personal identity, questions in value theory, and discusses questions about the first person singular. Brian Garrett makes an important contribution to the philosophy of personal identity and mind, and to epistemology.

Besieged Ego

The Besieged Ego critically appraises the representation, or mediation, of identity in film and television through a thorough analysis of doppelgangers and split or fragmentary characters. The prevalence of non-autonomous characters in a wide variety of film and television examples calls into question the very concept of a unified, 'knowable' identity. The form of the double, and cinematic modes and rhetorics used to denote fragmentary identity, is addressed in the book through a detailed analysis of texts drawn from a range of industrial, historical and cultural contexts. The doppelganger or double carries significant cultural meanings about what it means to be 'human' and the experience of identity as a gendered individual. The double also expresses in fictional form our problematic experience of the world as a social, and supposedly whole and autonomous, subject. The Besieged Ego therefore raises important questions about the representation of identity onscreen and concomitant issues regarding autonomy and what it means to be 'human', yet it also charts a generic account of the double onscreen. Case studies include horror, fantasy, and comedy.

The Identity in Question

First Published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

Personal Identity

A comprehensive introduction to the nature of the self and its relation to the body, this title places the problem of personal identity in the context of more general puzzles about identity, and discusses the major related theories.

Identity Formation, Youth, and Development

The concept of identity is one of the most important ideas the social sciences have investigated in recent years, yet no introductory textbooks are available to those who want to gain a sense of this burgeoning field. The first of its kind, this text provides an introduction to the scientific study of identity formation, with a focus on youth development. The analyses of the problems and prospects faced by contemporary young people in forming identities are placed in the context of societies that themselves are in transition, further complicating identity formation and the interrelated processes of self development and moral-ethical reasoning. In order to sort through what is now a vast literature on the various aspects of human identity, this book introduces the Simplified Identity Formation Theory. This theory cuts through much of the academic jargon that limits the accessibility of this promising field, and builds an understanding of human identity from first principles. This book is optimized for students and instructors, featuring several useful pedagogical tools and a robust series of online resources: Primer format: the text synthesizes the vast and disparate literature that has characterized the field of Identity Studies, with a focus on identity formation during the transition to adulthood; theory and research is discussed in plain, non-technical language, using the author's new Simplified Identity Formation Theory. In-text pedagogy: to enhance student engagement, box insert and in-text examples from current events, popular culture, and social media are incorporated throughout the text; key terms are in bold in each chapter and combined in a glossary at the end of the text. Online resources for instructors: A robust set of resources that, when combined with the text, provides a complete blueprint for designing an identity course; resources include PowerPoint Presentations, test bank, sample syllabi, and instructor manuals for both face-to-face and online courses that include weekly written assignment questions and discussion-forum questions along with essay topic ideas and grading rubrics. Online resources for students: a student manual, flashcards, practice quizzes, and exercises with video links.

Identity Trouble

Identity Trouble assembles contributions from a variety of discourse fields to discuss the pressures on traditional understandings of identity. The focus is on failures and uncertainties in people's construction of their identities when faced change and the contributors raise critical questions about identity and how it may be reconfigured.

Identity

Lawler examines debates surrounding identity, and shows how identity is part of the fabric of society, and integral to social relations. The book includes all the core topics covered by courses in this field and uses rich and varied contemporary empirical examples to illustrate the discussion.

Personal Identity

We take it for granted that a person persists over time: when we make plans, we assume that we will carry them out; when we punish someone for a crime, we assume that she is the same person as the one who committed it. Metaphysical questions underlying these assumptions point towards an area of deep existential and philosophical interest. In this volume, leading metaphysicians discuss key questions about personal identity, including 'What are we?', 'How do we persist?', and 'Which conditions guarantee our identity over time?' They discuss whether personal identity is 'complex', whereby it is analyzable in terms of simpler relations such as physical or psychological features, or whether it is 'simple', namely something that cannot be analyzed in terms of more fundamental relations. Their essays offer an innovative discussion of this topic and will be of interest to a wide readership in metaphysics.

Reasons and Persons

This book challenges, with several powerful arguments, some of our deepest beliefs about rationality, morality, and personal identity. The author claims that we have a false view of our own nature; that it is often rational to act against our own best interests; that most of us have moral views that are directly self-defeating; and that, when we consider future generations the conclusions will often be

disturbing. He concludes that moral non-religious moral philosophy is a young subject, with a promising but unpredictable future.

The Power of Us

If you're like most people, you probably believe that your identity is stable. But in fact, your identity is constantly changing - often outside your conscious awareness and sometimes even against your wishes - to reflect the interests of the groups of which you're a part. And that fluid identity has a powerful influence over your feelings, beliefs, and behaviours. In *THE POWER OF US*, psychologists Packer and Van Bavel integrate their own cutting-edge research in psychology, neuroscience and economics to explain what identity really is and show how to harness its dynamic nature to: Increase our productivity - Improve physical and psychological health - Overcome our individual prejudice - Unlock our altruism - Break the political gridlock - Galvanize others to solve controversial global problems. Along the way, they explain such seemingly unrelated phenomenon as why men cry at football games but not funerals, why the history of slavery in U.S. counties is one of the best predictors of current day racism, and why Canada keeps a national reserve of maple syrup. Packed with fascinating insights, vivid case studies, and pioneering research, *THE POWER OF US* will change the way you understand yourself - and those around you - forever.

Identity in question

This 12-hour free course explored how identity can be categorised, including in terms of gender, socio-economic categories, race and place of birth.

Social Justice, Education and Identity

This collection will give readers interested in questions of social justice and education access to the work of some of the key contributors to the debate in the UK.

Navigating the Future

Psychologists now understand that identity is not fixed, but fluid and highly dependent on environment. In times of stress, conflict, or change, people often adapt by presenting themselves in different ways and emphasizing different social affiliations. With changing demographics creating more complex social groupings, it is important to understand the costs and benefits of the way social groups are categorized, and the way individuals understand, cope with, and employ their varied social identities. *Navigating the Future*, edited by Geraldine Downey, Jacquelynne Eccles, and Celina Chatman, answers that call with a wealth of empirical data and expert analysis. *Navigating the Future* focuses on the roles that social identities play in stressful, challenging, and transitional situations. Jason Lawrence, Jennifer Crocker, and Carol Dweck show how the prospect of being negatively stereotyped can affect the educational success of girls and African Americans, making them more cynical about school and less likely to seek help. The authors argue that these issues can be mitigated by challenging these students educationally, expressing optimism in their abilities, and emphasizing that intelligence is not fixed, but can be developed. The book also looks at the ways in which people employ social identity to their advantage. J. Nicole Shelton and her co-authors use extensive research on adolescents and college students to argue that individuals with strong, positive connections to their ethnic group exhibit greater well-being and are better able to cope with the negative impact of discrimination. *Navigating the Future* also discusses how the importance and value of social identity depends on context. LaRue Allen, Yael Bat-Chava, J. Lawrence Aber, and Edward Seidman find that the emotional benefit of racial pride for black adolescents is higher in predominantly black neighborhoods than in racially mixed environments. Because most people identify with more than one group, they must grapple with varied social identities, using them to make connections with others, overcome adversity, and understand themselves. *Navigating the Future* brings together leading researchers in social psychology to understand the complexities of identity in a diverse social world.

Identity in Organizations

How do people identify with organizations? What role does organizational identity play in organizational strategy? *Identity in Organizations* investigates the fundamental character of organizational identity and individual identification with an organization. Through the use of an unconventional, conversational format the reader is drawn into a provocative discussion among key organizational scholars that

focuses on three different paradigmatic views of identity: a functionalist perspective, an interpretive perspective, and a postmodern perspective. Similarities and distinctions among these ways of understanding are explored and numerous theoretical and practical insights are gained. This groundbreaking book concludes with a discussion of the relevance of identity as a construct in organizational study and observations on conversation and theory building. Many well-known scholars participate in the conversation, including Jay Barney, Denny Gioia, Mary Jo Hatch, Stuart Albert, Anne Huff, Judi McLean Parks, and Rod Kramer. *Identity in Organizations* will be of interest to professionals and students of organizational studies, human resource management, industrial psychology, sociology of work, psychology, and organizational communication.

Collecting Sexual Orientation and Gender Identity Data in Electronic Health Records

Collecting Sexual Orientation and Gender Identity Data in Electronic Health Records: Workshop Summary reviews the statement of task set to the committee which required them to collect sexual orientation and gender identity data in electronic health records. This report summarizes the invited presentations and facilitated discussions about current practices around sexual orientation and gender identity data collection, the challenges in collecting these data, and ways in which these challenges can be overcome. Areas of focus for the workshop include the clinical rationale behind collecting these data, standardized questions that can be used to collect these data, mechanisms for supporting providers and patients in the collection of these data, technical specifications involved in creating standards for sexual orientation and gender identity data collection and exchange, and policy considerations related to the health information technology (HIT) Meaningful Use process being overseen by the Department of Health and Human Services. This report summarizes the workshop agenda, select invited speakers and discussants, and moderate the discussions. Invited participants will include lesbian, gay, bisexual, and transgender (LGBT) health care consumer advocates, providers with experience working with LGBT populations, HIT vendors and other HIT specialists, health care administrators, and policy makers.

Identity

This book introduces identity, one of the most iconic concepts of our time, which is used ubiquitously but rarely explained. It discusses the various uses of 'identity' separately for different fields of study - philosophy, psychology, sociology, gender studies, and linguistics. This book also compares Western concepts and theories of identity with similar concepts in other parts of the world. It explains how contemporary trends in marketization and globalization have made identity increasingly important to us in the last 50 years. This book also outlines the historical background to the concept of identity.

Intersex and Identity

Examines how intersexed individuals negotiate identity in a dual gendered culture.

IDs -- Not That Easy

IDs—Not That Easy highlights some of the challenging policy, procedural, and technological issues presented by nationwide identity systems. In the wake of the events of September 11, 2001, nationwide identity systems have been proposed to better track the movement of suspected terrorists. However, questions arise as to who would use the system and how, if participation would be mandatory, the type of data that would be collected, and the legal structures needed to protect privacy. The committee's goal is to foster a broad and deliberate discussion among policy-makers and the public about the form of nationwide identity system that might be created, and whether such a system is desirable or feasible.

Discourse and Identity

The relationship between language, discourse and identity has always been a major area of sociolinguistic investigation. In more recent times, the field has been revolutionized as previous models - which assumed our identities to be based on stable relationships between linguistic and social variables - have been challenged by pioneering new approaches to the topic. This volume brings together a team of leading experts to explore discourse in a range of social contexts. By applying a variety of analytical tools and concepts, the contributors show how we build images of ourselves through language, how society moulds us into different categories, and how we negotiate our membership of those categories. Drawing on numerous interactional settings (the workplace; medical interviews; education), in a

variety of genres (narrative; conversation; interviews), and amongst different communities (immigrants; patients; adolescents; teachers), this revealing volume sheds light on how our social practices can help to shape our identities.

Identity Development

The Second Edition of *Identity Development: Adolescence Through Adulthood* presents an overview of the five general theoretical orientations to the question of what constitutes identity, as well as the strengths and limitations of each approach. The volume then proceeds to describe key biological, psychological, and contextual issues during each phase of adolescence and adulthood.

Philosophy of Personal Identity and Multiple Personality

As witnessed by recent films such as *Fight Club* and *Identity*, our culture is obsessed with multiple personality—a phenomenon raising intriguing questions about personal identity. This study offers both a full-fledged philosophical theory of personal identity and a systematic account of multiple personality. Gunnarsson combines the methods of analytic philosophy with close hermeneutic and phenomenological readings of cases from different fields, focusing on psychiatric and psychological treatises, self-help books, biographies, and fiction. He develops an original account of personal identity (the authorial correlate theory) and offers a provocative interpretation of multiple personality: in brief, "multiples" are right about the metaphysics but wrong about the facts.

Identity, Interest and Action

This book offers an original combination of cultural and narrative theory with an empirical study of identity and political action. It is at once a powerful critique of rational choice theories of action and a solution to the historiographical puzzle of why Sweden went to war in 1630. Erik Ringmar argues that people act not only for reasons of interest, but also for reasons of identity, and that the latter are, in fact, more fundamental. Deploying his alternative, non-rational theory of action in his account of the Swedish intervention in the Thirty Years War, he shows it to have been an attempt on behalf of the Swedish leaders to gain recognition for themselves and their country. Further to this, he demonstrates the importance of questions of identity to the study of war and of narrative theories of action to the social sciences in general.

Persons and Personal Identity

As persons, we are importantly different from all other creatures in the universe. But in what, exactly, does this difference consist? What kinds of entities are we, and what makes each of us the same person today that we were yesterday? Could we survive having all of our memories erased and replaced with false ones? What about if our bodies were destroyed and our brains were transplanted into android bodies, or if instead our minds were simply uploaded to computers? In this engaging and accessible introduction to these important philosophical questions, Amy Kind brings together three different areas of research: the nature of personhood, theories of personal identity over time, and the constitution of self-identity. Surveying the key contemporary theories in the philosophical literature, Kind analyzes and assesses their strengths and weaknesses. As she shows, our intuitions on these issues often pull us in different directions, making it difficult to develop an adequate general theory. Throughout her discussion, Kind seamlessly interweaves a vast array of up-to-date examples drawn from both real life and popular fiction, all of which greatly help to elucidate this central topic in metaphysics. A perfect text for readers coming to these issues for the first time, *Persons and Personal Identity* engages with some of the deepest and most important questions about human nature and our place in the world, making it a vital resource for students and researchers alike.

White Identity Politics

Amidst discontent over diversity, racial identity is a lens through which many US white Americans now view the political world.

A Journey of Identity

The ancient texts of India carry a whole lot of discourse about 'Self'. The questions of Upanishads (Ancient text from India) revolving around the identity of self and beyond provoke our mind to question and rethink about our identities. Who I am? I am a human flesh who loves writing also I am a brown

Indian also I am a Hindu also I belong to a caste also I belong to a state in India and the list goes on... Multiple identities revolves around us. Some we choose while other we inherit. Our identities play a major role in our society. It's a known fact that having a passport of certain country will make the visa process easier in many destination countries. Some Identities enjoy privilege over other identities while some are mocked just because of their identity. Movements like Civil Rights movement, Women's movement, LGBTQ+ movement ...etc are fought to create space and equality among different identities that humanity wears. The question is- Why we propelled to fight for our identity? What makes one identity threat to other identity? Why identity matter so much? Answer of all these question lies in the fact that we deliberately choose to forget to visualise the real human behind the multiple identities. We assume identity as reality and fail to see the true reality. My faith, name, nation isn't reality. It is collective imagination of me and the society in which I grew. My colour, gender, appearance and height are my biological marker which is product of genetics and climatic condition in which I grew. What may be unique to me is how I interact with my biological marker and socio-cultural marker and that too is influenced by the education I acquire, resources which I can access. Beside that I am alike all other fellow human being. The fact is humanity existed before identity. It is only later we started wearing identity and then somehow, we forget to unbutton it. This assumption of identity as the only reality are the cause of all sorts of identity crisis and conflicts. My novella tries to create a discourse regarding identity. Inspired from contemporary socio-political reality of South Asia. It presents story of Faiz/Gopal/Illem who journeyed across Bangladesh, India and Myanmar (Burma) to find his true self. The journey consists of a lot of knowing and unknowing in order to acquire vision to imagine self in entirety, the true self which isn't isolated with others.

Narrative, Identity, and Academic Community in Higher Education

Grounded in narrative theory, this book offers a case study of a liberal arts college's use of narrative to help build identity, community, and collaboration within the college faculty across a range of disciplines, including history, psychology, sociology, theatre and dance, literature, anthropology, and communication. Exploring issues of methodology and their practical application, this narrative project speaks to the construction of identity for the liberal arts in today's higher education climate. Narrative, Identity, and Academic Community focuses on the ways a cross-disciplinary emphasis on narrative can impact institutions in North America and contribute to the discussion of strategies to foster bottom-up, faculty-driven collaboration and innovation.

The Social Psychology of Communication

This is the first comprehensive text on social psychological approaches to communication, providing an excellent introduction to theoretical perspectives, special topics, and applied areas and practice in communication. Bringing together scholars of international reputation, this book provides a unique contribution to the field.

First Nationalism Then Identity

First Nationalism Then Identity focuses on the case of Bosnian Muslims, a rare historic instance of a new nation emerging. Although for Bosnian Muslims the process of national emergence and the assertion of a new salient identity have been going on for over two decades, Mirsad Kriještorac is the first to explain the significance of the whole process and how the adoption of their new Bosniak identity occurred. He provides a historical overview of Yugoslav and Bosnian Slavic Muslims' transformation into a full-fledged distinct and independent national group as well as addresses the important question in the field of nationalism studies about the relationship between and workings of nationalism and identity. While this book is noteworthy for ordinary readers interested in the case of Bosnian Muslims,

it is an important contribution to the scholarly debate on the role of nationalism in the political life of a group and adds an interdisciplinary perspective to comparative politics scholarship by drawing from anthropology, history, geography, and sociology.
