Banking today is not what it was some years back. The basic purpose for which banks came into being was deposit mobilization and credit dispensation, which in a short form can be called 3-6-3 banking. It is not the same any more as the major agenda of the banks today is to multiply profits through an array of services like insurance, mutual fund, wealth management etc. to customers. The growth of financial markets, blurring of product boundaries, new network technologies have brought in enormous opportunities in the banking sector. The key to success is knowledge on the subject and updation of the events in the sector. Living up to the aspirations and requirements of the industry, many Indian Universities have introduced Banking as a subject in the curriculum of management courses at the undergraduate and Postgraduate levels. Business Schools and institutes of academic excellence have evolved exclusive courses on Banking to tap the potential in the field. This book meets the requirements of the subject in all its angles and intends to serve the requirements of management students who would like to make a career in banking and for those in pursuit of promotional avenues within the bank.

The Asian Yearbook of International Law is the first publication dedicated primarily to international law as seen from an Asian perspective. It provides international law articles written by experts from the region and other articles relating to Asian topics. The editorial board, national correspondents, advisory council, and governing board comprise a diverse group of academics and government officials from a wide range of countries and positions. The Asian Yearbook of International Law offers a number of useful features: - articles;- notes; - legal materials (such as the state practice in a number of Asian countries and participation in multilateral treaties); - Asia and international organizations; - chronicle of events for the covered year; - literature (including book reviews and a bibliography); - selected documents (treaties, agreements, and other relevant primary documents); and - an index. Its range of features assures that the Yearbook comprehensively covers the critical events, legislation, and issues of the past year and that users can easily access all of this information. Academics and practitioners who deal with international public law in Asia will appreciate this unique, complete resource. The Asian Yearbook of International Law provides insight into Asian views and practices, especially for non-Asian readers, and also promotes the dissemination of knowledge of international law in Asia. Some of the topics covered in this volume: the secession of Bangladesh in international law; the Asian Development Bank Administrative Tribunal; port state control: a comment on the Tokyo MOU; maritime jurisdiction over vessel-source pollution in the EEZ: the Chinese experience.

An Analytical Digest of the Law and Practice of the Courts of Common Law

This book examines the effect of banking on the real economy and society, focusing on banking supervision as the decisive factor in steering banking activities and determining the social outcome of the game of finance. Banking is like a cardiovascular system for our society. If it functions correctly, it allows the economy to operate smoothly. On the other hand, if it malfunctions it becomes a doomsday device. This creates an asymmetry of risks – the asymmetry between the potential dire consequences and the modest rewards of accepting those risks. Banking was one of the critical technological factors enabling the transition from the middle ages and the creation of modern society. However, while today it contributes little to economic growth, its malfunction has a profound and lasting adverse impact. The book explains why, how and what. Why is it important to keep tight supervision of the banks? How can banking supervision improve stability, not only of the financial system but also of the whole human society? What went wrong with the regulation in the past?
