Time & Tide

"Pompian is handing you the magic book, the one that reveals your behavioral flaws and shows you how to avoid them. The tricks to success are here. Read and do not stop until you are one of very few magicians." —Arnold S. Wood, President and Chief Executive Officer, Martingale Asset Management
Fear and greed drive markets, as well as good and bad investment decision-making. In Behavioral Finance and Wealth Management, financial expert Michael Pompian shows you, whether you're an investor or a financial advisor, how to make better investment decisions by employing behavioral finance research. Pompian takes a practical approach to the science of behavioral finance and puts it to use in the real world. He reveals 20 of the most prominent individual investor biases and helps you properly modify your asset allocation decisions based on the latest research on behavioral anomalies of individual investors.

In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Behavioral Finance and Wealth Management

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals

who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Billboard

The major conflicts between the Global North and the South can be expected to result from the confrontation of alternative conceptions of democracy, mainly between liberal or representative democracy and participatory democracy. The hegemonic model of democracy, while prevailing on a global scale, guarantees no more than low-intensity democracy. In recent times, participatory democracy has exhibited a new dynamic, engaging mainly subaltern communities and social groups that fight against social exclusion and the suppression of citizenship. In this collection of reports from the Global South—India, South Africa, Mozambique, Colombia, and Brazil—De Sousa Santos and his colleagues show how, in some cases, the deepening of democracy results from the development of dual forms of participatory and representative democracy, and points to the emergence of transnational networks of participatory democracy initiatives. Such networks pave one of the ways to the reinvention of social emancipation. This is volume 1 of the Reinventing Social Emancipation project, edited by Boaventura de Sousa Santos.

Mentorship is a catalyst capable of unleashing one's potential for discovery, curiosity, and participation in STEMM and subsequently improving the training environment in which that STEMM potential is fostered. Mentoring relationships provide developmental spaces in which students' STEMM skills are honed and pathways into STEMM fields can be discovered. Because mentorship can be so influential in shaping the future STEMM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. The Science of Effective Mentorship in STEMM studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of underrepresented students in STEMM, mentorship structures and behaviors, and institutional cultures that support mentorship. This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions, departments, and individual faculty members.

Transforming the Workforce for Children Birth Through Age 8

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

Congressional Record

Ugh—meetings. They're where productivity goes to die, right? There has to be a better way. According to leading consultants Dick and Emily Axelrod, there is. Using the same principles that make video

games so engaging and that transformed the numbing assembly line into the dynamic shop floor, the Axelrods outline a flexible and adaptable system used to run truly productive meetings in all kinds of organizations—meetings where people create concrete plans, accomplish tasks, build connections, and move projects forward. They show how to design every aspect of a meeting—from the way you greet people at the beginning to how you sum up at the end—so that real work actually gets done. Those who have adopted this system will never go back. Neither will you.

Democratizing Democracy

Artificial intelligence (AI) has grown in presence in asset management and has revolutionized the sector in many ways. It has improved portfolio management, trading, and risk management practices by increasing efficiency, accuracy, and compliance. In particular, AI techniques help construct portfolios based on more accurate risk and return forecasts and more complex constraints. Trading algorithms use AI to devise novel trading signals and execute trades with lower transaction costs. AI also improves risk modeling and forecasting by generating insights from new data sources. Finally, robo-advisors owe a large part of their success to AI techniques. Yet the use of AI can also create new risks and challenges, such as those resulting from model opacity, complexity, and reliance on data integrity.

The Science of Effective Mentorship in STEMM

Adolescence—beginning with the onset of puberty and ending in the mid-20s—is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence—rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

Trail-blazing social entrepreneurs are tackling the world's most pressing problems that government, business, or charity have failed to solve. They are creating businesses with a primary mission of social change. Scott Boyer is one such social entrepreneur. This 28-year veteran of Big Pharma left a six-figure salary to start OWP Pharmaceuticals and the ROW Foundation. This commercial business and non-profit organization exist in a symbiotic relationship we call a "tandem hybrid social enterprise." This model combines a multimillion dollar business with a foundation that's on track to become the largest funder of projects serving people with epilepsy and associated psychiatric disorders in the world. The tandem hybrid incorporates the principles learned by Scott and others for building a truly unique social enterprise from the ground up; one that is: Driven by a compelling social mission Financed by commercial success Structured to retain control Scalable and sustainable for the long haul Powering Social Enterprises With Profit And Purpose offers a detailed blueprint that has proven commercially and philanthropically successful and that can be replicated in most business sectors.

The Railway Times ...

Every day we are asked to fulfil others' requests, and we make regular requests of others too, seeking compliance with our desires, commands and suggestions. This accessible text provides a uniquely in-depth overview of the different social influence techniques people use in order to improve the chances of their requests being fulfilled. It both describes each of the techniques in question and explores the research behind them, considering questions such as: How do we know that they work?

Under what conditions are they more or less likely to be effective? How might individuals successfully resist attempts by others to influence them? The book groups social influence techniques according to a common characteristic: for instance, early chapters describe "sequential" techniques, and techniques involving egotistic mechanisms, such as using the name of one's interlocutor. Later chapters present techniques based on gestures and facial movements, and others based on the use of specific words, re-examining on the way whether "please" really is a magic word. In every case, author Dariusz Dolinski discusses the existing experimental studies exploring their effectiveness, and how that effectiveness is enhanced or reduced under certain conditions. The book draws on historical material as well as the most up-to-date research, and unpicks the methodological and theoretical controversies involved. The ideal introduction for psychology graduates and undergraduates studying social influence and persuasion, *Techniques of Social Influence* will also appeal to scholars and students in neighbouring disciplines, as well as interested marketing professionals and practitioners in related fields.

Epistemologies of the South

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Let's Stop Meeting Like This

Household vulnerability to weather shocks and changing climatic conditions has become a major concern in developing countries. Yet the empirical evidence remains limited on the impact that changing environmental conditions have on households. This book explores climate change adaptation using a social resilience approach. The book is based on primary data from the Sundarbans, a densely populated area located across parts of Bangladesh and India (West Bengal) which is highly vulnerable to extreme weather events and climate change. The focus is on assessing how households are affected by cyclones: whether they are able to cope with, adapt to and recover from events and changes; whether they are warned ahead of time; whether they benefit from government safety nets and other social programs; and finally whether they are driven to either temporary or permanent migration. This assessment leads to a better understanding of how exposure to an area of climate change vulnerability and risk affects and shapes human responses.

Investors Chronicle and Money Market Review

Attend any good meetings lately? Make the next one you lead a great one. *Leading Great Meetings: How to Structure Yours for Success* shows how to plan and run more effective meetings by changing their structure. This book's recommendations differ from those that rely on adopting rules or changing behavior. Such methods may fail in the heat of discussion, but the right meeting structure helps people meet productively without having to remember how to behave. *Leading Great Meetings* can help you with board, team and other meetings of any size. It explains 12 choices and 32 tools for creating effective structures in any setting. You select choices and tools relevant to your situation. Also included are stories, examples, and even "blueprints," that show a structural approach in action. There is also a chapter dedicated to effective structures for virtual meetings. Finally, there are recommendations for what to do under pressure when there is little time to prepare. Some common meeting challenges you can address through structure include: Poor commitment to decisions. Running over time. Difficult, disrespectful discussion. Presentations that overwhelm participation. Keeping everyone engaged. Ineffective virtual meetings. Start running more productive meetings beginning with your next one.

Artificial Intelligence in Asset Management

Bringing a timely synthesis to the field, *The Handbook of Law and Society* presents a comprehensive overview of key research findings, theoretical developments, and methodological controversies in the field of law and society. Provides illuminating insights into societal issues that pose ongoing real-world legal problems Offers accessible, succinct overviews with in-depth coverage of each topic, including its evolution, current state, and directions for future research Addresses a wide range of emergent topics in law and society and revisits perennial questions about law in a global world including the widening gap between codified laws and “law in action”, problems in the implementation of legal decisions, law’s constitutive role in shaping society, the importance of law in everyday life, ways legal institutions both embrace and resist change, the impact of new media and technologies on law, intersections of law and identity, law’s relationship to social consensus and conflict, and many more Features contributions from 38 international expert scholars working in diverse fields at the intersections of legal studies and social sciences Unique in its contributions to this rapidly expanding and important new multi-disciplinary field of study

The Promise of Adolescence

Congressional Record

Roger Murray (1911–1998) was a crucial figure in the history of value investing. A financial professional, economist, adviser to members of Congress, and educator, Murray was the successor to the legendary Benjamin Graham as professor of the securities analysis course at Columbia Business School. There, he mentored generations of students, including Mario Gabelli, Charles Royce, Leon G. Cooperman, and Art Samberg. This book offers a compelling account of Murray’s multifaceted career alongside a series of remarkable lectures he gave late in his life that encapsulated his philosophy of investing. The investing professionals and educators Paul Johnson and Paul D. Sonkin chronicle Murray’s life and accomplishments, capturing his professional triumphs, theoretical insights, and lasting legacy. They highlight Murray’s educational philosophy and mentorship, including personal recollections from his students about his teaching and influence. *The Enduring Value of Roger Murray* features the transcripts of four lectures Murray gave in 1993, hosted by Gabelli, which became legendary in the investing community. These lectures inspired Bruce Greenwald to ask Murray to co-teach a security analysis course, leading to the resurrection of value investing education at Columbia Business School, which had waned after Murray’s retirement in 1977. Annotated by Johnson and Sonkin, these lectures are now available to a wide audience for the first time. They will be illuminating and instructive for all value investing students and practitioners today.

Powering Social Enterprise with Profit and Purpose

U.S. Business Involvement in Southern Africa
