Graphisme actuel 1958-1965 : revue internationale du graphisme et des domaines annexes

Neue Grafik, die «Internationale Zeitschrift für Grafik und verwandte Gebiete», wurde vom Zürcher Gestalter Josef Müller-Brockmann initiiert und von einem Redaktionskollektiv, bestehend aus ihm, Richard Paul Lohse, Hans Neuburg und Carlo Vivarelli (LMNV), in 18 Nummern zwischen 1958 und 1965 veröffentlicht. Die Bände sind nun als hervorragender Faksimile-Nachdruck exklusiv bei Lars Müller Publishers erschienen. Neue Grafik kann aus historischer Sicht als programmatische Plattform und

wirksamstes publizistisches Organ der zu ihrer Zeit international massgeblichen Schweizer Grafik betrachtet werden. In der Zeitschrift wurde von den Protagonisten der Schweizer Schule beziehungsweise ihrer strengen Zürcher Fraktion ein fundamentaler Diskurs über die Grundlagen einer angesagten objektiven Kommunikation und einer konstruktiven Gestaltung geführt. Der Einfluss der Bewegung kann nicht hoch genug eingeschätzt werden. Weltweit wurde die Schweizer Schule, auch «International Style» genannt, zum Vorbild.

Swiss Graphic Design

Originally published: London: Laurence King Pub., 2006.

Josef Müller-Brockmann Suttli: Pioneer of Swiss Graphic Design

A new edition showing the work of one of the most famous Swiss designers: a comprehensive overview of his oeuvre.

No beginning, no end

In the ever-evolving world of contemporary graphic design those who came before are often forgotten in the search of the next big thing. It is surprising then that many new, fashionable designs intentionally conjure work that was created by designers of an earlier era - designers who worked not with a computer but with pen and paper - designers like Josef Müller-Brockmann. One of the twentieth century's most important graphic designers, the Swiss-born Müller-Brockmann is the father of functional, objective design and an influential figure for generations of designers around the world. While many of his contemporaries moved to the United States and elsewhere in Europe, Müller-Brockmann based himself in Zurich and established his reputation there. He adapted his approach to a changing world, moving from an early illustrative style to a modern constructivist approach, making full use of geometrical form and the grid system to provide an underlying structure to graphic work. Müller-Brockmann is perhaps most known for his large array of music posters, produced from the early 1950s to the early 1970s, which graphically represent the musical character of each specific performance. In addition to these iconic designs, Müller-Brockmann completed a number of books on graphic design and its history, including the influential *The Graphic Designer and his Design Problems*. This volume is the most definitive monograph to be published on Josef Müller-Brockmann. It traces Müller-Brockmann's life from his childhood through his early training, rarely seen designs for the theater, famous posters for the Zurich art scene, corporate design work for clients like IBM, and, finally, his efforts to educate young designers. With assistance from the Museum für Gestaltung, Zurich and the Josef Müller-Brockmann Archive, this book is extensively illustrated with completed works, period photography, rare sketches, concept drawings, and personal photos.

Josef Müller-Brockmann

This title takes a fresh look at Swiss typography and photo-graphics, posters, corporate image design, book design, journalism, and typefaces over the past hundred years. With illuminating essays by prominent experts in the field and captivating illustrations, this book presents the diversity of contemporary visual design while also tracing the fine lines of tradition that connect the work of different periods.

Gestaltungsprobleme Des Grafikers

Karl Gerstner's work is a milestone in the history of design. One of his most important works is *Designing Programmes*, which is presented here in a new edition of the original 1964 publication. In four essays, the author provides a basic introduction to his design methodology. Instead of set recipes, the method suggests a model for design in the early days of the computer era. The intellectual models it proposes, however, continue to be useful today. What it does not purvey is cut-and-dried, true-or-false solutions or absolutes of any kind - instead, it develops fundamental principles in an innovative and future-oriented way. The book is especially topical and exciting in the context of current developments in computational design, which seem to hold out the possibility of programmed design. With many examples from the worlds of graphic and product design, music, architecture, and art, it inspires the reader to seize on the material, develop it further, and integrate it into his or her own work. 200 illustrations

100 Years of Swiss Graphic Design

Graphic Design Theory is organized in three sections: "Creating the Field" traces the evolution of graphic design over the course of the early 1900s, including influential avant-garde ideas of futurism, constructivism, and the Bauhaus; "Building on Success" covers the mid- to late twentieth century and considers the International Style, modernism, and postmodernism; and "Mapping the Future" opens at the end of the last century and includes current discussions on legibility, social responsibility, and new media. Striking color images illustrate each of the movements discussed and demonstrate the ongoing relationship between theory and practice. A brief commentary prefaces each text, providing a cultural and historical framework through which the work can be evaluated. Authors include such influential designers as Herbert Bayer, L'szlo Moholy-Nagy, Karl Gerstner, Katherine McCoy, Michael Rock, Lev Manovich, Ellen Lupton, and Lorraine Wild. Additional features include a timeline, glossary, and bibliography for further reading. A must-have survey for graduate and undergraduate courses in design history, theory, and contemporary issues, Graphic Design Theory invites designers and interested readers of all levels to plunge into the world of design discourse.

Designing Programmes

La exposición está dedicada a la faceta de Le Corbusier como productor de libros: 35 publicaciones que constituyen proyectos tanto intelectuales como materiales, cuya elaboración estuvo íntegramente dirigida por el propio Le Corbusier, sin contar entre ellos libros sobre su propia obra con contribuciones propias, numerosos artículos y proyectos editoriales inacabados. La concepción gráfica de los libros de Le Corbusier se basa en los movimientos que transformaron la tipografía, el grafismo y el libro en el siglo XX. Le Corbusier se inscribe en la continuación de una cultura clásica que relaciona el libro con la arquitectura, reflejando su estrecha relación con las prácticas artísticas de sus contemporáneos, pero resistiendo en ocasiones a las corrientes de la época, especialmente las aportaciones de las vanguardias.

Graphic Design Theory

Graphic design is broadly interpreted in this annotated topical bibliography, covering both scholarly and applied literature focusing on graphics printed commercially for mass consumption in the United States from colonial times to the present. Materials extend from historical studies of design to textbooks and manuals of professional practice to theoretical works relating to design drawn from disciplines such as psychology and communication theory. The 1100 entries include reference sources, books, periodical articles, catalogs, films, and electronic data. Among the topics covered are general reference, design theory and history, education and career guides, professional practice, production and layout, typography, calligraphy, color reproduction, caricature, and photo illustrations as well as applications in advertising, publication design, corporate identity programs, information graphics, package design, posters and signs. Literature on computer technology as used in desktop publishing and computer graphics is also included. Appendixes provide annotated listings of almost 200 relevant annuals and serials as well as a directory of associations and organizations in the field. Access to titles, authors, and a finer breakdown of subjects is facilitated by thorough indexing. This work should be a valuable resource for professional designers, scholars and students of design, and librarians interested in collection development.

Le Corbusier

This book is a tool kit to create new forms. It deals with grid-based design and gives the reader techniques to develop new forms, fonts, logos, and patterns. The concept represents a design process in which individual decisions follow much larger and deeper principles than immediate and spontaneous-intuitive actions. Using a wide variety of examples, each chapter contains a detailed description of the procedure from form analysis to setting up design rules and their application. Both a workbook and a source of inspiration, this publication provides designers and architects with the tool they need to find analytical forms analog, algorithm-based, exploratory but never of arbitrary origin. The procedures described allow an almost infinite number of possibilities. The designer is thus transformed from inventor to interpreter or curator, who assesses individual forms for logos, fonts or patterns on the fly and ensures that the design process is always efficient and goal-oriented. AUTHOR: Christoph Grunberger is a German illustrator and designer. He is active in the fields of corporate, interactive and spatial design, with a strong focus on exploring the limits of interaction and desktop applications. Together with Stefan Gandl he is co-author of the book Neubau Modul and collaborated on the exhibition Neubaulsm at gallery MU (Eindhoven/NL) in 2008, which was opened by Wim Crouwel. For the video installation

Wutburger, a co-operation with Andreas Lutz, he received the excellence Award in the Art section at the Japan Media Arts Festival in Toyko in 2015. His works as a freelance designer have been awarded nationally and internationally. 55 images

American Graphic Design

Graphic Design, Referenced is a visual and informational guide to the most commonly referenced terms, historical moments, landmark projects, and influential practitioners in the field of graphic design. With more than 2,000 design projects illustrating more than 400 entries, it provides an intense overview of the varied elements that make up the graphic design profession through a unique set of chapters: "principles" defines the very basic foundation of what constitutes graphic design to establish the language, terms, and concepts that govern what we do and how we do it, covering layout, typography, and printing terms; "knowledge" explores the most influential sources through which we learn about graphic design from the educational institutions we attend to the magazines and books we read; "representatives" gathers the designers who over the years have proven the most prominent or have steered the course of graphic design in one way or another; and "practice" highlights some of the most iconic work produced that not only serve as examples of best practices, but also illustrate its potential lasting legacy. Graphic Design, Referenced serves as a comprehensive source of information and inspiration by documenting and chronicling the scope of contemporary graphic design, stemming from the middle of the twentieth century to today.

Analog Algorithm

A revered classic of American design delights anew with the freshness and ingenuity of its approach Bradbury Thompson (1911-1995) remains one of the most admired and influential graphic designers of the twentieth century, having trained a generation of design students while on the faculty of the Yale School of Art for more than thirty years. The art director of Mademoiselle and design director of Art News and Art News Annual in the decades after World War II, Thompson was also a distinguished designer of limited-edition books, postage stamps, rationalized alphabets, corporate identification programs, trademarks, and sacred works (most notably the Washburn College Bible). Thompson also designed more than sixty issues of Westvaco Inspirations, a magazine that was published by the Westvaco Corporation and distributed to thousands of printers, designers, and teachers to show the range and versatility of printing papers. Thompson was especially revered for his ability to adapt classic typography for the modern world. Bradbury Thompson: The Art of Graphic Design is a landmark in the history of fine bookmaking. First published by Yale University Press in 1988 and designed by Thompson himself, it was praised by the New York Times as a book in which "art and design are gloriously and daringly mixed." Original texts by the author and other notable designers, critics, and art historians, including J. Carter Brown, Alvin Eisenman, and Steven Heller, explore Thompson's methods and design philosophy, and a newly commissioned afterword by Jessica Helfand attests to the enduring importance of his work. Both a retrospective and a manifesto, the book surveys Thompson's timeless contributions to American graphic design, including his experimental work and his work in magazines, typography, books, simplified alphabets, and contemporary postage stamps. Published for the first time in paperback, this classic text is now available for a new generation of designers and students.

Graphic Design, Referenced

An original account of the life and work of legendary designer Jan Tschichold and his role in the movement in Weimar Germany to create modern graphic design Richly illustrated with images from Jan Tschichold's little-known private collection of design ephemera, this important book explores a legendary figure in the history of modern graphic design through the artists, ideas, and texts from the Bauhaus that most influenced him. Tschichold (1902-1974), a prolific designer, writer, and theorist, stood at the forefront of a revolution in visual culture that made printed material more elemental and dynamic. His designs were applied to everyday graphics, from billboard advertisements and business cards to book jackets and invoices. This handsome volume offers a new understanding of Tschichold's work, and of the underlying theories of the artistic movement he helped to form, by analyzing his collections: illustrations, advertisements, magazines, and books by well-known figures, such as Kurt Schwitters, El Lissitzky, Aleksandr Rodchenko, and László Moholy-Nagy, and lesser-known artist-designers, including Willi Baumeister, Max Burchartz, Walter Dexel, and Piet Zwart. This book also charts the development of the New Typography, a broad-based movement across Central Europe that included "The Ring," a group formed by Schwitters in 1927. Tschichold played a crucial role in defining this

movement, documenting the theory and practice in his most influential book, *The New Typography* (1928), still regarded as a seminal text of graphic design. Published in association with the Bard Graduate Center Exhibition Schedule: Bard Graduate Center, New York (02/15/19-07/07/19)

The Art of Graphic Design

From its roots in the development of printing, graphic design has evolved as a means of identification, information, and promotion to become a profession and discipline in its own right. This authoritative documentary history begins with the poster and goes on to chart the development of word and image in brochures and magazines, advertising, corporate identity, television, and electronic media, and the impact of technical innovations such as photography and the computer. For the revised edition, a new final chapter covers all the recent international developments in graphic design, including the role of the computer and the Internet in design innovation and globalization. In the last years of the twentieth century, at a time when "designer products" and the use of logos grew in importance, the role of graphic designers became more complex, subversive, and sometimes more political—witness Oliviero Toscani's notorious advertisements for Benetton. Digital technology cleared the way for an astonishing proliferation of new typefaces, and words began to take second place to typography in a whole range of magazines and books as designers asserted the primacy of their medium. Designers and companies discussed here include Neville Brody, David Carson, Design Writing Research, Edward Fella, Tibor Kalman, Jeffery Keedy, LettError, Pierre di Sciullo, Tomato, Gerard Unger, Cornel Windlin, and a host of others.

A History of Visual Communication

This accessible book demonstrates how ideas influenced and defined graphic design. Lavishly illustrated, it is both a great source of inspiration and a provocative record of some of the best examples of graphic design from the last hundred years. The entries, arranged broadly in chronological order, range from technical (overprinting, rub-on designs, split fountain); to stylistic (swashes on caps, loud typography, and white space); to objects (dust jackets, design handbooks); and methods (paper cut-outs, pixelation).

Jan Tschichold and the New Typography

This much sought-after book on the Swiss typographic discourse in the *Typografische Monatsblätter* is now available in a reprint.

World of Art Graphic Design 2e

Richard Hollis was the graphic designer for London's Whitechapel Art Gallery in the years 1969-73 and 1978-85. In this second period, under the directorship of Nicholas Serota, the gallery came to the forefront of the London art scene, with pioneering exhibitions of work by Georg Baselitz, Anselm Kiefer, Joseph Cornell, Philip Guston, Frida Kahlo and Tina Modotti, among others. Hollis's posters, catalogues, and leaflets, conveyed this sense of discovery, as well as being models of practical graphic design. The pressures of time and a small budget enhanced the urgency and richness of their effects. Christopher Wilson's monograph is an exemplary examination of a body of graphic design. This book matches the spirit of the work it describes: active, passionate, aesthetically refined, and committed to getting things right. As in Hollis's work, "design" here is a verb as much as a noun.

Wim Crouwel

The four hundred marks reproduced in this book represent the diverse array of identity work produced by Pentagram's partners, past and present, since the company was founded in 1972. Over the past four decades, Pentagram has designed marks for large corporations and small businesses, government agencies and non-profit institutions, clubs and societies, and even individuals, all of whom were seeking a representative symbol to appear on letterhead and books, buildings and websites, and everywhere else imaginable. Previously only distributed in a limited edition, this invaluable book is now made available in a paperback version and will provide inspiration for all graphic designers working on identity projects.

100 Ideas that Changed Graphic Design

Josef Muller-Brockman's impassioned and sudden appearance on the stage of constructive graphic design in the early 50s, at the age of almost 40, gives pause. What biographical developments preceded this energetic statement? What context created the conditions for an abrupt change from a subjective and illustrative view of design to one that was objective and constructive? The answer takes us back to the 30s, to the formative days when MB, the designer, and Swiss Graphic Design were still separate paths.

30 Years of Swiss Typographic Discourse in the Typografische Monatsblätter

From a professional for professionals, here is the definitive word on using grid systems in graphic design since 1981.

Richard Hollis Designs for the Whitechapel

A comprehensive guide to design, with entries on key topics in the history and theory of design, addressing a range of design forms including graphic, textile, furniture, metal, ceramic, fashion, stage and film, vehicle and product design, as well as national histories of design and key design movements

Pentagram Marks

A new edition of a seminal book on the history of graphic design in the twentieth century by one of the leading authorities in the field. The story of graphic design is one of the most exciting and important developments in twentieth-century visual culture. From its roots in the expansion of printing, graphic design has evolved from a means of identification, information, and promotion to a profession and art in its own right. This authoritative documentary history begins with the poster and goes on to chart the use of text and image in brochures and magazines, advertising, corporate identity, television, and electronic media, and includes the effects of technical innovations such as photography and the computer, as well as the digital revolution. With over 800 illustrations fully integrated with the text, this indispensable account is uniquely clear, comprehensive, and absorbing. For this latest edition, *Graphic Design in the Twentieth Century* has been updated with a new preface and additions to the bibliography, ensuring its continued usefulness to students and designers alike.

Josef Müller-Brockmann

This innovative volume is the first to provide the design student, practitioner, and educator with an invaluable comprehensive reference of visual and narrative material that illustrates and evaluates the unique and important history surrounding graphic design and architecture. *Graphic Design and Architecture, A 20th Century History* closely examines the relationship between typography, image, symbolism, and the built environment by exploring principal themes, major technological developments, important manufacturers, and pioneering designers over the last 100 years. It is a complete resource that belongs on every designer's bookshelf.

Design Issues

Niklaus Troxler, member of a leading group of Swiss graphic designers internationally known for their posters, is represented in Jazz Blvd. Troxler's work is closely linked with Jazz Festival Willisau and is included in major collections.

Grid Systems in Graphic Design

Using case studies and exercises, this innovative study guides the reader through the many varieties of persuasion and its performance, exploring the protocols of rhetoric unique to the medium, from orality and print to film and digital images.

Catalog of the Library of the Museum of Modern Art: Neu

The first comprehensive illustrated encyclopedia of design, with entries on designers, theories, forms, methods, movements, practices and processes.

TheBloomsbury Encyclopedia of Design

Bibliographic: 100 Classic Graphic Design Books is a unique compilation of the best design books of the last 100 years. It covers a huge range of material—historic titles from pioneering type foundries

to the best of recent monographs from today's leading studios—and provides an essential insight into the evolution of graphic design in the twentieth century. Classic graphic design manuals by László Moholy-Nagy and Josef Müller-Brockmann are included, alongside pioneering instructional titles on advertising and corporate identity. Monographs designed by and covering the major individuals and studios of the era—from A.M. Cassandre and Alexey Brodovitch to Stefan Sagmeister and Peter Saville—are detailed, along with groundbreaking anthologies on trademark design, Polish film posters, the impact of the avant-garde, and more. All the books, whether classic histories of Bauhaus design or rarely seen sourcebooks of symbols and type, are illustrated with a wide selection of spreads and covers, all in color. In addition, leading international designers have provided lists of favorite titles from their own libraries.

Graphic Design in the Twentieth Century

Enth. u. a.: S. 74: Concrete art (1936-49) / Max Bill. - S. 74-77: The mathematical approach in contemporary art (1949) / Max Bill. - S. 301-304: Dieter Roth.

Graphic Design and Architecture, A 20th Century History

Presents a catalog of an exhibition showcasing the products, sketches, and models of industrial designer Dieter Rams.

Jazz Blvd. : Posters

The final installment in this acclaimed series offers astute and controversial discussions on contemporary graphic design from 2001 to 2005. This collection of essays takes stock of the quality and profundity of graphic design writing published in professional and general interest design magazines, as well as on blogs and Internet journals. Prominent contributors include Milton Glaser, Maud Lavin, Ellen Lupton, Victor Margolin, Mr. Keedy, David Jury, Alice Twemlow, Steven Heller, Jessica Helfand, William Drenttel, Michael Bierut, Michael Dooley, Nick Curry, Emily King, and more. Among the important themes discussed: design as popular culture, design as art, politics, aesthetics, social responsibility, typography, the future of design, and more. Students, graphic designers beginning their careers, and veterans seeking fresh perspective will savor this anthology gathered from some of today's top graphic design writers and practitioners, as well as commentators from outside the profession. From the series that helped launch the design criticism movement and was the first to anthologize graphic design criticism from key sources, this volume promises to be the most provocative of all! Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Media, Persuasion and Propaganda

Made in close collaboration with Dieter Rams himself, this catalogue raisonné is the ultimate reference on one of the most influential product designers of all time

The Bloomsbury Encyclopedia of Design

The Lovings: An Intimate Portrait documents the extraordinary love story of Mildred and Richard Loving. The Lovings presents Grey Villet's stunning photo-essay in its entirety for the first time and reveals with striking intensity and clarity the powerful bond of a couple that helped change history. Mildred, a woman of African American and Native American descent and Richard, a white man, were arrested in July 1958 for the crime of interracial marriage, prohibited under Virginia state law. Exiled to Washington, DC, they fought to bring their case to the US Supreme Court. Knowledge of their struggle spread across the nation, and in the spring of 1965, the Life magazine photojournalist Villet spent a few weeks documenting the Lovings and their family and friends as they went about their lives in the midst of their trial. Loving v. Virginia was the landmark US civil rights case that, in a unanimous decision, ultimately ended the prohibition of interracial marriage in 1967.

Bibliographic

This innovative volume brings together international design scholars to address the history and present-day status of national and international design organizations, working across design disciplines and located in countries including Argentina, Turkey, Estonia, Switzerland, Italy, China and the USA. In the second half of the 20th century, many non-governmental organizations were created to address urgent cultural, economic and welfare issues. Design organizations set out to create an international consensus for the future direction of design. This included enhancing communication between professionals, educators and practitioners, raising standards for design, and creating communities of designers across linguistic, national and political borders. Shared needs and agendas were identified and categories of design constantly defined and re-defined, often with overt cultural and political intents. Drawing on an impressive range of original research, archival sources and oral testimony, this volume questions the aims and achievements of national and international design organizations in light of their subsequent histories and their global remits. The Cold War period is central to the book, while many chapters draw on post-colonial perspectives to interpret how transnational networks and negotiations took place at events and congresses, and through publication.

Theories and Documents of Contemporary Art

Information Design provides citizens, business and government with a means of presenting and interacting with complex information. It embraces applications from wayfinding and map reading to forms design; from website and screen layout to instruction. Done well it can communicate across languages and cultures, convey complicated instructions, even change behaviours. Information Design offers an authoritative guide to this important multidisciplinary subject. The book weaves design theory and methods with case studies of professional practice from leading information designers across the world. The heavily illustrated text is rigorous yet readable and offers a single, must-have, reference to anyone interested in information design or any of its related disciplines such as interaction design and information architecture, information graphics, document design, universal design, service design, map-making and wayfinding.
