How to Observe Children

Shows students how to make the links between observations and child development theory, helping them to achieve higher grades in their childcare awards. Provides guidance on terminology and presentation to ensure students do the best they can in their assignments. Includes chapters on observing for the Birth to Three Framework, the Foundation Stage and the National Curriculum. Written by an experienced early years professional and author - Sheila Riddall-Leech is Lead Examiner for CACHE and author of Childminding and Managing Children's Behaviour.

Developing High Quality Observation, Assessment and Planning in the Early Years

What is meant by high quality observation in the early years? How do you devise effective next steps for young children that build on their interests? How do you ensure that you meet the needs of all the children in your care? Offering a fresh approach, this practical toolkit offers a complete guide to observation, planning and assessment in the early years. It clearly explains the principles of good practice in this area and provides training tools to help practitioners develop their knowledge and skills and embed these principles into their setting. The focus throughout is on helping practitioners to create their own systems for observation, planning and assessment that are appropriate for the children they work with. All the material in the book has been fully tried, tested and proven to work and the methods described can be tailored to meet the needs of individual practitioners. Featuring a wide range of case studies to illustrate how the principles work in practice, the book includes: Making effective observations and assessments Recognising the characteristics of effective learning Ways to engage parents in their children's learning How to identify next steps and learning priorities Dealing with barriers and maintaining quality over time With fully photocopiable resources throughout and including downloadable training sessions to accompany the book, this is an essential toolkit for all early years managers, leaders and those involved in setting support.

Observing Young Children

The main purpose of this text, particularly this edition, is to assist students in developing the skills and knowledge necessary to conduct relevant, professional and meaningful observations of young children in the field of Early Childhood Education. The text is designed for college or university students embarking on a career involving young children. Observing Young Children includes references to various professions: Teachers, Early Childhood Educators, Early Interventionists and Resource Teachers and Consultants – all of whom use observation in a variety of ways for a diverse number of reasons. Observation is a language they all speak and understand. Uncovering the developmental process of a child's early years and making it visible to others requires the skills and knowledge of a practiced observer. Educators know that one of the best ways to learn about young children is to observe them, and the other way is to talk with their families. Through observation and documentation Educators can co-construct with children and their families a curriculum that is alive with what matters to them.

Child Observation

This is a key text that enables students to appreciate and understand the central role of observation in understanding, planning for and educating early years children. It explores the theoretical background to child observation and links it back to practice. Recent important research in the field of child observation is highlighted and ethical implications of research in early childhood are considered. This is essential for all those studying for degrees and foundation degrees in early childhood, early years and related disciplines and for Early Years Teacher candidates. Updated in line with recent policy and legislation changes A new chapter on observation documentation in the multi-modal age Includes new material and case studies that explores the essential elements of child observation across the world Research chapter re-written to make it more accessible for all students More case studies throughout linking theory to practice.

Child Observation for Learning and Research

Child Observation for Learning and Research is an exciting new text, providing a thorough grounding in the methodology, practice and interpretation of observing children. The authors draw on their experience and expertise in childcare, education, social work and research to introduce the fundamental principles and process of observation, preparing you for your first observation and building knowledge and confidence through a wide range of scenarios and activities. The book takes the unique approach of demonstrating how acquiring observational skills can serve as a key learning tool, not only helping you to understand children, but also to recognise, analyse and question theory, helping you make sense of your own learning.

Development & Learning for Very Young Children

'[T]his book has been well planned and provides information which is relevant for students and teachers alike in supporting teaching and learning. In particular, the practical aspects of group tasks and discussion points enable the reader to develop their reflective skills through the knowledge gained'

- ESCalate 'This informative and thought-provoking collection of essays brings together theory, policy and practice for practitioners working with children aged from birth to three years old...It would be a great resource for students' - Nursery World 'This is a very well edited collection easily accessible to everyone involved in the early years, with the common thread being the holistic nature of very young children's learning. Using the contents of the different chapters for reflection and analysis, those implementing the new Early Years Foundation Stage will be able to promote and enhance children's development and learning experiences and certainly their own practices...This book powerfully reminds readers of what is at the heart of their care and learning interactions with babies and young children'

- Professor Emeritus Janet Moyles, Play Consultant With a focus on the most critical years in a young child's development, this book brings together the essential theory, policy and practice for everyone working with young children. Concentrating on the 0 to 3 age range, the book considers all relevant legislation such as Every Child Matters and the new Early Years Foundation Stage. The content is organized into four sections: - development and learning; - policy to practice; - leadership and management; - establishing effective relationships. Examining the influence of policy on practice, issues covered include the stages of child development, observing young children, making partnerships with parents, building relationships within and between teams, working in a multi-agency way and creating a caring and stimulating environment. To illustrate practice and aid reflection, the chapters have: - chapter objectives; - case studies; - group tasks; - discussion points; - recommendations for further reading; - useful websites. Suitable for all early years students and practitioners, it is a must-have resource.

Observing Children

This user-friendly text is an invaluable guide to observation techniques for everyone working with children. It explains why child care workers and teachers need to observe children and gives clear instructions on how to carry out their observations. This new edition, which reflects the changes in early years education guidelines, now boasts material that relates specifically to the early learning goals of the foundation stage. It contains two updated chapters detailing how observations can be used when evaluating early learning goals and also assists with foundation stage profiling. Observing Children is essential reading for all CACHE Child Care validated courses, NVQs and SNVQs in Child Care and Education, GNVQ in Health and Social Care and the new Technical Certificates in Child Care. It will also prove invaluable for those training to be teachers in primary school. Book jacket.

Advanced Work-based Practice in the Early Years

Inspired by the first-hand experiences of those studying early childhood education and care, this book supports students as they gain advanced knowledge and skills, and embark on the journey from inexperienced student to graduate professional. Bringing together advanced theory, links to research, and illustrative case studies, *Advanced Work-based Practice in the Early Years* enables students to consolidate learning by applying theory to practice and identifying the skills, knowledge and personal traits which will help them succeed as a graduate practitioner. Chapters address a wealth of topical issues relating to both the development of the child and the student's own professional development. Areas of focus include ethical practice, safeguarding and child protection, the voice of the child, the role of the mentor, observation, assessment and the social and cultural factors which may impact on a child's development. Including reflective activities, practical tips, and examples of student experience throughout, this is an essential text for all early years students as they make the transition from academic study to professional practice.

Focused Observations

Intentional teaching begins with focused observations and systematic documentation of children's learning and development. This book is filled with tools and techniques designed to help early childhood educators purposefully observe children, create portfolios with rich documentation, and plan curriculum that supports every child. Discussion questions, observation practice exercises, and reflection assignments are included, as well as DVD with classroom vignettes showcasing observation techniques. Gaye Gronlund is an early childhood education consultant who trains early childhood educators across the country. Marlyn James is an education and early childhood professor.

The Revised EYFS in practice

With the new EYFS in its infancy, this practical professional development title will take practitioners through the new policies and provide vital information and practical advice on how to implement it effectively. With their wealth of experience in the Early Years, Ann Langston and Dr Jonathan Doherty have all the expertise to make this an authoritative book that will be useful to anyone involved in Early Years education.

Observing, Assessing and Planning for Children in the Early Years

This introductory text shows how, by observing children knowledgeably, practitioners can plan for and assess the young children in their care much more effectively. Observation as a 'tool for learning' has long been considered to be one of the most beneficial ways of teaching the very young, and this book introduces the work of people who have become famous for their skills as observers, exploring the theories behind their work and how this can be related to the day-to-day nursery environment. Sandra Smidt uses case studies throughout to explain in detail how young children's development can be matched to their exact needs and interests, creating a more positive learning experience for all.

Childhood Observation

Discussing the role of observation in the Early Years environment, this title helps Early Years students and practitioners understand the principles and ethical guidelines of observation and assessment methods, and encourages them to take a critical stance on different observation methods. It examines current initiatives and policies as a context for discussing the theoretical background, and draws on a number of methodologies in order to develop clear and systematic ways of making observations, recording data and using it to evaluate and assess children.

Professional Development and Quality in Early Childhood Education

This book provides a global overview of developments and discussion around the evaluation of quality of early childhood education environments, and the professional development of early childhood teachers, during the last decade. It reports on the Early Change project, a European-funded research project with the participation of six European countries: Cyprus, Denmark, Finland, Greece, Portugal, and Romania; and offers an in-depth view on the perspectives of early childhood teachers regarding their professional development and the quality of early childhood education environment. Additionally, it discusses the policies and educational framework supporting the professional development of early childhood teachers across Europe. Finally, it proposes an alternative way to integrate the use of observational rating scales of early childhood education environments' quality in teachers' professional

development. Presenting up-to-date scholarly research on global trends, this is an easily accessible, practical, yet scholarly source of information for researchers, policy makers and practitioners.

Observing Children From Birth to 6

Originally published under title: Observing children, 1995.

Observing Young Children

This fully updated third edition of Learning Through Child Observation is a handbook for professionals working in, or students preparing to work in, children's services. This accessible text examines the value of observation, its use in assessment and the practical aspects and methods of observational study. The authors focus on the importance of fully recognising the child's developmental and emotional state when intervening, and the need to see children 'holistically' and as unique individuals within the wider context of the family and community. This new edition reflects updates to policy and practice and further develops the critical perspective on contemporary thinking about childhood and observational methods. This edition has also expanded its focus to include observation of primary-aged children. A popular text, it will appeal to students and professionals in all children's services, whether in pre-school, schools, social care, mental health or health settings.

Learning Through Child Observation, Third Edition

"More than 50 interactive activities on this 3-CD set give students practice in observation by watching video clips of children from infancy through adolescence, and recording their interpretations."--CD-ROM packaging.

Child Development

How to Use Work Group Supervision to Improve Early Years Practice presents a new model for supervision as a collaborative process, and explores how this process can benefit practitioners at all stages in their career to reflect on and improve their own practice. Supported by detailed case studies which contextualise Work Group Supervision, Louis offers practical support which will help practitioners develop their knowledge and skills, and to work together to develop a shared understanding and more successful practice. Louis covers a range of insightful topics to help practitioners utilise the Work Group Supervision method to improve their practice, including: What Work Group Supervision is and how it can help practitioners How to develop self-understanding and professional practice Theories on child observation, and using observation to tune into children The importance of respectful interactions as a leader and among peers How to Use Work Group Supervision to Improve Early Years Practice is ideal for Early Years practitioners and teachers, managers of Early Years settings and students on courses for leadership in Early Childhood settings.

How to Use Work Group Supervision to Improve Early Years Practice

The debate surrounding testing and accountability in early childhood education continues, but one thing is universally agreed upon: effective observation and assessment of young children's learning are critical to supporting their development. Educators balance what they know about child development with observation and assessment approaches that both inform and improve the curriculum. This foundational resource for all educators of children from birth through third grade explores What observation and assessment are, why to use them, and how Ways to integrate documentation, observation, and assessment into the daily routine Practices that are culturally and linguistically responsive Ways to engage families in observation and assessment processes How to effectively share children's learning with families, administrators, and others Find inspiration to intentionally develop and implement meaningful, developmentally appropriate observation and assessment practices to build responsive, joyful classrooms.

Spotlight on Young Children

The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can

make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

Early Childhood Assessment

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Transforming the Workforce for Children Birth Through Age 8

Packed with examples of observation techniques, skills and documented examples, this text covers the child observation components of all major child-care courses, in particular CACHE CCE and DCE, NVQ Level 2 and 3 as well as BTEC.

A Practical Guide to Child Observation and Assessment

Observing and recording the development of young children ages two to six years old in an early childhood classroom setting.

Learning to See

Children develop and learn best when their environment is tailored to their individual needs, supported through careful observation, informed assessment and dynamic planning – a cycle which is the bedrock of good early years practice. Although the EYFS recommends that observation, assessment and planning should be linked in a constant, cyclical process, in practice this can be a significant challenge. This book presents an integrated framework which puts the cycle into practical terms, bringing it all together to ensure a seamless process and to support you in this vital part of your work. The focus is on the critical links within the cycle and combines theory with proven good practice, including: Making and recording observations effectively and efficiently How observations should inform next steps, assessment and planning Bringing all the information together into a cyclical process Exploring potential challenges Using reflective practice to refine and improve your techniques Rich in practical examples and case studies that illustrate how the cyclical framework works in practice, this is an excellent resource for early years practitioners and students looking to improve their observation, assessment and planning techniques. "Observation, Assessment and Planning in the Early Years – Bringing it All Together, actually does bring it all together. Kathy Brodie has linked theorists from the past to the

present, skilfully connecting to the revised EYFS. Early Years students and practitioners will have the opportunity to reflect on the innovative ideas that she has suggested. Kathy has also included detailed information on observing SEN children. This modern update to observation, assessment and planning is a must read for the early years sector.” Laura Henry, Managing Director, Childcare Consultancy “This is a very well researched and practical guide to observation, planning and assessment in the Early Years. Kathy has collected together both historical and current thinking and ideas around the subject and then presented them in a way that is easy for the reader to access, understand and, more importantly, apply. The structure and format of the book helps the reader to check their understanding of the key learning points and then supports them in working through any challenges that they may have along with answers to key questions. Observation, Planning and Assessment in the Early Years is an essential read for all Early Years Practitioners from those with experience to those just starting out.” Alistair Bryce-Clegg, Early Years Consultant “This is a wonderful and timely resource to help practitioners make and use well informed judgements of young children’s learning and achievement. The four threads of observation, assessment, next steps and planning are skilfully woven together. Plentiful exemplifications and case studies vividly illustrate theoretical points and give young children a central place in the book.” Marion Dowling, Early Years Specialist and Vice President of Early Education

Observing Development of the Young Child

Observation is an essential skill for all who work as carers and educators of children. It is the key way to assess a child's stage of development, to assess their progress, to alert you to their needs, to plan for their teaching and to enjoy each child's unique qualities. This book has been written to guide you through the process and to become a skilled practitioner. *Observing Children and Young People*: - is based on real observations - describes aims and objectives - illustrates methods of recording observations - provides guidance on observing children with SEN - suggests activities for promoting progress - offers a detailed breakdown of developmental milestones. Now in its 4th edition, this is a well-established, user-friendly and invaluable guide to observation techniques for everyone working with children and young people, with new material on observation of an extended age range, from 0--16 years. It is essential reading for all CACHE, Edexcel, Open University and City & Guilds validated courses for a vast range of childcare practitioners who work in a variety of settings, including schools, nurseries, hospitals and homes. Contents will also appeal to teaching assistants, trainee and practising teachers, and those studying for foundation and undergraduate degrees in Childhood Studies.

Observation, Assessment And Planning In The Early Years - Bringing It All Together

This book grew out of a three-year study of one child, documenting her social, emotional and cognitive development. It provides a valuable insight for all students and teachers of child development at the individual level. The observations and assessments are presented here as a model for students to use in their own observations aimed at supporting and extending children's learning. The book sets out theories and traditions in early childhood development and care, as well as ways of analyzing observations. This is an essential book for students and practitioners involved in research and observation in early years settings.

Observing Children and Young People

The Power of Observation explores the vital connection between observing and effective teaching. Much more than just a set of skills, observation is a mind-set of openness and wonder that helps teachers and caregivers get to know more about each child in their care. The link between observation and building relationships is an important theme of this book. The authors share their own experiences and those of many others to illustrate how observation helps teachers and caregivers become more effective in the child care center, preschool, family child care home, or elementary classroom. It offers guidelines for effective observation and specific strategies to help you refine your observation skills and transform observing into an integral part of your teaching. This second edition includes expanded guidance on applying what you learn from observation into your daily practices and a new study guide. This study guide was developed based on recommendations from numerous university and community college professors who use the book as the textbook for their courses. We are pleased that NAEYC has chosen to make this book a 2007 Comprehensive Member Benefit.

Child Development and Learning 2-5 Years

This book explains the unique insights that child observation can bring to practice with children and families and helps the reader develop their own skills in this approach. The ability to observe and to process what is seen is crucial in social work with children and families. Yet successive inquiries into child deaths have demonstrated the problems faced by professionals in doing what is superficially a very straightforward task, highlighting the difficulties in seeing, thinking about and developing an understanding of the child's experience. This book helps readers to develop an understanding of what is entailed in observation, explaining the unique insights that child observation can bring to practice with children and families. By drawing out relevant theoretical concepts it aids their understanding of what they are observing and so helps them to develop their own skills. Key theoretical concepts are brought together from developmental psychology and psychoanalytic thinking in a way that enables practitioners to draw on these to inform and enrich their thinking. Useful case studies are presented which practitioners can relate to their own practice when they are struggling to make sense of difficult situations.

The Power of Observation

Early Learning Standards and Staff Development helps directors and trainers guide early childhood staff to fulfill learning standards, often without compromising best practices. Written by respected consultants Gaye Gronlund and Marlyn James, it is one of few books on staff development in the area of learning standards. The book includes activities for reflecting on issues such as how much teachers should direct each type of classroom activity, and helps staff developers assist teachers in strengthening their observation and documentation skills. The book comes with a DVD featuring video vignettes to accompany the observation exercises, as well as PowerPoint training aids.

Observing Children and Families

This is a key text for all those studying for degrees and foundation degrees in early childhood, early years and related disciplines and for candidates on EYPS pathways. It enables students to appreciate the central role of observation for understanding, planning for and educating early years children. The theoretical background to child observation is covered in detail, the text highlights important works and considers the ethical implications. This Second Edition includes new chapters on recording and analysing and the curriculum and is fully updated throughout with links to the updated Early Years Foundation Stage. Interactive activities and real life case studies are included to help the reader engage with the text and make essential links between theory and practice. Ioanna Palaiologou is a lecturer and researcher at the Centre for Educational Studies at the University of Hull and a Chartered Psychologist of the British Psychological Society with specialism on child development and learning theories. Ioanna is currently leading the Masters in Early Childhood Studies, supervises a number of PhD students and is the Academic coordinator for Research Students Support. About the Early Years Series This series has been designed to support degree and foundation degree students of early years, early childhood and related disciplines. Each text takes a focused look at a specific topic and approaches it in an accessible and user-friendly way. Activities pose questions to prompt thought and discussion, and further reading suggestions, including useful websites, are provided to help students access extended learning in each topic. Other titles in the series are Child Development for Early Childhood Studies, Successful Placements in Early Years Settings and Childhood in Society for Early Childhood Studies.

Early Learning Standards and Staff Development

This is a book about the process of finding user-friendly and purposeful ways of observing and planning that will help those who are working with young children in a variety of settings to look with insight at children, providing what they need in order to develop and learn optimally. By examining the historic background of observing and planning, and describing examples of good practice in different group settings, this book will help to monitor a child's progress - what is needed now and to work out what is needed next. The real life case studies from various settings including day care, nursery school, primary school, private sector and Soweto examine different observation techniques, looking at their strengths, drawbacks and use in everyday practice. Examples from the UK and internationally illustrate the history and importance of observation in a range of contexts, while a glossary clearly explains the key terminology. All the examples given in this book can be used with different National Framework documents worldwide, bearing in mind however the authors' belief that curriculum frameworks must be used as a resource and never as a limiting straitjacket. Drawing on key theory and research, the book's chapters cover: Flexible planning Record keeping Working with parents Using technology. Full

colour photographs, illustrations and useful charts and diagrams make this an accessible and engaging resource that will no doubt be invaluable to any early years practitioner. This book was originally published as *Getting to Know You* - part of the 0-8 series.

Child Observation for the Early Years

Early childhood studies is fast becoming a separate academic discipline, and this single volume provides an overview of current issues and approaches in the subject as taught on many courses. The book reflects the multi-professional and multi-disciplinary range and scope of the subject, introducing students to different ways of studying the richness and complexity of children's lives and children's worlds.

Observing Young Children

Week by Week: Plans for Documenting Children's Development, 4e is a reference that not only presents the technical aspects of many various methods of documentation, it also reviews domains of development and the efficiency of each method to capture important information. Early childhood professionals should be keeping written records for every child in their group, documenting events, achievements, and concerns. There are many methods or types of documentation to use. The dilemma of both child development learners and professionals is how to manage detailed, meaningful documentation while attending to all the functions that they need to perform to keep children safe and actively involved in learning. This book is an all-purpose guide for learners and practitioners to gather meaningful developmental information. The new online companion contains forms and additional resources that will assist in using the child assessments to guide curriculum planning. Also added to this new edition are *'It Happened To Me'* vignettes that illustrate key points and are both entertaining as well as illustrative of the experiences of real professionals. It also includes an expanded discussion of the implications of *No Child Left Behind* and authentic assessment by portfolio documentation. The book can be useful for courses in observation methods, child development, curriculum planning and practicum. This reference is a must-have that provides a year's plan for gathering developmental data on every child; something every classroom teacher needs.

This title also includes printable/photocopiable forms for you to use to structure your own planning and observations with, and help you to put the best practice examples in this book directly into practice.

CACHE Level 2 Award in Child Development and Care

This fully revised second edition of *Observing, Assessing and Planning for Children in the Early Years* provides a detailed analysis of what is meant by the observation of young learners and why this is so vital to early years practitioners and students. In this accessible and insightful text, Sandra Smidt examines the various theories of how young children develop and learn, which have been put forward by thinkers and writers across time and place so the reader has a genuinely global view of early childhood. She then highlights how important it is for practitioners in schools, nurseries and settings

to think carefully about what they have seen and heard in light of what they, as adults, already know about the children and their learning. Also included in this text is a helpful 'Try Your Hand' section where readers are invited to make their own judgements about what they have read, as well as a section on observing and assessing not only the nursery-aged children but also babies and toddlers.

Early Years Observation and Planning in Practice

Nilsen's WEEK BY WEEK: PLANS FOR DOCUMENTING CHILDREN'S DEVELOPMENT, 8th Edition, provides an overview of accepted observation and recording methods, including examples and guidance about the advantages and disadvantages of each. Each chapter summarizes a developmental domain to focus your observation skills as you practice a specific recording method. These are integrated into a concrete, systematic plan for recording each child's development in all developmental areas -- a plan that can be extended over 40 weeks while in practicum, field experiences or your own classroom. It provides numerous practical observation forms and integrates NAEYC standards and Developmentally Appropriate Practices and learning objectives. Real-life anecdotes, practical tips, forms with clear instructions and step-by-step guidelines make this a valuable resource for teachers in training and practicing professionals.

Observing Young Children

Observation is watching and listening to learn about individual children. When teachers observe in a purposeful and intentional way, they form better relationships with children and families and become more responsive teachers. A companion to the best-selling book *The Power of Observation*, this workbook guides teachers through four phases of using observation to teach responsively--asking questions; watching, listening, and recording; reflecting; and responding. Its sixteen exercises are each linked to a 3-5 minute video clip. By taking you inside real classrooms, it enables you to observe children in action as they work and play, interacting with materials, other children, and adults. *Observation: The Key to Responsive Teaching* is designed for Head Start, infant, toddler, preschool, and kindergarten teachers, and for family child-care providers, staff developers, and college instructors. It may be used by individual teachers or by colleagues who are working together to improve their practice. Administrators, coaches, and college instructors can use the material as part of a multi-week course or as the basis for structured staff development workshops.

Week by Week: Plans for Documenting Children's Development

Based on the pioneering work of Mary D. Sheridan, *Play in Early Childhood* is a classic introductory text to play and development – key topics for all those who work with young children. Updated for a contemporary audience and fully evidence-based, it explains how children's play develops and how they develop as they play. With over eighty illustrations and observations of play from birth to six years, this new edition presents classical and contemporary literature, making clear links between play and all areas of children's development. It includes activities to consolidate thinking and suggestions for further reading throughout. *Play in Early Childhood* considers: the development, value and characteristics of play issues relating to culture, adversity and gender play from recreational, therapeutic and educational perspectives the role of parents/caregivers and professionals in supporting play Suitable for those new to the area or for more experienced workers wanting a quick reference guide, this easy-to-follow book meets the needs of students and professionals from a wide range of health, education and social care backgrounds, including early years professionals, playworkers, children's nurses, speech and language therapists and social workers.

Keeping Kids Safe, Healthy, and Smart

Perhaps the most challenging and important role that adults play in society is that of raising children. Every parent and teacher hopes to help children develop into healthy, caring, and intelligent adults. *Keeping Kids Safe, Healthy, and Smart* is designed for all adults who interact with kids-whether they be parents, teachers, or other caregivers-and provides specific suggestions for keeping children safe from hidden and open dangers wherever they spend time. This book is organized around three different

themes of major threats and hidden dangers to children in our country: threats in school spaces (e.g., in classrooms, on buses, on playgrounds, and on sports teams); threats in cyberspace (bullying or harassment and child predators or child pornography), threats in other spaces where children work and play (intrapersonal and interpersonal violence including a wide range of threats such as self-mutilation, accidents, abuse, environmental threats, drugs, and mental illness).

Keeping the Whole Child Healthy and Safe

This e-book, a collection of articles from "Educational Leadership" and other ASCD publications explores what it means to foster health and safety for students. Knowing that what we teach kids today will shape their future well-being, the authors look at the issues from many angles, addressing both physical and mental health and safety. This fourth in a four-book series of e-books on educating the whole child recognizes that although health and safety are not just curriculum topics, they definitely should be formal parts of learning. Safe Kids, Smart Parents

Leading family psychologist and personal therapist to Jaycee Dugard, Rebecca Bailey tells parents how to keep their children safe in this accessible, must-have guidebook, with a foreword by Terry Probyn, Jaycee's mother. Whether their children are toddlers or teens, six years old or sixteen, whether they live in a rural town, suburb, or a bustling city, all parents worry about threats—from cyber-bullying to exploitation and abduction. What should they tell their children and when? What practical steps can they take to reduce the risks and keep their kids safe? Dr. Rebecca Bailey, with the assistance of her sister and registered nurse, Elizabeth, gives easily understood, easily followed answers. Safe Kids, Smart Parents builds on Dr. Bailey's years of experience as a family psychologist helping real families deal with real situations. From abduction to abuse, Bailey explains how parents can speak to their kids about troubling topics while building their self-esteem and teaching them how to protect themselves. A smart, comprehensive, and easy-to-read resource, Safe Kids, Smart Parents is the most important book a parent can own.

Advancements in food science, medicine, and technology has greatly improved our lives; however, these advancements have also complicated the job of raising healthy kids and keeping them safe. So it's no wonder that many parents feel overwhelmed and question if they are doing enough. During her years as a clinical social worker and investigator, Nikole Seals found that parents often struggled to find healthier and safer alternatives for their kids. She realized that what parents needed most was a reliable guide to help them get informed, discover their options, and learn powerful strategies for protecting their families. You won't get this type of insight from teachers or even from a family therapist. The invaluable information in this book comes from over fifteen years of interviewing and coaching thousands of parents and children. *Empowered Parenting: Simple Strategies for Keeping Kids Healthy & Safe in a Complex World* is the ultimate guide for helping parents to make informed decisions. - You'll learn the truth about the food your children eat, the medicines prescribed to them, and how these things affect their health, physical development, and emotional well-being. - You'll discover the ways that the food and drug industries have fooled you into buying their products, despite knowing that their products are hazardous to your child's health and development. You'll learn which companies and brands to avoid and which companies you can trust. - We'll discuss how our own government is failing to protect our kids and how your rights as a parent are slowly being eroded and ignored. - We'll examine the pros and cons of technology and discuss how it impacts your child's development, safety, and self-identity. You'll learn how to effectively manage and supervise your child's use of technology. - You'll get the tools you need to create a prevention and safety plan so that you can prevent or manage a problem or crisis. Each chapter gives you options and effective strategies that you can integrate with your own unique parenting style. Armed with this knowledge, you'll make smarter decisions, worry less, improve your family's diet and health, save money, and trust yourself more. That's the Empowered Parenting way.

Feeding the Kids

After-school programs, scout groups, community service activities, religious youth groups, and other community-based activities have long been thought to play a key role in the lives of adolescents. But what do we know about the role of such programs for today's adolescents? How can we ensure that programs are designed to successfully meet young people's developmental needs and help them become

healthy, happy, and productive adults? Community Programs to Promote Youth Development explores these questions, focusing on essential elements of adolescent well-being and healthy development. It offers recommendations for policy, practice, and research to ensure that programs are well designed to meet young people's developmental needs. The book also discusses the features of programs that can contribute to a successful transition from adolescence to adulthood. It examines what we know about the current landscape of youth development programs for America's youth, as well as how these programs are meeting their diverse needs. Recognizing the importance of adolescence as a period of transition to adulthood, Community Programs to Promote Youth Development offers authoritative guidance to policy makers, practitioners, researchers, and other key stakeholders on the role of youth development programs to promote the healthy development and well-being of the nation's youth.

Community Programs to Promote Youth Development

Renown educator and expert in the practical applications of cognitive-neuroscience offers this opening her concise Forward to this book about the wide ranging uses of Thinking Maps®: "Neuroscientists tell us that the brain organizes information in networks and maps... the Thinking Maps program takes full advantage of the natural proclivity of the brain to think visually." Student Successes with Thinking Maps presents a language of eight visual tools and framing tools based on fundamental cognitive processes of the human brain and mind that boost all learners' metacognitive and critical thinking skills. The first chapter by Thinking Maps creator David Hyerle, Ed.D. is a comprehensive introduction to the theory, history, research and results from the systematic implementation of Thinking Maps over time. This book is rich in detail and inspiration from teachers, principals, and administrators from around the world and across diverse schools and systems. The wide-ranging stories and supporting data across

the 19 chapters weave together to create a unified theme of Thinking Maps as a transformational language for learning. From the authors of these chapters, you will learn about school-wide changes in teachers' effectiveness and student performance in an inner-city elementary school in Long Beach, California, where 85% of the students entering classrooms speak Spanish as their first language; students with special needs in a middle school in North Carolina making performance leaps of over three years' growth in mathematics; girls from a single-sex, independent, K–12 school in New Zealand rising over four years to the top of that nation's educational ladder; and entering junior college students in Mississippi significantly shifting reading comprehension scores, while those in the nursing program dramatically outperform their peers of previous years. You will also hear about the Pass Christian School District, landfall for Hurricane Katrina, rising over the years to become the top-performing school system in Louisiana. The authors of the chapters before you bring forth insights grounded in practical examples and experiences from their work to transform teaching and learning.

You have the power to protect yourself and others! What does it mean to be safe? Does it mean beating a throw to home plate? Does it mean never taking risks? No! Being safe is about feeling secure, feeling protected and being responsive--no matter the environment or situation. You can be safe in so many simple ways. From being aware of your limits to creating healthy boundaries. By not giving in to peer pressure and by standing up to bullies. And by being safe on the Internet, or knowing the right time to get a caring adult's help. This revised and updated addition to the award-winning What Does It Mean to Be...? series is the perfect book to spark meaningful dialogue and ensure every child knows what it means to be safe.
