How much weight should be placed at point X to balance the beam?

Both water buckets are filled to the top. Which water bucket most accurately demonstrates how water would leak from the bucket if 4 small holes were made on the side of the buckets?

The water pressure is higher at lower points of the bucket, causing water streams to go further.

A truck containing petrol is travelling at 40 mph in the direction of the large arrow. If it had to suddenly brake, which diagram best demonstrates what would happen to the petrol?

The following three trucks are parked on an incline. Their centre of gravity is identified by a dot. Which of the three HGVs is least likely to fall over?

How much force is required to lift the load?

How much weight is required to hold the load?

In the following electrical circuit which switch(es) will need to be closed to allow Bulbs B and C to illuminate?

If bulb 2 is removed, how many bulbs will illuminate?

When the switch is closed, how many bulbs will illuminate when bulb 3 is removed, and replaced with cable?

At which point will the beam balance?
