The Douglas F3D Skyknight was a pioneering twin-jet night fighter and attack aircraft developed for the U.S. Navy and Marine Corps. Known for its robust design and early radar capabilities, the F3D Skyknight served prominently during the Korean War, primarily as an interceptor and electronic warfare platform. This durable aircraft played a crucial role in naval aviation's transition to the jet age.

Instead of ejection seats, the F3D's crew must use an escape slide located to the rear of the cockpit. (Douglas F3D Skyknight - Steve Ginter)

During the Korean War, F3Ds had their night fighting capability handicapped by inadequate radio tubes that would burn out quickly.

There was also a general lack of spare parts during the Korean war. This increases repair times.

The F3D's AN APG-26 gun aiming radar scope can provide lead information to the pilot for a target up to 1.2km away. (F3D-1 Skyknight Pilot Handbook)

The F3D-1 has a researchable modification, F3D-1M, that allows it to carry and fire sparrow radar guided missiles.
