Intro

Product market: A product market is an effort to identify the products and suppliers of those products that compete some substantial degree with the product in question - Courts look at a variety of factors, but the boundaries of the market are determined by the reasonable interchangeability of use of Geographic market: Physical territory in which producers, including potential producers, are located and to which customers can reasonably turn for sources of supply - The hypothetical monopolist: could she impose a SSNIP in the proposed market? -Example: To determine whether Salt Lake County is a proper antitrust geographic market for hospital services, ask whether the WHO IS LOOKING AT THESE ISSUES? The Agencies - The Federal Trade Commission (FTC) Skeptical that mergers are necessary to provide more affordable care - The Department of Justice (DOJ)

WHAT ARE THE AGENCIES' AIMS? - The goal of antitrust enforcement is improving consumer welfare by protecting competition - This is not the same as protecting a particular competitor •

Competition provides -Lower prices -Better quality - More output

STATE LAWS AND THE SHERMAN ACT - Federal and state statutes Section 1 of the Sherman Act - There are three elements to a Section 1 claim: A contract, combination, or conspiracy among two or more separate entities

EXAMPLE: SHERMAN ACT SECTION 1 - Price fixing -In 2016, the Philadelphia Federation of Teachers Health and Welfare Fund sued three pharmaceutical companies alleging that

THE SHERMAN ACT SECTION 2 Section 2 of the Sherman Act - Prohibits monopolization, attempts to monopolize, and - There are two elements of a Section 2 claim

Merger of Thomas Jefferson University and Albert Einstein Healthcare Network - FTC lost based on witness credibility and issues surrounding how -Lessons . Illustrates the importance of the hypothetical monopolist to the FTC

AGENCY GUIDANCE The agencies have provided guidance regarding antitrust laws - Statements of Antitrust Enforcement Policy in Health Care

EXAMPLES - Per se unlawful transactions - Naked price-fixing agreements - Naked no poach agreements - Rule of reason - Supply agreements

MERGERS - Healthcare providers are frequently looking to consolidate: - To level the playing field with dominant insurers and - To take advantage of the financial benefits offered by the Affordable Care Act (ACA) to providers that collaborate to reduce

INFORMATION EXCHANGES - The Statements of Antitrust Enforcement Policy in Health Care provide a "safe harbor" for providers to exchange information • The scope of the safe harbor depends on the sensitivity of the information - General principles: - Managed by a third party - More than three months old - Aggregation

VERTICAL ACQUISITIONS - Historically, this has not been a key focus for the agencies - Vertical combinations are generally less of an antitrust concern than horizontal combinations - Competition is the key - For example, hospitals and physicians do not typically compete with - Multiple acquisitions raise concerns

BOYCOTTS • Agreement among competitors not to deal with other competitors, customers, or suppliers Per se illegal in several situations: - Agreement among competitors to deny access to a necessary - Boycott by dominant position in the relevant market - Refusal to deal unless a specified price is paid for the good or
