Review of Medical Microbiology and Immunology, Twelfth Edition

This is a review text on medical microbiology and immunology containing approximately 625 board-type review questions on left-hand pages with answers and explanations on facing right-hand pages. It is designed for medical students taking microbiology as well as for those studying for Step 1 of the National Board Exams and is also useful for Step 3 National Boards on infectious diseases or allergy and immunology. The book's main sections cover general and medical microbiology, bacteriology, virology, immunology, and parasitology. The answers summarize relevant information and point out the fault in incorrect answers. Line drawings and figures are used for questions concerning structure of both molecules and organisms and for interpreting graphical results. Authors Reese, Brownell, and Nair, all with the Medical College of Georgia, bring a combined total of some 85 years of medical school teaching experience to their development of the questions and annotated answers for this book.

Review of Medical Microbiology and Immunology, Sixteenth Edition

The material in this text was compiled to serve as a study guide for a REVIEW of microbiology and immunology suitable for preparing for Step 1 of the United States Medical Licensing Examination (USMLE). I have assumed that you, the reader, have already had a full fledged course covering this discipline. In-depth presentation of material will not be found in this review. You are urged to consult other study aids (lecture notes, textbooks, etc.) for detailed explanations of material that you find troublesome. In general, the text of the book is on the left side of each page; questions, illustrations, summary sentences or phrases, and other study aids are on the right. This format has the intent of getting you involved in the review process. Use a highlighter, put boxes around key statements, answer the questions, and fill in the blanks as you work through the book. Your reward will be proportional to your effort (i.e., no pain, no gain). As the format is a work book, you benefit most by active participation. Write key words in the margins; add to the Review State ments by writing out your own; use whatever study skills you have found help you "master" an area.
