But Not the Armadillo

"Boynton is the absolute master of board books."—The New York Times Book Review For more than forty years, readers have wondered what happens to the armadillo on the last page of Sandra Boynton's *But Not the Hippopotamus*. At last, comes the long-awaited sequel! The armadillo follows the less-traveled road: he picks cranberries, stops and smells the flowers, naps in the meadow, and at day's end passes an overeager hippo sprinting in the other direction. Told with Boynton's signature charm and unpredictability, *But Not the Armadillo* is a worthy companion to *But Not the Hippopotamus*. Behold the armadillo, with his armadillo nose. That nose can take him anywhere. He follows where it goes.

But Not the Hippopotamus

A shy hippo makes a big impact in this anniversary edition of a Sandra Boynton classic. A hog and a frog cavort in the bog. But not the hippopotamus. A cat and two rats are trying on hats. But not the hippopotamus. The original *But Not the Hippopotamus* was an instant favorite among children and parents. Now this hilarious Boynton book is back in a Special 30th Anniversary Edition, complete with its silly rhymes and humorous, charming illustrations. In this simple, playful board book, a shy hippo watches as other animals engage in social activities. Finally, the other animals invite the hippo along and, after dithering a moment, she leaps into the fun...with hilarious results. The repetitive, enjoyable rhythm, cheerful mood, and well-crafted, simple rhymes will endear this story to toddlers everywhere. This anniversary edition has an enlarged trim size and metallic ink on the cover, making this Boynton classic even more special.

The Armadillo from Amarillo

When an armadillo named Sasparillo wants to know where on earth he is, he leaves his home in San Antonio and travels north through the canyons and prairies of Texas. In Amarillo he meets an eagle and, with her help, finds the answer to his question--as well as lots of adventures.

Armadillo and Hare

Armadillo and Hare live with their friends in the Big Forest. Hare loves dancing. Armadillo loves cheese sandwiches. Hare loves playing the tuba. Armadillo loves cheese sandwiches. Hare loves his best friend, Armadillo. Armadillo loves Hare - AND cheese sandwiches! They have quite a mix of friends, including an acrobatic wombat, a know-it-all lobster, a hungry jaguar, and (let's not forget) the invisible stick insect.

The Nine-Banded Armadillo

The word armadillo is Spanish for “little armored one.” This midsize mammal that looks like a walking tank is a source of fascination for many people but a mystery to almost all. Dating back at least eleven million years, the nocturnal, burrowing insectivore was for centuries mistaken for a cross between a hedgehog and a turtle, but it actually belongs to the mammalian superorder Xenarthra that includes sloths and anteaters. Biologists W. J. Loughry and Colleen M. McDonough have studied the nine-banded armadillo (*Dasypus novemcinctus*) for more than twenty years. Their richly illustrated book offers the first comprehensive review of everything scientists know about this unique animal. Engaging both scientists and a broader public, Loughry and McDonough describe the armadillo's anatomy and physiology and all aspects of its ecology, behavior, and evolution. They also compare the nine-banded armadillo with twenty or so other, related species. The authors pay special attention to three key features of armadillo biology—reproduction, disease, and habitat expansion—and why they matter. Armadillos reproduce in a unique and puzzling manner: females always give birth to litters of genetically identical quadruplets, a strategy not found in any other vertebrates. Nine-banded armadillos are also the only vertebrates except for humans known to contract leprosy naturally. And what about habitat expansion? The authors suggest that the armadillo's remarkable spread across the southeastern United States may be the consequence of its most notable feature: a tough, protective carapace. Biologists, evolutionists, students, and all those interested in this curious creature will find *The Nine-Banded Armadillo* rich in information and insight. This comprehensive analysis will stand as the definitive scientific reference for years to come and a source of pleasure for the general public.

Armadillo

Armadillo is the classic comic bestseller by William Boyd, author of *Any Human Heart*. 'A young man not much over thirty, tall with ink-dark hair and a serious-looking, fine-featured but pallid face, went to keep a business appointment and discovered a hanged man' Lorimer Black - young, good-looking, but with a somewhat troubled expression - does not understand why his world is being torn apart, though he does know that for the most part it is made up of bluster and hypocrisy. His business, trying to keep insurance companies from paying out the money they've promised, is a con game run with the protection of the law. One winter's morning, Lorimer goes to keep a perfectly routine business appointment and finds a hanged man. A bad start to the day, by any standards, and an ominous portent of things to come. *Armadillo* is a must-read for fans of William Boyd and will also be loved by readers of Sebastian Faulks, Nick Hornby and Hilary Mantel. 'Marvellously paced and ingeniously plotted. A real page-turner' Andrew Motion, *Observer* 'Armadillo doesn't miss a trick. It has depth and resonance which will make you want to read it again... zinging readability' Philip Hensher, *Mail on Sunday* 'As entertaining and as thought-provoking as anything Boyd has ever written' *Daily Telegraph*

He travels to France and, guided by Augustin's journal, discovers the joys of Paris: eating a flakey croissant at a café, visiting the Louvre, walking along the Seine and, of course, meeting the Iron Lady... More important moments in childhood are depicted lightly, but effectively, in a fresh and funny question-and-answer format. Who gets a haircut? Does a yak? Does a rhinoceros? Does a whale? Does a sheep? Do YOU? And who goes to school? Does a panda? Does an ostrich? Does an armadillo? Does a chimpanzee? These books help teach children about important moments of childhood, in this case getting a haircut and going to school. Using a funny question-and-answer format comparing people to animals, the author and illustrator share information on childhood events that may seem scary, but won't hurt a bit.

Does a Panda Go to School?

This is a counting book and a book about parts of the body. It also has a serious educational aim.
