IFRS 4 establishes the principles for the recognition, measurement, presentation and disclosure of
insurance contracts within the scope of the standard.

The objective of IFRS 4 is to ensure that an entity provides relevant information that faithfully
represents insurance contracts. This information gives a basis for users of financial statements to
assess the effect that insurance contracts have on the entity's financial position, financial performance
and cash flows.

What form can an insurance arrangement take? • The relationship between an insurer and the
policyholder is established by a contract. • A 'contract' is an agreement between two or more
What is insurance risk? • Insurance risk is a risk, other than financial risk, that is transferred from
the policyholder to the issuer of a contract. The issuer accepts a risk from the policyholder that the
policyholder was already exposed to. The following table includes examples of insurance risk and
financial risk.
