The carpet is inspected for damage and condition (heat treatment is applied to stop the pile from further damage)

The carpet is being thoroughly vacuumed with industrial vacuum cleaner (this removes solid dirt from the carpet while lifting the pile for better cleaning results)

4. Furniture already removed, pre-spotting for easier removal of stubborn stains (post cleaning spotting applied if necessary)

Pre-Spray (depending on the carpet, particular pre-spray is applied to help dissolve stains and dirt)

Agitation Machine with counter rotating brushes helps to agitate the pile right to the backing (note how the stains are disappearing already)

Extraction, Rinse, Neutralizer Machine with twin parallel vacuum motors and maximum 800psi (no more than 400-500psi is actually necessary) is used to rinse the carpet and immediately extract the dirt while cutting down the drying time. Neutralizer restores the natural PH of the carpet. Heater that heats the water to approx. 90°C/194°F is also used.

Post-Spot Treatment 9. Post Groom 10. Speed Dry 11. Post Cleaning Inspection
