How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

How and Why to Read and Create Children's Digital Books

Excerpt from *Primary Reading and Literature: A Manual for Teachers to Accompany the Primer, First, and Second Readers of the Reading-Literature Series* The Free and Treadwell Readers aim first, last, and all Of the time to secure and hold the child's interest. They were compiled, in the schoolroom, from child litera ture that has held the interest Of children through genera tions that are gone and that will be read with equal interest by millions in the years to come. In the beginning the publishers had prepared a brief teachers' manual to accompany the Primer. Beyond that it was then thought and is yet believed that any good method may be successfully used with these books. Since the books have become very extensively used it has been found that, owing to widely different degrees and kinds Of preparation, many need, or think they need, more help than was provided in the original manual. The book aims to show teachers how simple and natural are the essential principles Of teaching young children to read; to Outline clearly and definitely simple methods in harmony with the most approved ideas Of teaching reading, yet leaving the directions so exible that teachers may be strengthened by their helpful guidance rather than ham pered and weakened by an artificial, daily routine; and to enlarge the conception Of the significance of the best litera ture in the early years of the child's life. Teaching Children's Literature in the Primary School

TEACH YOUR STUDENTS TO READ WITH PRECISION AND INSIGHT The world we are preparing our students to succeed in is one bound together by words and phrases. Our students learn their literature, history, math, science, or art via a firm foundation of strong reading skills. When we teach students to read with precision, rigor, and insight, we are truly handing over the key to the kingdom. Of all the subjects we teach reading is first among equals. Grounded in advice from effective classrooms nationwide, enhanced with more than 40 video clips, *Reading Reconsidered* takes you into the trenches with actionable guidance from real-life educators and instructional champions. The authors address the anxiety-inducing world of Common Core State Standards, distilling from those standards four key ideas that help hone teaching practices both generally and in preparation for assessments. This 'Core of the Core' comprises the first half of the book and instructs educators on how to teach students to: read harder texts, 'closely read' texts rigorously and intentionally, read nonfiction more effectively, and write more effectively in direct response to texts. The second half of *Reading Reconsidered* reinforces these principles, coupling them with the 'fundamentals' of reading instruction—a host of techniques and subject specific tools to reconsider how teachers approach such essential topics as vocabulary, interactive reading, and student autonomy. *Reading Reconsidered* breaks an overly broad issue into clear, easy-to-implement approaches. Filled with practical tools, including: 44 video clips of exemplar teachers demonstrating the techniques and principles in their classrooms (note: for online access of this content, please visit my.teachlikeachampion.com) Recommended book lists Downloadable tips and templates on key topics like reading nonfiction, vocabulary instruction, and literary terms and definitions. *Reading Reconsidered* provides the framework necessary for teachers to ensure that students forge futures as lifelong readers.

Reading Reconsidered

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

Literacy and Language in the Primary Years

Teachers can have a profound influence on children's reading behaviour and attitudes to literature. Whether it's to broaden children's knowledge and understanding, or encourage reading for pleasure, reading in the classroom is becoming an increasing priority. This book looks at a wide range of children's literature from picture books to classics to poetry. A diverse array of books is recommended for teachers to use in a broad variety of contexts to enhance learning across the curriculum, featuring beloved authors such as Michael Morpurgo, Tove Jansson and Kenneth Grahame, as well as introducing some who may be new to teachers. This book:

- Recognises the key role of children's literature within the curriculum and learning development
- Explores examples through case studies of classroom practice and highlights children's literature's role in Personal, Social, Health and Economic (PSHE) education
- Celebrates the range of voices and contexts that literature can represent in the classroom
- Includes a 'For your bookshelf' section in each chapter which summarises key titles
- Dedicates a chapter to the importance of creating children's literature with and for children

The authors place emphasis on creating a literate environment in which children's literature is a central feature. This is a must-read for teachers at all levels, as well as anyone who volunteers in schools to support readers. "Read on to enrich your practice right across the curriculum and find diverse books to engage and inspire children. Enjoy!"

Professor Teresa Cremin, The Open University, UK "How do we make sure children today recognise the value of reading for pleasure when so many other mediums are competing for their attention? The answer lies within this excellent text." Megan Stephenson, PGCE Primary ITT Lead, Leeds Trinity University, UK "It is an essential book for the primary school – needed now more than ever before."

Adam Bushnell, Author of Modelling Exciting Writing and Descriptosaurus: Story Writing Rosemary Waugh is a retired teacher who has written extensively on children's literature, spelling, punctuation and grammar. She is an avid collector of children's literature. She works with David to lead workshops for reading volunteers in schools for the Open University, UK, and the charity Coram Beanstalk. Reading Under Control

Reproduction of the original: Special Method in Primary Reading and Oral Work with Stories by Charles Alexander McMurry

Primary Reading and Literature

Observing children is a fundamental aspect of learning to teach and a vital component of primary English teaching. Observing Primary Literacy focuses on observing children and teachers in the primary classroom. Its purpose is to enable trainee teachers to make sense of what they observe in classrooms. This book aims to help make explicit the reasons for the professional decisions teachers make before and during lessons, as well as encouraging critical and reflective thought on key aspects of primary English. Using a detailed examination of real-life case studies, Margaret Perkins provides a framework for understanding the literacy learning processes of primary-age children and how this can inform good teaching practice. She demonstrates to readers how to re-focus on children's learning and develop a critically informed approach to literacy in the modern primary classroom. This is essential reading for all students studying primary English on primary initial teacher education courses including undergraduate (BEd, BA with QTS), postgraduate (PGCE, SCITT), and employment-based routes into teaching. It is also useful for practising teachers who wish to develop their understanding and practice of literacy teaching. Dr Margaret Perkins is Senior Lecturer at the University of Reading.

Primary Reading and Literature

There is something quite magical about forming a connection to a book: the way in which the words on the page can conjure feelings of excitement, fun, joy, laughter or tears, channeling the part of our being that fundamentally makes us human. The journey that children take as they travel towards becoming a competent and confident reader can be a long, winding and complex road. This book helps teachers understand how to build a quality reading rich curriculum that supports the needs of all the children in their classroom. Starting with a section on choosing texts, the book goes on to explore a variety of essential teaching approaches from a read aloud programme, to drama and storytelling, art and illustration. This is a practical resource that provides teachers and schools ideas to support the embedding of text experience and deliver a reading rich curriculum that leads to higher student attainment and working at greater depth.

It puts the matter very clearly and succinctly, and presents a great deal of evidence to support the argument that pleasure is not a frivolous extra, but the very heart and essence of what reading is about. It also gives readers plenty of ideas for carrying the principle into the classroom, and for justifying it...This is an excellent piece of work, which I hope will find a place on every staffroom bookshelf.' - Philip Pullman English primary school children are less likely to read for pleasure than their counterparts in many other countries. This practical and focused book discusses the background to this situation and looks at how government initiatives have tried to address it. Drawing on the author's own research project in order to identify good practice in promoting reading for enjoyment, the book presents specific activities which teachers can use to develop their own whole school and classroom practice, enabling them to put the fun back into reading. Each chapter features case-study material and provides examples of planning from schools that have successfully created thriving reading cultures through schemes such as reading assemblies, book clubs, library loyalty cards, school book evenings and quizzes. There is also an extensive, annotated list of print and internet-based resources. Topics covered include: - Becoming a reading for pleasure school - Promoting a love of reading in the early years - Developing reading enjoyment in the later primary years - Getting boys reading Promoting Reading for Pleasure in the Primary School is written for all those involved in education who would like to see as many children as possible develop a love of reading. Learning to read and the teaching of reading have long been surrounded with controversy. Originally published in 1969, this book takes the view that the subject is best approached via linguistic theory. The relationship between reading and spoken language is clearly brought out in the author's attempt to define more closely the area in which the teacher has to operate when teaching children to read. His analysis of reading problems in children up to the age of 11 will encourage experienced teachers to question constructively their own beliefs and practices, while the book as a whole provides a valuable introduction to the psychology of reading for the student of education.

This book specifies the foundation for Adapted Primary Literature (APL), a novel text genre that enables the learning and teaching of science using research articles that were adapted to the knowledge level of high-school students. More than 50 years ago, J.J. Schwab suggested that Primary Scientific Articles “afford the most authentic, unretouched specimens of enquiry that we can obtain” and raised for the first time the idea that such articles can be used for “enquiry into enquiry”. This book, the first to be published on this topic, presents the realization of this vision and shows how the reading and writing of scientific articles can be used for inquiry learning and teaching. It provides the origins and theory of APL and examines the concept and its importance. It outlines a detailed description of creating and using APL and provides examples for the use of the enactment of APL in classes, as well as descriptions of possible future prospects for the implementation of APL. Altogether, the book lays the foundations for the use of this authentic text genre for the learning and teaching of science in secondary schools.

Floodland

Mainstream narratives suggest Black and African Caribbean children, white working class children, and boys, are 'failing' to learn to read. This book investigates intersections between race, class and gender in the picture of the 'poor reader', starting with young children's voices. What is the place of home learning in the story of children learning- or failing to learn to read? What do we learn about children's identity formation as they engage with books? Social science has not focused on reading as a social practice in the lives of children, starting with their perspectives, and this book fills a major gap. Policy and teachers' discourses are well represented in the literature; children's experiences of reading are not. This book not only shows the complex meanings children make of reading, but also that through consulting pupil voice it is possible to explore different issues around reading than those in adult-led debates.

Reading in Primary Schools

Excerpt from *Special Method in Primary Reading and Oral Work With Stories* This book attempts the discussion of two very important problems in primary education. First, the oral work in the handling of stories, and second, the introduction to the art of reading in the earliest school work. The very close relation between the oral work in stories and the exercises in reading in the first three years in school is quite fully explained. The oral work in story-telling has gained a great importance in recent years, but has not received much discussion from writers of books on method. As Loki suffers the misery of school lunch, discovers the magic of internet videos, and keeps watch for frost giant spies, will he finally learn to tell good from bad, trust from tricks, and friends from enemies? Louie Stowell's witty text and hysterical drawings will keep readers in stitches from start to finish.

Cambridge Readings in French Literature

Originally published in 1920, this book presents a series of extracts from French literature with editorial introductions to the selected writers. The extracts were chosen both on the basis of literary merit and as representative of the history of France. All selections are presented in French, with editorial material in English. They are grouped together on the basis of their theme or historical period. Numerous illustrative figures are also provided. This book will be of value to anyone with an interest in French literature and history.

Excerpt from Cambridge Readings In French Literature Either because of their similarity of content, or as belonging to the same period. The transition from one group to another is sometimes by connexion of thought, sometimes by way of contrast. The pictures with four exceptions have been chosen from the works of French masters. In most instances they are obvious illustrations of the text with which they are associated; in a few the connexion is less apparent. The Cambridge Companion to French Literature

An engaging, highly accessible and informative introduction to French literature from the Middle Ages to the present.

The Cambridge Introduction to French Literature

Medieval French literature encompasses 450 years of literary output in Old and Middle French, mostly produced in Northern France and England. These texts, including courtly lyrics, prose and verse romances, dits amoureux and plays, proved hugely influential for other European literary traditions in the medieval period and beyond. This Companion offers a wide-ranging and stimulating guide to literature composed in medieval French from its beginnings in the ninth century until the Renaissance. The essays are grounded in detailed analysis of canonical texts and authors such as the Chanson

de Roland, the Roman de la Rose, Villon's Testament, Chrétien de Troyes, Machaut, Christine de Pisan and the Tristan romances. Featuring a chronology and suggestions for further reading, this is the ideal companion for students and scholars in other fields wishing to discover the riches of the French medieval tradition.

The Cambridge Companion to Medieval French Literature

This volume provides a unique and valuable insight into the novel in French over the past two centuries. Essays by acknowledged experts range widely over issues and texts, referring to earlier periods and other genres and literatures where relevant. Theoretical discussion is combined with close reading, and there is a challenging reassessment of major figures and traditional views. All quotations are translated and there is a chronology and guide to further reading, making this an essential reference work for all those interested in modern French fiction.

The Cambridge Companion to French Novel

In this highly accessible introduction, Brian Nelson provides an overview of French literature - its themes and forms, traditions and transformations - from the Middle Ages to the present. Major writers, including Francophone authors writing from areas other than France, are discussed chronologically in the context of their times, to provide a sense of the development of the French literary tradition and the strengths of some of the most influential writers within it. Nelson offers close readings of exemplary passages from key works, presented in English translation and with the original French. The exploration of the work of important writers, including Villon, Racine, Molière, Voltaire, Balzac, Flaubert, Zola, Proust, Sartre and Beckett, highlights the richness and diversity of French literature.

The Cambridge Introduction to French Literature

Penguin Classics have built their reputation as one of the largest and most successful modern imprints for 'classic' texts on the notion of 'the general reader'. Following an interrogation of this idea, Leah Tether investigates the publication of medieval French literature on this list and shines a light on the drivers, motivations, negotiations and decision-making processes behind it. Focusing on the medieval French texts published between c.1956 and 2000, Tether demonstrates that, rather than Penguin's frequently cited 'general reader', a more academic market may have contributed to ensuring the success of these titles.

Cambridge Readings in Literature

This volume offers a unique and valuable insight into the novel in French over the past two centuries. In a series of essays, acknowledged experts discuss a variety of topics including nineteenth-century realism, women and fiction, popular fiction, experiment and innovation, war and the Holocaust, the Francophone novel, and postmodern fiction. They offer a challenging reassessment of major figures, while deliberately reading traditional views of literary history against the grain. Theoretical discussion is combined with close reading of texts and exploration of context, comparison with other genres and other literatures, and reference to novels from earlier periods. This companionable introduction includes a chronology and guide to further reading. From it emerges a strong sense of the vitality and energy of the modern French novel, and of the debates surrounding it.

The General Reader and the Academy

Wide-ranging study of gender and the underlying ideologies of Old French and Occitan literature.

The Cambridge Companion to the French Novel

The first major collection of essays to provide a comprehensive examination of the British literature of the French Revolution.

Gender and Genre in Medieval French Literature

This History is the first in a century to trace the development and impact of the novel in French from its beginnings to the present. Leading specialists explore how novelists writing in French have responded to the diverse personal, economic, socio-political, cultural-artistic and environmental factors that shaped their worlds. From the novel's medieval precursors to the impact of the internet, the History

provides fresh accounts of canonical and lesser-known authors, offering a global perspective beyond the national borders of 'the Hexagon' to explore France's colonial past and its legacies. Accessible chapters range widely, including the French novel in Sub-Saharan Africa, data analysis of the novel system in the seventeenth century, social critique in women's writing, Sade's banned works and more. Highlighting continuities and divergence between and within different periods, this lively volume offers routes through a diverse literary landscape while encouraging comparison and connection-making between writers, works and historical periods.

The Cambridge Companion to the French Enlightenment

This volume was the first historical introduction to women's writing in France from the sixth century to the present day. Specially-commissioned essays by leading scholars provide an introduction in English to the wealth and diversity of French women writers, offering fascinating readings and perspectives. The volume as a whole offers a cohesive history of women's writing which has sometimes been obscured by the canonisation of a small feminine elite. Each chapter focuses on a given period and a range of writers, taking account of prevailing sexual ideologies and women's activities in, or their relation to, the social, political, economic and cultural surroundings. Complemented by an extensive bibliography of primary and secondary works and a biographical guide to more than one hundred and fifty women writers, it represents an invaluable resource for those wishing to discover or extend their knowledge of French literature written by women.

An Introduction to 16th-century French Literature and Thought

This volume of essays, written by scholars from a wide range of critical and theoretical viewpoints, presents a fresh approach to the study of nineteenth-century French poetry. Each of the eleven essays, on different poets from Lamartine to Mallarmé and Laforgue, focuses on the detailed organisation of a single poem. The method of close reading has been adopted in order to effect an introduction to the analysis of the 'basics' of poetic language (sound, metre, syntax, etc.), and in order to explore and illustrate some of the claims and arguments about poetry arising from developments in the prevailing literary theory. Theoretical positions are posed and tested in the terms of practical analysis and interpretation. Christopher Prendergast's introduction to the volume situates the essays in a series of general perspectives and contexts, and Clive Scott has provided an appendix on French versification.

The Lion and the Mouse Green Band

A selection of modern French poems with critical commentary, glossary of literary terms, biographies and bibliography.

Cambridge IGCSE(tm) French Teacher's Guide (Collins Cambridge IGCSE(tm))

Some of the language we come across, in reading other peoples' works or listening to others speak, moves us profoundly. It requires a response from us; it occupies and involves us. Writers, always readers and listeners as well, are fascinated by this phenomenon, which became the subject of the classical treatise *On the Sublime*, traditionally attributed to Longinus. Emma Gilby looks at this compelling and complex text in relation to the work of three major seventeenth-century authors: Pierre Corneille, Blaise Pascal and Nicolas Boileau. She offers, in each case, intimate critical readings which spin out into broad interrogations about knowledge and experience in early modern French literature.

A History of Women's Writing in France

This Companion highlights the energy, variety and inventiveness of the literature written in response to events in France and the political reaction at home, most famously by Burke, Paine, Godwin and Wollstonecraft. It contains specially commissioned essays, a chronology of events and publications, and an extensive guide to further reading.

Cambridge Companion to Medieval French Literature

Specially commissioned essays by specialists focus on a wide range of political, historical and cultural questions in this Companion. The book provides information and analysis on such topics as French national identity, architecture, the mass media, food, literature, cinema, intellectual culture and music. It features supplementary material that includes a chronology, illustrations and suggestions for further reading.

Nineteenth-Century French Poetry

This bilingual edition, based on a reexamination of the Old French manuscript, makes *Silence* available to specialists and students in various fields of literature, to those in women's studies and, most important, to everyone who loves a first-rate story.

Twentieth-Century French Poetry

An authoritative and accessible account of French literature from medieval romance to avant-garde poetry. It explores the medieval roots of modern literature; French tragedy; why the Romantics revered nature; how Proust helped create the modern novel; and the widely varying uses authors have made of the French language.

Sublime Worlds

The literature of French-speaking countries forms a distinct body of work quite separate from literature written in France itself, offering a passionate creative engagement with their postcolonial cultures. This

book provides an introduction to the literatures that have emerged in the French-speaking countries and regions of the world in recent decades, illustrating their astonishing breadth and diversity, and exploring their constant state of tension with the literature of France. The study opens with a wide-ranging discussion of the idea of francophonie. Each chapter then provides readers with historical background to a particular region and identifies the key issues that have influenced the emergence of a literature in French, before going on to examine in detail a selection of the major writers. These case studies tackle many of the key authors of the francophone world, as well as authors writing today.

Cambridge Readings in Literature

'Transforming Tales' examines the idea of bodily transformation in French literature composed between the 12th and the 15th centuries, exploring the ways in which stories of transformation enable an insight into medieval ideas about humanity and arguing that metamorphosis can be read as a metaphor for rewriting in the Middle Ages.

The Cambridge Companion to British Literature of the French Revolution in the 1790s

Ludmilla Jordanova examines the way historians have divided up their subject, and how that has changed, and with what effects. She treats historical practice critically and resists the separation of theory from practice.

The Cambridge Companion to Modern French Culture

This book demonstrates that received views on orality and literacy underestimate the importance of public reading in the late Middle Ages.

Roman de Silence

Originally published in 1999, this was the first comprehensive account of the work of the French modernist writer Paul Valéry.

The Cambridge Companion to French Literature

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
