Jewels on the Water

This is the first-ever large-format full-color book on the human history and natural history of the Apostle Islands National Lakeshore. The text is by Jeff Rennie, an accomplished outdoor writer who lives in Bayfield, WI, the "gateway to the Apostles." Photographs are by Layne Kennedy, whose assignments have included National Geographic, Smithsonian, and many other publications. The book covers the history of the islands, from native American habitation, voyageurs and French missionaries, to European Americans who made their livings off the islands' forests and fishing, as well as a brief boom in brownstone quarrying. 21 of the 22 islands are now part of the national park system, and in August 2005, dedication ceremonies were held for the Gaylord A. Nelson National Wilderness, in honor of the islands' champion and founder of Earth Day. Foreword is by William Bechtel, late Senator Nelson's chief of staff during the time the islands were visited by John F. Kennedy and subsequently became a national park. The text also covers the unique geography and ecosystems of the islands.

A Storied Wilderness

The Apostle Islands are a solitary place of natural beauty, with red sandstone cliffs, secluded beaches, and a rich and unique forest surrounded by the cold, blue waters of Lake Superior. But this seemingly pristine wilderness has been shaped and reshaped by humans. The people who lived and worked in the Apostles built homes, cleared fields, and cut timber in the island forests. The consequences of human choices made more than a century ago can still be read in today's wild landscapes. A Storied Wilderness traces the complex history of human interaction with the Apostle Islands. In the 1930s, resource extraction made it seem like the islands' natural beauty had been lost forever. But as the island forests regenerated, the ways that people used and valued the islands changed - human and natural processes together led to the rewilding of the Apostles. In 1970, the Apostles were included in the national park system and ultimately designated as the Gaylord Nelson Wilderness. How should we understand and value wild places with human pasts? James Feldman argues convincingly that such places provide the opportunity to rethink the human place in nature. The Apostle Islands are an ideal setting for telling the national story of how we came to equate human activity with the loss of wilderness characteristics, when in reality all of our cherished wild places are the products of the complicated interactions between human and natural history. Congressional Record Index

A stunning combination of landscape photography and thematic essays exploring how the concept of wilderness has evolved over time Our ideas of wilderness have evolved dramatically over the past one hundred and fifty years, from a view of wild country as an inviolable "place apart" to one that exists only within the matrix of human activity. This shift in understanding has provoked complicated questions about the importance of the wild in American environmentalism, as well as new aesthetic expectations as we reframe the wilderness as (to some degree) a human creation. Wild Visions is distinctive in its union of landscape photography and environmental thought, a merging of short, thematic essays with a striking visual narrative. Often, the wild is viewed in binary terms: either revered as sacred and ecologically pure or dismissed as spoiled by human activities. This book portrays wilderness instead as an evolving gamut of understandings, a collage of views and ideas that is still in process.

Nathaniel Van Yperen offers an original argument for how wilderness can evoke a vision of a good life in which creaturely limits are accepted in gratitude, even in the face of ambiguity and mystery. Through the theme of gratitude, the book refocuses attention on the role of affection and testimony in ecological ethics and Christian ethics.

Wildland Recreation Research in the Western Lake Superior Basin

The Apostle Islands National Lakeshore is a breathtakingly beautiful archipelago of twenty-two islands in Lake Superior, just off the tip of northern Wisconsin. For years, the national park has been a favorite destination for tourists and locals alike, but the remarkable story behind its creation is little known. In Environmental Politics and the Creation of a Dream, Harold Jordahl, one of the primary advocates for designating the islands as a national park, discloses the full story behind the effort to preserve their natural beauty for posterity. He describes in detail the political and bureaucratic complexities of the national lakeshore campaign, augmented by his own personal recollections and those of such prominent figures as Wisconsin Senator Gaylord Nelson and President John F. Kennedy. Writing in collaboration with Annie Booth, Jordahl recounts how activists, legislators, media, local residents, and other players shaped the islands' future establishment as a national park.

Apostle Islands National Lakeshore Wilderness Study

Many national parks and monuments tell unique stories of the struggle between the rights of native peoples and the wants of the dominant society. These stories involve our greatest parks—Yosemite, Yellowstone, Mesa Verde, Glacier, the Grand Canyon, Olympic, Everglades—as well as less celebrated parks elsewhere. In American Indians and National Parks, authors Robert Keller and Michael Turek relate these untold tales of conflict and collaboration. American Indians and National Parks details specific relationships between native peoples and national parks, including land claims, hunting rights, craft sales, cultural interpretation, sacred sites, disposition of cultural artifacts, entrance fees, dams,

tourism promotion, water rights, and assistance to tribal parks. Beginning with a historical account of Yosemite and Yellowstone, *American Indians and National Parks* reveals how the creation of the two oldest parks affected native peoples and set a pattern for the century to follow. Keller and Turek examine the evolution of federal policies toward land preservation and explore provocative issues surrounding park/Indian relations. When has the National Park Service changed its policies and attitudes toward Indian tribes, and why? How have environmental organizations reacted when native demands, such as those of the Havasupai over land claims in the Grand Canyon, seem to threaten a national park? How has the Park Service dealt with native claims to hunting and fishing rights in Glacier, Olympic, and the Everglades? While investigating such questions, the authors traveled extensively in national parks and conducted over 200 interviews with Native Americans, environmentalists, park rangers, and politicians. They meticulously researched materials in archives and libraries, assembling a rich collection of case studies ranging from the 19th century to the present. In *American Indians and National Parks*, Keller and Turek tackle a significant and complicated subject for the first time, presenting a balanced and detailed account of the Native-American/national-park drama. This book will prove to be an invaluable resource for policymakers, conservationists, historians, park visitors, and others who are concerned about preserving both cultural and natural resources.
