## Aircraft Repossession and Enforcement

"Designed as a detailed practical guide to the management of aircraft during default periods and their repossession, this very useful book is also of great value as a preventive guide in the drafting of aircraft lease and financing contracts. Local aviation law experts from 32 jurisdictions worldwide provide in-depth responses, country by country, to an extremely detailed questionnaire that includes eighty 'real-life' questions." "Fees, time periods, costs of all kinds, remedies, immunities, required documentation, recognition of foreign judgments, interim measures - all these and many other crucial considerations are fully explained for each jurisdiction." --Book Jacket.

## Aircraft Repossession and Enforcement

Adding a second volume to the peerless country-by-country guide first published in February 2009, this book brings lessors, financiers, and operators valuable assistance in the management of aircraft during default periods and repossession proceedings in an additional 14 jurisdictions, bringing the total jurisdictions covered to 46. The two-volume set is also of great value as a preventive guide on issues arising in aircraft finance or lease transactions, especially in the drafting of associated contracts. Defaults, workouts, and repossessions of aircraft are still on the rise globally, and the situations that can lead to, or arise after, an event of default remain literally endless. This is the best way to be prepared for virtually any contingency. Local aviation law experts from each jurisdiction provide in-depth responses, country by country, to an extremely detailed questionnaire that includes eighty 'real-life' questions covering such categories as the following: self-help procedures; court proceedings; arbitration and other non-court proceedings; money claims; bankruptcy; non-consensual liens; rights and security interests in aircraft; deregistration powers of attorney; and export permit issues. Fees, time periods, costs of all kinds, remedies, immunities, required documentation, recognition of foreign judgements, interim measures and other court proceedings – all these and many other crucial considerations are fully explained for each jurisdiction. Loaded with precise, up-to-date information and expert practical guidance, this two-volume set will be of enormous value to aviation lawyers, in-house counsel of aircraft owners and operators, receivers, export credit agencies, banks, lessors, lenders and investors with an interest in the aviation industry

## Aircraft Operating Leasing

**Aircraft Operating Leasing A Legal and Practical Analysis in the Context of Public and Private International Air Law Third Edition Donal Patrick Hanley** Although aircraft leasing is comparatively young as a commercial activity – less than fifty years old in practical terms – already well over half of the world's commercial aircraft fleet is leased. The legal significance of aircraft leasing is, therefore, growing very quickly. Bringing together the laws affecting both air travel and leasing can, however, be challenging. This book is the first to assume this task in a major focused way, thus providing invaluable expert guidance to practitioners handling aircraft lease agreements as well as to legal academics and students. In this third edition, the author examines the aircraft operating lease from both a legal and practical point of view and contextualizes it in light of the latest public and private international air law agreements, case law, statutes and regulations from a variety of jurisdictions and current literature in the field: – the obligations and rights of each party; – failure to meet delivery conditions before delivery; – standby letters of credit and guarantees; – regulatory constraints concerning aircraft registration or foreign remittances; – manufacturer's warranties; – possession and replacement of parts and engines; – sub-leasing; – damage to the aircraft and other loss to lessor; – liability for damage to third parties; – safety issues and lessor's liability for acts of the airline; – the events that will entitle the lessor to terminate the contract and recover its asset; – issues pertaining to enforcement of remedies; and – governing law. The format broadly follows that of a typical aircraft operating lease. The author flags the principal legal issues to be considered in developing a standard form aircraft operating lease and makes recommendations in that regard. His approach balances the desired commercial outcome with the legal, or more theoretical, mandate to apply the law to disputes that may arise. An immensely useful supplement sets out a real example of a form of aircraft operating lease for a used aircraft, as used by a leading commercial aircraft leasing company. As a detailed examination of each part of the lease with particular reference to the impact on each term of relevant case law, statutes, regulations and international treaties, this work greatly enhances understanding of the legal and practical aspects of the aircraft operating lease.

#### Corporate Social Responsibility

The current theory of corporate social responsibility (CSR) is developing along three interwoven lines - oral, social, and environmental. Although everybody recognizes that although CSR is of growing concern in a globalized economy, it being at the top of the board of director's agenda and also good for business, there is no sign of consensus on its rules, structures, or procedures. Now, this collection of essays by leading jurists, businesspeople, and academics takes a giant step toward a more cohesive and durable set of principles that can contribute to a cleaner environment and a better society while respecting and protecting the interests of all stakeholders.

#### International Air Law and ICAO

Specialized legal literature dealing with different aspects of international air law is rare. The developments often overtake the existing writings and there is a continuous need, not only for updating, but also for future-oriented thinking. There is a practical need for a compact, exhaustive, and easily comprehensible reference book that deals with the most general aspects of international air law, as well as with the constitutional issues and law-making functions of the International Civil Aviation Organization (ICAO). This book fills the gap as it is a general treatise of the law of international civil aviation, aimed at the needs of university students and educators, government authorities, airlines, practicing lawyers, journalists, international organizations, and the general public. This second edition of the acclaimed International Air Law and ICAO has been fully updated to take the latest developments into account. (Series: Essential Air and Space Law - Vol. 10)

In this unique guide to the suite of contracts published by FIDIC (The International Federation of Consulting Engineers) - the contract forms most widely used for international construction undertakings - twenty-two outstanding authorities in construction law from a wide variety of countries, describe relevant likely pitfalls (and special opportunities) for foreign lawyers in each of their jurisdictions. This very useful book will be extremely welcome to in-house counsel who must evaluate the legal disposition of a proposed or pending construction contract subject to the laws of a foreign jurisdiction. It will continue to be of service as long as the project proceeds and beyond, particularly for the optimal resolution of disputes.

## FIDIC

Most readers, especially those with car loans or home mortgages, know about "collateral"--property that the lender can take away from the borrower in the event that the borrower defaults. In low/middle income countries, it is understood that conservative lenders exclude firms from credit markets with their excessive collateral requirements. Usually, this is because only some property is acceptable as collateral: large holdings of urban real estate and, sometimes, new motor vehicles. Microenterprises, SMEs, and the poor have little of this property but they do have an array of productive assets that could easily be harnessed to serve as collateral. It is only the legal framework which prevents firms from using these assets to secure loans. In countries with reformed laws governing collateral, property such as equipment, inventory, accounts receivable, livestock are considered excellent collateral. This book aims to better equip project managers to implement reforms to the legal and institutional framework for collateral (secured transactions). It discusses the importance of movable property as a source of collateral for firms, the relationship between the legal framework governing movable assets and the financial sector consequences for firms (better loan terms, increased access, more competitive financial sector), and how reforms can be put in place to change the lending environment.

## Reforming Collateral Laws to Expand Access to Finance

Judges and lawyers have to shape their moral competences in order to maintain their professional ethics at a high standard if they want to effectively meet the challenges that modern society will throw at them. This requirement is due to the growing expectation that they will be socially and morally responsible for the law. Thus, the need to place ethics at the heart of legal education, and to make ethical reflection pervasive in academic courses, becomes more obvious every day. Using the concept and examples of moral dilemmas is a way of facilitating this task. The main purpose of this book is to analyse the concept of moral dilemma in context of judicial and legal ethics, and to provide material for legal education. The structure of this book is designed with this double aim in mind. The theoretical part presents the concept of dilemmas on grounds of metaethics and the perspectives for its application in a professional legal context. The former encompasses situations of conflict of duties or obligations, in which the choice of one conduct necessarily prevents a different conduct, and therefore leads to an unacceptable outcome. Hence, the situation of dilemma always involves an issue of moral responsibility and the problem of "dirty hands". How such situations are present in legal practice and how to deal with them is the main concern of this part. The considerations are divided into three levels of reflection – deontological, axiological, and moral responsibility. The practical part of the book contains an overview of 150 dilemmas that can be useful in legal ethics or other legal courses. The dilemmas are divided into chapters covering the following branches of law: criminal law, civil and commercial law, family and custody law, labour and social security law, and constitutional law. Every dilemma presents a description of the facts, a reconstruction of dilemma, its standard solution and some critical remarks from a meta-ethical perspective. The dilemmas cover situations regularly met in everyday practice, as well as examples of more exceptional challenges in connection with constitutional crises that have occurred in Poland in recent years.

Further to the 28th Conference of European Ministers of Justice (Lanzarote, Spain, 25-26 October 2007), the Council of Europe has continued working on access to justice for migrants and asylum seekers. This publication contains an assessment of the situation faced by this vulnerable category of persons in accessing justice. It deals in particular with the identification of measures - both existing and new - for facilitating and ensuring such access for these people.

We live in an age of economic turmoil. The recent crises emphasize the need for modern, sophisticated rules to govern businesses in financial distress in order to realize value from distressed companies and to protect economic institutions. This book provides information for legislators, policymakers, lawyers, accountants, academics, and administrators who seek to understand the workings of insolvency laws. Guided by the World Bank's Principles and Guidelines, it supplements the work in this field done by UNCITRAL.

The first edition of *Interim Measures in International Arbitration* edited by Lawrence Newman and Dr. Colin Ong, is most auspicious in its timing. The editors have compiled a shrewd and very practical questionnaire and they have gathered together a formidable group of some of the most reputed and talented practising arbitration lawyers, academics and arbitrators from 43 leading jurisdictions to inform the reader about the essential elements of the different interim measures which are available as part of the arbitral process in a very large number of different national jurisdictions. This book, thus, combines the best elements of a focused legal textbook with the essential practicalities of a practitioners' procedural handbook. This should be a standard travelling-companion of international arbitrators and counsel as well as many international lawyers--not just those who are arbitration specialists.

This book introduces readers to recent advancements in financial technologies. The contents cover some of the state-of-the-art fields in financial technology, practice, and research associated with artificial intelligence, big data, and blockchain—all of which are transforming the nature of how products and services are designed and delivered, making less adaptable institutions fast become obsolete. The book provides the fundamental framework, research insights, and empirical evidence in the efficacy of these new technologies, employing practical and academic approaches to help professionals and academics reach innovative solutions and grow competitive strengths.

International tribunals need to interface effectively with national jurisdictions, which includes coordination with domestic judicial prosecutions as well as an appreciation for other non-judicial types of transitional justice. In this book, the authors analyze the earlier international tribunals established since the 1990s and the parallel national proceedings for each. In examining the ways in which the ICC can best coordinate with national processes this book considers the ICC's present interactions with national jurisdictions and the statutory framework of the Rome Statute for interface with national jurisdictions.

This book discusses the principles and rules of general contract law in England & Wales. It examines the key points and rules of contract law, starting with the formation of the contract and ending with

the remedies for breach of contract. In this it follows the structure most used in contract law modules at universities. Please also note that this book takes into account developments of the law up until July 2021. Contract law is a core module in legal higher education in the UK. Contract law is also an important basis for many other law modules including maritime law, company law, commercial law, and arbitration law. This book gives a clear oversight of the main issues of key contract law topics. It summarises the issues in a concise and precise manner and uses practical examples throughout to clarify how the law is applied. Key cases are used to explain and illustrate the principles of the law. This book is an ideal companion guide for exam revisions. The chapters follow a question-and-answer model that makes it easy to find information on a specific issue. The chapters end with a problem-solving scenario on key issues of the topic and a list with key cases which will be helpful in preparing for examinations. At the end of the book, you find a further reading list and a set of sample multiple-choice questions which can be used to help prepare for the first stage of the SQE examination that will be introduced in September 2021. "Contract Law is generally taught as a first-year subject which could be a daunting subject. This book helps students to revise this subject effectively as it brings together all key areas of contract law that a student should be familiar with when preparing for examinations, drafting coursework, and preparing for seminars. It examines the key points and rules of contract law, starting with the formation of the contract and ending with the remedies for breach of contract. The book is written in plain language in the form of questions and answers. It is detailed without being too long, succinct but covers all key cases and developments in the area. The multiple-choice questions at the end of the book are very beneficial for students preparing for the SQE and exams that follow a similar format. I would recommend this book wholeheartedly." – Dr Aysem Diker Vanberg, Lecturer in Law, Goldsmiths, University of London

### The International Criminal Court in an Effective Global Justice System

The premier authority on secured transactions, *Secured Transactions: A Systems Approach* is known for its cutting-edge coverage, dynamic pedagogy, and ease of use for instructors. The Systems Approach gives students the big picture. Straightforward explanations and cases prepare the students to solve real-life problems in the context of actual transactions. A modular structure allows for tremendous flexibility in course design. The materials are divided into bite-sized assignments, making it easier for instructors to make and adjust assignments for class. This problem-based casebook supports the teaching of Article 9 alone or expansion of the course to include Article 9 in the full context of bankruptcy, mortgages, judicial liens, and statutory liens. New to the 9th Edition: Updated throughout, while retaining the same structure. Highly adaptable modular text broken into assignments. Main sections can be taught in any order. New cases throughout (including the Second Circuit's landmark decision in *In re Motors Liquidation*). Problem-based approach with ethics integrated. Problems progress from easy to difficult. Professors and students will benefit from: Comprehensive Teacher's Manual with suggestions for teaching coverage, changes from the prior edition, lists of key concepts for each assignment, and the answers to every question asked in the book. The main sections can be taught in any order. Bite-sized assignments organized for 50-minute or 75-minute classes. Can support ABA-qualified experiential courses. Casebook authors who are happy to engage with adopters and include them as characters in the book. Coverage of non-Article 9 aspects of secured transactions that students will need as lawyers Default problem sets for ease of assignment; extra problems for variety from year to year. Engaging problems with interesting characters and real-world issues, providing all of the information necessary to solve the problems. A real-life approach that prepares students for the practice of law. Clear explanations of every subject – no hiding of the ball. Basic financial literacy information included throughout the book. Focus on how lien systems actually work in practice.

### Introduction to Contract Law - REVISION GUIDE

"Cooter and Schfer provide a thorough introduction to growth economics through the lens of law and economics. They do a masterful job of weaving in historical anecdotes from all over the world, detailed discussions of historical transformations, theoretical literature, empirical studies, and numerous clever hypotheticals. Scholars as well as general readers will find this book to be very useful and informa-

tive."--Henry N. Butler, George Mason University -- "This book distills and presents in a lucid and often even entertaining way the main insights and contributions of law and economics to meeting the challenges of growth for developing countries. Cooter and Schfer argue that market freedom is the key to growth, but that it needs to be sustained by the appropriate legal rules and institutions."--Robert Howse, coauthor of "The Regulation of International Trade."

Judging by the sheer number of papers reviewed in this Handbook, the empirical analysis of firms' financing and investment decisions—empirical corporate finance—has become a dominant field in financial economics. The growing interest in everything “corporate is fueled by a healthy combination of fundamental theoretical developments and recent widespread access to large transactional data bases. A less scientific—but nevertheless important—source of inspiration is a growing awareness of the important social implications of corporate behavior and governance. This Handbook takes stock of the main empirical findings to date across an unprecedented spectrum of corporate finance issues, ranging from econometric methodology, to raising capital and capital structure choice, and to managerial incentives and corporate investment behavior. The surveys are written by leading empirical researchers that remain active in their respective areas of interest. With few exceptions, the writing style makes the chapters accessible to industry practitioners. For doctoral students and seasoned academics, the surveys offer dense roadmaps into the empirical research landscape and provide suggestions for future work. \*The Handbooks in Finance series offers a broad group of outstanding volumes in various areas of finance \*Each individual volume in the series should present an accurate self-contained survey of a sub-field of finance \*The series is international in scope with contributions from field leaders the world over

What are the most salient and sparking facts about the Netherlands? This updated edition of 'Discovering the Dutch'tackles the heart of the question of Dutch identity through a number of essential themes that span the culture, history and society of the Netherlands. Running the gamut from the Randstad to the Dutch Golden Age, from William of Orange to Anne Frank, this volume uses a series of vignettes written by academic experts in their fields to address historical and contemporary topics such as immigration, tolerance, and the struggle against water, as well as issues of culture - painting, literature, architecture, and design among them. All chapters are written by academic experts in their fields who have extensive experience in explaining the many features of Dutchness to a foreign audience. Each chapter comes to life in vignettes that illustrate characteristic historical figures or essential aspects in Dutch culture and society from William of Orange and Anne Frank to Dutch cheese and the inevitable coffeeshop.

#### Systems of Land Registration

The Clean Water Act (CWA) requires that wetlands be protected from degradation because of their important ecological functions including maintenance of high water quality and provision of fish and wildlife habitat. However, this protection generally does not encompass riparian areas—the lands bordering rivers and lakes—even though they often provide the same functions as wetlands. Growing recognition of the similarities in wetland and riparian area functioning and the differences in their legal

protection led the NRC in 1999 to undertake a study of riparian areas, which has culminated in *Riparian Areas: Functioning and Strategies for Management*. The report is intended to heighten awareness of riparian areas commensurate with their ecological and societal values. The primary conclusion is that, because riparian areas perform a disproportionate number of biological and physical functions on a unit area basis, restoration of riparian functions along America's waterbodies should be a national goal.

### The Post-Conflict Environment

This book provides a comprehensive examination of classical sociological theory by introducing students to the life, times, and ideas of the figures who have had the greatest influence on the development of the field. Each chapter focuses on one theorist and his ideas, organized into a social and historical perspective. Students will enjoy reading the background information on each theorist covered in the book. These include such interesting highlights as Comte's days in military school, the death of Durkheim's son in World War I, Spencer's inability to commit to marriage, and Hegel's illegitimate son. Taking a critical and reflexive approach, the text also discusses how classical theory affects sociology today.

### Discovering the Dutch

The internment of civilian and military prisoners became an increasingly common feature of conflicts in the twentieth century and into the twenty-first. Prison camps, though often hastily constructed and just as quickly destroyed, have left their marks in the archaeological record. Due to both their temporary nature and their often sensitive political contexts, places of internment present a unique challenge to archaeologists and heritage managers. As archaeologists have begun to explore the material remains of internment using a range of methods, these interdisciplinary studies have demonstrated the potential to connect individual memories and historical debates to the fragmentary material remains. *Archaeologies of Internment* brings together in one volume a range of methodological and theoretical approaches to this developing field. The contributions are geographically and temporally diverse, ranging from Second World War internment in Europe and the USA to prison islands of the Greek Civil War, South African labor camps, and the secret detention centers of the Argentinean Junta and the East German Stasi. These studies have powerful social, cultural, political, and emotive implications, particularly in societies in which historical narratives of oppression and genocide have themselves been suppressed. By repopulating the historical narratives with individuals and grounding them in the material remains, it is hoped that they might become, at least in some cases, archaeologies of liberation.

### Ship Finance

This book focuses on varied practical and theoretical issues of the science of victims, Victimology. Featuring a foreword and epilogue by leading victimologists, and fifteen original essays by leading as well as by young international victimologists, *Trends and issues in Victimology*, illustrates how victimization is currently perceived. This edited collection describes how the victim's right for privacy is deprived for the benefit of the accused and the public interest, and how special needs populations are exposed to revictimization during criminal proceedings. It also delineates specific characteristics of stalking victims, sexual abused victims, and victims in work place. Several recommendations and solutions in order to balance the justice system and improve the victims of crime situation are presented in this book. Practical modifications such as the adoption of the principle of restitution in the penal code as a framework for building evidence of victim legislation and policy, and the incorporation of the victim's therapy and restorative justice proceedings into the criminal justice system, are suggested. Theoretical aspects discuss the rhetoric of victimization and the social construction of victimization and empirical aspects of the focus on the impact of victimization. This book is a valuable addition to the growing literature on Victimology and Victimization. This book offers versatile authors of multidisciplinary fields of law, victimology, psychology and criminology. It is suitable to use in courses across social sciences, criminology, victimology and law. "I have read this book with a kind of breathless tension and with an intellectual joy. Its contributions triggered many theoretical questions. This book not only reflects the

current intellectual climate in social science, but it has also posed certain challenges.” —Prof. Gerd Ferdinand Kirchhoff (from the Foreward).

### Riparian Areas

The popular 1998 reformasi movement that brought down President Suharto’s regime demanded an end to illegal practices by state officials, from human rights abuse to nepotistic investments. Yet today, such practices have proven more resistant to reform than people had hoped. Many have said corruption in Indonesia is “entrenched”. We argue it is precisely this entrenched character that requires attention. What is state illegality entrenched in and how does it become entrenched? This involves studying actual cases. Our observations led us to rethink fundamental ideas about the nature of the state in Indonesia, especially regarding its socially embedded character. We conclude that illegal practices by state officials are not just aberrations to the state, they are the state. Almost invariably, illegality occurs as part of collective, patterned, organized and collaborative acts, linked to the competition for political power and access to state resources. While obviously excluding many without connections, corrupt behaviour also plays integrative and stabilizing functions. Especially at the lower end of the social ladder, it gets a lot of things done and is often considered legitimate. This book may be read as a defence of area studies approaches. Without the insights that grew from applying our area studies skills, we would still be constrained by highly stylised notions of the state, which bear little resemblance to the state’s actual workings. The struggle against corruption is a long-term political process. Instead of trying to depoliticize it, we believe the key to progress is greater popular participation. With contributions from Simon Butt, Robert Cribb, Howard Dick, Michele Ford, Jun Honna, Tim Lindsey, Lenore Lyons, John McCarthy, Ross McLeod, Marcus Mietzner, Jeremy Mulholland, Gerben Nooteboom, J Danang Widoyoko and Ian Wilson. This book is the result of a series of workshops supported, among others, by the Australian-Netherlands Research Collaboration (ANRC).

The two-volume set LNCS 7066 and LNCS 7067 constitutes the proceedings of the Second International Visual Informatics Conference, IVIC 2011, held in Selangor, Malaysia, during November 9-11, 2011. The 71 revised papers presented were carefully reviewed and selected for inclusion in these proceedings. They are organized in topical sections named computer vision and simulation; virtual image processing and engineering; visual computing; and visualisation and social computing. In addition the first volume contains two keynote speeches in full paper length, and one keynote abstract.

### Archaeologies of Internment

This book examines the role of economic violence (violations of economic and social rights, corruption, and plunder of natural resources) within the transitional justice agenda. Because economic violence often leads to conflict, is perpetrated during conflict, and continues afterwards as a legacy of conflict, a greater focus on economic and social rights issues in the transitional justice context is critical. One might add that insofar as transitional justice is increasingly seen as an instrument of peacebuilding rather than a simple political transition, focus on economic violence as the crucial “root cause” is key to preventing re-lapse into conflict. Recent increasing attention to economic issues by academics and truth commissions suggest this may be slowly changing, and that economic and social rights may represent the “next frontier” of transitional justice concerns. There remain difficult questions that have yet to be worked out at the level of theory, policy, and practice. Further scholarship in this regard is both timely, and necessary. This volume therefore presents an opportunity to fill an important gap. The project will bring together new papers by recognized and emerging scholars and policy experts in the field.
