Biology, Zoology & Botany Solved Papers

Laboratory Exercises in Zoology serves as a teaching aid for students studying for Advanced level Zoology or Biology. This book provides exercises concerned mainly with physiology and some dissection techniques. Organized into 12 parts, this book begins with an overview of diffusion of molecules or ions from a region of high concentration to a region of relatively low concentration. This text then discusses the breakdown of complex molecules, which is achieved by a series of hydrolyses catalyzed by the digestive enzymes produced by the glandular cells of the digestive system. Other chapters consider the various stages involved in making permanent stained preparations. This book discusses as well the requirements for animals in the laboratory. The final chapter deals with the rate of growth of an organism. This book is a valuable resource for students studying zoology and biology. Teachers and biology laboratory technicians will also find this book extremely useful.

From best-selling author Holly Webb comes a brand new series full of mystery and intrigue following the adventures of a very determined heroine and her dog! Holly Webb fans will be thrilled to pieces to discover the adventures of Maisie Hitchins, the pluckiest little detective in Victorian London. Maisie Hitchins lives in her grandmother's boarding house, longing for adventure. She idolizes the famous detective, Gilbert Carrington, and follows his every case. But Maisie is about to be given the opportunity of a lifetime: her own mystery to solve! In the first book in this fantastic new series, Maisie rescues a puppy in peril whilst running an errand, and adopts him. She decides to investigate the puppy's original cruel owner, but instead gets tangled up in an intriguing plot involving stolen sausages, pilfered halfpennies and a fast-paced bicycle chase. The streets of Victorian London are never safe, but Maisie's on the case!

Serial verbs and complex predicates have a long history of research, yet there is comparatively little documentation on Oceanic languages. This volume presents new data for further typological studies. While previous research on serial verbs in Oceanic languages was mostly devoted to "core" serial constructions (with non-contiguous sV(o)sV(o) nuclei), this volume contributes a more detailed investigation of the "nuclear" type of complex predicates involving contiguous sVV(o) nuclei. Complex predicates of the form VV may correspond to two different syntactic structures, either co-ranking or hierarchized (head-modifier). Though the VV pattern does evidence a tendency towards structural compression, often entailing the fusion of the argument structures of two or more nuclei, yet it cannot be reduced to cases of co-lexicalization, compounding or grammaticalization. The data also show the "nuclear" type to be compatible with all types of basic word orders (VSO, VOS, SVO, SOV), with no evidence that this results from any word order change. This challenges the claim that "nuclear" serialization correlates with verb-final order, and "core" serialization with verb-medial order.
