## Islam's Political Culture

This book examines the political dimension of Islam in predivided Pakistan (1947-1971), one of the first new Muslim nations to commit itself to an Islamic political order and one in which the national debate on Islamic, political, and ideological issues has been the most persistent, focused, and rich of any dialogues in the contemporary Muslim world. Nasim Jawed draws on the findings of a survey he conducted among two influential social groups—the ulama (traditional religious leaders) and the modern professionals—as well as on the writings of Muslim intellectuals. He probes the major Islamic positions on critical issues concerning national identity, the purpose of the state, the form of government, and free, socialist, and mixed economies. This study contributes to an enhanced understanding of Islam's political culture worldwide, since the issues, positions, and arguments are often similar across the Muslim world. The empirical findings of the study not only outline the ideological backdrop of contemporary Islamic reassertion, but also reveal diversity as well as tensions within it.

## Islam, Civility and Political Culture

This book provides a comprehensive and interdisciplinary exploration of civility and political culture in the Muslim world. The contributions consider the changing interface between religion and politics throughout Islamic history, and into the present. Extending beyond saturated approaches of 'political' and/or 'militant' Islam, this collection captures the complex sociopolitical character of Islam, and identifies tensions between the political-secular and the sacred-religious in contemporary Muslim life. The alternative conceptual framework to traditional analyses of secularisation and civility presented across this volume will be of interest to students and scholars across Islamic studies, religious studies, sociology and political science, civilisation studies, and cultural studies.

#### Islam, Civility and Political Culture

This book provides a comprehensive and interdisciplinary exploration of civility and political culture in the Muslim world. The contributions consider the changing interface between religion and politics throughout Islamic history, and into the present. Extending beyond saturated approaches of 'political' and/or 'militant' Islam, this collection captures the complex sociopolitical character of Islam, and identifies tensions between the political-secular and the sacred-religious in contemporary Muslim life. The alternative conceptual framework to traditional analyses of secularisation and civility presented across this volume will be of interest to students and scholars across Islamic studies, religious studies, sociology and political science, civilisation studies, and cultural studies. .

#### Islamic Political Culture, Democracy, and Human Rights

What effect does Islamic political culture have on democracy and human rights practices? The author of this book suggests that too much emphasis is being placed on the power of Islam as a political force, stating that the political power of Islam can be better explained by other factors.

#### Islam and Pakistan's Political Culture

This book explores the ideological rivalry which is fuelling political instability in Muslim polities, discussing this in relation to Pakistan. It argues that the principal dilemma for Muslim polities is how to reconcile modernity and tradition. It discusses existing scholarship on the subject, outlines how Muslim political thought and political culture have developed over time, and then relates all this to Pakistan's political evolution, present political culture, and growing instability. The book concludes that traditionalist and secularist approaches to reconciling modernity and tradition have not succeeded, and have in fact led to instability, and that a revivalist approach is more likely to be successful.

#### Islamic Political Thought and Governance

Islam has had a significant impact on world history, not only as a major religion that has directed the personal beliefs and actions of individuals, but also as the basis of a distinct system of government that has developed its own institutions, practices and philosophies. This new Routledge Major Work collection is concerned with the development of political thought in Islam. By political thought is meant, broadly, the study and interpretation of Islamic political culture, ideas, beliefs, and institutions; the contribution of key political theorists and authorities to the understanding or practice of governance; what people and groups believed about political authority and institutions and their political convictions; and how politics in the Islamic world has related to and interacted with other disciplines, such as religion, law, ethics, and philosophy. Although contemporary issues in Islamic political thought are very much in the public focus at the moment, this set also focuses on the history and development of Islamic political theories and thought, from their inception until the twentieth century. Political thought in the Muslim world is connected to its history and by understanding the past, those who study contemporary political thought will have a better grounding to understand current and future developments. Moreover, understanding how Islamic political thought developed also helps shed light on the political thought of other civilizations, such as Western political thought. Political thought in Islam did not develop in isolation it responded to and interacted with the political institutions and theories of other civilizations throughout history.

#### The Islamic World and the West

The anthology is an introduction to political cultures in the Islamic world and into relations between the West and Islam. It details its analysis in country studies on Algeria, Iran, Egypt, Morocco, Turkey, Bosnia, Israel/Palestine, Iraq, Central Asia and Pakistan.

#### Iran

Since the Islamic revolutionary movement overthrew the "Peacock Throne" (the Shah) in 1979 the Islamic Republic has maintained its credibility and the loyalty of the people of Iran. It has survived an extremely destructive war with Iraq, isolation from the West and the rest of the Middle East except Syria, and the death of the Ayatollah Khomeini. This book explores the social transformation of Iran in this period stressing the importance of political culture and ideology. It argues that the systematic building of a legitimate Islamic political culture is the key to the success of the regime. The authors of the book address specific aspects of Iran's political culture within a general theoretical framework laid out in the introduction. There is discussion of a wide range of topics ranging from the relationship of the individual to society to "Westoxication\

### Political Culture Of Islam

Islam and Political-Cultural Europe identifies the sometimes confusing and often contentious new challenges that arise in daily life and institutions as Islam settles deeper into Europe. Critiquing past and recent assimilation efforts in the fields of education, finance, and security, the contributors offer prospective solutions to diverse contemporary problems. Exploring the interactions of Muslim, Christian and secular cultures in the context of highly pluralized contemporary European societies, this book offers a valuable tool for those within and outside Europe seeking to understand the far-reaching implications of combining cultures, the struggles of the Muslim-Christian-secular transition, and the progress which the future promises.

### Islam and Political-Cultural Europe

Seminar paper from the year 2004 in the subject Politics - International Politics - Region: Near East, Near Orient, grade: very good, University of Vienna (Institute for Political Science), course: African Political Systems, language: English, abstract: In the vast field of political culture on the one hand and public participation, respectively democratisation, on the other hand I will start by limiting the field of my study by defining its aims. My first guiding thesis is that there is a cleavage between state and society in Egypt and I want to show some aspects and dimensions of its present status and its historical origins. The two central fields of my study will be firstly the actual secular state practice and its ideological origins and secondly Islam, its influence in Egyptian society, and its compatibility to liberal trends, the concept of civil society or democracy in general. To look at public participation in any state is an ambitious task, for the field of participation is broad and hard to measure. I will deal with political public participation. Public participation can be limited to social groups, like syndicates. By aims I am referring to the fact that different groups have different participatory intentions. This aspect becomes more interesting when looking at Islamist groups. Looking at public participation is at the same time looking at democratic processes and political culture of the society being analysed. This includes regarding in what way the preconditions for political participation are provided: Freedom of opinion and expression, freedom of assembly, freedom of press and last but not least education. Political culture includes as well many cultural aspects of the society analysed, here Islam comes in as a religion as well as a theoretical system for a society respectively a state. All those being components of political culture, the basic research questions are consequently: What is public participation, or rather what will be the definition I will base my study on? What are the components of Egyptian political culture? What definition of civil society is adequate for Egypt? Is civil society only a term employed by "Western" scientists based on "Western" concepts and developments and thus not appropriate to describe Egyptian society? The second central thesis of my study is that Egypt, still an authoritarian state, has begun a process of liberalisation to provide the possibility of political participation to its people. The aim of my research is to investigate how far this liberalisation went until today and what consequences this process has for Egyptian society. Thus the question of legitimacy will be a central one.

### Public Opinion in the Middle East

The major theme of this book is authority in Shi'ism with special emphasis on its institutionalization in different historic periods from the beginning of Shi'ism in the Middle Ages to the present. Part I presents new material on important or neglected issues that are at the center of current scholarly debate, including the fundamental relationship between knowledge and authority in pristine Shi'ism, aspects of popular culture in medieval Shi'ism, the institutionalization of religious authority in Shi'ite Iran from the 16th to 18th centuries, and the centralization of religious authority in the 19th century. The editor provides an analysis of the ideological revolution in Shi'ism during the 1970s and 1980s. Important documents and primary sources have been selected for Part II representing the major trends in the history of Shi'ism. With two exceptions, these sources have neither been available in English translation nor easily accessible in the original Arabic or Persian. An extensive introduction by the editor effectively connects Parts I and II of the book.

### Authority and Political Culture in Shi'ism

The origins and implications of American policy on political Islam.

### America and Political Islam

This comparative study explores three key cultural and political spheres – the Latin west, Byzantium and the Islamic world from Central Asia to the Atlantic – roughly from the emergence of Islam to the fall of Constantinople. These spheres drew on a shared pool of late antique Mediterranean culture, philosophy and science, and they had monotheism and historical antecedents in common. Yet where exactly political and spiritual power lay, and how it was exercised, differed. This book focuses on power dynamics and resource-allocation among ruling elites; the legitimisation of power and property with the aid of religion; and on rulers' interactions with local elites and societies. Offering the reader route-maps towards navigating each sphere and grasping the fundamentals of its political culture, this set of parallel studies offers a timely and much needed framework for comparing the societies surrounding the medieval Mediterranean.

## Political Culture in the Latin West, Byzantium and the Islamic World, c.700–c.1500

Five centuries after the expulsion of Muslims and Jews from Spain, Europe is once again becoming a land of Islam. At the beginning of a new millennium, and in an era marked as one of globalization, Europe continues to wrestle with the issue of national identity, especially in the context of its Muslim citizens. Muslim Europe or Euro-Islam brings together distinguished scholars from Europe, the United States, and the Middle East in a dynamic discussion about the Muslim populations living in Europe and about Europe's role in framing Islam today. The book raises several crucial questions: Does Islam offer a special case for citizenship? Is assimilation or multiculturalism the model to be followed in the case of Muslims in Europe? How powerful a force is Islam in determining identity? And why is Islam—after centuries of being a presence in Europe—not considered a European religion? Working at the knotty intersection of cultural identity, the politics of nations and nationalisms, and religious persuasions, this is an invaluable anthology of scholarship that reveals the multifaceted natures of both Europe and Islam.

### Muslim Europe or Euro-Islam

This comprehensive overview describes and interprets all schools of Islamic political thought, their origins, inter-connections and meaning. It examines the Qur'an, the early Caliphate, classical Islamic philosophy, and the political culture of the Ottoman and other empires.

### The History of Islamic Political Thought

A unique focus on the relationship between religion and political culture in the Third World using a comparative and thematic approach. Specific issues of religion-politics interaction in the Third World in recent times include: the rise of Islamic fundamentalist groups throughout the Middle East and other parts of the Muslim world; the political effects of the decline of Catholicism and the rapid growth of Protestant evangelical sects in Latin America; communal conflict between Hindu nationalist groups, and the politicisation of Buddhism in South East Asia. The common effect of such developments is to challenge existing forms of relationship between states and societies with religion used as a political resource.

### Religion, Globalization and Political Culture in the Third World

This book explores the long history of the evolution of Arab political identity, which predates the time of the Prophet Muhammad and is characterized by tolerance, compassion, generosity, hospitality, self-control, correct behaviour, equality and consensus. The author argues that present-day struggles in many Arab countries to redefine politics and political culture are related to the fact that the underlying political culture of the Arabs has been overridden for centuries by successive political regimes which have deviated from the original political culture that the Prophet adhered to. The book outlines the political culture that existed before Islam, examines how the Conquests and the rule of the early dynasties (Umayyad and Abbasid) of the Islamic world found it necessary to override it, and analyses the effect of rule by non-Arabs – successively Mamluks, Ottoman Turks and Western colonial powers. It discusses the impact of these distortions on present day politics in the Arab world, and concludes by appealing for a reawakening of, and respect for, the cultural elements underlying the origins of Arab political identity.

### The Erasure of Arab Political Identity

In an atmosphere of growing concern over the threat posed by Islamist violence, political Islamism has become the most important of geopolitical issues. In the process, it has been misrepresented. Contrary to what many believe, Islamist movements are characterised by their diversity. Revisiting the main arguments and explanations that have been used over the past twenty years to understand Islamist activism, moderate as well as militant, Salwa Ismail here proposes a rethinking of Islamist politics. The phenomenon of political Islam is determined by macro and micro-level changes in the Muslim world, such as the retreat of the welfare state across the Middle East, and the subsequent expansion in the role of informal political activists in the popular neighbourhoods of such cities as Algiers or Cairo. Ismail examines both levels to explain the socio-economic and political settings out of which Islamism has developed. Her focus is both the economic and political environments that fomented Islamism, and the structures of Islamist movements themselves (from their ideologies to their modes of action). Looking at Islamism as a form of contestation politics, Ismail offers a reassessment of its failures and successes - limited, as it is, by its use of violence, but capable of real mobilisation at a popular level. "Rethinking

Islamist Politics" will be vital reading for anyone seeking to understand such spectacular expressions of Islamism as the September 11th attacks, but also the everyday struggles of ordinary people which Islamism embodies.

### Rethinking Islamist Politics

Bassam Tibi offers a radical solution to the problems faced by Islam in a rapidly changing and globalizing world. He proposes a depoliticization of the faith and the introduction of reforms to embrace secular democracy, pluralism, civil society and individual human rights. The alternative to this is the impasse of fundamentalism. The pivotal argument is that Islam is being torn between the pressure for cultural innovation and a defensive move towards the politicization of its symbols for non-religious ends.

### Arab-Islamic Political Culture

A systematic account of the life, works, and accomplishments of al- Kirmani, an important Ismaili Muslim scholar and writer in the fields of philosophy and science who lived during the first half of the 11th century AD

### Islam Between Culture and Politics

Over the last decade, political Islam has been denounced in the Western media and in the surrounding literature as a terrorist or fascist movement that is entirely at odds with Western democratic ideology. Kai Hafez's book overturns these arguments, contending that, despite its excesses, as a radical form of political opposition the movement plays a central role in the processes of democratization and modernization, and that these processes have direct parallels in the history and politics of the West. By analyzing the evolution of Christian democratization through the upheavals of the Reformation, colonisation, fascism, and totalitarianism, the book shows how radicalism and violence were constant accompaniments to political change, and that these components - despite assertions to the contrary - are still part of Western political culture to this day.

### Islam in Modern Turkey

In recent years, it has become clear that the integration of Islam into the political and social framework of European societies will be crucial to the successful future of the region. This volume steps back from the often heated debates over the issue to view it in a wider context, through historical and comparative analyses of the integration of religious minorities in the Netherlands and France. In addition, it broadens the scope of the question by focusing not only on Muslims but on Protestant and Catholic religious minorities as well.

### Radicalism and Political Reform in the Islamic and Western Worlds

This book provides a detailed analysis of the political arguments about the place of Muslims in contemporary France, and also discusses the ideas put forward by a range of Muslim thinkers. France has become the setting for one of the most important conflicts in the modern world. On the one hand, it possesses a rigidly organized, centralized state, whose bureaucrats and civil servants are animated by a code of secular activism. On the other hand, France is also the home for Europe's largest Muslim minority, variously estimated at numbering between four and six million people. This means that in terms of simple numbers, France can be counted as the world's fifteenth Islamic power. Previous conflicts with religion have left a deep impression on French political culture: from the sixteenth and seventeenth-century conflicts between Catholics and Protestants played to the formation of the collaborationist Vichy government in 1940. In recent decades, Muslims have been stigmatized as an irreconcilable minority unable to adapt to the secular culture of the majority of French citizens. This work draws out the political implications of the current conflict. It is based on events and publications produced in a single five year period, beginning with the shock of the 2002 Presidential elections, in which Le Pen was the second most successful candidate, ranging through the legislation of March 2004 which banned the Islamic headscarf from French state schools, and which sparked off a series of bad-tempered exchanges between left and right-wing French nationalists, anti-racism campaigners, secularists, anti-clericals and a variety of Muslim authors.

### Religious Newcomers and the Nation State

Culture is a constant reference in debates surrounding Islam in Europe. Yet the notion of culture is commonly restricted to conceptual frames of multiculturalism where it relates to group identities, collective ways of life and recognition. This volume extends such analysis of culture by approaching it as semiotic practice which conjoins the making of subjects with the configuration of the social. Examining fields such as memory, literature, film, and Islamic art, the studies in this volume explore culture as another element in the assemblage of rationalities governing European Islam. From this perspective, the transformations of European identities can be understood as a matter of cultural practice and politics, which extend the analytical frames of political philosophy, historical legacies, normative orders and social dynamics.

#### Islam and the Politics of Culture in Europe

**Religion and Representation: Islam and Democracy** brings together a series of reflections, studies and observations that examine the complex relationship between political representation and Islam. Through the perspectives of theology, history, sociology, philosophy and political science, contributions to this volume explore the connections between religious beliefs, religiosity, political ideals and political behaviour. Grounded in the experience of both Muslim-majority and Muslim-minority states, the chapters represent a broad cross-section of approaches that emerge from a process of exchange and dialogue, which began with a three-day conference in London, Canada in March 2012. Beyond demonstrating how Islam and democracy are compatible, the authors in this volume employ theological reasoning, theoretical insight, logical argumentation and empirical data to explore in detail the points of connection. Contributions encompass a broad spectrum of interpretations of Islam, as well as consideration of critical and compelling issues and controversies across a range of contemporary settings.

#### Religion and Political Culture in Kano

This innovative book analyzes the relationship between religion and politics in the Middle East through a comparative study of five countries—Egypt, Israel, Turkey, Iran, and Saudi Arabia. Robert D. Lee examines each country in terms of four domains in which state and religion necessarily interact: national identity, ideology, institutions, and political culture. In each domain he considers contradictory hypotheses, some of them asserting that religion is a positive force for political development and others identifying it as an obstacle. Among the questions the book confronts: Is secularization a necessary prerequisite for democratic development? How is it and why is it that religion and politics are so deeply entangled in these five countries? And, why is it that all five countries differ so markedly in the way they identify themselves and use religion for political purposes? The book argues that the nature of religious organization and practice in the Middle East must be understood in the context of individual nation states. The second edition is updated throughout and includes an entirely new chapter discussing the political and religious climate in Saudi Arabia. Earlier introductory analysis has been condensed to make room for new material, and chronologies at the end of each chapter have been added to help students understand the broader context. The second edition of *Religion and Politics in the Middle East* is a robust addition to courses on the Middle East.

## Religion and Representation

Some of the most pressing questions in the Middle East and North Africa today revolve around the proper place of Islamic institutions and authorities in governance and political affairs. Drawing on data from 42 surveys carried out in fifteen countries between 1988 and 2011, representing the opinions of more than 60,000 men and women, this study investigates the reasons that some individuals support a central role for Islam in government while others favor a separation of religion and politics. Utilizing his newly constructed Carnegie Middle East Governance and Islam Dataset, which has been placed in the public domain for use by other researchers, Mark Tessler formulates and tests hypotheses about the views held by ordinary citizens, offering insights into the individual and country-level factors that shape attitudes toward political Islam.

## Islam and Politics in the Middle East

The intention of this book is to explore the relationship between an ideological idiom and the changing social movement in which it operates. The basic question is that of what roles an Islamic symbol complex played in different phases of the Palestinian nationalist movement, and what were the socio-economic factors which help to explain, and are themselves partially explained by, the appearance of these roles. Islam was ideologically 'appropriate' at different stages in the development of the movement, and this study examines in what way, and why. First published in 1982.

## Islam Between Culture and Politics

Interpreting Islamic Political Parties offer a critical analysis and explanation of the evolution, institutionalization and current developments of Islamic political parties. The volume contains case studies of Islamic political parties in Algeria, Egypt, Indonesia, Kuwait, Lebanon, Malaysia, Maldives, Mauritius, Somalia, South Africa and Sudan.

## Islam and the Politics of Meaning in Palestinian Nationalism (RLE Politics of Islam)

These essays examine Iran's place in the world--its relations and cultural interactions with its immediate neighbors and with empires and superpowers from the beginning of the Safavid period in 1501 to the present day. The book provides important historical background on recent political and social developments in Iran and on its contemporary foreign relations. The topics explored include Iranian influence abroad on political organization, religion, literature, art, and diplomacy, as well as Iran's absorption of foreign influences in these areas. A special focus is the prevailing political culture of Iran throughout its early modern and contemporary periods. The authors combine approaches from history, political science, anthropology, international relations, and cultural studies. Some essays address Iran's interactions with various Arab and Turkic ethnicities in the region stretching from India to Egypt. Others examine its relations with the West during the Qajar and Pahlavi eras, women's issues, culture inside Iran during the Islamic Republic, and the Shi'ite theocracy of Iran as compared with other Muslim states.

## Interpreting Islamic Political Parties

Tensions and Transitions in the Muslim World provides an alternative reading of Middle Eastern politics and political culture by focusing on the dynamics of change, and examining the role of Islam in the emerging modern Middle East. Louay Safi contends that by focusing on radical and traditionalist Islam, Middle East specialists often overlook the liberal manifestations of Islam, which, though marginalized, constitute the driving force in the sociopolitical development of the Middle East. To capture the dynamics of progress in the Middle East, Safi examines the impact of the ideological struggle and intellectual debate between the forces of modernism and Islamic traditionalism on the transformation

of mainstream society, and delineates the emerging sociopolitical outlooks and orientations, locked in a fierce struggle for the heart and soul of the Middle East.

### Iran and the Surrounding World

Muslim Democracy explores the relationship between politics and religion in forty-seven Muslim-majority countries, focusing especially on those with democratic experience, such as Indonesia and Turkey, and drawing comparisons with their regional, non-Islamic counterparts. Unlike most studies of political Islam, this is a politically-focused book, more concerned with governing realities than ideology. By changing the terms of the debate from theology to politics, and including the full complement of Islamic countries, Schneier shows that the boundaries between church and state in the Islamic world are more variable and diverse than is commonly assumed. Through case studies and statistical comparisons between Muslim majority countries and their regional counterparts, Muslim Democracy shows that countries with different religions but similar histories are not markedly different in their levels of democratization. What many Islamists and western observers call "Islamic law," moreover, is more a political than a religious construct, with religion more the tool than the engine of politics. "Women who drive in Saudi Arabia," as the author says, "are not warned they will go to hell, but that they will go to jail." With the political salience of religion rising in many countries, this book is essential reading for students of comparative politics, religion, and democratization interested in exploring the shifting boundaries between faith and politics.

### Tensions and Transitions in the Muslim World

This book offers a new interpretation to the social history of religion in Iran from the 1870s to the 1970s. It aims to situate the 'revolutionary' upheavals of 1977-82 in an extensive narrative context of historical developments over the preceding century, and to relate the 'religious' elements in that history to other social and cultural issues. In the author's analysis, Iran's revolution was complex, and contingent on a range of factors rather than a simple or inevitable outcome of the nature of the Iranian state or the nature of religion in Iran. The focus of the argument is on the human responses of Iranians to their experiences and problems in all their diversity and on the rich variety and complexity of relationships between religion and other aspects of life, thought and culture in the daily life of Iranians.

### Muslim Democracy

Advance praise for *Islam, Politics, and Pluralism*: "A valuable, accessible, and timely introduction to events and movements that lie behind the headlines of atrocity and terror, and which will enhance understanding of our dangerously polarized world." —Karen Armstrong, author of *Islam: A Short History* "Well-conceived, convincingly argued, and lucidly written. She provides a sorely needed dose of objectivity and balance precisely when those virtues are becoming essential for our government, our media, and our citizenry" —Robert Bianchi, author of *Guests of God: Pilgrimage and Politics in the Islamic World* "This is an important contribution to the debate about Islam and should be read by scholars, policy planners, and the informed public." —Akbar S. Ahmed, Ibn Khaldun Chair of Islamic Studies, American University "A fine book... clear, crisp, well-written. It makes an important case for the political possibilities of the Islamic movements." —Ira M Lapidus, professor emeritus of history, University of California, Berkeley

### Religion, Culture and Politics in Iran

Few empirical studies of Arab countries have dealt with political culture and political socialisation or focused on people's beliefs, values, and attitudes towards the government or political leaders, mainly because the regimes have been reluctant to allow opinion to be tested. The significance of this book is that it assesses the influence of state ideology on the new generation of Libyans, and examines their political culture.
