The Origins of Historical Sociology

Academic Sociology

Differences between Critical Realism and Vapers Version of Historicism

Part 2 on Critical Realism in Historical Sociology

Sociological Positivism

Scientism

Question of Comparison

Macro Causal Analysis

Transformational Model of Social Action

Causation Is all Occurring at One Level or on One Plane It Occurs in a in a Two Dimensional Space as Opposed to a Three Dimensional Space Which Is To Say that It in Classical Terms It's all Efficient Causality When this Diagram of Roses Is Opening Up It's a Possibility of Something like Formal Causation That Is Where the Important Effect Here Is Is the Way in Which Say a New Structure That's Created at at Juncture One and Gradually Becomes Instantiated

But It Seems to Me that Bass Cars Original Formulation Which Is that You Can Do Something Called by by Criticizing or by Shunt Bikes You Can Do an Explanatory Critique that by Pointing to Social Structures That Systematically Produce False Knowledge about the World that in Automatically Yields an Ethical Program of Eliminating that Program I Think that Has Been Pretty Disprin Satisfying for Many People as the as if that Were all That Could Be Said about the Program and Baskar Himself Elaborated on that Further so There's Been There's no Sense of It Being a Static Program and I Don't Think There's if We Wanted To Really Get into Bhaskar Himself and I Think Tim or Someone Tim Rousseau or Someone Who's a Real Bhaskar Ian Would Be Better Able To Cover that Question but I Don't Think His Work Was Static

So that's a Different Approach to Case Selection than One That Seems To Be Based on a Kind of a Statistics Model of Case Selection as for the Act as for the Depth Realist Case Selection Here I Think You You Start from Your Interest in a Certain Call It Set of Causal Powers or a Single Causal Power Let's Say You're Interested in in Bourdieu's Field Theory What You Will Try To Do Is Think about What Kinds of Cases That Field that Approach Suggest You Should Look at Where You Would Expect Fields To Emerge Where You Would Expect Certain Features of Fields To Emerge for Example What You Will Try To Do Is Think about What Kinds of Cases That Field that Approach Suggest You Should Look at Where You Would Expect Fields To Emerge Where You Would Expect Certain Features of Fields To Emerge for Example You Would Expect Certain Kinds of Practices To Be More Autonomous or Capable of Achieving Relative Autonomy and Others To Be More Pulled toward Heteronomy toward Dependence on the Economy or the State and You Would Probably Want To Systematically Do Comparative Depth Analysis Depth Realist Analysis Looking at Field Formation in those Two Different Kinds of Situations You Look at the Field of Poetry

As an Exemplification of an Unobservable Causal Mechanism before There Are Probably Other

Structures like Network Structures Which Are Linked to Individual People Net Nodes of People or of Institutions and Where Are those People and Institutions Are Visible and So We Might Be Able To Do Something with that So another another Question Which Has Come Up Is Is One about How You Actually Put the Notion of Emergence and Stratification and Levels To Work in Actual Research Practice So How Do You Actually Go about Distinguishing between Different Levels of Structure How Do You Determine Which Ones Are Kind Of Are Relevant or You'Re Relevant and I Think this Is a Question You Should Be Able To Hit Out at the Park since It's Definitely One That I Know You Thought a Lot about

I Think the the Real Type Approach Suggests that We Should Instead of One-Sidedly Accentuating Certain Aspects of Them That Are Currently of Interest to Us We Should Try To Understand How these Things Are Working and with the Example of Field and Unconscious those those Show Also How It's Not Just Our Own Individual Conception of How They'Re Working but There's a Whole Body of Other Research Which Has Been Working Away at these Concepts for Quite a Long Time and Giving More and More Evidence about How these Should Be Thought of and whether There's Evidence for Certain Ways of Thinking about Them or Not I Mentioned Earlier the Unconscious I Mean We Had To Wait
