Some important questions are discussed in this book: Are there any civilisations other than the Western one living in our so-called Global-Age? 'Eastern civilisation'? Is the concept of East anything more than non-West? Or does there exist, in reality, a distinct Chinese, Indian, Arabo-Muslim, and Western civilisation? Is the construction of large civilisation-states such as China and India an unparalleled historical achievement? Do economic ties always eclipse other forms of affiliation such as those formed through kinship or between speech communities? What is the role of the 'Latin' and the Jewish Peoples in our Anglo-American-led Western world? Is English today the global language or merely an international one? Is the Chinese thought pattern closely related to its writing system? Is today's world one of (symmetrical) interdependence? Or rather one of hegemony? If the so-called North-South or East-West dialogue fails in constructing a universally accepted world civilisation, then what is the appropriate arrangement for reaching such a consensus within humankind?

Over the course of more than three centuries of Romanov rule in Russia, foreign visitors and residents produced a vast corpus of literature conveying their experiences and impressions of the country. The product of years of painstaking research by one of the world's foremost authorities on Anglo-Russian relations, *In the Lands of the Romanovs* is the realization of a major bibliographical project that records the details of over 1200 English-language accounts of the Russian Empire. Ranging chronologically from the accession of Mikhail Fedorovich in 1613 to the abdication of Nicholas II in 1917, this is the most comprehensive bibliography of first-hand accounts of Russia ever to be published. Far more than an inventory of accounts by travellers and tourists, Anthony Cross's ambitious and wide-ranging work includes personal records of residence in or visits to Russia by writers ranging from diplomats to merchants, physicians to clergymen, gardeners to governesses, as well as by participants in the French invasion of 1812 and in the Crimean War of 1854-56. Providing full bibliographical details and concise but informative annotation for each entry, this substantial bibliography will be an invaluable tool for anyone with an interest in contacts between Russia and the West during the centuries of Romanov rule.

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—*Time* How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Chosen an "Outstanding Book on the Subject of Human Rights in the United States" by the Gustavus Myers Center for the Study of Human Rights. In this volume of incisive essays, Ward Churchill looks at representations of American Indians in literature and film, delineating a history of cultural propaganda that has served to support the continued colonization of Native America. During each phase of the genocide of American Indians, the media has played a critical role in creating easily digestible stereotypes of Indians for popular consumption. Literature about Indians was first written and published in order to provoke and sanctify warfare against them. Later, the focus changed to enlisting public support for "civilizing the savages," stripping them of their culture and assimilating them into the dominant society. Now, in the final stages of cultural genocide, it is the appropriation and stereotyping of Native culture that establishes control over knowledge and truth. The primary means by which this is accomplished is through the powerful publishing and film industries. Whether they are the tragically doomed "noble savages" walking into the sunset of *Dances With Wolves* or Carlos Castaneda's Don Juan, the exotic mythical Indians constitute no threat to the established order. Literature and art crafted by the dominant culture are an insidious political force, disinforming people who might otherwise develop a clearer understanding of indigenous struggles for justice and freedom. This book is offered to counter that deception, and to move people to take action on issues confronting American Indians today.
