How To Restore Tractor Magnetos the essential guide to farm tractor electrical systems and offers the tractor restorer all the information needed to restore, repair and diagnose magnetos. Authored by the late Neil Yerigan, who was a master of working with vintage electronics, the book comprehensively covers how magnetos function as well as how to troubleshoot and repair common problems. The fine art of non-destructive disassembly is covered in detail and is a key ingredient to keeping your magneto (and your tractor) happy and running. Now back in print, How To Restore Tractor Magnetos includes sections on the most common magnetos, including those made by Wico, American Bosch, International Harvester, Fairbanks-Morse, Case, Eiseman and more. Also included is voltage regulator field repair and testing, electric starter motors, and wiring advice. Yerigan augments the book's technical detail with anecdotes about the trials and tribulations of day-to-day life in his state-of-the-art (for 1936) south Minneapolis electrical repair shop.

This SAE document defines a recommended practice for implementing circuit identification for electrical power and signal distribution systems of the Class 8 trucks and tractors. This document provides a description of a supplemental circuit identifier that shall be utilized in conjunction with the original equipment manufacturer's primary circuit identification as used in wire harnesses but does not include electrical or electronic devices which have pigtails. The supplemental circuit identifier is cross-referenced to a specified subsystem of the power and signal distribution system identified in Section 5. The SAE J2191 document is being revised to provide additional circuit ID nomenclature to the Supplemental Circuit Identifications for the following sections: Power, Instrumentation, Monitoring (Warn Sys), Control (Fuel, Engine, Cruise), Serial/Data Communication, Operator Convenience, Entertainment, Navigation, Accessories, Emergency/Vision, and Engine Accessories. SAE J2191 has been reaffirmed to comply with the SAE Five-Year review policy.
