The non-jazz improvisation series is a concept that germinated in Dick Weissman's mind while he was attending music school. He wrote a 15-piece arrangement of the old square dance tune, Cripple Creek, and wanted the trombone to take a solo as part of the arrangement. When the trombonist kept playing a bebop solo that was totally unsuitable for the chart, Dick realized that - in addition to the many musicians who do not improvise - there are even jazz musicians who don't know how to improvise outside the limits of their own stylistic backgrounds. This book approaches the five-string banjo as a musical instrument freed from the prison of specific musical genres. Old-time music, clawhammer, bluegrass and many eclectic adaptations of the banjo are utilized to demonstrate a variety of musical styles. A number of the selections are in different tunings. All examples are written out in traditional and tablature notation.

Hispanic culture is woven into all aspects of Texas life, from mission-style architecture to the highly popular Tex-Mex cuisine, from ranching and rodeo traditions to the Catholic religion. So common are these Hispanic influences, in fact, that they have been widely accepted as a part of everyone's heritage, comfortably familiar and distinctively Texan. This new edition of Hispanic Texas contains all the guidebook entries of the original volume in a compact format perfect for taking along on trips throughout the state. Entries are arranged by region: San Antonio and South Texas Laredo and the Rio Grande Valley El Paso and Trans-Pecos Texas Austin and Central Texas Houston and Southeast Texas Dallas and North Texas Lubbock and the Plains Within each region, a city-by-city listing details the historic and modern sites and structures that bear Hispanic influence. Descriptions of local festivals and events, public art, museums, natural areas, and scenic drives enhance the entries, which are also profusely illustrated with historic and modern photographs and other illustrations.

All examples are written out in traditional and tablature notation.

The concise information is informative yet easy to scan for quick reference. The small size allows the option of carrying it in a handbag or backpack and take it everywhere you go! Each Essential Oil entry within this guide gives a brief introduction to each oil and covers it's main uses and benefits. The key ingredients are also listed and the unique aromatic description. Essential oils are the highly concentrated version of the natural oils in plants. Getting essential oils from plants is done with a process called distillation, most commonly distillation by steam or water, where many parts of the plants are being used, including the plant roots, leaves, stems, flowers, or bark. After distillation, the outcome is a highly concentrated portion of essential oil, which will have the characteristic fragrance and properties of the plant from which it was extracted, and contain the true essence of the plant it came from. This includes the smell, but also the plant's healing properties and other plant characteristics. You can see how this highly potent extract of a plant or herb can be extremely useful for many purposes. Essential oils have been used throughout history in many cultures for their medicinal and therapeutic benefits. "I believe that for every illness or ailment known to man, that God has a plant out here that will heal it. We just need to keep discovering the properties for natural healing." Vannoy Gentles Fite The aim of this guide is to provide a quick reference to the most common essential oils, giving its readers better access to information on the move.

Introduction

For a larger gentleman

Short, slim, or the modest man

Tall and thin men

Big Nose: Rather than having it curled up, you definitely want to snap it down. Rather than going for a very pointy pinch, go for something that's a little wider. Slim brims that are snapped up or just slightly snapped down are your enemy because they will just accentuate the size of your nose.

Receding chin: Definitely make sure to avoid a big hat and a full crown because that will just highlight your receding chin, likewise, don't snap your hat too much because it's not an advantageous look for you.

Chiseled features: you want a hat with a slight pinch on the crown that is not too small and you want a nice deep snap. It's definitely best to not tilt your hat but keep it straight so everything looks more proportional. In order not to highlight your chiseled features, I urge you to stay away from a very tall crown or a very slim brim.

Round faces

Protruding ears: it's very important that you have a wider brim that is snapped down and not snapped up. The brim is important because it doesn't highlight the size of your ears or the shape, but it rather helps to cover them up. Opt for a wider crown that is not too pointy, although a little point is alright.

Also, go with a wide hatband that's ideally somewhat contrasting because of your ears, it really pays to not just snap down the hat in the front but also in the back. If you have protruding ears, you definitely want to avoid small hats with shorter brims and anything that is pointed up.
