What If We Lost Gravity for 5 Seconds?
So, what is Gravity?
the first thing that will happen
so the impact of lack of gravity
you could experience winds
the earth's atmosphere would disappear
which would immediately rupture the inner ears
there will be no oxygen on Earth.
What if the earth lost oxygen for five seconds
the pressure of the Earth's inner core
will cause the planet to expand
leading to significant earthquakes
the end of the world for us.
not to take gravity for granted
Did you know astronauts
and their sense of balance changes
