[#WCST](#) [#Wisconsin Card Sorting Test](#) [#Cognitive Assessment](#) [#Executive Function Test](#) [#Neuropsychological Testing](#)

The Wisconsin Card Sorting Test (WCST) is a widely-used neuropsychological assessment designed to measure executive function, including strategic planning, organized searching, and the ability to utilize environmental feedback to shift cognitive sets. It's a crucial cognitive assessment for evaluating abstract reasoning and problem-solving skills, often employed in clinical and research settings to understand a subject's cognitive flexibility and ability to adapt to changing rules.
