classical mechanics

We have admired this text since we first studied Classical Mechanics from the first edition in our graduate student days (CPP in 1953 and JLS in 1960), and each of us used the first and second editions in our teaching throughout the years. Professor Goldstein is to be commended for having written and later enhanced ...

Classical Mechanics: Goldstein, Herbert: 9780201029185

ABSTRACT: We prove that any nonrelativistic classical system must obey a statistical wave equation that is exactly the same as the Schrödinger equation for the system, including the usual "canonical quantization" and Hamiltonian operator, provided an unknown constant is set equal to \hbar . We show why the two equations must ...
