Statuta Universitatis Oxoniensis (Classic Reprint)

Excerpt from Statuta Universitatis Oxoniensis Concerning the operation of Statutes made under the powers of the Universities of Oxford and Cambridge Act, 1877. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Dr Hackett discovered in the Angelica Library in Rome a manuscript containing a unique text of the first constitution of Cambridge University. The centrepiece of this book is a critical edition of the text with an English translation on facing pages. The importance of his discovery for historians of Cambridge and of medieval university education cannot be overestimated. The Cambridge constitutions form a complete code, promulgated at a remarkably early date (c. 1250). Dr Hackett shows that Oxford lagged more than 50 years behind Cambridge in codifying its statutes and neither Paris nor Bologna, the oldest of all universities, had a written constitution or code of laws at this time.

English Humanism and the Reception of Virgil c. 1400-1550 reassesses how the spread of Renaissance humanism in England impacted the reception of Virgil. It begins with the first signs of humanist influence in the fifteenth century, and ends at the height of the English Renaissance during the mid-Tudor period. This period witnessed the first extant English translations of Virgil's Aeneid, by William Caxton (1490), Gavin Douglas (1513), and the Earl of Surrey (c. 1543). It also marked the first printings of Virgil's works in England by Richard Pynson (c. 1515) and Wynkyn de Worde (1510s-1520s). Through a fine-grained analysis of surviving manuscripts and early printed editions, Matthew Day questions how and to what extent Renaissance humanism impacted readers' and translators' approaches to Virgil. Building on current scholarship in the fields of book history, classical reception, and translation studies, it draws attention to substantial continuities between the medieval and humanist reception of Virgil's works. Humanist study of Virgil, and indeed of classical poetry more generally, continued to draw many of its aims, methods, and conventions from well-established medieval traditions of learning. In emphasizing the very gradual pace of humanist development and the continuous influence of medieval scholarship, the book comes to a more qualified view of how humanism did and (just as importantly) did not affect Virgilian reading and translation. While recognizing humanist innovations and discoveries, it gives due attention to the understudied, yet far more numerous examples of consistency and traditionalism.
