A Karger 'Publishing Highlights 1890-2015' title This 2nd, revised edition is still the reference work available in print and electronically on Paracelsus by the Paracelsus authority. Furthermore, it makes a very good read. See also Pagel's last book The Smiling Spleen on Paracelsianism as a historical phenomenon. '...a work in the brilliant tradition of biographical research ... even the casual reader will be impressed to learn that, four centuries ago, the man who had the courage to burn in public the writings of Avicenna, recognised pulmonary disease in miners as an occupational hazard, cretinism and goitre as endemic in certain areas, and chorea and hysteria as manifestations of disease, not demonic possession.' A renowned biologist provides a sweeping chronicle of more than four billion years of life on Earth, shedding new light on evolutionary theory and history, sexual selection, speciation, extinction, and genetics.

The Ancestor's Tale

This volume combines an analysis of PISA with a description of the policies and practices of those education systems that are close to the top or advancing rapidly, in order to offer insights for policy in the United States.

Strong Performers and Successful Reformers in Education Lessons from PISA for the United States

Andreas Schleicher - initiator of PISA and an international authority on education policy - offers a unique perspective on education reform.

The book reflects on the statement that religion represents a force in the public realms of society. Does religion regain public significance in social debates and what are its characteristics in terms of topics and interests, actors and parties? How do different religious and non-religious groups evaluate the impact of religion on its public environment? These questions are reflected by an international group of scholars.

The Perennial Scope of Philosophy

If one Andy Warhol Mini Journal is portable pop fun, a set of three is even better! Galison's Andy Warhol Mini Journal Set holds three different mini journals, each with a photo of a sunglasses-wearing Warhol and one of his quotations: "Everybody should like everybody," "The idea of waiting for something makes it more exciting," and "Art is what you can get away with." Andy Warhol (1928-87) was one of the preeminent American artists of the twentieth century. This set of journals was created in conjunction with the Andy Warhol Foundation for the Visual Arts, Inc.

The insatiate countesse, a tragedie

In her study of Margaret Atwood, Ellen McWilliams explores how the Bildungsroman has been appropriated by women writers in the second half of the twentieth century. Early works by Atwood are placed in dialogue with more recent novels, thus furthering our

The Public Significance of Religion

A book that looks at both the traditional and the unconventional ways in which the Holocaust has been visually represented. The purpose of this volume is to enhance our understanding of the visual representation of the Holocaust - in films, television, photographs, art and museum installations and cultural artifacts - and to examine the ways in which these have shaped our consciousness. The areas covered include the Eichman Trial as covered on American television, the impact of Schindler's List, the Jewish Museum in Berlin, the Israeli Heritage Museums, Women and Holocaust Photography, Internet Holocaust sites and tattoos and shrunken heads, the bodies of the dead and of the survivors.>

In 18th through 20th-century British and American literature, school stories always play out the power relationships between adult and child. They also play out gender relationships, especially when females are excluded, although most histories of the genre ignore the unusual novels that probe the gendering of school stories. When the occasional man wrote about girls' schools-as Charles Lamb and H. G. Wells did-he sometimes empowered his female characters, granting them freedoms that he had experienced at school. Women who wrote about boys' schools often gave unusual emphasis to families, and at times, revealed the contradictions in the schoolyard code against telling tales or presented competing versions of masculinity, such as the Christian gentleman versus the self-made man. Sometimes these middle-class white women projected their sense of estrangement onto working class and minority women. Sometimes they wrote school stories that were in dialog with other genres, as when Mrs. Henry Wood wrote a sensation story or, like Louisa May Alcott, they domesticated the boys' school story, giving prominence to a female viewpoint.

Margaret Atwood and the Female Bildungsroman

Traces the history of the Coca-Cola Company from its beginnings in 1886 to its present status as a billion-dollar international business.

"... its pages come alive with wonderful illustrative material coupled with sensitive and insightful commentary." —Reviews in Anthropology " ... the scope, breadth, and lucidity of this excellent study confirm that Okpewho is undoubtedly the most important authority writing on African oral literature right now ... " —Research in African Literatures "Truly a tour de force of individual scholarship . . . " —World Literature Today " ... excellent ... " —African Affairs " ... a thorough synthesis of the main issues of oral literature criticism, as well as a grounding in experienced fieldwork, a wide-ranging theoretical base, and a clarity of argument rare among academics." —Multicultural Review "This is a breathtakingly ambitious project ... " —Harold Scheub " ... a definitive accounting of the evidence of living oral traditions in Africa today. Professor Okpewho's authority as an expert in this important new field is unrivaled." —Gregory Nagy "Isidore Okpewho's African Oral Literature is a marvelous piece of scholarship and wide-ranging research. It presents the most comprehensive survey of the field of oral literature in Africa." —Emmanuel Obiechina " ... a tour de force of scholarship in which Okpewho casts his net across the African continent, searching for its verbal forms through voluminous recent writings and presents African oral literature in a new voice, proclaiming the literariness of African folklore." —Dan Ben-Amos "This is an outstanding book by a scholar whose work has already influenced how African literature should be conceived. ... Professor Okpewho is a scholar with a special talent to nurture scholarship in others. After this work, African literature will never be the same." —Mazisi Kunene Isidore Okpewho, for many years Professor of English at the University of Ibadan, is one of the handful of African scholars who has facilitated the growth of African oral literature to its status today as a literary enterprise concerned with the artistic foundations of human culture. This comprehensive critical work firmly establishes oral literature as a landmark of high artistic achievement and situates it within the broader framework of contemporary African culture.

Michael Cart shares the poignant story of eighteen-year-old Andy Logan as he reflects on the tender moments and personal struggles he has faced while growing up. As Andy settles into his first year of college, he can't help but reflect on the struggles, events, and experiences that brought him to this point. As a fearsome and skittish little boy, Andy faced bullying and teasing for the entirety of his youth. Now, as an independent and strong young man, he considers the people and lessons learned that brought him to a place where he is confident and comfortable being himself. "Cart joins the rank of YA novelists with a courageous if not entirely successful story about a gay youth's coming of age..." — Publishers Weekly

"For millennia, idleness and laziness have been regarded as vices. We're all expected to work to survive and get ahead, and devoting energy to anything but labor and self-improvement can seem like a luxury or a moral failure. Far from questioning this conventional wisdom, modern philosophers have worked hard to develop new reasons to denigrate idleness. In *Idleness*, the first book to challenge modern philosophy's portrayal of inactivity, Brian O'Connor argues that the case against an indifference to work and effort is flawed--and that idle aimlessness may instead allow for the highest form of freedom. *Idleness* explores how some of the most influential modern philosophers drew a direct connection between making the most of our humanity and avoiding laziness. *Idleness* was dismissed as contrary

to the need people have to become autonomous and make whole, integrated beings of themselves (Kant); to be useful (Kant and Hegel); to accept communal norms (Hegel); to contribute to the social good by working (Marx); and to avoid boredom (Schopenhauer and de Beauvoir). O'Connor throws doubt on all these arguments, presenting a sympathetic vision of the inactive and unserious that draws on more productive ideas about idleness, from ancient Greece through Robert Burton's *Anatomy of Melancholy*, Schiller and Marcuse's thoughts about the importance of play, and recent critiques of the cult of work. A thought-provoking reconsideration of productivity for the twenty-first century, *Idleness* shows that, from now on, no theory of what it means to have a free mind can exclude idleness from the conversation."--Provided by publisher

This text examines the process of psychoanalysis and discusses the inability of the analyst to determine the patient's actual experiences through the recollections of the patient.

The Unity of Reality

There are two stories here. One is the now legendary tale of a defiant Jew's refusal to abandon God, even in the face of the greatest suffering the world has known, a testament of faith that has taken on an unpredictable and fascinating life of its own and has often been thought to be a direct testament from the Holocaust. The parallel story is that of Zvi Kolitz, the true author, whose connection to Yosl Rakover has been obscured over the fifty years since its original appearance. German journalist Paul Badde tells how a young man came to write this classic response to evil, and then was nearly written out of its history. With brief commentaries by French philosopher Emmanuel Levinas and Leon Wieseltier, author of *Kaddish*, this edition presents a religious classic and the very human story behind it.

African Oral Literature

A resolute defense of philosophy and hermeneutics against the threats of dogmatism and relativism. Luigi Pareyson (1918–1991) was one of the most important Italian philosophers to emerge after World War II and stands shoulder to shoulder with fellow hermeneutic thinkers Hans-Georg Gadamer and Paul Ricoeur. The product of a well-developed theory of interpretation that stretches back to the late 1940s, his 1971 masterpiece *Truth and Interpretation* provides the historical impetus and theoretical framework for the questions of existence, art, and politics that would motivate his most famous students, Umberto Eco and Gianni Vattimo. In a time when the meaning of truth as an interpretation is challenged by the chaotic din of media on the one side and the violent force of absolute claims from science, religion, and political economy on the other, Pareyson's meditation on the value of thinking that is shaped by the traditions of philosophy and yet responds to contemporary demands remains timely and pressing more than forty years after its initial publication.

German books in print

"Umar Ibn al-Farid is the most venerated mystical poet in Arabic. An accomplished Sufi as well as a respected poet, his poetry blends the two traditions - classical Arabic poetry and Islamic mysticism - in a body of work with a distinctly devotional and mystical character. Th. Emil Homerin makes available here two of Ibn al-Farid's poems that have long been considered classics of Islamic mystical literature. The *Wine Ode*, a poem in praise of wine as well as a love poem, can also be seen as an extended meditation on the presence of divine love in the universe. The *Poem of the Sufi Way*, one of the longest poems ever composed in Arabic, and the most famous one rhyming in "T," begins as a love poem and then explores a number of crucial concerns confronting the seeker on the Sufi path. Both works have been treated for centuries in numerous mystical commentaries. Noteworthy as well in this volume is the addition of the *Adorned Proem*, a reverential account of Ibn al-Farid's life by his grandson. Individuals interested in the fields of mysticism and spirituality, as well as lovers of poetry, particularly love poetry, will find this to be fascinating reading. It will have great relevance for scholars and students of Arabic literature, Islam and mysticism."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

State Ideology and Language in Tanzania

Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture,

livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?

The Sleepwalkers

The 1970s. They were the best of times and the worst of times. Wealth inequality was at a record low, yet industrial strife was at a record high. These were the glory years of Doctor Who and glam rock, but the darkest days of the Northern Ireland conflict. Beset by strikes, inflation, power cuts and the rise of the far right, the cosy Britain of the post-war consensus was unravelling – in spectacularly lurid style. Fusing high politics and low culture, *Crisis? What Crisis?* presents a world in which Enoch Powell, Ted Heath and Tony Benn jostle for space with David Bowie, Hilda Ogden and Margo Leadbetter, and reveals why a country exhausted by decline eventually turned to Margaret Thatcher for salvation.

My Father's Scar

This book deals with the role that World War I played in the life and literary imagination of the Italian author and soldier Gabriele D'Annunzio. D'Annunzio believed war would not only solve the mystery of death, it would also provide him with a means of redemption.

Goethe Wörterbuch: Einwenden-Gesäusel

Patiently and lucidly, this Los Angeles Times Book Award and Royal Society of Literature Heinemann Prize winner identifies the aspects of the theory of evolution that people find hard to believe and removes the barriers to credibility one by one. As readable and vigorous a defense of Darwinism as has been published since 1859.--The Economist.

Idleness

Germany in the 20th century endured two world wars, a failed democracy, Hitler's dictatorship, the Holocaust, and a country divided for 40 years. But it has also boasted a strong welfare state, affluence, liberalization and globalization, a successful democracy, and the longest period of peace in European history. In this award-winning volume of German history, Ulrich Herbert analyzes the trajectory of German politics and culture during a century of extremes.

Narrative Truth and Historical Truth

When Swiss aid worker David Hohl arrives in Rwanda in 1990, he wants to know what it feels like to make a difference. Instead, he finds himself among expats, living a life of postcolonial privilege and boredom, and he begins to suspect that the agency is more concerned with political expedience than improving lives. But are his own motives any more noble? When civil war breaks out and David goes into hiding, he is forced to examine his own relationship to the country he wants to help and to the cosmopolitan Rwandan woman he wants to possess. As the genocide rages over the course of one hundred desperate days, the clear line David has always drawn between idealism and complicity quickly begins to blur.

Yossel Rakover Speaks to God

The early twenty-first century has been defined by a rise in Islamist radicalisation and a concurrent rise in far right extremism. This book explores the interaction between the 'new' far right and Islamist extremists and considers the consequences for the global terror threat. Julia Ebner argues that far right

and Islamist extremist narratives - 'The West is at war with Islam' and 'Muslims are at war with the West' - complement each other perfectly, making the two extremes rhetorical allies and building a spiralling torrent of hatred - 'The Rage'. By looking at extremist movements both online and offline, she shows how far right and Islamist extremists have succeeded in penetrating each other's echo chambers as a result of their mutually useful messages. Based on first-hand interviews, this book introduces readers to the world of reciprocal radicalisation and the hotbeds of extremism that have developed - with potentially disastrous consequences - in the UK, Europe and the US.
