From Conflict To Resolution

In a dramatic theoretical breakthrough, psychologist Susan M. Heitler unites various schools of therapy with a powerful insight. Emotional healing depends on movement from conflict to resolution, as the title suggests.

Narrative Mediation

In this groundbreaking book, John Winslade and Gerald Monk -- leaders in the narrative therapy movement--introduce an innovative conflict resolution paradigm that is a revolutionary departure from the traditional problem-solving, interest-based model of resolving disputes. The narrative mediation approach encourages the conflicting parties to tell their personal "story" of the conflict and reach resolution through a profound understanding of the context of their individual stories. The authors map out the theoretical foundations of this new approach to conflict resolution and show how to apply specific techniques for the practical application of narrative mediation to a wide-variety of conflict situations.

Teaching the Skills of Conflict Resolution

Activities and Strategies for Counselors and Teachers

Relationships and Patterns of Conflict Resolution

Dr. Ladd has written a reference book on couples counseling that explores six contemporary relationships and discusses how couples may change from one to another according to their life experiences. In addition, six common styles of conflict resolution that may make relationship changes less painful and difficult are also addressed. When we realize that one of the most common methods for transforming the union between two people is through divorce, then the possibility of changing a relationship, instead of changing a partner, may become a more attractive alternative.

Ready-to-Use Conflict Resolution Activities for Secondary Students

This practical resource gives counselors, coaches, and youth leaders a program for training secondary students in conflict resolution and peer mediation. Activities use typical adolescent scenarios and role-plays with reproducible handouts to make the skills involved in resolving conflicts relevant and accessible to students of all ability levels.

Mediation

Provides practical, how-to advice for mediating a variety of conflicts, including those arising from divorces, custody and visitation decisions, family conflict, neighborhood grievances, educational disagreements, environmental disputes, and problems in the workplace.

Mediation

This book is about conflict resolution through mediation, from a psychological perspective. Although written in part from the point of view of litigation, the objective is to demonstrate how an appreciation of the psychological aspects of conflict and an understanding of the emotional strategies people adopt in dispute situations can assist both lawyers and non-lawyers in resolving conflicts. The book consists of three sections- a theoretical analysis of conflict and conflict resolution; a practical, legal and experiential explanation of mediation; and thirdly a series of mock mediations, comprehensively analysed from the viewpoint of the mediator and the parties, providing tips and guidance on the dilemmas and pitfalls that mediators encounter. The book is based on three fundamental tenets: that conflict is ever present, and cannot be eliminated but can be worked with; that the attitude and stance of the mediator towards the dispute can be of significance to the outcome; and above all that the use of psychotherapeutic tools can facilitate a paradigm shift in the parties' approach to conflict. The authors demonstrate how the mediator can move parties in dispute from a position of intransigent adversity to a working alliance, and thereby achieve a 'good enough ' resolution.

Beyond Conflict

An explanation of the common principles of conflict resolution on every level discusses self-help, psychotherapy, and family therapy and discloses the impact and origins of guilt and anxiety.

Couples Communication Workbook

"Conflict Resolution for Christian Couples" is written in a comprehensive, easy-to-understand, and logical progression that maps out how to have a healthy relationship - one where conflict can be readily managed. The book has solid answers and strategies for Christian couples having difficulties working out reasonable solutions. This book consists of four parts. Part I is about establishing a spiritually healthy foundation for the relationship: 1) knowing the basics of Biblical knowledge, prayer, fellowship and ministry, and 2) taking into account the spiritual world, and respecting the balance between grace and accountability. Part II details a useful conflict resolution model and itemizes 26 effective tools (the ABC's) for moving smoothly through issues. Part III provides a 3-part solution model for mapping out a plan for change, and discusses healthy routines for maintaining change. Part IV addresses two unique dilemmas for long-term relationships: 1) affair recovery or affair safe-guarding, and 2) considering or going through a marital separation.

From Conflict to Conciliation

Everything you need to initiate a peer mediation program in your school and tips for expanding an existing program can be found in this comprehensive guide.

Conflict Resolution For Christian Couples

Originally published in 1996, this book is about the role of peer-helping in alleviating interpersonal difficulties among young people in school settings. It is based on real-life experience on the part of the two editors and their contributors in training and developing peer-counselling services in local schools, in order to strengthen policies on bullying, equal opportunities and related personal issues. Young people's experience of being actively engaged in helping their peers has a positive effect on self-esteem and heightens a sense of responsibility and citizenship in the young people involved. The book seeks to help teachers, educational psychologists, social workers and others working with young people to appreciate the value of peer counselling and to introduce it into their practice.

Using Peer Mediation in Classrooms and Schools

Students who are learning the practice of counseling and psychotherapy repeatedly find themselves asking, "What do I do when ?" Often, an immediate intervention that will carry the therapy forward is needed. This book provides students in the early phase of their training with a variety of tactics developed by creative therapists to deal with tactical problems with clients. The topics covered include diagnostic techniques, conflict resolution, confrontation, motivation, encouragement, and many others."

Peer Counselling in Schools

This book is a "how to" manual for working with families in separation and divorce using an active, directive therapeutic process called Family Restructuring Therapy. The strategy provided in this book can relieve the damage caused by conflict on children and help parents communicate effectively.

Tactics in Counseling and Psychotherapy

The focus of this book is on mediation, a third party intervention role that can be undertaken by supervisors, managers, human resource professionals, marriage and family therapists, teachers, mediators, peace keepers, and parents. The authors make a strong case for the central role of empathy in promoting a successful mediation, especially when ongoing relationships between the parties are at stake. This book provides a thoughtful study of the important role of empathy in mediation through the development of a theoretical model to explain the effectiveness of Nonviolent Communication™ (NVC) mediation. The theory building process used in this book, as well as the list of conditions for a successful mediation, can be broadly applied to other third party intervention methods. Intended Audience: Mediators; Conflict Resolution and Third Party Interveners (managers, supervisors, human resources representatives) students, teachers, and professionals; Marriage and Family Therapists; and Attorneys. "While one of the aims of this book is providing a welcome beginning theoretical basis for the use of empathy in the mediation process, there is much crossover into counseling, parenting and other arenas that involve conflict in relationship. The humanity and authenticity of the authors comes through

in a way that makes this book accessible and appealing to readers well beyond the academic arena. It provides support and clarity for those seeking to understand and adopt the practice of empathy either personally or professionally.” Carolyn N. Altrock, MCE, LCSW “This book provides a framework for understanding why mediation works when it works and therefore points the way to how mediation can be made to work more reliably. By highlighting the role of empathy—from the mediator and between the parties—in supporting many of the conditions for successful mediation, the authors provide a path for further research with clear implications for practitioners.” Miki Kashtan, Ph.D., writer, facilitator, and certified NVC trainer “I’m grateful for all the care and effort taken in this book to provide a theoretical container that can hold the power of NVC to guide the mediation process. I’m imagining many ripples of benefit for both the NVC community and the mediation community for the stimulation of future research that can define best practices for cultivating connection in the midst of conflict.” Jim Manske, Certified NVC Trainer “This book makes an important contribution to the theoretical development of mediation.” Dr. Cheryl Picard, Professor, Department of Law and Legal Studies, Director of the Centre for Conflict Education and Research and the Graduate Certificate in Conflict Resolution program “As one who teaches peace studies, it is exciting to have the tools Bowers and Moffett offer. We often tell students that conflicting parties have to see things from the others’ perspective. This book starts us digging deeper into the ‘how’—how can mediators use empathy effectively in the course of mediation to get the parties to understand better the feelings and needs of each other? Moving beyond thinking about interests and positions—and how to do so—can help my students envision how real change is possible, be it in conflicts overseas or in their own lives.” Andrea Grove, Ph.D., Professor, Political Science, California State University Channel Islands

Family Restructuring Therapy

Conflict in relationships is inevitable. Like electricity, it can turn on a light, power change, or burn down the house. Over the past 30 years, Keith R Wilson has worked with thousands of people in his psychotherapy practice. They’ve all had problems with conflict. Either they stuff their feelings, or they’re outwardly angry, or they alternate between the two. However, he believes that conflict can signify the beginning of a real bond, not the end, provided that it’s well regulated. With disarming humor and refreshing directness, the author shows how you can manage your conflicts. You’ll be a better person and build better relationships if you do.

Empathy in Conflict Intervention

Conflict Resolution: The Partnership Way presents readers with a proven paradigm for effective conflict resolution in all human systems called the Partnership Way. Within this model, individuals are encouraged to see those with whom they are experiencing conflict as partners and to identify conflict as an opportunity for personal and relational transformation. The Partnership Way features a strong theoretical foundation, presents a systemic approach to conflict resolution, and empowers individuals to lead more authentic lives. The book is divided into four parts. Part One provides an overview of the Partnership Way, its theoretical foundation, and the key components of the model. In Part Two, readers learn how to apply the model to resolve interpersonal conflicts concerning wants, needs, values, and beliefs. Part Three demonstrates how to resolve intractable conflicts that involve unmet needs related to unhealed development traumas. The final part of the text focuses on the application of the Partnership Way to resolving conflicts in schools, professions, communities, cultures, nation-states, and the history of the human race. Highly personal and experiential in nature, Conflict Resolution helps current and future practitioners in education, counseling, social work, psychology, and law to not only develop skillsets to guide clients through effective conflict resolution, but to successfully apply the skills to their own lives and relationships. Barry K. Weinhold, Ph.D. is professor emeritus and the founder and former program chair of the counseling and human services M.A. program at the University of Colorado at Colorado Springs. He is the co-founder and director of both the Colorado Institute for Conflict Resolution and Creative Leadership and The Kind & Safe Schools Initiative, a nationally acclaimed school violence prevention program. Dr. Weinhold is the founder of The Kindness Campaign, a community-based violence prevention program, and the co-founder of The First Visitor program, a home visitation program designed to prevent child abuse and neglect. Dr. Weinhold earned his Ph.D. from the University of Minnesota and been a licensed psychologist since 1976. He taught conflict resolution classes at the university level for over 10 years and is the author or co-author of 65 books.

Constructive Conflict

Practicing Narrative Mediation provides mediation practitioners with practical narrative approaches that can be applied to a wide variety of conflict resolution situations. Written by John Winslade and Gerald Monk—leaders in the narrative therapy movement—the book contains suggestions and illustrative examples for applying the proven narrative technique when working with restorative conferencing and mediation in organizations, schools, health care, divorce cases, employer and employee problems, and civil and international conflicts. Practicing Narrative Mediation also explores the most recent research available on discursive positioning and exposes the influence of the moment-to-moment factors that are playing out in conflict situations. The authors include new concepts derived from narrative family work such as "absent but implicit," "double listening," and "outsider-witness practices."

Conflict Resolution: The Partnership Way

Conflict Coaching: Conflict Management Strategies and Skills for the Individual defines this growing area of conflict resolution and distinguishes conflict coaching as a stand-alone resolution technique. In a service society where human relationships are central to our professional as well as personal lives, individuals value one-on-one attention to obtain custom solutions for handling important interpersonal communication. The CD-ROM accompanying the book provides numerous resources for instructors, coaches, and other interested readers.

Practicing Narrative Mediation

Many Christians see conflict as a dirty word--something wrong to be avoided at all costs. After all, aren't Christians to be peacemakers who strive to maintain unity? But, as Lou Priolo reminds us, many other things that the Bible exhorts us to do--including its commands to convict, rebuke, and admonish other Christians--make conflict a necessary part of the Christian life. Lou takes us through the biblical principles of conflict resolution, beginning before conflict even starts. He shows us the prerequisites we must have as we go into conflict, what is at the heart of our conflict, when it is biblical and unbiblical, and how we should respond to it. He also shares practical steps and advice, giving us specific talking points to resolve conflict and journaling exercises to help us to grow when it happens. Learn how to "make every effort" to maintain unity--even when that effort involves conflict first!

Conflict Coaching

Among the greatest challenges faced by teachers and administrators are how to communicate effectively with students and how to resolve conflicts between them. Face to Face discusses the communication skills and conflict resolution principles necessary for the smooth functioning of schools and the effective teaching of students. The authors present a number of methods for improving teacher-student communication including: the use of reflective listening; open-ended questions; mediation programmes; problem-solving models; and interactive exchange. The book establishes a correlation between good communication skills and positive student outcomes, and offers practical tips that will help improve communication in the school.

Resolving Conflict

While featuring field-based examples in multiple disciplines, including political science, anthropology, communication, psychology, sociology, law and teacher training, this book presents real cases of conflict work. Explained are concepts underlying conflict transformation and strategies that have been adapted for use in professional practice.

Face to Face

This hands-on guide addresses conflict resolution; uses introspective quizzes to expose more of couples' inner lives, and suggests ways to change bad habits which threaten the viability of the relationship.

Conflict Resolution and Peace Education

It is uncommon for lawyers and psychologists and other mental health professionals to agree on most subjects regarding the human condition. Eureka! Recent research by the American Association of Lawyers concluded that the #1 cause of divorce in America is poor communication. Psychologists concur with that conclusion, with the qualification that breakups among married and non-married

partners alike are the result of ineffective emotional communication. As the divorce rate continues to hover around 40 per cent and is significantly higher for second marriages, progress in this critical aspect of relating, has apparently come to an abrupt halt. Moreover, advances in technology are making this state of affairs even more problematic. Couples seek counseling because of the “usual suspects” including finances, infidelity, partner abuse, sexual inactivity or disparate child rearing practices. In most, if not all cases, the inability to negotiate these and other matters is attributable to clashing egos, incompatible communication styles and resistance to change. The return to harmony presents a new approach that entails the replacement of the ubiquitous win-lose mentality with a mutual learning mindset, and a strategy that incorporates effective conflict management skills, less ego involvement and an assortment of tools to counteract the obstacles to mature love.

New Horizons in Therapy

If we lived alone in the world, we might never face conflict. But part of interacting with others involves finding ways to get along. When conflict does arise, it can be a struggle to find common ground. Conflict Resolution Therapy defines some basic skills to respectfully listen to one another's perspectives and work toward mutually beneficial solutions to our problems. If we know how to deal with conflict constructively, we can come out of these discussions stronger, and with a deepened sense of trust.

Return to Harmony

Logotherapy applied to families, relationships, and children by one of the leading practitioners of logotherapy in the world. Topics include meaningful education, search for meaning in youth, self-transcendence in conflict resolution, self-help and crisis intervention, and meaning-centered family counseling, the meaning of children's play .

Conflict Resolution Therapy

Increasing numbers of therapists around the world are discovering the benefits of parts therapy and its variations to help clients get past personal barriers. Variations of parts therapy such as ego state therapy or voice dialogue are already used by many psychotherapists and psychologists who also use hypnosis in their practices. This book will provide therapists with the added knowledge of parts therapy.
