Family Therapy

FAMILY THERAPY provides a balanced presentation of the major theoretical underpinnings and clinical practices in the field. By presenting an overview of traditional and evolving viewpoints, perspectives, values, intervention techniques, and goals of family therapy, Herbert and Irene Goldenberg provide current, relevant, practice-oriented content laying the foundation for students to become proficient family therapists. This edition reflects the Goldenbergs' commitment to providing students with not only traditional family therapy theoretical frameworks, but also the field's evolving models of practice. It is the complete resource for assisting students in mastering the many facets of family therapy. For this new edition, Michael White, founder of Narrative Therapy, has written a new foreword for the text.

An Introduction to Family Therapy: Systemic Theory and Practice

The fourth edition of the bestselling *An Introduction to Family Therapy* provides an overview of the core concepts informing family therapy and systemic practice, covering the development of this innovative field from the 1950s to the present day. The book considers both British and International perspectives and includes the latest developments in current practice, regulation and innovation, looking at these developments within a wider political, cultural and geographical context. The fully revised fourth edition also contains new material on: EXPANDED Chapter 4 'Ideas that keep knocking on the door'-updated with applications of attachment & narrative therapy, linking these ideas to issues of developing the therapeutic alliance with families EXPANDED Chapter 5 'Systemic Formulation'- updated with a view of formulation as a core skill in many therapeutic models, and an alternative to diagnosis EXPANDED Chapter 6 '21st Century Practice Development'- updated to include cutting edge innovations in the field, such as integrative practice EXPANDED Chapter 7 'Couple Therapy'- updated to include the more recent process and outcome research in the models, making link with current systemic practice and using more illustrative examples and highlighting how Relate has changed EXPANDED Chapter 8 'Research and Evaluation'- updated with a greater range of research methods and contemporary emphasis on evidence based practice Greater focus on key family therapy skills throughout the book in the updated 'Formats of Exploration' feature in each chapter Expanded lists of key texts and diagrams, suggested reading organized by topic, and new practical examples and exercises are also used in order to encourage the reader to explore and experiment with the ideas in their own practice. This book is key reading for students and practitioners of family therapy and systemic practice as well as those from the fields of counselling, psychology, social work and the helping professions who deal with family issues.

Family Therapy

Models of Family Therapy provides an overview of established family therapy models. All classification schemes of family therapy models must reduce ideological complexity, ignore overlap, and generalize for the purposes of category inclusion and exclusion. Nonetheless, orientation differences do exist and the authors make these differences clear by placing ideas and methods into categories. To facilitate learning how the dimensions of each model fit with other models, this book enhances comparability by using the same general outline in all chapters. In these outlines, the critical components of each model are broken down into a few core assumptions, terms, techniques, and methods. These critical components are summarized consistent with their description in the original publications. Some of these models include structural, strategic, behavioral, psychoeducational, and experiential therapy. Because of the style of presentation, this book can be useful as a primary text or supplement in a marriage and family therapy course. In addition, graduate students and professionals can benefit from this guidebook in order to prepare for any state or national examination on marriage and family therapy.

Models Of Family Therapy

In the past decade, family therapy has evolved from a loosely defined aggregate of approaches to a mature field with codified schools of theoretical systems and concepts. *Textbook of Family and Couples Therapy: Clinical Applications* is the first book to draw together theories and techniques from these various schools and combine them with specific clinical approaches in a single comprehensive resource. Under the editorial direction of acclaimed expert G. Pirooz Sholevar, *Textbook of Family and Couples Therapy* presents the current body of theoretical knowledge in the field along with the latest practical applications for working with couples and families. The book is divided into seven major sections: Family Therapy: Theory and Techniques; Family Assessment; Family Therapy With Children and Adolescents; Marital Therapy; Family Therapy With Different Disorders; and Research in Family and Marital Therapy. Most sections begin with overview chapters to lay the groundwork for clinical

applications. With contributions from today's leading practitioners, Textbook of Family and Couples Therapy includes unique features such as: Family therapy approaches to specific mental disorders, including depression, psychiatric hospitalization, alcohol and substance abuse, incest, and personality disorders Specific guidance for working with couples, with detailed approaches to problems such as sexual dysfunction, divorce, remarriage, and stepfamilies -- invaluable for practicing in today's society The unique considerations of treating children in a family therapy context with practical applications such as whole-family intervention and a method for parent management training An overview of the evolution and theoretical underpinnings of family therapy which helps readers develop a solid foundation of understanding to support their clinical knowledge The latest information on issues related to gender, culture, and ethnicity and how they affect family therapy important for enhancing awareness and understanding The state of family therapy research today and future research directions with perspectives from leading academics to point the way Blending theoretical training and up-to-date clinical strategies, Textbook of Family and Couples Therapy is a landmark event in the field. It is a must for clinicians who are currently treating couples and families -- and a major resource for training future clinicians in these highly effective therapeutic techniques.

Textbook of Family and Couples Therapy

Family Therapy: An Introduction to Process, Practice and Theory is a primer for students, professionals, and trainees to understand how family therapists conceptualize the problems people bring to therapy, utilize basic therapeutic skills to engage clients in the therapeutic process, and navigate the predominant models of family therapy. This text walks readers through each of these main areas via a straightforward writing style where they are provided with exercises and questions to help them develop the basic concepts and tools of being a family therapist. Upon finishing this book, students will have the foundational skills and knowledge needed to work relationally and systemically with clients.

Family Therapy

A common question at the initial meeting of a family therapist and a new client(s) is often whether or not to include a child or children in the counseling sessions. The inclusion of a child in the family therapy process often changes the dynamic between client and therapist -- and between the clients themselves -- within the context of the counseling sessions. And yet, although this is such a common experience, many counselors and family therapists are not adequately equipped to advise parents on whether to include a child in therapy sessions. Once the child does make an appearance in the counseling session, the therapist is faced with the challenges inherent in caring for a child, in addition to many concerns due to the unique circumstance of the structured therapy. Counseling a child in the context of a family therapy session is a specific skill that has not received the attention that it deserves. This book is intended as a guide for both novice and experienced counselors and family therapists, covering a wide range of topics and offering a large body of information on how to effectively counsel children and their families. It includes recent research on a number of topics including working with children in a family context, the exclusion of children from counseling, and counselor training methods and approaches, the effectiveness of filial play therapy, the effects of divorce on children, and ADHD. Theoretical discussion is given to different family therapy approaches including family play therapy and filial play therapy. Central to the text are interviews with leaders in the field, including Salvador Minuchin, Eliana Gil, Rise VanFleet and Lee Shilts. A chapter devoted to ethical and legal issues in working with children in family counseling provides a much-needed overview of this often overlooked topic. Chapters include discussion of specific skills relevant to child counseling in the family context, case vignettes and examples, practical tips for the counselor, and handouts for parents.

Family Therapy

The challenge facing the authors of texts that address the multiplicity and complexity of problems that may afflict families can be intimidating. Philip Barker has addressed this challenge head-on in each of the editions of this book. This task has been greatly facilitated by the contributions of the new co-author, Jeff Chang, and in this edition provides a clear, easily read and readily understandable introduction to family therapy. Much has happened in the field of family therapy since the fifth edition of Basic Family Therapy was published in 2007. New developments covered in this book include: Emotionally Focused Therapy The Gottman approach to couples therapy Mindfulness and psychotherapy The common factors approach to psychotherapy and to family therapy The increased emphasis on empirically

supported treatments High-conflict post-divorce parenting Basic Family Therapy will be of value to readers new to family therapy and to those in the early stages of training.

Engaging Children in Family Therapy

This special edition of the classic text includes a new introduction from Professor Arlene Vetere exploring its continuing influence on contemporary practice. One of family therapy's foundational texts, *Families and Family Therapy* is as relevant today as it has ever been. Examining the therapist's role, Dr. Minuchin presents the views and strategies of a master clinician in a clear and practical form. Transcripts of actual family sessions—both with families meeting their problems fairly successfully and those seeking help—are accompanied by a running interpretation of what is taking place. The book constructs a model of an effectively functioning family and defining the boundaries around its different subsystems, whether parental, spouse, or sibling. It then explores the ways in which families adapt to stress from within and without, as they seek to survive and grow. Combining vivid clinical examples, specific details of technique, and mature perspectives on both effectively functioning families and those seeking therapy, this is an important text for all those interesting in the theory and practice of family therapy. This book can be used on courses such as Family Therapy, Family Interventions, Systemic Practice, and Systemic Counselling within departments of Psychology, Mental Health, and Counselling; and by undergraduate students on Social Work qualifying courses.

Basic Family Therapy

Now in its second edition, this text introduces readers to the rich history and practice of Marriage and Family Therapy, with 32 professionals from across the US presenting their knowledge in their areas of expertise. This blend of approaches and styles gives this text a unique voice and makes it a comprehensive resource for graduate students taking their first course in Marriage and Family Therapy. The book is divided into three sections: Part 1 focuses on the components on which 21st century family therapy is based and summarizes the most recent changes made to not only therapeutic interventions, but to the very concept of “family.” Part 2 presents an overview of the 7 major theoretical models of the field: structural, strategic, Milan, social constructionist, experiential, transgenerational, and cognitive-behavioral family therapy. Each chapter in this section • Focuses on the founder of the theory, its theoretical tenants, and its key techniques • Shows how the model focuses on diversity • Presents the research that supports the approach Part 3 addresses specific treatment areas that are common to marriage and family therapists, such as sex therapy, pre-marital therapy, research, and ethics and legal issues. As an introduction to the field of Marriage and Family Therapy, this volume stands above the rest. Not only will readers gain an understanding of the rich history of the field and its techniques, but they will also see a complete picture of the context in which families are embedded, such as gender, culture, spirituality, and sexual orientation. This knowledge is the key to understanding what differentiates Marriage and Family Therapy from individual psychotherapy. Glossaries, case studies, tables, figures, and appendices appear generously throughout the text to present this information and give students a thorough overview to prepare them for their professional lives.

Families and Family Therapy

This text offers a straightforward, comprehensive overview of both traditional and evolving theoretical models of family therapy and intervention techniques as well as a discussion of clinical issues unique to family therapy practice. Aiming to prepare students to develop beginning proficiency in family therapy, the authors outline major family therapy models in detail, including a step by step description of concepts, theories, skills, and techniques as well as a history of each model and its conceptual and theoretical underpinnings. The text also provides extensive case illustrations of family interviews that identify the specific stages, clinical issues, concepts, theories and techniques associated with each model. This core text is designed for graduate level courses such as Family Therapy, Marriage and Family Therapy, Marriage and Family Counseling, Family Systems Theory, and Family Counseling in departments of social work, psychology, nursing, education, or human services.

An Introduction to Marriage and Family Therapy

Annotation The third edition of *An Introduction to Family Therapy* provides an overview of the core concepts informing family therapy and systemic practice, covering the development of this innovative field from the 1950s to the present day. The book considers both British and International perspec-

tives and includes the latest developments in current practice, regulation and innovation, looking at these developments within a wider political, cultural and geographical context. The third edition also contains: A new chapter on couple therapy A new chapter on practice development up to 2009 Sections highlighting the importance of multi-disciplinary practice in health and welfare Lists of key texts and diagrams, suggested reading organized by topic, and practical examples and exercises are also used in order to encourage the reader to explore and experiment with the ideas in their own practice. This book is key reading for students and practitioners of family therapy and systemic practice as well as those from the fields of counselling, psychology, social work and the helping professions who deal with family issues.

Family Therapy

The systemic-cybernetic framework in Family Therapy provides a framework for understanding people and families in context. The text is divided into three sections including The Systemic Framework, The Practice of Family Therapy, and The Systemic Practitioner- includes historical information, current developments, and ongoing debates. Book jacket.

An Introduction to Family Therapy

An introduction to the theory and practice of systemic family therapy This invaluable introductory title offers an overview of the core conceptual framework of family therapy, illustrated throughout by lively examples drawn from clinical practice. The book has been carefully designed as a teaching tool and includes a set of resources that can be used by individual readers or as part of teaching workshops. This new edition has been comprehensively updated throughout. Key additions and changes include: More on the evidence base for the effectiveness of family therapy A stronger focus on attachment and psychodynamic perspectives An entirely new chapter on assessment and formulation An entirely new chapter on integrative practice For counselors, family therapists, psychologists, and students.

Family Therapy

Ideas drawn from family and systemic therapy form the basis of many interventions in mental health and childcare. This brief introduction offers an ideal starting-point for non specialists and new students keen to develop their skills. Taking a step-by-step experiential approach, it explores key concepts in vivid practice context.

le-Family Therapy

Aims to endorse a training process that links individual and group counseling theories and practices to those used in marriage and family therapy. This book helps families handle pressing issues such as Alzheimer's disease, HIV, and chronic medical problems. It addresses the concerns of special needs families.

An Introduction to Family Therapy

This enriching workbook helps readers consider the role that their family of origin and their current family dynamics play in the development and maintenance of their current attitudes, values, and behavior patterns. Readers are encouraged to think about systems theory in general and apply it to their own lives. By working through the book's in-depth interpersonal family life experience exercises, they have a powerful subjective experience which can be used as a vehicle for them discovering their own strengths and weaknesses as potential family therapists.

Introduction to Systemic and Family Therapy

The Third Edition of The Essentials of Family Therapy, now in a more affordable paperback format, examines the rich history, classic schools, and latest developments of family therapy while emphasizing a more practical clinical focus. Expanded treatment of ethical issues, more material on diversity issues, a new chapter on research, and a new section on in-home therapy, further arm therapists with practical knowledge.

Counseling Families

Now in its third edition, this highly regarded and well-established textbook includes up-to-date coverage of recent advances in family therapy practice and reviews of latest research, whilst retaining the popular structure and chapter features of previous editions. Presents a unique, integrative approach to the theory and practice of family therapy. Distinctive style addresses family behaviour patterns, family belief systems and narratives, and broader contextual factors in problem formation and resolution. Shows how the model can be applied to address issues of childhood and adolescence (e.g. conduct problems, drug abuse) and of adulthood (e.g. marital distress, anxiety, depression). Student-friendly features: chapters begin with a chapter plan and conclude with a summary of key points; theoretical chapters include a glossary of new terms; case studies and further reading suggestions are included throughout.

Family Exploration

While there are many volumes that survey the field of family therapy, *Family Therapy Sourcebook* provides something different: a roadmap to classic and state-of-the-art work on foundational issues in theory, research, and practice. More than a textbook or a summary of primary sources, this volume is a comprehensive guide to original source materials for the student or teacher of family therapy. Covering the traditional family therapies and more, each chapter presents a selective annotated bibliography, highlights key concepts and clinical techniques, discusses research issues, and proposes creative teaching strategies. Describing helpful assignments and experiential learning exercises for educators, the authors share valuable expertise gained from years of teaching.

The Essentials of Family Therapy

Global Perspectives in Family Therapy: Development, Practice, Trends provides an overview of the development of the family and the issues and concerns they are faced with in different cultural contexts. Contributions from experts in the field expand on the different aspects on the historical beginnings, current developments, training issues, theoretical variations, future trends, and research potential in family therapy throughout 14 countries. It explores the diverse cultural approach to family therapy and suggests various clinical interventions that are helpful to clinicians dealing with families from different countries, including case studies, vignettes and research outcomes of family therapy overseas.

Family Therapy

This book provides an overview of the basic concepts of a systems theoretical perspective using families and family therapy as examples and illustrations of their application in professional practice. This meta-perspective focuses on viewing problems in context. The difference between first-order and second-order cybernetics is explicated. Readers then are invited to see themselves as parts of the systems with which they are working consistent with a second-order cybernetics perspective. Along the way a difference between modernism and post-modernism as well as constructionism and social constructionism also are described. In addition, theories of individual and family development are presented with implications for their use in family therapy. The book concludes with more than 100 examples of how the meta-perspective of systems theory can be used in work with families.

Family Therapy Sourcebook, Second Edition

FAMILY THERAPY, International Edition provides a balanced presentation of the major theoretical underpinnings and clinical practices in the field. By presenting an overview of traditional and evolving viewpoints, perspectives, values, intervention techniques, and goals of family therapy, Herbert and Irene Goldenberg provide current, relevant, practice-oriented content laying the foundation for students to become proficient family therapists. This edition reflects the Goldenbergs' commitment to providing students with not only traditional family therapy theoretical frameworks but also the field's evolving models of practice. It is the complete resource for assisting students in mastering the many facets of family therapy. For this edition, Michael White, founder of Narrative Therapy, has written a new foreword for the book.

Global Perspectives in Family Therapy

A master class in family therapy--now updated with an additional ten years' case experience. Few people have had as profound an impact on the theory and practice of family therapy as Salvador Minuchin. As one commentator put it, "Memories of his classic sessions have become the standard against which therapists judge their own best work." This new edition of the classic, *Mastering Family Therapy*,

offers beginners and experienced practitioners alike the opportunity to learn the art and science of family therapy under this pioneering clinician and teacher. In elegant clinical interplays, Minuchin, his colleagues Wai-Yung Lee and George Simon, and eight advanced students provide answers to such critical questions as: * What does it take to master the art of family therapy? * How do I create an effective personal style? * How can I become an instrument for growth for troubled families? This updated Second Edition features: * An overview and critique of new models of treatment in the field, especially evidence-based models of family treatment * New case material highlighting the impact of societal context on families * Minuchin's conceptualization of a four-step process of family assessment, including how history can impact current family functioning A new and thoroughly revised version of the classic text, *Mastering Family Therapy*, Second Edition is essential reading for all those who practice, study, or teach family therapy.

An Introduction to Family Therapy

First Published in 1993. Routledge is an imprint of Taylor & Francis, an informa company.

Systems Theory and Family Therapy

Over the last three decades, family therapy has revolutionized the mental health field, changing the way human problems are conceived and therapy is conducted. In concert with the dynamic growth of family therapy, the field of family therapy training and supervision has also expanded enormously yielding many new ideas and skills. Yet, until now, few books have been devoted to it, and no single volume has attempted to relate the full breadth of this growing field in terms of its conceptual and theoretical expansion as well as its practical application. *HANDBOOK OF FAMILY THERAPY TRAINING AND SUPERVISION* fills this need by presenting a truly comprehensive view of this dynamic area. To accomplish this broad yet in-depth scope, editors Liddle, Breunlin, and Schwartz have assembled 30 highly acclaimed authorities to author chapters in their respective areas of expertise. For further clarification, the editors have included segues that introduce and analyze each of the book's four major sections providing the reader with an overview of the section, highlights of themes that run through it, and discussion of the issues raised in a way that ties the chapters together. The book opens with a presentation of the unique and innovative approaches to training and supervision that have evolved in each separate school of family therapy. Offering a panoramic view of the entire field of family therapy, these seven chapters allow for fascinating comparisons among the different schools regarding the process by which ideas about therapy evolve into training techniques and philosophies. Section II follows with an explication of the pragmatics of family therapy supervision. Helping family therapy trainers avoid and anticipate the common mistakes involved with supervision, the skills described in this section create an atmosphere conducive to learning and maintaining a working trainer-trainee relationship, and finally, for training of supervisors. Practical guidelines for using live and video supervision are included. Section III features family therapy trainers in such diverse fields as psychiatry, psychology, family medicine, social work, nursing, free-standing and academic family therapy programs, who describe the problems and advantages they encounter teaching these new ideas within their idiosyncratic contexts. The book closes with a section that includes reflections on the field by such innovative and respected leaders as Cloe Madanes and Jay Haley. Among topics covered are perspectives and recommendations for researchers evaluating family therapy, practical advice for incorporating a cultural perspective into training programs, feedback on the experience of live supervision from trainees' perspectives. An appendix follows that provides over 400 references organized by subject for easy reference. Given the level and scope of this extraordinary text, *FAMILY THERAPY TRAINING AND SUPERVISION* is an invaluable resource for anyone interested in teaching, learning, or simply appreciating family therapy.

Family Therapy

This unique book presents actual case transcripts based on 12 different theories of family therapy. Each author describes his or her theoretical orientation and then presents transcripts, interspersed with commentary on how the model of therapy is expressed in the sessions. This blend of theory and practice is ideal for students who understand basic principles of family therapy, yet need an illustration of how to put these concepts into practice. No other text includes the gamut of family therapy models, with specific transcripts of why, when, how, and what therapists say to their clients.

Mastering Family Therapy

A master of family therapy, Salvador Minuchin, traces for the first time the minute operations of day-to-day practice. Dr. Minuchin has achieved renown for his theoretical breakthroughs and his success at treatment. Now he explains in close detail those precise and difficult maneuvers that constitute his art. The book thus codifies the method of one of the country's most successful practitioners.

Family Therapy

The fourth edition of *Counseling Families* has undergone a substantial revision. As in the prior editions the text is concrete, pragmatic, and relevant to aspiring family therapists. The foundation to the family therapy section is a training process that links individual and group counseling theories and practices to those used in marriage and family therapy. Readers will build their core counseling skills to begin implementing specific family systems intervention models. This edition continues to help students link some of these family systems therapies with psychodynamic, cognitive-behavioral, and humanistic theories. New to the fourth edition is a focus on the recent developments in the profession. Discussion on the evolving definitions of marriage and the family and the controversies that have emerged from these definitions enhance the family therapy section. Additionally, there are two new chapters in this edition. One chapter advances important skills to prepare competent family therapists. The other new chapter focuses on counseling military families and the demand for marital and family therapy services for returning veterans and their families. SPECIAL FEATURES Website with summaries, lists of key terms, quizzes, and related web links Includes a list of institutions that have programs designed to prepare family therapists Includes evolving definitions of marriage Addresses concerns for of special needs families and military families

Handbook of Family Therapy Training and Supervision

A complete and accessible resource for working with couples and families *Becoming a Family Counselor* sets a new standard for family therapy texts. Working from a broad historical orientation, it focuses on the common themes that reappear across various theoretical approaches and connects family practice with individual approaches. Crossing boundaries of generation, gender, race, and culture, this useful introduction presents current thinking related to today's practice issues. The text begins with an overview of couple and family counseling, emphasizing the diversity and unity in the field. The development of the field is examined, from its roots in the nineteenth century through its identity crisis in the 1980s. Subsequent chapters lay out an integrated approach to contemporary family research, theory, and therapy; core chapters focus on understanding the contributions of behavioral, organizational, narrative, emotional, and spiritual perspectives. The last section of the book offers practical chapters on conducting family therapy in organizational contexts that often define the client in individual terms. Readers are encouraged to balance a change orientation with a respect for continuity and tradition. Complete with illuminating case studies, self-evaluation exercises, suggestions for independent study, and current ethics codes, *Becoming a Family Counselor* is a dynamic resource suitable for both students and practicing mental health professionals.

Family Therapy

Hoffman provides a brilliant synthesis of family therapy. Starting with Gregory Bateson's seminal ideas on social fields, the book examines the key concepts of general systems theory. The author then explores the major schools of family therapy and such figures as Minuchin, Bowen, Whitaker, Haley, Erickson, and Ackerman, as well as the revolutionary work of Selvini Palazzoli.

Casebook in Family Therapy

For courses in Marriage and Family Counseling, Marital Therapy, and Family Therapy. Inviting, well-illustrated, and developmental in approach—a comprehensive look at the theory and practice of working with families. Considered the most thorough, well-written text in the field, Samuel T. Gladding's, *Family Therapy: History, Theory, and Practice*, give readers clear coverage of all aspects of working with couples and families from proven, evidence-based theories. In a user-friendly organization and writing style, it covers important background information on healthy and functional families and different types of families, and includes an overview of how individual and family life cycles intertwine. The basic processes involved in treating couples and families are made clear, before delving into a dozen theoretical ways of treating families. Thoroughly updated, the Sixth Edition of *Family Therapy*, includes an abundance of examples and case studies, new illustrations, more than 175 new references, helpful learning objectives at the beginning of each chapter, a new chart comparing the different therapies,

and more.*User-friendly and well illustrated, this book is developmental in its approach to working therapeutically with families. *The practitioner-oriented focus shows how to work with different types of families. *Illustrations, diagrams, summaries, examples, case studies, and a glossary help readers understand and retain the main points in the text. *NEW Realigned chapters put new emphasis on some of the materials in former chapters.

FAMILY THERAPY TECHNIQUES

This book provides a simple, practical introduction to the conceptual framework and techniques of the structural and strategic family therapy approaches. The clear explanations of concepts, straightforward descriptions of techniques, and examples of applications make this an ideal text for training beginning family counselors and therapists. The author draws from his 30 plus years of experience counseling families and couples, providing real examples from his work with families. Family Therapy for Beginners can serve as a good stand alone text or a companion book for a broader overview text.

Counseling Families

Despite the advances that have occurred since the first edition of this book appeared in 1981, the aims of Basic Family Therapy remain the same. These are to provide a clear, easily read and readily understandable introduction to family therapy, and to guide the reader to sources of further information by providing a comprehensive list of references. No prior knowledge of family therapy has been assumed and it is hoped that the book will be useful not only to those who are new to family therapy but also to those in the early phases of their training.
