Insight is the superpower that drives innovation and enables us to understand the world from other peoples’ points of view, be they customers or colleagues, advocates or competitors. This new book from data storyteller Sam Knowles explains how to ask smarter questions – questions that, by design, stimulate more useful answers. This is the shortcut to better productivity, fast-tracked innovation, and organisational success – for businesses, universities, charities, and governments. For too long, the simple act of asking questions has been overlooked as almost too trivial to contemplate. Asking Smarter Questions seeks to champion the art of curiosity by setting out a framework to make every question count. The fundamental building blocks of insight are data and information, joined together in new and often unpredictable ways. The way we surface new data and information and make meaningful connections between data points is by asking smarter questions. By taking this approach, you can make your organisation a less confrontational, more collaborative, and more productive environment in which to work – particularly in the more distributed and remote settings that will characterise the 2020s. Managers, directors, and leaders will find the universal principles, expert interviews, and data-driven recommendations a source of inspiration to share with their teams. Asking Smarter Questions is aimed at professionals in businesses and organisations across all sectors, and will help those working in many functions, including market research, intelligence, insight, analytics, strategy, marketing, communications, planning, product development, and innovation.

### If I Were Me

A book that argues that lessons in creativity, innovation, salesmanship, and entrepreneurship can come from surprising places: pirates, bootleggers, counterfeiters, hustlers, and others living and working on the margins of business and society. Who are the greatest innovators in the world? You're probably thinking Steve Jobs, Thomas Edison, Henry Ford. The usual suspects. This book isn't about them. It's about people you've never heard of. It's about people who are just as innovative, entrepreneurial, and visionary as the Jobses, Edisons, and Fords of the world. They're in the crowded streets of Shenzhen, the prisons of Somalia, the flooded coastal towns of Thailand. They are pirates, computer hackers, pranksters, and former gang leaders. Across the globe, diverse innovators operating in the black, grey, and informal economies are developing solutions to a myriad of challenges. Far from being "deviant entrepreneurs" that pose threats to our social and economic stability, these innovators display remarkable ingenuity, pioneering original methods and practices that we can learn from and apply to

move formal markets. This book investigates the stories of underground innovation that make up the Misfit Economy. It examines the teeming genius of the underground. It asks: Who are these unknown visionaries? How do they work? How do they organize themselves? How do they catalyze innovation? And ultimately, how can you take these lessons into your own world?

#### The Misfit Economy

Now available only as an eBook, the dark and sexy prequel to the Imnada Brotherhood series about a clan of shape-shifters and telepaths living secretly as humans for centuries. One very passionate and very scandalous kiss separated university student James Farraday and professor's daughter Katherine Lacey. Now five years later, James, the new Lord Duncallan, receives an unexpected summons from Kate's father begging him to come to Wales. When James arrives, he finds Professor Lacey has

vanished while studying a mysterious ancient obelisk and everyone blames the nightwalkers; sinister creatures said to haunt the surrounding remote Welsh mountains. Do these legends point to the existence of the Imnada; a race of shape-shifters said to have died off a thousand years ago? Or is the professor's disappearance the result of a very human villain? James and Kate are determined to find out the truth, knowing it may be the only way to find her father. Even as they work to unravel the mystery, they find that they're not the only ones interested in the obelisk and the lost race of Imnada. Treasure hunter Gilles d'Espe believes the ancient dolmen is the focal point of the shape-shifters' power and would do anything to lay his hands on the last of four silver disks he needs to unlock the dolmen. A disk that hangs around the neck of James Farraday. While Cade, a local villager, is determined to refute both the claims of nightwalker sightings and the power of the dolmen as superstitious nonsense. James and Kate soon find themselves fighting for their lives. Yet every hour they spend together makes it harder to lay aside the bitterness of the past and a very new and very real temptation...

Also in the car is Paul's French girlfriend, Alexa, and his American poet friend, Jake, whose main aim in life is to sleep with a woman from every country in the world. Preferably in the back of Paul's Mini. But as the little car battles from New York to Miami, leg-room turns out to be the least of Paul's troubles. His work is being sabotaged, his tour plans are in tatters, and his love life becomes a Franco-American war zone. And as Paul knows better than anyone, when you mix love and war - merde happens...

### You Know it Makes Sense

Created around the world and available only on the Web, internet “television” series are independently produced, mostly low budget shows that often feature talented but unknown performers. Typically financed through crowd-funding, they are filmed with borrowed equipment and volunteer casts and crews, and viewers find them through word of mouth or by chance. The third of five volumes on Internet TV series, this book covers 335 alphabetically arranged gay and lesbian programs, 1996–2014, giving

casts, credits, story lines, episode descriptions, websites, dates and commentary. A complete index lists program titles and headings for gay, lesbian, bi-sexual, transgender and drag queen shows.
