Siemens NX Basic Assemblies Tutorial - Siemens NX Basic Assemblies Tutorial by Morrison Institute of Technology 109,348 views 3 years ago 39 minutes - NX, Assembly Modeling Basics, learn how to create an assembly using existing parts, how to use assembly constraints, reference ...

start an assembly model

cycle the orientation

rotate it basically 90 degrees about the z axis

add another component

align the center axes of those faces

bring in another component

add the bushings

putting the bushings into this pivot piece

align and use the infer center axis

change the navigator to a constraints navigator

make a change to one of the parts

show me all the sketches and construction geometry

add a little construction geometry

get rid of the model reference set

select that reference set in the assembly file

create a quick exploded view

edit the object display of these parts

create a new explosion

orient the x-axis to the center axis of this hole

draw trace lines between the points

add a base view for my drawing

put an arrow on every instance of the components
