Consensus Organizing: A Community Development Workbook

A person doesn't have to be a consensus organizer to think like one. Consensus Organizing: A Community Development Workbook—A Comprehensive Guide to Designing, Implementing, and Evaluating Community Change Initiatives helps students and practitioners begin to think like consensus organizers and incorporate this way of strategic thinking into their lives and their work. Through a wide range of exercises, role-play activities, case scenarios, and discussion questions, this workbook presents the conceptual framework for consensus organizing and provides a practical and experiential approach to understanding and applying consensus organizing to address a range of issues. This workbook is designed to be used by itself or along with Mike Eichler's text Consensus Organizing: Building Communities of Mutual Self Interest (SAGE, 2007). Accompanying Website Instructors and students have access to the many activities and cases on the accompanying website at www.sagepub.com/ohmer-workbookstudy.

Consensus Organizing

The authors put the theory of consensus organising into practice through activities, case studies and the practical application of examples to real life situations.

Consensus Organizing: A Community Development Workbook

A person doesn't have to be a consensus organizer to think like one. Consensus Organizing: A Community Development Workbook—A Comprehensive Guide to Designing, Implementing, and Evaluating Community Change Initiatives helps students and practitioners begin to think like consensus organizers and incorporate this way of strategic thinking into their lives and their work. Through a wide range of exercises, role-play activities, case scenarios, and discussion questions, this workbook presents the

conceptual framework for consensus organizing and provides a practical and experiential approach to understanding and applying consensus organizing to address a range of issues. This workbook is designed to be used by itself or along with Mike Eichler's text *Consensus Organizing: Building Communities of Mutual Self Interest* (SAGE, 2007). Accompanying Website Instructors and students have access to the many activities and cases on the accompanying website at www.sagepub.com/ohmer-workbookstudy.

Community Organization and Development

This book traces the development of community development/organization as it evolved separately in Britain and the United States, and how the social and political situations in each country determined the various shapes and directions it took. In presenting a comprehensive history of the subject, *Community Organization and Development* draws on local and international factors that have helped to shape its application and fortunes across varied settings. Recent economic and social pressures, the changing demographics of developed economies, and the rise of social and cultural diversity all contribute to the need for a comprehensive model that can be deployed to effect the necessary social changes required for sustained change with stability. The history of this intervention technique throws up many examples from which insight can be gained for the present time, and Wales is used as an example of how national policy and local development could be combined for maximum effect. Community development should become reliable and quantifiable, and the comprehensive model developed here demonstrates how and when it should be deployed.

Social Work Skills for Community Practice

Focuses on skill-building to facilitate positive social change With straightforward content enriched by practical and applicable learning experiences, this comprehensive text prepares social work students for careers in community organizing and macro practice. It focuses on building the social work skills required for organizing communities, including cause-based coalitions, geographically/identity-based communities, and health and human service organizations, to achieve culturally relevant, equity- and justice-driven social change. The second edition presents new information that includes self-care for the community practitioner, social work grand challenges, cultural humility, community dialogue, trauma-informed and resiliency-focused community development, environmental justice, and many other topics. Emphasizing community practice through the application of macro, mezzo, and micro social work skills, the book uses frameworks drawn from generalist social work practice as well as core competencies identified by CSWE's EPAS. Its focus on a broad range of community practice models makes it accessible to all social workers. The text also highlights the importance of technology as a tool for social work macro practice with skill-building activities. Vivid case vignettes, applied and experiential learning activities, and team and individual-based assignments reinforce content and emphasize skill-building, along with abundant resources for further learning. New to the Second Edition: Presents a framework for self-care for the community practitioner Highlights the importance of community practitioner readiness, competency, and leadership Introduces a new trauma-informed and resiliency-focused approach for community development Discusses strategic compatibility for interorganizational collaboration Introduces youth-based participatory research and empowerment evaluations Key Features: Focuses on skill-building for community engagement and organizing, facilitating community dialogue, and conducting assessments Covers planning and implementing community change initiatives and evaluating and disseminating knowledge from change activities Provides case vignettes to reinforce content and abundant resources for additional learning Offers a complete ancillary package that includes chapter PowerPoints, Test Bank, and an Instructor's Manual with suggested individual and group activities and more

Social Work Practice with Groups, Communities, and Organizations

A solid, theory-to-practice guide to contemporary mezzo and macro social work Written by a renowned team of scholars, *Social Work Practice with Groups, Communities, and Organizations* focuses on the contemporary theory and practice of social work. Each chapter delves deeply into the key theoretical considerations surrounding a particular practice area, exploring the clinical implications of each. Spanning the full range of both mezzo and macro practice areas, the authors thoroughly look at the assessment of and interventions with group, community, organizational, and institutional settings. The most authoritative book in this field, *Social Work Practice with Groups, Communities, and Organizations* features: A focus on evidence-based approaches to assessment and intervention

for each practice area discussed Comprehensive coverage of the most important new and emerging practice technologies in mezzo and macro social work Current and emerging demographic, social, political, and economic trends affecting mezzo and macro practice An array of pedagogical aids, including Key Terms, Review Questions for Critical Thinking, and Online Resources Content closely aligned with social work accreditation standards (EPAS) Providing a solid review of the entire scope of contemporary mezzo and macro social work practice, *Social Work Practice with Groups, Communities, and Organizations* is both an indispensable educational text for students and a valuable working resource for practitioners who work with groups, communities, and organizations of all sizes.

Macro Practice in Social Work for the 21st Century

Macro Practice in Social Work for the 21st Century, Second Edition offers a modern approach to building effective career skills in macro practice. Author Steve Burghardt inspires students by tracing the careers of macro-practitioners from grass roots organizers to agency executives. By focusing on how practitioners can make meaningful, strategic choices regardless of their formal roles and responsibilities, this Second Edition takes a refreshing new approach on the key issues of how to respond to diversity and oppression, the use of the internet for organization, the limits of "virtual trust," understanding where "micro" and "macro" meet in practice, and co-leadership development.

Progressive Community Organizing

The second edition of *Progressive Community Organizing* offers a concise intellectual history of community organizing and social movements while also providing practical tools geared toward practitioner skill building. Drawing from social-constructionist, feminist and critical traditions, *Progressive Community Organizing* affirms the practice of issue framing and offers two innovative frameworks that will change the way students of organizing think about their work. *Progressive Community Organizing* is ideal for both undergraduate and graduate courses focused on community theory and practice, community organizing, community development, and social change and service learning. The second edition presents new case studies, including those of a welfare rights organization and a youth-led LGBTQ organization. There are also new sections on the capabilities approach, queer theory, the Civil Rights movement, and the practices of self-inquiry and non-violent communication. Discussion of global justice has been expanded significantly and includes an account of a transnational action-research project in post-earthquake Haiti. Each chapter contains discussion questions, written and web resources, and a list of key terms; a full, free-access companion website is also available for the book.

Community Intervention

Community Intervention: Clinical Sociology Perspectives showcases important efforts to improve the quality of life in communities around the world. The book, a project of the clinical sociology division of the International Sociological Association, describes the interdisciplinary field of clinical sociology in relation to community improvement. The first part of the book covers important concepts and tools for community intervention and identifies a variety of approaches to community research with an emphasis on research that centrally involves community members. The chapters in the second part of the volume focus on projects in a broad range of countries, covering topics such as involving residents in urban renewal projects, developing healthy communities, encouraging socioeconomic development, improving the life of immigrants, helping communities deal with climate change, establishing human rights cities, encouraging empowerment and creating an inclusive community. A unique feature of the book is the inclusion of profiles about some of the outstanding work in community intervention over the last 100 years. These profiles are of Nobel Peace Prize winner Jane Addams; community activist Saul Alinsky; human rights and environmental activist Wangari Maathai and participatory action research pioneer Orlando Fals Borda. Written by scholar-practitioners as well as analysts, the book provides essential commentary regarding community intervention efforts.

Macro Practice in Social Work for the 21st Century

This book develops a new paradigm suited to the quickly shifting dynamics of a globalized society, both more reliant on social networking, and yet seeking common connection and community.

Global Youth

Youth violence is not a unique phenomenon, and, in fact, youth have been plagued with challenges throughout the centuries that have placed them at risk of violent tendencies. These challenges include poverty, inadequate healthcare, limited educational opportunities, exploitation, gender inequality, substance abuse, mental health concerns, homelessness, gang involvement, and family dysfunction. Further, these challenges are not unique to youth within the United States; however, these experiences may differ in terms of chronicity, intensity, and impact. In all youth, these challenges create stress and trauma that compromise well-being. This book explores the challenges that youth experience, and provides context to better understand the factors related, and contributing, to those issues. The chapters describing realistic and practical violence prevention and remediation programs, which are both innovative and effective, are particularly unique. Additionally, there are a number of chapters that discuss the latest technological advances in helping young people, as well as evidence-based assessments and evaluations to help those who work with young people understand the needs of at-risk youth.

The Handbook of Community Practice

Encompassing community development, organizing, planning, & social change, as well as globalisation, this book is grounded in participatory & empowerment practice. The 36 chapters assess practice, theory & research methods.

Measures for Community and Neighborhood Research

Measures for Community and Neighborhood Research, by Mary L. Ohmer, Claudia Coulton, Darcy A. Freedman, Joanne L. Soback, and Jaime Booth, is the first book of its kind to compile measures focused on communities and neighborhoods in one accessible resource. Organized into two main sections, the first provides the rationale, structure and purpose, and analysis of methodological issues, along with a conceptual and theoretical framework; the second section contains 10 chapters that synthesize, analyze, and describe measures for community and neighborhood research, with tables that summarize highlighted measures. The book will get readers thinking about which aspects of the neighborhood may be most important to measure in different research designs and also help researchers, practitioners, funders, and others more closely examine the impact of their work in communities and neighborhoods.

Implementation Monitoring and Process Evaluation

Implementation Monitoring and Process Evaluation by Ruth P. Saunders is a practical guide that helps readers understand and use the steps that program planners and evaluators take in implementing and monitoring a new program, policy, or practice in an organizational setting. The book covers the entire process, from planning, to carrying out the plan, and summarizing, reporting, and using the results. A wide range of real-world examples in the book are drawn from health, education, non-profit organizations, and public administration, and an extended case study, Your Turn boxes, and worksheet templates help readers apply concepts to their own projects. Ideal for practitioners, researchers, and students, this book can be used as a primary text for a process evaluation or an implementation monitoring course or as a supplemental text in a broader program evaluation course.

Rules of the Game

Concise, empowering, and inspirational, this introduction to promoting change offers practical knowledge, and features more than 150 guidelines brought to life with down-to-earth, often humorous language. Replete with the wisdom of more than four decades of experience in the field, Mark S. Homan demystifies the community change process by providing nuts-and-bolts rules for success, including eight essential steps for building an organized change effort. Homan's outline for community change is invaluable in any setting, from grassroots organizations to governments or community agencies. Writing in a conversational, informal style, Homan leads readers through the basic things they need to know about themselves, about others, and about the change process itself. As they put these ideas into action, they will identify skills, attitudes, and choices important to their success as a change agent in the community.

Roots to Power

The third edition of the manual for community organizers tells readers how to most effectively implement community action for social change, clearly laying out grassroots organizing principles, methods, and best practices. Written for those who want to improve their own lives or the lives of others, this thoroughly revised how-to manual presents techniques groups can use to organize successfully in pursuit of their dreams. The book combines time-tested, universal principles and methods with cutting-edge material addressing new opportunities and challenges. It covers basic concepts and best practices and offers step-by-step guidelines on things an organizer needs to know, such as how to identify issues, formulate strategies, set goals, recruit participants, and much more. The work focuses on six organizing arenas: turf/geography, faith-based, issue, identity, shared experience, and work-related. It offers new or expanded material addressing community development, use of social media, internal organizational dynamics, electoral organizing, evaluation/assessment, and prevention of burnout for key leaders. There are also nuts-and-bolts articles by experts who address topics such as action research, lobbying, legal tactics, and grassroots fundraising. Numerous case examples, charts, worksheets, and small group exercises enrich the discussion and bring the material to life.

Practical Health Promotion

The third edition of this popular introductory textbook has been revised to provide a totally up-to-date and hands-on guide to the practical aspects of health promotion. Focusing on the range of skills needed to become an effective practitioner, it takes readers step-by-step through the different settings in which health promotion takes place and the various tools they might employ, including chapters on health promotion through the lifespan, one-to-one communication, working with groups, advocacy, social media, workplace settings and planning and management. As well as incorporating the most recent government policies and initiatives in public health, there is new and expanded material on issues such as community initiatives and alliances, social media, health literacy, understanding health behaviours, stress in the workplace and much more. Throughout the text there are activities to develop students' understanding and encourage reflective practice. Each chapter opens with a list of the central issues and learning objectives which are reinforced with real-life case studies. The key terms highlighted are clearly explained and checklists dispersed throughout the book, enabling practical application. The new edition of Practical Health Promotion will continue to be the ideal and indispensable guide for students at all levels. It will inspire anyone involved with health care to find practical ways of promoting change.

Social Work Methods and Skills

This brilliantly systematic and comprehensive textbook provides an integrated approach to social work theory, methods and skills as the bedrock of all social work practice. Recognizing social work as a diverse activity that is rooted in common foundations, it explains how practice both shapes and is shaped by professional purpose. The text also explores the diverse range of social work practice methods available and aims to equip the reader with a foundation in the history and application of these varied approaches. Offering a step-by-step discussion that will empower readers to critically develop and refine their professional toolkit for purposeful and innovative intervention, this original rationale is an essential resource for any social work student or practitioner looking to build, or consolidate, their understanding of the range of methods and skills available for effective professional practice.

Social Work in Health Emergencies

This is the first comprehensive book that provides accessible, international knowledge for practitioners, students and academics about social work in health emergencies and spans fields of practice across world regions with particular reference to the COVID-19 pandemic. Divided into three sections: • Regional, Historical and Social Work Perspectives takes a journey through world regions during the first six months of the pandemic as it unfolded, explores the lessons found in the history of pandemics and situates public health social work practice in the values of the profession. Situating the diversity of challenges and opportunities in context, in turn, influences current and future social work practice. • Social Work Practice, Issues and Responses explores social work practice innovations and responses across eleven key practice fields. International authors feature social work responses during the COVID-19 health emergency from different regions of the world. • Preparing for the Future analyses broader concepts, innovations and the implications for future practices as social work enters a new era of service delivery. The 20 chapters explore the convergence of pandemic, politics and planet which is critiqued within a framework of the profession's ethics and values of human dignity, human rights and social justice. Social work's place in public health is firmly situated and built on the premise

that the value social work brings to the table deserves recognition and should be documented to inform the development of the profession and future practice and how social work must carry lessons forward to prepare for the next pandemic. The book is relevant to a wide range of audiences, including practitioners, educators and students in social work, human services, international development and public health, as well as policy makers and researchers.

The British National Bibliography

This workbook applies the CDC Framework for Program Evaluation in Public Health. The purpose of this workbook is to help public health program managers, administrators, and evaluators develop a joint understanding of what constitutes an evaluation plan, why it is important, and how to develop an effective evaluation plan in the context of the planning process. This workbook is intended to assist in developing an evaluation plan but is not intended to serve as a complete resource on how to implement program evaluation.

Resources in Education

As a palliative medicine physician, you struggle every day to make your patients as comfortable as possible in the face of physically and psychologically devastating circumstances. This new reference equips you with all of today's best international approaches for meeting these complex and multifaceted challenges. In print and online, it brings you the world's most comprehensive, state-of-the-art coverage of your field. You'll find the answers to the most difficult questions you face every day...so you can provide every patient with the relief they need. Equips you to provide today's most effective palliation for terminal malignant diseases • end-stage renal, cardiovascular, respiratory, and liver disorders • progressive neurological conditions • and HIV/AIDS. Covers your complete range of clinical challenges with in-depth discussions of patient evaluation and outcome assessment • ethical issues • communication • cultural and psychosocial issues • research in palliative medicine • principles of drug use • symptom control • nutrition • disease-modifying palliation • rehabilitation • and special interventions. Helps you implement unparalleled expertise and global best practices with advice from a matchless international author team. Provides in-depth guidance on meeting the specific needs of pediatric and geriatric patients. Assists you in skillfully navigating professional issues in palliative medicine such as education and training • administration • and the role of allied health professionals. Includes just enough pathophysiology so you can understand the "whys" of effective decision making, as well as the "how tos." Offers a user-friendly, full-color layout for ease of reference, including color-coded topic areas, mini chapter outlines, decision trees, and treatment algorithms. Comes with access to the complete contents of the book online, for convenient, rapid consultation from any computer.

Developing an Effective Evaluation Plan

Ensure you have a solid understanding of community and public health nursing with this industry standard text! Public Health Nursing: Population-Centered Health Care in the Community, 10th Edition provides up-to-date information on issues such as infectious diseases, natural and man-made disasters, and healthcare policies affecting individuals, families, and communities. This new edition has been thoroughly updated to reflect current data, issues, trends and practices presented in an easy-to-understand, accessible format. Additionally, real-life scenarios show examples of health promotion and public health interventions. Ideal for BSN and Advanced Practice Nursing programs, this comprehensive, bestselling text will provide you with a greater understanding of public health nursing! Focus on Quality and Safety Education for Nurses boxes give examples of how quality and safety goals, knowledge, competencies and skills, and attitudes can be applied to nursing practice in the community. Healthy People boxes highlight goals and objectives for promoting the nation's health and wellness over the next decade. Linking Content to Practice boxes provide examples of the nurse's role in caring for individuals, families, and populations in community health settings. Evidence-Based Practice boxes illustrate the use and application of the latest research findings in public/community health nursing. UNIQUE! Separate chapters on healthy cities, the Intervention Wheel, and nursing centers describe different approaches to community health initiatives. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels. End-of-chapter Practice Application scenarios, Key Points, and Clinical Decision-Making activities promote application and in-depth understanding of chapter content. UPDATED Content and figures reflect current data, issues, trends, and practices. How To boxes provide you with practical application practice. NEW! Check

Your Practice boxes added throughout feature scenarios and discussion questions to promote active learning.

Public Health Nursing E-Book

This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

New Approaches to Evaluating Community Initiatives: Theory, measurement, and analysis

Whether you work in the corporate world, a nonprofit organization, or the government sector, you likely face the need to work with others to solve problems and make decisions on a daily basis. And you've undoubtedly been frustrated by how laborious and conflict-ridden such group efforts can be. At all levels--from neighborhood block associations to boards of directors of multinational corporations--the consensus building process is highly effective in an increasingly fragmented, contentious society. In addition, the old top-down methods such as Robert's Rules of Orders often prompt more problems than they solve. Consensus helps you to implement better, more creative solutions. It provides a winning alternative to top-down decision making--and even parliamentary procedure. By learning to build consensus, stakeholders come to understand and respect one another's perspectives. The consensus building process allows participants to find solutions and forge agreements that meet everyone's needs--and provides a meaningful basis for effective, long-range implementation of decisions. The Consensus Building Handbook provides a blueprint to help make the process work in your organization, including a practical, quick-reference Short Guide. Plus, you'll find in-depth commentary and seventeen case studies with in-depth commentaries to provide the theoretical basis for this approach. --From publisher's description.

The Green Book

How do communities protect and improve the health of their populations? Health care is part of the answer but so are environmental protections, social and educational services, adequate nutrition, and a host of other activities. With concern over funding constraints, making sure such activities are efficient and effective is becoming a high priority. Improving Health in the Community explains how population-based performance monitoring programs can help communities point their efforts in the right direction. Within a broad definition of community health, the committee addresses factors surrounding the implementation of performance monitoring and explores the "why" and "how to" of establishing mechanisms to monitor the performance of those who can influence community health. The book offers a policy framework, applies a multidimensional model of the determinants of health, and provides sets of prototype performance indicators for specific health issues. Improving Health in the Community presents an attainable vision of a process that can achieve community-wide health benefits.

Programs and Services for Federal Court Personnel Available from the Court Education Division

The first new form of community organizing since Saul Alinsky, this book connects the poor to the rest of society. Written in a logical, teachable, and pragmatic style, Consensus Organizing: Building Communities of Mutual Self Interest is a model of social change for the 21st century. Through real examples, author Mike Eichler illustrates how anyone can practice consensus organizing and help the poor, forgotten, and disempowered.

The Consensus Building Handbook

Research Methods for Community Change: A Project-Based Approach, Second Edition is an in-depth review of all of the research methods that communities can use to solve problems, develop their resources, protect their identities, and build power. With an engaging writing style and numerous real world examples, Randy Stoecker shows how to use a project-based research model in the community to: diagnose a community condition; prescribe an intervention for the condition; implement

the prescription; and evaluate its impact. At every stage of this model there are research tasks, from needs and assets assessments to process and outcome studies. Readers also learn the importance of involving community members at every stage of the project and in every aspect of the research, making the research part of the community-building process.

Improving Health in the Community

This 'Handbook on Planning, Monitoring and Evaluating for Development Results' is an updated edition of the 2002 edition of 'Handbook on Monitoring and Evaluation for Results'. It seeks to address new directions in planning, monitoring and evaluation in the context of the United Nations Development Programme (UNDP) corporate strategic plan, the requirements of the UNDP evaluation policy approved by the Executive Board in 2006 and the United Nations Evaluation Group (UNEG) 'Standards for Evaluation in the UN System'. The updated Handbook also incorporates information recommended by key users of the Handbook during various workshops held by UNDP units.

Consensus Organizing

Artificial Intelligence (AI) has the potential to address some of the biggest challenges in education today, innovate teaching and learning practices, and ultimately accelerate the progress towards SDG 4. However, these rapid technological developments inevitably bring multiple risks and challenges, which have so far outpaced policy debates and regulatory frameworks. This publication offers guidance for policy-makers on how best to leverage the opportunities and address the risks, presented by the growing connection between AI and education. It starts with the essentials of AI: definitions, techniques and technologies. It continues with a detailed analysis of the emerging trends and implications of AI for teaching and learning, including how we can ensure the ethical, inclusive and equitable use of AI in education, how education can prepare humans to live and work with AI, and how AI can be applied to enhance education. It finally introduces the challenges of harnessing AI to achieve SDG 4 and offers concrete actionable recommendations for policy-makers to plan policies and programmes for local contexts. [Publisher summary, ed]

Research Methods for Community Change: A Project-Based Approach

Regarded as one of the most influential management books of all time, this fourth edition of Leadership and Organizational Culture transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

Getting climate ready

On this video, we picked 5 of the **most**, ...

Stomach: some people might disagree with this pick, but the stomach plays a very important role in digestion. Yes, some people can live without one, however life is not as easy without the stomach. It helps us breakdown food through enzymes and secreted acid. The stomach contracts to enhance your digestion.

Liver: an organ responsible for many, many functions in the Human body. It is the largest detoxifier and drug metabolizer of your body. It secretes bile, which helps us digest fats. Also involved in making proteins important for blood clotting.

Lungs: They help take oxygen from the air into your body. The lungs allow your body to get rid of carbon dioxide.

Heart: Pumps blood to the entire body. It allows for cells to be supplied with important nutrients and oxygen.

Brain: Receives and interprets information from your body and surroundings. The brain interprets inputs such as odors, light, sounds and pain.

Twelve Body Systems Song - Twelve Body Systems Song by Hopscotch 8,918,584 views 3 years ago 4 minutes, 6 seconds - Song by Matt & Joanna Pace Voices: Skeletal: Matt Pace Muscular: AnneMarie Schenewark Circulatory, Nervous: Joseph Larson ...

Have you ever wondered how our bodies work inside?

Immune, Lymphatic, Renal (or Urinary)

Endocrine and Integumentary!

I'm your Skeleton! My bones support you.

Protect your organs from things that could hurt you!

I'm your Muscles and I help you move!

Circulatory here, with blood vessels and heart.

I'm a system that may seem a little nervous...

We're Digestive and Excretory! Welcome to the intestine loop

We're the Reproductive Systems, and here's what we're doin

Take a breath! Respiratory System's on your side.

Airways bring in oxygen and let go of carbon dioxide!

I'm your Immune System, and I fight off disease!

I protect you better when you wash your hands, so wash your hands...

I'm Lymphatic, I drain and kill toxins, and help with immunity...

I'm the Renal! I clean your blood, and make pee.

Oh, come on... everybody pees!

I'm the Endocrine! My glands send hormones in.

Integumentary means nails, hair and skin, from your head to your toe!

Keeping you going takes cooperation!

Digestive and Excretory, Reproductive, Respiratory

Skeletal, Muscular, Circulatory, Nervous
